

University of Washington (UW) in Seattle will build on its successful experience of serving high need and under-represented students to serve a large migrant/seasonal farmworker student population in Washington State. The UW Office of Minority Affairs & Diversity will provide the management and leadership for the proposed CAMP Program. A unique feature of the program and significant opportunities for migrant students will be that the UW's "**Husky Promise**" Scholarships will pay for **100%** tuition for eligible low-income students. Most migrant families/students would qualify for this tuition assistance for 4 years at the UW. UW CAMP will deliver culturally appropriate and relevant academic, personal, career and financial support services to 50 migrant/seasonal farmworker students annually.

A total of 250 students will be served during the five-year project period. UW has designed a comprehensive project based on the specific needs of migrant/seasonal farmworker students. Supportive services such as advising, educational planning, career/personal assessments, student stipends, tutoring, intense summer orientation, and supplemental instruction will be delivered with appropriate intensity and sufficient duration by experienced staff reflective of the CAMP students. Students will obtain the necessary information, support and skills to successfully complete their first year at the university and continue their postsecondary education through graduation. Annually, UW CAMP will meet the following objectives and outcomes which are summarized: **1)** Outreach to 1,500 potential participants and recruit 50 eligible MSFW students in need of CAMP services; **2)** Provide 50 students with academic, career, and personal counseling services to support them in completing their first year (**GPRA 1**); **3)** Provide 50 students with financial assistance and resources; and **4)** Provide follow-up services to enhance students' retention and graduation rates (**GPRA 2**). Annually, UW CAMP will deliver the following outcome: Retain 92 % (46) through 1st year at University of Washington.
