U.S. Department of Education  
Washington, DC 20202

OMB Number: 1810-0581

## **Paperwork Burden Statement**

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1810-0581. The time required to complete this information collection is estimated to average 336 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate or suggestions for improving this form, please write to: U.S. Department of Education, Washington, D.C. 20202-4537.

## INTRODUCTION

---

The U.S. Department of Education (Department) is offering each State educational agency (SEA) the opportunity to request flexibility on behalf of itself, its local educational agencies (LEAs), and its schools, in order to better focus on improving student learning and increasing the quality of instruction. This voluntary opportunity will provide educators and State and local leaders with flexibility regarding specific requirements of the No Child Left Behind Act of 2001 (NCLB) in exchange for rigorous and comprehensive State-developed plans designed to improve educational outcomes for all students, close achievement gaps, increase equity, and improve the quality of instruction. This flexibility is intended to build on and support the significant State and local reform efforts already underway in critical areas such as transitioning to college- and career-ready standards and assessments; developing systems of differentiated recognition, accountability, and support; and evaluating and supporting teacher and principal effectiveness.

The Department invites interested SEAs to request this flexibility pursuant to the authority in section 9401 of the Elementary and Secondary Education Act of 1965 (ESEA), which allows the Secretary to waive, with certain exceptions, any statutory or regulatory requirement of the ESEA for an SEA that receives funds under a program authorized by the ESEA and requests a waiver. Under this flexibility, the Department would grant waivers through the 2014–2015 school year.

## REVIEW AND EVALUATION OF REQUESTS

The Department will use a review process that will include both external peer reviewers and staff reviewers to evaluate SEA requests for this flexibility. This review process will help ensure that each request for this flexibility approved by the Department is consistent with the principles described in the document titled *ESEA Flexibility*, which are designed to support State efforts to improve student academic achievement and increase the quality of instruction, and is both educationally and technically sound. Reviewers will evaluate whether and how each request for this flexibility will support a comprehensive and coherent set of improvements in the areas of standards and assessments, accountability, and teacher and principal effectiveness that will lead to improved student outcomes. Each SEA will have an opportunity, if necessary, to clarify its plans for peer and staff reviewers and to answer any questions reviewers may have. The peer reviewers will then provide comments to the Department. Taking those comments into consideration, the Secretary will make a decision regarding each SEA's request for this flexibility. If an SEA's request for this flexibility is not granted, reviewers and the Department will provide feedback to the SEA about the components of the SEA's request that need additional development in order for the request to be approved.

## GENERAL INSTRUCTIONS

---

An SEA seeking approval to implement this flexibility must submit a high-quality request that addresses all aspects of the principles and waivers and, in each place where a plan is required, includes a high-quality plan. Consistent with ESEA section 9401(d)(1), the Secretary intends to grant waivers that are included in this flexibility through the end of the 2014–2015 school year for SEAs that request the flexibility in “Window 3” (*i.e.*, the September 2012 submission window for peer review in October 2012). The Department is asking SEAs to submit requests that include plans through the 2014–2015 school year in order to provide a complete picture of the SEA’s reform efforts. The Department will not accept a request that meets only some of the principles of this flexibility.

This *ESEA Flexibility Request for Window 3* is intended for use by SEAs requesting ESEA flexibility in September 2012 for peer review in October 2012. The timelines incorporated into this request reflect the timelines for the waivers, key principles, and action items of ESEA flexibility for an SEA that is requesting flexibility in this third window.

**High-Quality Request:** A high-quality request for this flexibility is one that is comprehensive and coherent in its approach, and that clearly indicates how this flexibility will help an SEA and its LEAs improve student achievement and the quality of instruction for students.

A high-quality request will (1) if an SEA has already met a principle, provide a description of how it has done so, including evidence as required; and (2) if an SEA has not yet met a principle, describe how it will meet the principle on the required timelines, including any progress to date. For example, an SEA that has not adopted minimum guidelines for local teacher and principal evaluation and support systems consistent with Principle 3 by the time it submits its request for the flexibility will need to provide a plan demonstrating that it will do so by the end of the 2012–2013 school year. In each such case, an SEA’s plan must include, at a minimum, the following elements for each principle that the SEA has not yet met:

1. **Key milestones and activities:** Significant milestones to be achieved in order to meet a given principle, and essential activities to be accomplished in order to reach the key milestones. The SEA should also include any essential activities that have already been completed or key milestones that have already been reached so that reviewers can understand the context for and fully evaluate the SEA’s plan to meet a given principle.
2. **Detailed timeline:** A specific schedule setting forth the dates on which key activities will begin and be completed and milestones will be achieved so that the SEA can meet the principle by the required date.
3. **Party or parties responsible:** Identification of the SEA staff (*e.g.*, position, title, or office) and, as appropriate, others who will be responsible for ensuring that each key activity is accomplished.
4. **Evidence:** Where required, documentation to support the plan and demonstrate the SEA’s progress in implementing the plan. This *ESEA Flexibility Request for Window 3* indicates the specific evidence that the SEA must either include in its request or provide at a future reporting date.
5. **Resources:** Resources necessary to complete the key activities, including staff time and additional funding.

6. Significant obstacles: Any major obstacles that may hinder completion of key milestones and activities (e.g., State laws that need to be changed) and a plan to overcome them.

Included on page 19 of this document is an example of a format for a table that an SEA may use to submit a plan that is required for any principle of this flexibility that the SEA has not already met. An SEA that elects to use this format may also supplement the table with text that provides an overview of the plan.

An SEA should keep in mind the required timelines for meeting each principle and develop credible plans that allow for completion of the activities necessary to meet each principle. Although the plan for each principle will reflect that particular principle, as discussed above, an SEA should look across all plans to make sure that it puts forward a comprehensive and coherent request for this flexibility.

Preparing the Request: To prepare a high-quality request, it is extremely important that an SEA refer to all of the provided resources, including the document titled *ESEA Flexibility*, which includes the principles, definitions, and timelines; the document titled *ESEA Flexibility Review Guidance for Window 3*, which includes the criteria that will be used by the peer reviewers to determine if the request meets the principles of this flexibility; and the document titled *ESEA Flexibility Frequently Asked Questions*, which provides additional guidance for SEAs in preparing their requests.

As used in this request form, the following terms have the definitions set forth in the document titled *ESEA Flexibility*: (1) college- and career-ready standards, (2) focus school, (3) high-quality assessment, (4) priority school, (5) reward school, (6) standards that are common to a significant number of States, (7) State network of institutions of higher education, (8) student growth, and (9) turnaround principles.

Each request must include:

- A table of contents and a list of attachments, using the forms on pages 1 and 2.
- The cover sheet (p. 3), waivers requested (p. 4-6), and assurances (p. 7-8).
- A description of how the SEA has met the consultation requirements (p. 9).
- Evidence and plans to meet the principles (p. 10-18). An SEA will enter narrative text in the text boxes provided, complete the required tables, and provide other required evidence. An SEA may supplement the narrative text in a text box with attachments, which will be included in an appendix. Any supplemental attachments that are included in an appendix must be referenced in the related narrative text.

Requests should not include personally identifiable information.

Process for Submitting the Request: An SEA must submit a request to the Department to receive the flexibility. This request form and other pertinent documents are available on the Department's Web site at: <http://www.ed.gov/eSEA/flexibility>.

Electronic Submission: The Department strongly prefers to receive an SEA's request for the flexibility electronically. The SEA should submit it to the following address: [ESEAFlexibility@ed.gov](mailto:ESEAFlexibility@ed.gov).

Paper Submission: In the alternative, an SEA may submit the original and two copies of its request for the flexibility to the following address:

Paul S. Brown, Acting Director  
Student Achievement and School Accountability Programs  
U.S. Department of Education  
400 Maryland Avenue, SW, Room 3W320  
Washington, DC 20202-6132

Due to potential delays in processing mail sent through the U.S. Postal Service, SEAs are encouraged to use alternate carriers for paper submissions.

### **REQUEST SUBMISSION DEADLINE**

The submission due date for Window 3 is September 6, 2012.

### **TECHNICAL ASSISTANCE FOR SEAS**

The Department has conducted a number of webinars to assist SEAs in preparing their requests and to respond to questions. Please visit the Department's Web site at: <http://www.ed.gov/esea/flexibility> for copies of previously conducted webinars and information on upcoming webinars.

### **FOR FURTHER INFORMATION**

If you have any questions, please contact the Department by e-mail at [ESEAflexibility@ed.gov](mailto:ESEAflexibility@ed.gov).

## TABLE OF CONTENTS

Insert page numbers prior to submitting the request, and place the table of contents in front of the SEA's flexibility request.

Overview of SEA's Request for the ESEA Flexibility	13
Principle 1: College- and Career-Ready Expectations for All Students	15
1.A Adopt college- and career-ready standards	15
1.B Transition to college- and career-ready standards	15
1.C Develop and administer annual, statewide, aligned, high-quality assessments that measure student growth	64
Principle 2: State-Developed Differentiated Recognition, Accountability, and Support	65
2.A Develop and implement a State-based system of differentiated recognition, accountability, and support	65
2.B Set ambitious but achievable annual measurable objectives	91
2.C Reward schools	102
2.D Priority schools	105
2.E Focus schools	114
2.F Provide incentives and supports for other Title I schools	125
2.G Build SEA, LEA, and school capacity to improve student learning	126
Principle 3: Supporting Effective Instruction and Leadership	129
3.A Develop and adopt guidelines for local teacher and principal evaluation and support systems	129
3.B Ensure LEAs implement teacher and principal evaluation and support systems	137

**TABLE OF CONTENTS, CONTINUED**

For each attachment included in the *ESEA Flexibility Request for Window 3*, label the attachment with the corresponding number from the list of attachments below and indicate the page number where the attachment is located. If an attachment is not applicable to the SEA's request, indicate "N/A" instead of a page number. Reference relevant attachments in the narrative portions of the request.

<b>LABEL</b>	<b>LIST OF ATTACHMENTS</b>	<b>PAGE</b>
1	Notice to LEAs	147
2	Comments on request received from LEAs (if applicable)	153
3	Notice and information provided to the public regarding the request	172
4	Evidence that the State has formally adopted college- and career-ready content standards consistent with the State's standards adoption process	182
5	Memorandum of understanding or letter from a State network of institutions of higher education (IHEs) certifying that meeting the State's standards corresponds to being college- and career-ready without the need for remedial coursework at the postsecondary level (if applicable)	N/A
6	State's Race to the Top Assessment Memorandum of Understanding (MOU) (if applicable)	200
7	Evidence that the SEA has submitted high-quality assessments and academic achievement standards to the Department for peer review, or a timeline of when the SEA will submit the assessments and academic achievement standards to the Department for peer review (if applicable)	N/A
8	A copy of the average statewide proficiency based on assessments administered in the 2011–2012 school year in reading/language arts and mathematics for the "all students" group and all subgroups (if applicable)	217
9	Table 2: Reward, Priority, and Focus Schools	120/219
10	A copy of the guidelines that the SEA has developed and adopted for local teacher and principal evaluation and support systems (if applicable)	N/A
11	Evidence that the SEA has adopted all of the guidelines for local teacher and principal evaluation and support systems	N/A
12	Appendix 1: Additional Details Regarding Principle 1B	224
13	Appendix 3: Additional Materials Related to Principles 3.A and 3.B	248
14	Appendix 4: Acronym List	426

## COVER SHEET FOR ESEA FLEXIBILITY REQUEST

Legal Name of Requester:

Requester's Mailing Address:  
**1900 Kanawha Boulevard East  
Charleston, WV 25305**

State Contact for the ESEA Flexibility Request

Name: **Robert E. Hull**

Position and Office: **Associate Superintendent**

Contact's Mailing Address:  
**1900 Kanawha Boulevard East  
Charleston, WV 25305**

Telephone: **304-558-8098**

Fax: **304-558-1834**

Email address: **rhull@access.k12.wv.us**

Chief State School Officer (Printed Name):  
**Jorea M. Marple, Ed.D.**

Telephone:  
**304-558-2681**

Signature of the Chief State School Officer:

X 

Date:  
**September 6, 2012**

The State, through its authorized representative, agrees to meet all principles of the ESEA Flexibility.

