

Revised Proposal Submitted by Eric Atchinson

Good afternoon, please see below revised language that does not include specific percentages as was discussed this morning.

Top of page 24

(iii) A written policy for determining if a credential is stackable and portable that establishes documented connections to additional credentials, **including data showing the percentage of students that have obtained additional credentials through the career pathways**, considers real-time labor market information, and includes a process for employer validation; and

This suggestion is aimed at requiring states to look at documented history of students stacking WFP programs so that the pathways are not just theoretical/on paper, but tangible and proven.
