Project Director Phone:

(404) 615 - 5925

The Georgia Strategic Charter School Growth Initiative (Charter Growth Initiative) was established in 2022 with funding from the GEER II fund to support the creation, replication, or expansion of highly-effective charter schools in underserved Georgia communities. The applicants are proposing to expand and continue the Charter Growth Initiative with CSP funds and meet all CSP priority areas with the following goals:

Goal #1 - Support the replication, expansion, or creation of 32 high-quality charter schools that are responsive to community need in Georgia with technical assistance and grants, including a new school leader fellowship and a replication cohort program.

Goal #2 - Educate and engage communities across Georgia about charter schools with community outreach events and a comprehensive charter school website (FindaGaCharter.org).

Goal #3 - Promote consistent, quality charter school authorizing by providing technical assistance to authorizers, engaging in evaluations of practices, and supporting the Georgia Principles and Standards for Charter School Authorizing.

Goal #4 - Disseminate charter school best practices and offer additional support to high-need public schools, including charter schools and local district schools, with an emphasis on supporting TSI, ATSI, and Promise schools.