## WAIVERS

By submitting this flexibility request, the SEA requests flexibility through waivers of the ten ESEA requirements listed below and their associated regulatory, administrative, and reporting requirements by checking each of the boxes below. The provisions below represent the general areas of flexibility requested; a chart appended to the document titled *ESEA Flexibility Frequently Asked Questions* enumerates each specific provision of which the SEA requests a waiver, which the SEA incorporates into its request by reference.

- ☒ 1. The requirements in ESEA section 1111(b)(2)(E)-(H) that prescribe how an SEA must establish annual measurable objectives (AMOs) for determining adequate yearly progress (AYP) to ensure that all students meet or exceed the State's proficient level of academic achievement on the State's assessments in reading/language arts and mathematics no later than the end of the 2013–2014 school year. The SEA requests this waiver to develop new ambitious but achievable AMOs in reading/language arts and mathematics in order to provide meaningful goals that are used to guide support and improvement efforts for the State, LEAs, schools, and student subgroups.
- ☒ 2. The requirements in ESEA section 1116(b) for an LEA to identify for improvement, corrective action, or restructuring, as appropriate, a Title I school that fails, for two consecutive years or more, to make AYP, and for a school so identified and its LEA to take certain improvement actions. The SEA requests this waiver so that an LEA and its Title I schools need not comply with these requirements.
- ☒ 3. The requirements in ESEA section 1116(c) for an SEA to identify for improvement or corrective action, as appropriate, an LEA that, for two consecutive years or more, fails to make AYP, and for an LEA so identified and its SEA to take certain improvement actions. The SEA requests this waiver so that it need not comply with these requirements with respect to its LEAs.
- ☒ 4. The requirements in ESEA sections 6213(b) and 6224(e) that limit participation in, and use of funds under the Small, Rural School Achievement (SRSA) and Rural and Low-Income School (RLIS) programs based on whether an LEA has made AYP and is complying with the requirements in ESEA section 1116. The SEA requests this waiver so that an LEA that receives SRSA or RLIS funds may use those funds for any authorized purpose regardless of whether the LEA makes AYP.
- ☒ 5. The requirement in ESEA section 1114(a)(1) that a school have a poverty percentage of 40 percent or more in order to operate a schoolwide program. The SEA requests this waiver so that an LEA may implement interventions consistent with the turnaround principles or interventions that are based on the needs of the students in the school and designed to enhance the entire educational program in a school in any of its priority and focus schools that meet the definitions of "priority schools" and "focus schools," respectively, set forth in the document titled *ESEA Flexibility*, as appropriate, even if those schools do not have a poverty percentage of 40 percent or more.
- ☒ 6. The requirement in ESEA section 1003(a) for an SEA to distribute funds reserved under that section only to LEAs with schools identified for improvement, corrective action, or restructuring. The SEA requests this waiver so that it may allocate section 1003(a) funds to its LEAs in order to serve any of the State's priority and focus schools that meet the definitions of "priority schools" and "focus schools," respectively, set forth in the document titled *ESEA Flexibility*.
- ☒ 7. The provision in ESEA section 1117(c)(2)(A) that authorizes an SEA to reserve Title I, Part A funds to reward a Title I school that (1) significantly closed the achievement gap between subgroups in the school; or (2) has exceeded AYP for two or more consecutive years. The SEA requests this waiver so that it may use funds reserved under ESEA section 1117(c)(2)(A) for any of the State's reward schools that meet the definition of "reward schools" set forth in the document titled *ESEA Flexibility*.

- ☒ 8. The requirements in ESEA section 2141(a), (b), and (c) for an LEA and SEA to comply with certain requirements for improvement plans regarding highly qualified teachers. The SEA requests this waiver to allow the SEA and its LEAs to focus on developing and implementing more meaningful evaluation and support systems.
- ☒ 9. The limitations in ESEA section 6123 that limit the amount of funds an SEA or LEA may transfer from certain ESEA programs to other ESEA programs. The SEA requests this waiver so that it and its LEAs may transfer up to 100 percent of the funds it receives under the authorized programs among those programs and into Title I, Part A.
- ☒ 10. The requirements in ESEA section 1003(g)(4) and the definition of a Tier I school in Section I.A.3 of the School Improvement Grants (SIG) final requirements. The SEA requests this waiver so that it may award SIG funds to an LEA to implement one of the four SIG models in any of the State's priority schools that meet the definition of "priority schools" set forth in the document titled *ESEA Flexibility*.

Optional Flexibilities:

If an SEA chooses to request waivers of any of the following requirements, it should check the corresponding box(es) below:

- ☐ 11. The requirements in ESEA sections 4201(b)(1)(A) and 4204(b)(2)(A) that restrict the activities provided by a community learning center under the Twenty-First Century Community Learning Centers (21st CCLC) program to activities provided only during non-school hours or periods when school is not in session (*i.e.*, before and after school or during summer recess). The SEA requests this waiver so that 21st CCLC funds may be used to support expanded learning time during the school day in addition to activities during non-school hours or periods when school is not in session.
- ☒ 12. The requirements in ESEA sections 1116(a)(1)(A)-(B) and 1116(c)(1)(A) that require LEAs and SEAs to make determinations of adequate yearly progress (AYP) for schools and LEAs, respectively. The SEA requests this waiver because continuing to determine whether an LEA and its schools make AYP is inconsistent with the SEA's State-developed differentiated recognition, accountability, and support system included in its ESEA flexibility request. The SEA and its LEAs must report on their report cards performance against the AMOs for all subgroups identified in ESEA section 1111(b)(2)(C)(v), and use performance against the AMOs to support continuous improvement in Title I schools.
- ☒ 13. The requirements in ESEA section 1113(a)(3)-(4) and (c)(1) that require an LEA to serve eligible schools under Title I in rank order of poverty and to allocate Title I, Part A funds based on that rank ordering. The SEA requests this waiver in order to permit its LEAs to serve a Title I-eligible high school with a graduation rate below 60 percent that the SEA has identified as a priority school even if that school does not otherwise rank sufficiently high to be served under ESEA section 1113.

### ASSURANCES

By submitting this request, the SEA assures that:

- ☒ 1. It requests waivers of the above-referenced requirements based on its agreement to meet Principles 1 through 4 of the flexibility, as described throughout the remainder of this request.
- ☒ 2. It will adopt English language proficiency (ELP) standards that correspond to the State's college- and career-ready standards, consistent with the requirement in ESEA section 3113(b)(2), and that reflect the academic language skills necessary to access and meet the new college- and career-ready standards, no later than the 2013–2014 school year. (Principle 1)
- ☒ 3. It will develop and administer no later than the 2014–2015 school year alternate assessments based on grade-level academic achievement standards or alternate assessments based on alternate academic achievement standards for students with the most significant cognitive disabilities that are consistent with 34 C.F.R. § 200.6(a)(2) and are aligned with the State's college- and career-ready standards. (Principle 1)
- ☒ 4. It will develop and administer ELP assessments aligned with the State's ELP standards, consistent with the requirements in ESEA sections 1111(b)(7), 3113(b)(2), and 3122(a)(3)(A)(ii). (Principle 1)
- ☒ 5. It will report annually to the public on college-going and college credit-accumulation rates for all students and subgroups of students in each LEA and each public high school in the State. (Principle 1)
- ☐ 6. If the SEA includes student achievement on assessments in addition to reading/language arts and mathematics in its differentiated recognition, accountability, and support system and uses achievement on those assessments to identify priority and focus schools, it has technical documentation, which can be made available to the Department upon request, demonstrating that the assessments are administered statewide; include all students, including by providing appropriate accommodations for English Learners and students with disabilities, as well as alternate assessments based on grade-level academic achievement standards or alternate assessments based on alternate academic achievement standards for students with the most significant cognitive disabilities, consistent with 34 C.F.R. § 200.6(a)(2); and are valid and reliable for use in the SEA's differentiated recognition, accountability, and support system. (Principle 2)
- ☒ 7. It will report to the public its lists of reward schools, priority schools, and focus schools at the time the SEA is approved to implement the flexibility, and annually thereafter, it will publicly recognize its reward schools as well as make public its lists of priority and focus schools if it chooses to update those lists. (Principle 2)
- ☒ 8. Prior to submitting this request, it provided student growth data on their current students and the students they taught in the previous year to, at a minimum, all teachers of reading/language arts and mathematics in grades in which the State administers assessments in those subjects in a manner that is timely and informs instructional programs, or it will do so no later than the deadline required under the State Fiscal Stabilization Fund. (Principle 3)
- ☒ 9. It will evaluate and, based on that evaluation, revise its own administrative requirements to reduce duplication and unnecessary burden on LEAs and schools. (Principle 4)
- ☒ 10. It has consulted with its Committee of Practitioners regarding the information set forth in its request.
- ☒ 11. Prior to submitting this request, it provided all LEAs with notice and a reasonable opportunity to comment on the request and has attached a copy of that notice (Attachment 1) as well as copies of any

comments it received from LEAs (Attachment 2).

☒ 12. Prior to submitting this request, it provided notice and information regarding the request to the public in the manner in which the State customarily provides such notice and information to the public (*e.g.*, by publishing a notice in the newspaper; by posting information on its website) and has attached a copy of, or link to, that notice (Attachment 3).

☒ 13. It will provide to the Department, in a timely manner, all required reports, data, and evidence regarding its progress in implementing the plans contained throughout this request.

☒ 14. It will report annually on its State report card, and will ensure that its LEAs annually report on their local report cards, for the “all students” group and for each subgroup described in ESEA section 1111(b)(2)(C)(v)(II): information on student achievement at each proficiency level; data comparing actual achievement levels to the State’s annual measurable objectives; the percentage of students not tested; performance on the other academic indicator for elementary and middle schools; and graduation rates for high schools. It will also annually report, and will ensure that its LEAs annually report, all other information and data required by ESEA section 1111(h)(1)(C) and 1111(h)(2)(B), respectively.

