

## UNITED STATES DEPARTMENT OF EDUCATION

OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

April 18, 2023

The Honorable Michael F. Rice  
Superintendent of Public Instruction  
Michigan Department of Education  
608 West Allegan Street  
Lansing, MI 48909

Dear Superintendent Rice:

The U.S. Department of Education (Department) received your written plan for a reasonable level of tolerance when calculating whether the Michigan Department of Education (MDE) has met State maintenance of equity requirements under the American Rescue Plan Act of 2021 (ARP Act). This written plan applies only to a subset of Michigan's local educational agencies (LEAs).

The ARP Act State maintenance of equity requirements help ensure that State funding supports LEAs with high concentrations of poverty and the students who have been subject to longstanding opportunity gaps in our education system and experienced the greatest impact from the COVID-19 pandemic. These requirements are vital for ensuring that States maintain funding to address the impact of the pandemic on students' education, and for protecting students in high-need and highest-poverty LEAs from disproportionate cuts if reductions in State effort do occur.

The Department determined that it is consistent with the State maintenance of equity requirements to allow a State educational agency (SEA) to calculate whether it has maintained funding equity with respect to its very small high-need and highest-poverty LEAs within a reasonable "tolerance level." The Department's determination is based on the possibility of significant volatility in the calculated per-pupil funding amounts for very small LEAs caused by small changes in student enrollment, which may be unrelated to whether an SEA has achieved the intent of the requirements. (See *Frequently Asked Questions, American Rescue Plan Elementary and Secondary School Emergency Relief Program, Maintenance of Equity Requirements*, July 26, 2022, Question 21(a).)

MDE considers LEAs with a membership of fewer than 400 students to be very small. Under this proposed threshold, Michigan has 230 very small LEAs that serve 3.1 percent of Michigan's students. MDE asserts that calculated per-pupil funding amounts for these very small LEAs are significantly affected by small changes in attendance rates and students' educational needs. This makes the per-pupil funding amounts in Michigan's very small LEAs an imperfect indicator of whether the SEA has achieved the intent of maintaining equity in funding across LEAs. For its 230 very small LEAs, MDE proposes to implement a tolerance of up to a 5 percent decline in

*The Department of Education's mission is to promote student achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access*

per-pupil funding. Applying this tolerance would impact two very small LEAs in FY 2022 that served 0.02 percent of Michigan's students.

After reviewing MDE's tolerance proposal and accompanying data, the unique circumstances in the State, and our further State-specific analysis, we have determined that this approach includes a reasonable level of tolerance when calculating whether Michigan has maintained equity for very small LEAs.

We appreciate your diligence in developing this proposal. If you have any questions, please contact your program officer at: [Michigan.OESE@ed.gov](mailto:Michigan.OESE@ed.gov).

Sincerely

*Laura Jimenez*
