SUBJECT : Second and last set of materials for the April 22-24 negotiating session

Enclosed are the remaining materials for the next negotiating session.

Included in this posting are three packages of draft regulatory language, again arranged by program, that, with one exception, are those issues on which no agreement, either tentative or “conceptual,” was reached. The one exception is the issue of “FFEL Promissory Notes” (682.414(a)(5)) on which we agreed to a technical modification regarding the imaging of promissory notes. That language is included here (as FFEL 16).

If I were better at planning, the heading for each issue would have included an indication of whether any agreement had been reached, not unlike the “Quick Fix” indicator. Since I’m not, you’ll see that the program/issue number identifier in the footer on each page includes an asterisk if no agreement had been reached on that issue.

There is new language for an item related to “Perkins Write-offs” (Perkins 12), specifically a conforming change to the student eligibility section with respect to reaffirming written-off debt. It is identified here as Perkins 12.1 (with an asterisk).

As with the regulatory language for the tentative agreements, the draft language for each issue here includes the “contextual” language, with redline/strikeout, as well as amendatory language.

See you on the 22nd.