If the SEA selects Option A in section 3.A of its request, indicating that it has not yet developed and adopted all the guidelines for teacher and principal evaluation and support systems, it must also assure that:

☒ 15. It will submit to the Department for peer review and approval a copy of the guidelines that it will adopt by the end of the 2012–2013 school year. (Principle 3)

## CONSULTATION

An SEA must meaningfully engage and solicit input from diverse stakeholders and communities in the development of its request. To demonstrate that an SEA has done so, the SEA must provide an assurance that it has consulted with the State's Committee of Practitioners regarding the information set forth in the request and provide the following:

## INTRODUCTION AND BACKGROUND

The following section provides a brief description of how West Virginia meaningfully engaged and solicited input on its request from (a) teachers and their representatives and (b) other diverse communities, such as students, parents, community-based organizations, civil rights organizations, organizations representing students with disabilities and English Learners, business organizations, and Indian tribes.

## PUBLIC INVOLVEMENT IN THE DEVELOPMENT OF WEST VIRGINIA’S ESEA FLEXIBILITY REQUEST

The West Virginia Department of Education (WVDE) has spent several months nurturing meaningful communication and feedback from educational stakeholders, parents, law makers and the community regarding the plan set forth in West Virginia’s Elementary and Secondary Education Act (ESEA) Flexibility Request.

West Virginia commenced our ESEA Flexibility Request in February 2012 during a public event at the Capitol Complex. The WVDE joined with students, teachers, health and wellness programs, lawmakers, teacher unions and many other public education stakeholders to recognize the hard work and dedication of school systems across the state and to celebrate the decision to apply for flexibility from several of the restrictive provisions of ESEA. At this event, education stakeholders shared their support for submitting the Request and their commitment to public education <https://wvde.state.wv.us/news/2495/>.

Since that time, an integrated approach to public outreach about the state’s ESEA Flexibility Request and the three reform principles has been paramount. Press releases, conferences, professional development, public presentations, media interviews and articles, videos and public websites have been developed to provide outreach related to West Virginia’s Flexibility Request.

The site <http://wvde.state.wv.us/waiver/>, established in January 2012, served as a springboard for informing Local Education Agencies (LEA) of our decision to pursue a waiver to freeze West Virginia’s Annual Measurable Objectives (AMOs) for reading/language arts and mathematics to the levels approved in the state’s Accountability Workbook for the 2010 – 2011 school year. LEAs broadly supported this essential stop gap measure as West Virginia worked toward crafting our request. The WVDE also requested input from LEAs on the WVDE’s broader ESEA Flexibility Request via this site.

In addition, as part of the state’s ESEA Flexibility Request outreach plan the WVDE began meeting with the Title I Committee of Practitioners (COP) in March 2012 to share an outline of West Virginia’s plans and expectations regarding its request. On August 22, 2012, the WVDE met again with the COP to share a draft of the request and solicit additional direction and feedback prior to submission.

The WVDE has also engaged our state’s law makers in conversations about the ESEA Flexibility Request. Governor Earl Ray Tomblin, along with the state’s congressional representatives in Washington D.C. were briefed on the contents of the Request and encouraged to provide suggestions for improvement prior to submission.

West Virginia’s teacher and principal organizations have also been included in the development of this Request. Input from these representatives has been integral as the WVDE developed our plan to address the three reform principles. Further, all teacher organizations have been asked to share information about the request with their members via newsletters and listservs.

The West Virginia Board of Education (WVBE) has taken a central role in supporting and communicating aspects of the ESEA Flexibility Request. The three ESEA Reform principles have been featured eight times on monthly board agendas. The meetings are attended by the public and the media and information about the topics was placed on the WVDE's main website.

Perhaps most significantly, West Virginia has solicited continuous two-way communication regarding the development of our ESEA Flexibility Request via an online comment option provided to stakeholders statewide at <http://wvde.state.wv.us/policies/esea.html>. West Virginia posted an extended executive summary of our request via this site in early August 2012 and provided the complete draft of our ESEA Flexibility Request at three week-long intervals for public comment. Version 1.0 was provided on August 10, 2012, Version 2.0 on August 17, 2012, and Version 3.0 on August 24, 2012. The site featured an embedded commentary feature whereby any member of the public or visitor to the site could provide input regarding the state's plan to address each principle included in the Request (See Attachment 1).

The online comment option was promoted among every media outlet in West Virginia, sent to every Parent Teacher Association president, to all of the state's 25,000 teachers and representatives of West Virginia's major teacher organizations, to all county superintendents, chief instructional leaders, curriculum directors, special education directors, county test coordinators, to every county board member in our 55 county school districts, to student organizations, to the state's minority communities, to West Virginia law makers and statewide business organizations. The link was also sent to representatives from the WV Advisory Council for the Education of Exceptional Children, the WV Autism Training Center, and the WV Developmental Disabilities Council. Feedback from this online option is included in Attachment 2. All public comments were reviewed and appropriate items were incorporated into the final Request prior to submission.

The remainder of this section provides a brief description of the major avenues through which West Virginia's education stakeholders were involved in the planning and development of the specific strategies proposed within this Request to address each reform Principle.

## **STAKEHOLDER COLLABORATION IN THE DEVELOPMENT OF WEST VIRGINIA'S PLANS RELATED TO PRINCIPLE 1**

After the WVBE adopted the Common Core State Standards (CCSS) in May 2010, the WVDE spent months collaborating with K-12 teachers from across the state and higher education representatives to incorporate the common core into West Virginia's standards framework. The result of their work was the West Virginia Next Generation Content Standards and Objectives (hereafter WV Next Generation CSOs). The process of reviewing and adopting the state's Next Generation CSOs included countless hours of discussion regarding the implications for teachers, administrators, parents, and students.

As final versions of the standards were completed, they were taken to the WVBE for public comment and approval. A rollout plan was developed and began in summer 2011, with West Virginia's kindergarten teachers participating in the Teacher Leadership Institute (TLI). During the weeklong professional development sessions, teachers delved deep into understanding the standards and the evolution of teaching. These teachers were responsible for returning to their counties and providing training to all kindergarten teachers in their region. The new standards were implemented in kindergarten classrooms beginning in the fall of 2011.

Fourth and ninth grade teachers participated in similar sessions during the summer 2012 TLI sessions. They are expected to launch the standards in their classrooms in the fall of 2012. A comprehensive overview of the professional development and implementation schedule for the WV Next Generation CSOs is included in this Request.

Every aspect of the development of the state's Next Generation Standards has been communicated to educators, parents and the general public through press releases, speeches, public appearances, articles and the development of a website dedicated to the standards. The site, located at <https://wvde.state.wv.us/next-generation/>, serves as an information hub for teachers, parents, students and all other education stakeholders regarding the standards. It includes testimonials from teachers learning to implement the new standards and frequently asked questions (FAQs) about the instructional implications of the standards. The site also includes the state's rollout plan for professional development and implementation of the new standards.

## **STAKEHOLDER COLLABORATION IN THE DEVELOPMENT OF WEST VIRGINIA'S PLANS RELATED TO PRINCIPLE 2**

In April 2012, the WVDE established the Accountability and Accreditation Stakeholders Advisory Committee (AASAC) to discuss components central to Principle 2 of the ESEA Flexibility Request. This group includes representatives from the WVBE, WVDE, teachers, administrators, education agency representatives, district staff, Institutions of Higher Education (IHEs) and Regional Education Service Agency (RESA) staff.

On May 2, 2012 the AASAC met to discuss the philosophical underpinnings for a revised accountability system. The AASAC discussed their desire for the development of an Accountability Index including measures of student achievement, student growth, achievement gaps among subgroups of students, and graduation/attendance rates. This discussion involved a consideration of which components were necessary to identify high and low performing schools and what obstacles including current state code must be navigated in order to implement a system aligned to the stakeholders' vision.

The AASAC then met again on June 18, 2012 to review school performance upon the proposed Accountability Index measures. The group examined these data and made a recommendation for index weights based upon several potential Accountability Index scenarios. At this meeting, the stakeholders also provided their philosophical rationale for the weighting of various Index components.

The committee met again on July 26, 2012 to delve deeper into issues related to index scenarios, discussing the application of the Index among various programmatic levels schools and to make recommendations for a variety of areas including reporting, intervention in schools identified as unsatisfactory upon the Index, and rewards for high performing schools.

The AASAC was convened one last time on August 29 to review a final draft of the state's ESEA Flexibility Request prior to submission. The group was also solicited to provide feedback on the final Flexibility Waiver via the aforementioned online comment process.

Furthermore, on August 15, 2012, the WVDE convened a diverse group of building administrators and LEA staff with the goal of engaging in a small-scale standard setting process to develop the initial Annual Measurable Objective (AMO) targets and trajectories for the proposed accountability system. This group provided direction to the WVDE in the operational definitions for each school classification as well as the trajectory for improvement over time. The final AMO targets and school classifications were provided to this group for feedback prior to submission of the state's ESEA Flexibility Request.

The WV Federal Programs Committee of Practitioners was also convened in July 2012 to review and make suggestions for incorporation into the Differentiated System of Accountability, Recognition and Supports. During this process, the committee provided suggestions to strengthen the proposed rewards and interventions that would be made available to schools. The committee added tremendous insight into the

practical application of the proposals for recognition and support. The proposal was changed to address their issues of concern.

## STAKEHOLDER COLLABORATION IN THE DEVELOPMENT OF WEST VIRGINIA'S PLANS RELATED TO PRINCIPLE 3

The development of the state's revised Educator Evaluation System has been an ongoing project involving intense collaboration among a variety of stakeholders. In 2009, a task force comprised of WVDE representatives, teachers, county school and building administrators, teacher organization representatives, higher education representatives and legislative liaisons convened to develop the West Virginia Professional Teaching Standards. Following a national review by experts and researchers, the standards were adopted by the WVDE and formed the framework for Standards 1-5 of the educator evaluation system.

In 2010, following the U.S. Department of Education requirement that states begin work on a revised teacher evaluation system in order to receive stimulus and ARRA funds, West Virginia launched three separate task forces. The three groups began work on the new teacher, principal and counselor evaluation systems. The task forces were comprised of teachers, counselors, principals, superintendents, teacher organizations, higher education and other key stakeholders. During this process, the stakeholders identified a series of rubrics and measures to operationalize Standards 1 – 5, and developed the methodology for a sixth standard, entitled *Student Learning*. This sixth standard is the outcome-based component of the educator evaluation system which includes as a significant factor, student growth as evidenced by multiple measures.

During the 2011-12 school year, the Educator Evaluation System was piloted in twenty-five schools. The WVDE and educator evaluation task forces received multiple recommendations from stakeholders during the pilot and are currently in the process of compiling research results from the pilot study. In addition, the three task forces united during the pilot to form one group called the Educator Evaluation Task Force.

As we move into the 2012-13 school year, West Virginia's school district representatives have identified 136 schools to serve as demonstration sites for the new Educator Evaluation System. The demonstration schools consist of the 25 original pilot schools, and 111 additional schools. During school year 2012-13, every educator in each of the demonstration schools will participate in an expanded research study that further broadens stakeholder input into the revision process.

Meanwhile, the Educator Evaluation Task Force continues to meet and make recommendations based on the feedback provided by teachers and principals.

