

Population includes all borrowers with an open loan as of the end of the payment pause (10/1/2023).

All categories / balances are at the borrower level - a borrower is only counted in one row so there is no duplication of borrowers across rows.

It is possible for a borrower to have loans in different statuses. For this request, the following hierarchy was assumed (a borrower and all of their loan balances are counted in the first category for which any of their loans apply):

- '1 - Default Now'
- '2 - SAVE Forbearance'
- '3 - Delinquent 270+'
- '4 - Delinquent 90-269'
- '5 - Delinquent 30-89'
- '6 - Other, Federally Managed'
- '7 - Other, Commercial FFEL/FI'
- '8 - Other, School Held Perkins'
- '9 - Other Open'
- '99 - Only Closed Loans'

"IDR History" is defined as the borrower currently or at any point in their history having had a loan enrolled in an IDR repayment plan.

"PELL History" is defined as the borrower having ever received a PELL grant.

"DMCS History Prior to Pause" is defined as the borrower having at least one loan serviced by the default loan servicer DMCS at any point on or before the return to repayment (10/1/2023).

Consolidation loan types were not considered for the determination of a borrower's earliest and latest loan award years. All other non-cancelled loans were considered, including closed loans.

Borrower counts less than 30 are redacted to the value "<30" in results due to privacy protection.