## EVALUATION

The Department encourages an SEA that receives approval to implement the flexibility to collaborate with the Department to evaluate at least one program, practice, or strategy the SEA or its LEAs implement under principle 1, 2, or 3. Upon receipt of approval of the flexibility, an interested SEA will need to nominate for evaluation a program, practice, or strategy the SEA or its LEAs will implement under principles 1, 2, or 3. The Department will work with the SEA to determine the feasibility and design of the evaluation and, if it is determined to be feasible and appropriate, will fund and conduct the evaluation in partnership with the SEA, ensuring that the implementation of the chosen program, practice, or strategy is consistent with the evaluation design.

☒ Check here if you are interested in collaborating with the Department in this evaluation, if your request for the flexibility is approved.

## OVERVIEW OF SEA’S REQUEST FOR THE ESEA FLEXIBILITY

Provide an overview (about 500 words) of the SEA’s request for the flexibility that:

1. explains the SEA’s comprehensive approach to implement the waivers and principles and describes the SEA’s strategy to ensure this approach is coherent within and across the principles; and
2. describes how the implementation of the waivers and principles will enhance the SEA’s and its LEAs’ ability to increase the quality of instruction for students and improve student achievement.

It is our pleasure to submit this ESEA Flexibility Request on behalf of the West Virginia Department of Education and the West Virginia Board of Education. This request represents the work of hundreds of stakeholders involved in the development process over the past several months. It is our belief that the implementation of the initiatives outlined in this proposal will elevate the effectiveness of all schools in West Virginia and propel student achievement to a much higher level.

We are proposing an ambitious timeline for statewide implementation of College- and Career-Ready Expectations and Assessment for all students. In 2010, our state took bold action by adopting the Common Core State Standards (CCSS) and adapting them into the West Virginia framework, labeling these standards “The West Virginia Next Generation Content Standards and Objectives.” Likewise, we are working with a consortium of states to develop and adopt a set of CCSS-aligned English language proficiency (ELP) standards, and we have begun the process of adopting the Common Core Essential Elements (CCEE) as our college- and career-ready expectations for students with significant cognitive disabilities.

This Flexibility Request includes our plan to provide a robust system of professional development, technical assistance and direct support to enable teachers and principals to teach in and lead schools in which all students achieve at high levels. We have also set forth plans to reinvigorate our assessment system by adding a variety of additional common-core aligned items and prompts in the coming years to ensure teachers have the tools necessary to gauge students’ mastery of the new standards. We also provide plans to continue and accelerate our involvement as a governing state on the Smarter Balanced Assessment Consortium and as a member of the Dynamic Learning Maps Alternate Assessment Consortium to prepare for full administration of the new assessments by the 2014-15 school year.

As we move toward full implementation of the new standards and assessments, we also realize the importance of redefining current accountability metrics to reinforce our expectations that all students are prepared for college and career. That is why within this Request, West Virginia is proposing an innovative and multifaceted accountability system which provides a system of differentiated recognition and support based upon multiple measures, including assessments that are benchmarked to national/international expectations. The proposed accountability system will utilize a new measure, the West Virginia Accountability Index which includes data on student achievement and growth in mathematics and reading/language arts, achievement gaps for subgroups, and attendance/graduation rates to identify four primary categories of schools: (1) *Targeted for Support*, (2) *Needs Improvement*, (3) *Effective*, and (4) *Highly Effective*. This application outlines specific interventions and supports that must be enacted by the SEA, LEAs, and schools that do not meet the *Effective* designation. Additional interventions and supports are described for the state’s persistently lowest achieving schools, labeled *Priority* schools and those schools that exhibit persistent achievement gaps, labeled *Focus* schools. A system of recognition for the state’s highest achieving and highest progress schools, labeled *Reward* schools, are also described.

The proposed accountability system also includes a rigorous yet attainable set of proficiency-based Annual Measureable Objectives (AMOs) for mathematics and reading/language arts against which student performance will be benchmarked and reported annually. The proposed AMOs are anchored by

stakeholders' recommendations and set forth policy expectations for LEAs and schools that ensure the education of all students shall remain a priority during this transition. Schools that fail to meet the AMOs, regardless of their classification among the four levels or their designations as *Focus*, *Priority*, or *Reward* schools, must report this failure publically and more importantly, must take immediate actions to increase achievement for the students not meeting the AMOs.

Sweeping changes to our school level accountability system will also require dramatic increases in the quality of instruction and leadership provided by the state's education professionals. That is why West Virginia is committed to undergoing a complete transformation of our educator and school leader evaluation systems. West Virginia has co-developed new evaluation systems for both groups in collaboration with educator and principal advocacy organizations and we are in the process of piloting the new systems both of which incorporate multiple measures including student growth data as a significant factor. The outcomes of these evaluation systems will drive continuous improvement by better identifying educator effectiveness and helping to frame discussions about improving the quality of our education workforce.

West Virginia has established an ESEA Flexibility Request Implementation Task Force comprised of SEA level staff and other representatives. The cross-office task force will meet at regular intervals beginning during the peer review process to discuss adjustments to our proposed plan, to set and measure progress toward key goals related to the implementation of the plans outlined in this request, and to develop a communications outreach plan based upon this proposal. We will engage existing stakeholder groups such as the Accountability and Accreditation Stakeholders Advisory Council (AASAC), Educator Evaluation Task Force, and other LEA groups such as Chief Instructional Leaders, County Superintendents, and the WVBE to ensure all groups are on the same page regarding the plans outlined herein.

An integral part of the implementation plan will be the involvement of the State Superintendent's LEA Advisory Council which meets monthly and is comprised of district superintendents, Regional Education Service Agency (RESA) Directors, and State Board of Education members. This Council will serve as the conduit of communication with the LEA leadership teams and will advise the SEA on effective means of communication with the 55 districts on the state. In addition, quarterly meetings, either virtual or face-to-face, will be held with district leadership teams throughout the implementation period of the components of this Request. The SEA will be responsive to the needs of these various stakeholder and advisory groups by providing professional development, technical support, and direct services to all districts as needed.

The revisions to the key systems outlined in the Request will provide the impetus for ensuring that by 2020, all students are taught in schools that are designated as *Effective* or *Highly Effective*, thus assuring that all West Virginia students are college- career- and citizenship ready.

## PRINCIPLE 1: COLLEGE- AND CAREER-READY EXPECTATIONS FOR ALL STUDENTS

### 1.A ADOPT COLLEGE- AND CAREER-READY STANDARDS

Select the option that pertains to the SEA and provide evidence corresponding to the option selected.

<p>Option A</p> <p><input checked="" type="checkbox"/> The State has adopted college- and career-ready standards in at least reading/language arts and mathematics that are common to a significant number of States, consistent with part (1) of the definition of college- and career-ready standards.</p> <p>i. Attach evidence that the State has adopted the standards, consistent with the State's standards adoption process. (Attachment 4)</p>	<p>Option B</p> <p><input type="checkbox"/> The State has adopted college- and career-ready standards in at least reading/language arts and mathematics that have been approved and certified by a State network of institutions of higher education (IHEs), consistent with part (2) of the definition of college- and career-ready standards.</p> <p>i. Attach evidence that the State has adopted the standards, consistent with the State's standards adoption process. (Attachment 4)</p> <p>ii. Attach a copy of the memorandum of understanding or letter from a State network of IHEs certifying that students who meet these standards will not need remedial coursework at the postsecondary level. (Attachment 5)</p>
---	--

### 1.B TRANSITION TO COLLEGE- AND CAREER-READY STANDARDS

Provide the SEA's plan to transition to and implement no later than the 2013–2014 school year college- and career-ready standards statewide in at least reading/language arts and mathematics for all students and schools and include an explanation of how this transition plan is likely to lead to all students, including English Learners, students with disabilities, and low-achieving students, gaining access to and learning content aligned with such standards. The Department encourages an SEA to include in its plan activities related to each of the italicized questions in the corresponding section of the document titled *ESEA Flexibility Review Guidance for Window 3*, or to explain why one or more of those activities is not necessary to its plan.

#### INTRODUCTION AND BACKGROUND

In May 2010, the West Virginia Board of Education (WVBE) unanimously adopted the Common Core State Standards (CCSS) for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects and the CCSS for Mathematics [see Attachment 4]. West Virginia immediately began transitioning toward full implementation of the standards.

In September 2010, the West Virginia Department of Education (WVDE) convened 85 stakeholders, representing K-12 public education teachers and higher education faculty specializing in English language arts (ELA), reading, and mathematics. After studying the CCSS for approximately six months, they agreed

that the content and expectations in these rigorous standards were sufficient and that West Virginia would not need to add any content to the CCSS prior to integrating them into the state's framework. This stakeholder group then placed the CCSS into a standards framework familiar to West Virginia teachers. The group included academic performance descriptors to be used by teachers, students, and parents. The mathematics stakeholders placed the CCSS into the recommended integrated framework and developed new, more integrated high school mathematics courses: Math I, Math II, Math III, and Math IV. The stakeholder group titled the standards *The Next Generation Content Standards for English Language Arts and Literacy* and *The Next Generation Content Standards for Mathematics in WV Public Schools* (hereafter, WV Next Generation CSOs). Educators and the public can explore these standards interactively via the WVDE's Teach 21 website: [http://wveis.k12.wv.us/Teach21/public/ng\\_cso/NG\\_CSO.cfm](http://wveis.k12.wv.us/Teach21/public/ng_cso/NG_CSO.cfm).

As further evidence of West Virginia's commitment to the CCSS, in January 2011, the WVBE unanimously approved a rigorous schedule for implementing the WV Next Generation CSOs for ELA, literacy, and mathematics [see Attachment 4].

The WVDE's Office of Instruction subsequently developed a professional development roll-out plan to support the statewide transition to the new standards. Professional development for grades K, 1, 4, 5, and 9 is complete, and professional development for all grades will be complete by School Year 2013-14, ensuring that teaching and learning aligned with the new standards shall take place in all public schools in West Virginia for all students, including English language learners, students with disabilities, and low-achieving students. The content of this professional development schedule and the rationale for West Virginia's staggered rollout is further detailed below in the section labeled *Professional Development and Supports for All Teachers*.

Throughout the following sections of our response to Principle 1.B, we provide a series of detailed narratives of activities West Virginia has already completed as well as those activities we plan to carry out through school year 2014-15 in order to support transition to College and Career-Ready standards and CCSS-aligned assessment for all students. It should be noted that we have also developed a succinct tabular representation of the milestones and timeline, parties responsible, evidence, resources, and significant obstacles for each of the 10 major subsections detailed below. This information can be found in Tables 1-1 through 1-10 in Appendix 1. Where appropriate, we make reference to these Tables in text. We encourage reviewers to view these tables while reading the narrative.

## **ALIGNMENT OF THE WEST VIRGINIA 21<sup>ST</sup> CENTURY CSOs TO THE CCSS**

Following the state's adoption of the CCSS, the WVBE directed the WVDE to study the new standards and to produce a document detailing the degree of alignment between the CCSS and the current standards, as set forth in WVBE Policies [2520.1](#) and [2520.2](#): *The West Virginia 21<sup>st</sup> Century Standards for Reading English Language Arts and Mathematics in West Virginia Schools* (hereafter, WV 21<sup>st</sup> Century CSOs). The resulting crosswalks detail the degree of change represented by the CCSS. The grade-level crosswalks are available to stakeholders as standalone documents: <http://wvde.state.wv.us/teach21/Crosswalks.html>.

WVDE staff used the crosswalks to identify gaps within the instructional materials for each grade level and then contracted with classroom teachers to design quality instructional materials to eliminate these gaps. The crosswalks also helped inform the professional development modules. These materials were posted to the Teach 21 website to assist all West Virginia classroom teachers with implementing the WV Next Generation CSOs.

For more information about tasks related to the alignment of the WV 21<sup>st</sup> Century CSOs to the CCSS see Table 1-1 in Appendix 1.

## LINGUISTIC DEMANDS OF THE WV NEXT GENERATION CSOs AND THE DEVELOPMENT OF CORRESPONDING ELP STANDARDS

West Virginia is committed to providing English language learners (ELLs) with access to content that aligns with the state’s college- and career-ready standards. WVBE Policy [2417](#) defines the expectations for programs of study that help improve the English language proficiency (ELP) of these students. Relevant to the policy are the embedded *English Language Proficiency Standards and Objectives for West Virginia Schools*. Pursuant to guidance from NCLB, Title III, Part A, Sec. 3113(b)(2), the ELP standards will be revised in spring 2013 to reflect the linguistic demands of the recently adopted WV Next Generation CSOs.

As a precursor to developing new ELP standards, West Virginia has partnered with 15 other states, the Assessment and Accountability Comprehensive Center (AACC) at WestEd, the Mid-Atlantic Comprehensive Center (MACC) at The George Washington University, and the Council of Chief State School Officers (CCSSO) to examine current ELP/English language development (ELD) standards systematically. The objectives for this partnership, identified as the State Collaborative on English Language Acquisition (SCELA), are to provide information that helps states develop common ELP expectations that correspond to the CCSS and to identify similarities and differences across the states’ standards to inform considerations for “common” or “coordinated” ELP/English language development (ELD) state standards. SCELA has issued initial results indicating the alignment between the states’ current ELP standards and the CCSS for ELA, literacy, and mathematics.

In addition to the SCELA partnership, West Virginia continues to review other emerging research that will inform the development of new state ELP standards. *The Framework for the Creation and Evaluation of English Language Proficiency (ELP) Standards Corresponding to the Common Core State Standards and Next Generation Science Standards*, developed by the CCSSO, communicates to stakeholders the language practices, knowledge, and skills that ELLs must acquire to meet the more rigorous expectations of the CCSS and Next Generation Science Standards. As a member of the CCSSO-sponsored State Collaborative on Assessment and Student Standards (SCASS) for ELLs, West Virginia will provide feedback on the draft framework, which is scheduled for completion in summer 2012.

In June 2012, West Virginia formalized a commitment to join the English Language Proficiency Assessment for the 21<sup>st</sup> Century (ELPA21) consortium. ELPA21—a partnership of 13 states, Stanford University, and the CCSSO—has submitted a proposal to improve the assessment instruments and systems that states use to measure the development of students’ ELP. As a preliminary activity, the ELPA21 will develop and implement a set of ELP standards that correspond to the CCSS in ELA & literacy and mathematics. The SCELA analysis and the CCSSO framework will be the foundations for a final set of agreed-upon consortium ELP standards.

As a conditional element of participation in the ELPA21 consortium, West Virginia will conduct a state review of the common ELP standards when a finalized draft is made available in February 2013. A committee of stakeholders from across the state will vet these standards, and the feedback will be used to finalize a set of state ELP standards, which the WVDE will use as a basis for revising WVBE Policy 2417. This will be presented to the WVBE for approval and adoption by summer 2013. The committee will comprise representatives of local education agencies (LEAs), institutions of higher education (IHEs), Regional Education Service Agencies, regional collaborative organizations, professional educator associations, and communities. The state will launch a concerted summer professional development program, through West Virginia’s eight Regional Education Service Agencies, to allow practitioners from across the state to learn about the newly adopted state ELP standards. Additional, ongoing, job-embedded

professional development will follow the initial launch to support comprehensive statewide implementation.

As a contingency plan, the state will use redirected federal funding and seek other regional and/or national partnerships to ensure that the ELP standards are developed and analyzed by the end of spring 2013.

For more information about tasks related to assessing the linguistic demands of the CCSS and the development of corresponding ELP standards see Table 1-2 in Appendix 1.

## **LEARNING AND ACCOMMODATION FACTORS FOR STUDENTS WITH DISABILITIES**

The WV Next Generation CSOs are robust and relevant and reflect the knowledge and skills that all young people will need for success in college and careers. The manner for demonstrating mastery of these fewer, clearer, and higher standards will be very different from current methods. Students will be required to use higher-order thinking skills, apply what they have learned to unique situations, and bring together knowledge from a variety of content areas to solve problems. Students will be expected to engage in performance-based events, some of which will take place over extended periods of time. The most significant challenge will be in preparing and further developing the knowledge and skills of not only special educators, but all teachers who are sharing the instructional responsibilities for students with disabilities. West Virginia will provide a high-quality system of supports for these educators to ensure their students have equitable access to the WV Next Generation CSOs, the Common Core Essential Elements (CCEE) and their related assessment systems.

### **IDENTIFICATION OF LEARNING AND ACCOMMODATION FACTORS FOR STUDENTS WITH DISABILITIES**

#### **Accommodations for Teaching and Learning**

In 2010-11, four coordinators from the WVDE's Office of Special Programs joined teacher leaders from across the state in a yearlong extensive analysis of the CCSS, led by the WVDE's Office of Instruction. These coordinators worked with the ELA and mathematics standards and interacted with teachers from all programmatic levels. The coordinators identified the expectations and challenges inherent in the new standards and began designing instructional materials and supports to fill the gaps for special education students and teachers.

The target topics include vocabulary, differentiation, scaffolding, Universal Design for Learning, cognitive strategies, accessible instructional materials, progress monitoring, and formative assessments. All of these areas have been selected based on critical issues identified in current research and the state of current practice in West Virginia. Each topic will be presented to LEAs in a blended format, providing current information and guided experiences that deepen understanding and result in accessible standards-aligned instruction. Pairs of coordinators in the Office of Special Programs have been assigned to each of the previously identified areas and are studying current research and recommendations. Information is presently being drafted into a suitable presentation format for LEAs and schools. A vetting process is planned for the 2012-13 school year.

Further, in 2012 professional staff of the Office of Special Programs attended the WVDE's Teacher Leadership Institute professional development. For one week these staff members sat side by side with teachers and administrators from across the state and studied the WV Next Generation CSOs. Based on this experience, the Office of Special Programs plans to conduct debriefing conversations to identify additional needs of special educators as they transition to these standards and identify the implicit changes

that will impact their teaching. This will ensure that the staff thoroughly understands the new standards and can provide high-quality support to LEAs and schools.

Finally, the state's online Individualized Educational Program (IEP) currently contains a link to the Teach21 CSO search engine—from which IEP teams can access the most up-to-date standards, including the WV Next Generation CSOs and *The West Virginia Extended Academic Content Standards*. Augmentations to the online IEP are anticipated to be conducted on an as-needed basis to support CCSS and CCEE adoption/implementation.

### **Accommodations for the Assessment of Learning**

The West Virginia Department of Education Offices of Assessment and Accountability and Research have established and embarked upon an ambitious and comprehensive research agenda to address the appropriateness and impact of accommodations identified for students with disabilities and English language learners (ELLs). The research agenda also sets a goal of empirically determining the comparability of test scores for students from both accommodated and non-accommodated conditions and the impact of the assessment accommodations upon student performance.

This challenging work began in 2006 with the publication of [\*“Special Education Testing Accommodations in West Virginia: An Overview of Practices in 2003-2004”\*](#). This study, conducted by an external research organization, provided a comprehensive overview of accommodations provision during the 2003-2004 school year and examined student performance on the state's summative assessment disaggregated by each available accommodation. The study, was later replicated internally in 2009 to re-examine the distribution of accommodations and the academic performance of those students who were identified to receive accommodations during the first administration of the state's newly developed summative assessment—The West Virginia Educational Standards Test 2 (WESTEST 2). This report, [\*“Examining Accommodations in West Virginia \(2008-2009\)”\*](#) provided a first look at accommodations use on the new assessment, and included the aforementioned research agenda.

In 2011, West Virginia completed a third research report titled, *“Examining Accommodations in West Virginia: A Descriptive Analysis of Accommodations Specified for Students in Individualized Education Plans, 504 Plans, and Limited English Proficient Plans in 2009-2010”* as part of this agenda. In addition to examining accommodations for students with disabilities, this report is noteworthy in that it represents the first systematic examination of the distribution of assessment accommodations provided to ELLs in West Virginia, a historically small population of students in our state (i.e., ~1,700 students across all grades).

The WVDE's research agenda also includes plans to work with the state's assessment vendor to examine Differential Item Functioning (DIF) statistics to address comparability of accommodated and non-accommodated conditions. An essential step in the process was the development of an improved process to monitor, collect, and warehouse identifier-linked accommodations provision data from all schools. These data have been traditionally collected and maintained by LEAs, but in 2011-12 West Virginia piloted the new provision/monitoring process and has received the resulting data to be warehoused at the state level for the first time. The Offices of Assessment and Accountability and Research will be working with the state's test vendor in the coming months to analyze the results and determine comparability.

Finally, West Virginia is also working closely with the George Washington University Center for Equity and Excellence in Education (GWU-CEEE) over the next few months to examine the appropriateness of accommodations for ELLs via a special technical assistance project. The project will inform West Virginia about the extent to which instructors' accommodation recommendations for ELLs are in line with recommendations from the research literature given students' English language proficiency levels.

With respect to the future of assessment, West Virginia is a member of the Smarter Balanced and Dynamic Learning Maps (DLM) consortia developing assessments aligned to CCSS. Accessibility is a core principal

of both consortia which will provide computer adaptive assessments for all students in West Virginia beginning school year 2014-15. Participation in these consortia will provide both opportunities and consequences for teachers of students with disabilities as we implement a comprehensive assessment system that will include formative, interim assessment and summative assessments. These assessments provide an opportunity to obtain immediate results that will provide an opportunity for data-based differentiated instruction. One challenge inherent in this transition is that the use of these computer adaptive assessments will signal the need for accommodations which are not currently used or available in West Virginia. The Office of Special Programs and the Office of Assessment will address this challenge by assuring that students with disabilities including those who are English Language Learners (ELLs) have opportunities to access the curriculum with accommodations that are consistent for both instruction and assessment.

Furthermore, acknowledging the importance of providing appropriate accommodations and ensuring accessibility of instruction and assessment, WVDE staff currently serve and will continue to serve on the accessibility and accommodations working group for the Smarter Balanced Assessment Consortium. Lessons learned from this work will inform West Virginia's transition to the Next Generation CSOs and the next generation of student assessment.

## **STRATEGIES TO ADDRESS LEARNING AND ACCOMMODATION FACTORS FOR STUDENTS WITH DISABILITIES**

The implementation of the WV Next Generation Standards have implications for students with disabilities and provide an opportunity for greater access to the general curriculum while enhancing successful transition opportunities and improving results. That positive outlook, however, does not camouflage the very real challenges inherent in teaching to these more rigorous standards or the accountability of schools and, now, teachers in moving students to mastery of them. The delivery of special education for this population of students should be considered within the context of general education. Nearly 68% of West Virginia's students with disabilities are in general education for more than 80% of the day. As a result, these students' primary instructors are general educators. Special education is a support within that system, with special educators providing the necessary interventions and expertise in individualization and research-based teaching.

Scale-up strategies to ensure these students can access the WV Next Generation CSOs and the Common Core Essential Elements (CCEE) must include the development of knowledge of content, curriculum and standards for both special and general educators, and knowledge of accommodation procedures and instructional practices that struggling students require. To this end, West Virginia will take a multi-pronged approach including (1) a comprehensive system of professional development and technical assistance and (2) the development of key partnerships with national and state organizations to augment existing state capacity and inform best practice. Each approach is described below.

### **Professional Development and Technical Assistance to Address Learning and Accommodation Factors for Students with Disabilities**

Professional development and technical assistance are critical facets of West Virginia's transition plan for teachers of students with disabilities. Between now and school year 2014-15, the WVDE Office of Special Programs will continue to support a variety of activities, including the following.

**Literacy Academies** – Literacy is an area of focus and change brought about by the rigor of the Next Generation Standards. The goal of this initiative is to strengthen the instructional expertise of special educators serving students in grades 4 through 9 who struggle to develop literacy; this includes text complexity, rigor and the shift to focus on informational text. More information about this initiative can be found in the section titled *“Professional Development and Supports for All Teachers.”*

**Mathematics Academies** – This initiative improves student achievement in mathematics by deepening special educators’ understanding of mathematics and by building their capacity to teach in student-centered classrooms. More information about this initiative can be found in the section titled *“Professional Development and Supports for All Teachers.”*

**State Personnel Development Grant (SPDG)** – The last year of the state’s current SPDG project will focus on implementing Support for Personalized Learning (SPL). The WVDE’s Office of Special Programs is partnering with Regional Education Service Agency special education directors, professional development directors, and technical assistance support specialists (formally Response to Intervention [RTI] specialists) to provide training at the district, school, and classroom levels. More information about this work can be found in the section titled *“Professional Development and Supports for All Teachers.”*

**Focus Support to Counties** – The achievement gap between special education and general education students in ELA and mathematics is persistent. The WVDE’s Office of Special Programs is piloting efficient and cost-effective scale-up strategies to assist districts in increasing achievement among students with exceptional learning needs. Four school districts have been selected to receive improvement grants and intense professional development for general and special educators from 2012-14. This targeted assistance will help educators implement SPL and promote changes that lead toward improved outcomes for students with disabilities. The Office of Special Programs will assist districts in developing locally tailored solutions to meet their unique educational challenges.

**West Virginia Autism Collaborative Community of Practice (WVACCoP)** – The number of students with autism is increasing nationally and in West Virginia. In response, the WVDE has developed scale-up strategies to assist districts in delivering effective and efficient special education services to these students. The West Virginia Autism Collaborative Community of Practice (WVACCoP) has provided guidance for teachers and parents of students with Autism Spectrum Disorders; this includes the WVACCoP’s *Autism Spectrum Disorders: Services in WV Schools Guidelines for Best Practice*, developed and disseminated during 2011-12. During the upcoming school year, the WVACCoP will review and revise Policy [5314.01](#) to define standards for autism mentors more clearly. It also will help meet staff training needs by developing courses and identifying resources to assist in training professional and service personnel on Autism Spectrum Disorders.

**Autism Academies** – The Autism Academies are a series of professional development experiences provided through a partnership between the WVDE’s Office of Special Program and the Marshall University Autism Training Center. This ongoing professional development strengthens the instructional expertise of special educators who serve students with Autism Spectrum Disorders. These academies began during 2011-12 and will continue in 2012-13; they are further described in the section titled *“Professional Development and Supports for All Teachers.”*

Additional professional development supports for all teachers including general educators who serve students with disabilities are described in the section titled *“Professional Development and Supports for All Teachers.”*

### **Partnerships to Support Learning and Accommodations for Students with Disabilities**

The WVDE has a long record of successfully partnering with state and national technical assistance providers to build the capacity of general and special educators to support scaffolded instruction, the appropriate provision of accommodations, and the use of scientifically researched-based practices to scaffold learning for students with disabilities. Some notable examples germane to the transition to the WV

Next Generation CSOs include the following ongoing collaborations.

**West Virginia Accessible Instructional Materials (WV AIM)** – The Individuals with Disabilities Education Act of 2004 (IDEA) requires core instructional materials to be provided in specialized formats when needed by students with print disabilities. It is the responsibility of each student's IEP team to identify and document the types of instructional accommodations, including specialized instructional materials and format(s) on the IEP.

West Virginia and its school districts have coordinated with the National Instructional Materials Access Center (NIMAC) to provide specialized formats to eligible students in a timely manner. Eligible students with print disabilities include those with visual impairments, physical limitations, or organic dysfunctions, which may include specific learning disabilities. Three authorized users designated by the state may access National Instructional Materials Access Standards (NIMAS) source files from the NIMAC: (1) The West Virginia Instructional Resource Center (IRC), (2) Bookshare, and (3) Learning Ally. Designated users can download the accessible materials files that have been provided by publishers to the NIMAC. These files can then be used to prepare screen enlargements, braille, digitized text, and audio books for eligible students to use. Currently, teachers of students with visual impairment are aware of these resources and access them regularly for student use by registering online and/or contacting the appropriate authorized user. Based on usage reports, teachers of other students with print disabilities apparently are not obtaining materials regularly; usage records indicate that fewer than 350 students have received materials even though approximately 17,000 students receive read-aloud accommodations for the state assessment. The expanding availability of instructional materials in an auditory format—for example, audio books—could give students with print disabilities, such as a reading disability, access to print information in a different format that they can use independently, thus supporting their Common Core learning.

IDEA requires a process and system for determining student needs and eligibility and for obtaining and distributing the materials in a timely manner. West Virginia was selected as one of seven states to receive targeted technical assistance from the National Center on Accessible Instructional Materials (AIM), funded by the U.S. Department of Education, to design and implement a system for all eligible students with print disabilities. The WV AIM Coordinating Committee is developing state and district procedures and processes to ensure that eligible students with print disabilities receive instructional resources in a timely manner.

In 2011-12, with assistance from Joy Zabala of AIM, a WV AIM Coordinating Committee was formed. This group comprises local special education directors, teachers, state special education and instructional materials staff, and Regional Education Service Agency staff. The WV AIM Coordinating Committee created three work groups and initiated efforts to develop (1) acquisition steps, (2) operational guidelines, and (3) professional development plans. During that same school year, the team launched a website with decision-making resources for teachers and implemented professional development to raise awareness of the process. This work will continue during 2012-13 as the system and procedures are finalized. The WVDE's Office of Special Programs will implement the state structure, guidelines, and professional development resulting from the WV AIM Committee's work to increase appropriate distribution and usage of materials in accessible formats. Additional information is available at <http://wvde.state.wv.us/osp/accessiblematerials.html>.

**Collaboration with the National Center on Response to Intervention (NCRTI)** - NCRTI, funded by the U.S. Department of Education's Office of Special Education Programs (OSEP), provides technical assistance to states and districts and builds the capacity of states to assist districts in implementing proven models of Response to Intervention (RTI). The WVDE's Office

of Special Programs has piloted the NCRTI's online RTI reporting system to provide data that can be used to make policy and program decisions as West Virginia scales up SPL. Pilot participants are conducting research and contributing important practitioner perspectives and information. Further, the NCRTI will provide WVDE with technical assistance surrounding the findings from the data collected.

The NCRTI/WVDE's Office of Special Programs online system provides pilot participants with a common electronic tool for collecting data about the fidelity of SPL implementation at the school level and will help West Virginia and other states determine the impact of SPL on various key outcomes, including student achievement. The Office of Special Programs has customized the NCRTI tool to include several data collection and reporting variables that will support schools in making student-level decisions. Currently, eight schools are involved in the pilot. Feedback from the participating schools will be very valuable and will assist the WVDE in designing a more efficient and user-friendly online data collection and reporting system for SPL. Schools will also receive professional development from the NCRTI on how to use the online reporting system. More significantly, pilot schools will collect and analyze important student data for making decisions to improve student achievement outcomes.

**National Dropout Prevention Center–Students with Disabilities** – The West Virginia Office of Special Programs submitted a grant and was selected to receive technical assistance from the National Dropout Prevention Center for Students with Disabilities (NDPC-SD) to develop tools to prevent students with disabilities from dropping out. The project, implemented in 12 LEAs, will provide guidance to districts in calculating ESEA's cohort graduation and dropout rates, analyzing and using LEA data related to State Performance Plan/Annual Performance Report transition indicators (e.g., graduation, dropout, transition planning in the IEP process, and post-school outcomes), addressing dropout risk factors, and developing and implementing LEA dropout prevention plans. Input from this group assisted the WVDE in developing an Early Warning Tool, which will be implemented in 2012-13, to identify students in these LEAs at risk for dropping out. Stakeholders in this process have included WVDE staff members, agency/organization staff, and LEA staff.

**Autism Training Center at Marshall University** - As noted above and in the later section titled *"Professional Development and Supports for All Teachers,"* the WVDE is partnering with the Autism Training Center to offer a series of professional development academies—in addition to the West Virginia Autism Community of Practice. The center provides education, training, and treatment programs for West Virginians with Autism Spectrum Disorders, including Pervasive Developmental Disorder–Not Otherwise Specified and Asperger's Disorder. It addresses areas such as language, speech and communication, self-help skills, academic education, occupational therapy, recreation and leisure skills, social skills and issues, behavior strategies, and sensory integration strategies through appropriate education, training, and support for professional personnel, family members or guardians, and others important in the life of a person with autism. The center's highly skilled and experienced staff provides the training.

**Technical Assistance Center on Social Emotional Intervention for Young Children (TACSEI) and Center for Early Literacy Learning (CELL)** - West Virginia is one of two states recently selected to participate in a technical assistance and training partnership with TACSEI and CELL—funded by the U.S. Department of Education. Through this exciting partnership, the state will develop an integrated early childhood training system to promote social, emotional, and early language and literacy competence and to prevent challenging behaviors in all young children from birth to age five.

**Partnership with the Office of School Improvement** – In 2012-13, personnel from the WVDE’s Office of Special Programs will join WVDE teams to help schools with planned improvement activities assist struggling students. The collaboration will focus on improving the achievement of students with disabilities in schools identified by the WVDE’s Office of School Improvement as needing targeted technical assistance due to consistently low performances.

**Instructional Practice Professional Development** – Implementation of the WV Next Generation CSOs will require general and special educators to be skilled in the instructional practices of differentiation, scaffolding, Universal Design for Learning, cognitive strategy instruction, technology, and vocabulary development. The WVDE’s Office of Special Programs is developing a professional development program, including online digital courses, for general and special education teachers who serve students with disabilities. These courses are being designed in 2012-13 and will be rolled out in 2013-14. Professional staff involved in the partnership with the National Center to Improve Recruitment and Retention of Qualified Personnel for Children with Disabilities (NCIPP) mentor project and the four Focused Support Counties noted above will pilot these digital courses and provide feedback after trainings.

**National Center to Inform Policy and Practice (NCIPP) in Special Education Professional Development** – The degree to which students with disabilities are able to meet state content and performance standards, improve achievement, stay in school, graduate with a regular diploma and obtain post school employment and independence is contingent upon teacher quality in general and special education. West Virginia has had a chronic shortage of qualified special education teachers fueled by difficulties in retaining new teachers. The WVDE’s Office of Special Programs established a partnership with NCIPP in 2011-2012 to provide technical assistance to improve special education teacher retention in seven counties through a mentoring process for novice teachers. Research indicates novice teachers are more likely to stay in teaching when they are supported and part of the community and when they have the skills to be effective. Mentoring will offer two types of supports: school-based socialization, associated with teacher retention; and instructional coaching, associated with improving instructional practice. Since West Virginia is a predominately rural state, mentoring approaches will use technology to support beginning teachers. Online digital courses, addressing policies, procedures and instructional practices, and e-mentoring opportunities will be provided in 2012-13 and 2013-14. The Office of Special Programs and Office of Professional Preparation also are collaborating to provide opportunities for mentors of special education teachers to pursue National Board Teacher Certification through the *TakeOne Project*.

**Partnership with the Office of Professional Preparation** – During 2012-13 and 2013-14, mentors and readers will support special education teachers who are pursuing National Board Certification and who are employed in counties receiving focused support. This effort, supported by the WVDE’s Office of Special Programs and Office of Professional Preparation, will assist these teachers with the portfolio completion process. The purpose of the National Board Certification program is to advance student learning and achievement by establishing definitive standards and advocating policies that support excellence in teaching.

**National Center to Improve Recruitment and Retention of Qualified Personnel for Children with Disabilities** – The WVDE’s Office of Special Programs is collaborating with this center to address personnel shortages by establishing distance learning options for prospective speech-language pathologists to obtain professional licensure. This federally funded technical assistance and dissemination project was created in 2008 and is maintained through a cooperative agreement between the National Association of State Directors of Special Education (NASDSE) and the OSEP.

## STRATEGIES TO ADDRESS LEARNING AND ACCOMMODATION FACTORS FOR STUDENTS WITH SIGNIFICANT COGNITIVE DISABILITIES

Students with significant special needs include those who require intensive or extensive levels of direct, ongoing support that are not temporary or transient in nature. Students with significant cognitive disabilities require specially designed individualized instruction to acquire, maintain, or generalize skills that can be transferred to natural settings, including the home, school, workplace, or community. Challenges will arise for educators of these students due to the increased rigor of the CCEE.

### Adoption and Implementation of the Common Core Essential Elements (CCEE)

The WVBE is expected to formally adopt the CCEE during school year 2012-13. After their formal adoption during 2012-13, the Common Core Essential Elements (CCEE), which shall serve as the state's alternate achievement standards aligned to the CCSS, shall be made available through the online IEP. This will give IEP team's access to robust descriptions of the new standards when developing academic IEP goals and when creating each student's Present Levels of Educational and Functional Performance statements.

In 2011-12, West Virginia began to identify challenges facing students with significant cognitive disabilities as the state transitions to the CCSS and the CCEE. Teachers and content specialists were invited to participate in an in-depth analysis of the differences in the current extended standards and the CCEE. This work was facilitated by the WVDE's Office of Special Programs and Office of Assessment and Accountability. The group developed crosswalks for the current extended standards and the CCEE and for the CCSS in ELA and mathematics. These crosswalks will help teachers understand the increased rigor and depth of the CCSS and the CCEE and the changes regarding when specific learning concepts should be introduced to students. Instructional guides that build on this work will be developed in 2012-13.

Students with significant cognitive disabilities access the existing content standards through WVBE Policy 2520.16 (*West Virginia Extended Content Standards and Performance Descriptors*). This policy links the WV 21<sup>st</sup> century CSOS in ELA and mathematics with the extended standards and includes performance descriptors aligned with the extended standards. These extended standards and performance descriptors are applicable for students with the most significant cognitive disabilities—those who are instructed upon alternate academic achievement standards and who are assessed with the West Virginia Alternate Performance Task Assessment (APTA), the state's alternate assessment on alternate achievement standards (AA-AAS). The policy provides a framework for teachers of students with the most significant cognitive disabilities to teach the skills and competencies essential for independent living, employment, and postsecondary education. The standards were developed with input from teachers, and formative assessment items were developed within the Acuity platform (West Virginia's interim/diagnostic assessment aligned to the general assessment) to support ongoing assessment for these students.

The special educator's purpose is to be as knowledgeable as she or he can be about what social and academic skills a student needs to access, or perform successfully in, the general curriculum. The challenge for the field is to do everything possible to make sure every special educator feels confident that she or he can achieve that purpose. As the programming for students with more significant needs has moved toward more integrated settings, the delivery of life-skills training has become less common. The Office of Special Programs is preparing a guidance document, *Common Core Functional Elements*, as a companion to the Common Core Essential Elements. It will focus on life skills and career and technical skills for students with more significant needs. Professional development on the essential and functional elements will be provided in July and August 2013.

### Teaching and Technology for Students with Significant Disabilities

Anticipating the coming changes in standards and assessment, the WVDE's Office of Special Programs and Office of Assessment and Accountability have embarked on a three-year project, Teaching and Technology for Students with Significant Disabilities (the T1 project), to support the teachers of students who take the APTA. Based upon needs assessments conducted with these teachers, the Office of Special Programs and Office of Assessment and Accountability have developed and begun conducting professional development sessions to prepare teachers to use formative assessments that align with the CCEE and to prepare their students for an online summative assessment based upon those standards in 2014-15.

Additionally, a survey of teachers revealed that students with significant cognitive disabilities have not been receiving the instructional benefits of assistive and instructional technology to access the standards because teachers lack the requisite knowledge and expertise in technology. Since 2009-10, mentor teachers and district leaders have participated in a professional development program that highlights evidence-based instructional practices in formative assessment and technology integration. This will prepare them to train teachers in their home regions. During the second year, training occurred throughout all eight Regional Education Service Agency areas with 53 of the state's 55 county school systems participating. These training events addressed communication and literacy strategies for students with severe cognitive disabilities, the use of interim/diagnostic assessment items for the alternate achievement standards, and the use of software to modify and create computer-based interactive learning activities and assessments for students. These trainings were provided at no cost to the districts.

The professional development culminated in a [T1 Statewide Conference](#) in July 2011. Keynotes for the conference were delivered by the state Superintendent of Schools and Dr. Karen Erickson of the Center for Literacy and Disabilities Studies at the University of North Carolina. The [agenda](#) included Apple accessibility, Bookshare, Acuity, Don Johnston Literacy Tools, interactive whiteboards, the West Virginia Assistive Technology System, and other technology trainings that addressed scripted stories, schedule development, and prevention of impeding behaviors. District leaders met with teams to develop yearlong professional development plans for their districts. To begin the rollout of the CCEE, the second T1 Statewide Conference, held in August 2012, addressed the CCEE and the Dynamic Learning Maps (DLM) assessment—the state's future AA-AAS, which will be implemented in 2014-15. Teachers and district leaders also took part in sessions demonstrating ways to utilize assistive technology and effective technology integration practices.

Beginning in September 2012, the WVDE's Office of Special Programs and Office of Assessment and Accountability will offer additional professional development regarding the CCEE rollout. Statewide training will be provided during the special education administrators and county test coordinators meetings in fall 2012. Regional trainings for each school district will be conducted during 2012-13 to help teachers learn more about the CCEE, how the CCEE will link with the WV Next Generation CSOs and the CCSS, appropriate instructional strategies, and the DLM assessment.

For more information about tasks related to assessing learning and accommodation factors for students with disabilities see Table 1-3 in Appendix 1.

## **OUTREACH AND DISSEMINATION OF WV NEXT GENERATION CSOs TO APPROPRIATE STAKEHOLDERS**

The WVDE continually disseminates information relevant to the WV Next Generation CSOs to teachers, principals, students, and parents and will continue to do so as we transition to these new standards.

### **DEVELOPMENT OF AN INFORMATIONAL WEBSITE FOR THE PUBLIC**

In December 2011, the WVDE established a website to serve as a communication hub regarding West Virginia's transition to the CCSS: <http://wvde.state.wv.us/next-generation/>. The site includes an overview of the process through which West Virginia adopted the CCSS and rebranded them as the *WV Next Generation CSOs*. The site includes video testimonials from teachers who are implementing the new standards, an overview of the professional development and implementation schedule, and a set of frequently asked questions (FAQs) about the WV Next Generation CSOs. The FAQs provide stakeholders with an overview of why these new learning standards are important to them and to the state, the adoption process, West Virginia's rationale for adopting the new standards, the implications for classroom instruction, instructional materials identification/development, and assessments. The site also includes a "Need to Know" section for teachers, parents, and students. Each section features resources relevant to these stakeholders.

### **PROFESSIONAL DEVELOPMENT OPPORTUNITIES FOR EDUCATORS**

The WVDE's large-scale professional development events, such as Teacher Leadership Institutes, inform classroom teachers at each grade level about the WV Next Generation CSOs. By participating in these opportunities, educators are developing a deeper understanding of college and career readiness standards/expectations. The goal is for each teacher to be better prepared to implement these standards in their classrooms and to articulate to students, parents, and community members what it means to be college and career ready in ELA and mathematics. Administrators are also required to attend Teacher Leadership Institutes with their instructional staff.

### **REGULAR COMMUNICATION FROM THE STATE SUPERINTENDENT OF SCHOOLS**

West Virginia has already and will continue to engage in dialogue with critical stakeholders regarding the state's progress toward implementing the WV Next Generation CSOs. The WVDE currently sends weekly updates to district superintendents, LEA chief instructional leaders, professional organizations, Regional Education Service Agency directors, and other education leaders.

### **OUTREACH TO CHIEF INSTRUCTIONAL LEADERS**

Chief instructional leaders represent the frontline for LEAs as they transition to the WV Next Generation CSOs. The WVDE holds two-day workshops for these staff twice a year, creating opportunities for the WVDE and the LEAs to communicate and collaborate. The WVDE has refocused these workshops to provide technical assistance and guidance to chief instructional leaders as they implement the WV Next Generation CSOs and the related assessment system.

### **INVOLVEMENT IN NATIONAL ADVISORY GROUPS/STATE COLLABORATIVE ORGANIZATIONS**

West Virginia is a member of the CCSSO's Implementing the Common Core (ICCS) State Collaborative on Assessment and Student Standards (SCASS). Through this collaborative effort, the state has designed an implementation plan with a robust communication component.

The vice chancellor for Academic Affairs with the West Virginia Higher Education Policy Commission is a

member of the state's ICCS SCASS team and also serves as the higher education liaison with the Smarter Balanced Assessment Consortium (SBAC). The executive director of the WVDE's Office of Instruction has presented an introductory session regarding the CCSS and their implementation in West Virginia to approximately 120 faculty members from educator preparation programs across the state. The vice chancellor has created a Smarter Balanced West Virginia Higher Education Advisory Council. This advisory council, whose first meeting was held in June 2012, will serve as the link between public education and higher education and assist in establishing placement guidelines for the seamless transition of students who have achieved the college and career readiness standards. The Higher Education Policy Commission has also endorsed two courses—Transitions Mathematics and English 12 CR—to help students meet college and career readiness standards for entrance into higher education programs.

For more information about tasks related to outreach and dissemination of the WV Next Generation CSOs see Table 1-4 in Appendix 1.

## PROFESSIONAL DEVELOPMENT AND SUPPORTS FOR ALL TEACHERS

Professional development for the state's education workforce is a centerpiece of the state's plan to transition to the WV Next Generation CSOs. The WVBE's goals for professional development and the resulting *Master Plan for Statewide Professional Development* will help ensure that teachers and administrators receive adequate support related to the CCSS.

During 2011-12, the WVBE's first goal for professional development was to promote "instruction that exhibits an understanding of the CCSS for English/language arts and mathematics including how the new standards align to the West Virginia 21<sup>st</sup> Century Content Standards and Objectives." The second goal stated that "participants will apply their knowledge of the CCSS into professional practice with specific attention to (1) addressing writing and text complexity, (2) designing school-wide efforts to improve literacy and numeracy, and (3) ensuring technology and science are integrated into improvement efforts." During 2011-12, approximately 423 professional development sessions addressed the first goal, and 370 additional sessions addressed the second goal.

The WVBE's goals for staff development for 2012-13 include a similar, though expanded, focus on promoting high-quality standards-based instruction. The first goal for the upcoming school year states that professional development must "align with curriculum standards to increase educator effectiveness in the arts, world languages, health, physical education, career/technical, reading/English language arts, mathematics, science, and social studies." So far, the state's professional development providers (including the WVDE) have proposed conducting 229 sessions in 2012-13 that align with this goal.

### TEACHER LEADERSHIP INSTITUTES

The WVDE is supporting the state's transition to the CCSS through a series of weeklong residential summer institutes supported by ongoing follow-up throughout the school year that will help prepare all educators to implement the WV Next Generation CSOs. These Teacher Leadership Institutes, which began in summer 2011, are attended by teams of teacher leaders from all 55 districts who are accompanied by a building principal or county staff member. This professional development experience deepens the teacher leaders' understandings of the content and expectations set forth in the WV Next Generation CSOs. It also prepares and empowers educators to facilitate professional development for their peers in their home districts.

In summer 2011, the Teacher Leadership Institutes prepared teams of kindergarten teacher leaders from all

55 districts to lead their peers in implementing the WV Next Generation CSOs during the upcoming school year; 275 kindergarten teachers attended the 2011 institutes and began implementation of the new content during school year 2011-12. In summer 2012, grade-specific weeklong institutes were held for teams of teacher leaders in grades 1, 4, 5, and 9. All 55 districts were represented by teams of teacher leaders during each of the three weeklong institutes, with a total enrollment of 910. Again, these teachers returned to their districts with the expectation to share their knowledge with peers and begin implementation of the new standards. In summer 2013, the WVDE will provide grade-specific Teacher Leadership Institutes for district teams of teacher leaders in grades 2 – 3, 6 – 8, and 10 – 12. Elementary, middle, and high school teachers and their teams will each participate in a weeklong series of professional development delivered in three separate programmatic level academies. These teachers will then return to their districts and promote district-wide implementation of the new standards. The 2014 Teacher Leadership Institute will invite teachers of grades K – 12 to return to a second institute to deepen their knowledge of the new standards and further explore the myriad implications for their classrooms.

Figure 1.1 provides an overview of the professional development/implementation roll-out schedule which indicates all grade levels will have received professional development and begun implementation of the new standards by the 2013-14 school year. Figure 1.1 also illustrates that West Virginia will use a staggered professional development rollout plan. This approach is designed to ensure that, by school year 2014-15, all students enrolled in grades 1-12 will have spent at least one year in classrooms implementing college and career ready standards. Reading the parenthetical notations in the chart diagonally from the top left to the bottom right allows the reader to determine the exact number of years for each cohort of students.

**Figure 1.1. Schedule for CCSS-Aligned Professional Development and Implementation**

**CCSS-Aligned Professional Development and Implementation Schedule**

<b>2011</b>	<b>K</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>	<b>10</b>	<b>11</b>	<b>12</b>

<b>Red Text:</b>	<b>First year of CCSS-aligned assessment</b>	

Through a collaborative partnership with the state's Higher Education Policy Commission, the WVDE is further supporting the implementation of the CCSS by inviting faculty from educator preparation programs to participate in the Teacher Leadership Institutes. More information about the roles of IHEs can be found later in this section under the heading "Collaboration with West Virginia IHEs to Help Teachers and Principals Transition to the WV Next Generation CSOs."

While the foundational content of the Teacher Leadership Institutes is the WV Next Generation CSOs for ELA and mathematics, the institute also helps teacher leaders understand that the goal is not simply the mastery of content knowledge or the use of new technologies but rather student mastery of the learning process. By focusing on quality core instruction, teacher leaders are reminded that inflexible curricula raise unintentional learning barriers for many students and that the burden of adaptation should be placed on the curricula, not the learner.

The goal of education is to develop expert learners who are resourceful, knowledgeable, strategic, goal directed, purposeful, and motivated. As such, the principles of Universal Design for Learning serve as the basis for instructional design throughout the institute. The institute staff comprises master teachers from across the state. They model the design and delivery of curricula to meet the needs of all learners, including ELLs and students with disabilities, by:

- creating flexible designs with customizable options that allow all learners to progress from where they are and not where schools may imagine them to be;
- being flexible in the ways information is presented, students respond or demonstrate knowledge and skills, and students are engaged in learning; and
- reducing instructional barriers by providing appropriate accommodations, supports, and challenges while maintaining high achievement expectations for all students.

Following the weeklong residential institute, teacher leaders are supported by numerous follow-up opportunities, including webinars, professional learning opportunities, and networks of professional collaboration across grades throughout the year.

### **SUPPORT FOR PERSONALIZED LEARNING (SPL)**

Through a partnership with the WVDE's Office of Special Programs, the 2012 Teacher Leadership Institute introduced participants to SPL, in part, through the WVDE's recently issued guidance document. SPL provides a framework for supporting all students—including those who are struggling, those with disabilities, and ELLs—to master the WV Next Generation CSOs by problem-solving individual needs and by providing multiple levels of instruction tailored to each student.

The West Virginia SPL framework suggests flexible use of resources to provide relevant academic, social/emotional, and/or behavioral support to enhance learning for all students. SPL is characterized by a seamless system of high-quality instructional practices that allow all students to sustain significant progress, whether they are considered at risk, exceeding grade-level expectations, or at any other point along the continuum.

In 2005, in response to IDEA, West Virginia began to develop an RTI process. Functioning primarily as a K-3 prevention and intervention model, RTI emerged in West Virginia as a process for identifying and addressing students' needs prior to initiating the special education eligibility process for those suspected of having specific learning disabilities. SPL embraces these purposes, but the intent of SPL is much more pervasive in scope. SPL operates with the understanding that student learning increases when the right supports are available; these supports are responsively revised or removed as each student's learning advances and deepens. SPL also incorporates and builds on processes formerly implemented as RTI. A key element is that staff, parents, and students collaboratively collect and thoughtfully consider a relevant array of data as a means for determining the most appropriate instruction.

SPL was developed by a group of WVDE staff from the Offices of Instruction; Healthy Schools; School Improvement; Title I; Title II, III, and System Support; Assessment and Accountability; Research; Special

Programs; and Technology. WVDE staff took special care to utilize the terminology of the WV Next Generation CSOs and the SBAC. Policy [2419](#) (*Regulations for the Education Students with Exceptionalities and Specific Learning Disability Guidance for Schools and Districts*) was revised effective July 1, 2012. A broad stakeholder group of teachers, administrators, school psychologists and representatives of IHEs, teacher associations, Regional Education Service Agencies, and the West Virginia Advisory Council for the Education of Exceptional Children provided input regarding the documents. Additionally, the WVDE solicited extensive public comments online and through public hearings. The subsequent tools and resources that emerged from this effort can be found at <http://wvde.state.wv.us/spl>.

As West Virginia implements best practices and proven strategies around SPL, ELLs and students with disabilities will have greater opportunities to access the WV Next Generation CSOs in the general education environment.

### **The Six Core Principles of SPL**

West Virginia is transforming the way learning needs are conceptualized and addressed through the implementation of SPL. This seamless system of high-quality tiered instructional practices supports sustained, significant progress for all students. SPL presents an opportunity for educators to join forces in devising a coordinated system that encourages the flexible use of resources to provide more relevant learning experiences for all students. Early in this transition, West Virginia, like many other states, recognized the importance of leveraging the positive effects emanating from school improvement initiatives, strategic planning, RTI, and coaching. Mission-driven inclusive conversations and research established a common language and agreement among stakeholders on these core principles of SPL:

- Leadership
- School Climate and Culture
- Collaboration
- Family and Community Involvement
- Assessments
- High-Quality Tiered Instruction
  - Core Instruction
  - Targeted Instruction
  - Intensive Instruction

This foundation supported a viable entry point for guidance, technical support, and professional development.

### **SPL Implementation Guidance for LEAs and Schools**

To build understanding of SPL processes, the WVDE has developed a comprehensive guidance document: [\*Support for Personalized Learning—Guidance for West Virginia Schools and Districts\*](#). It describes current evidenced-based practices that have emerged from the WVDE's partnerships with the CCSS initiative and the SBAC and from feedback from the WVDE's various offices and stakeholders. The content of the guidance document is organized by the six core principles of SPL.

The WVDE realizes that high-functioning SPL largely will result from a careful comparison between what is currently in place and what needs to be in place at every level of the system to meet learning needs. Based on this realization, the WVDE developed a series of practice profiles that align with the guidance document:

- [District Practice Profile](#)
- [School Practice Profile](#)

- [Classroom Practice Profile](#)

These profiles will serve as processing tools for self-assessment along a continuum of implementation stages.

## Professional Development and Technical Assistance Related to SPL for LEAs and Schools

Professional development related to SPL is structured to support districts and schools as they work through the SPL implementation process, beginning with comprehensive self-assessment, recognition of the urgent need to change structures and practices to support effective implementation, flexible use of resources, and implementation of high-quality tiered instructional practices. Professional development and technical assistance related to SPL is occurring over three phases [see Figure 1.2].

**Figure 1.2. Three Phases of SPL Professional Development and Technical Assistance for LEAs and Schools**

2012-2013	2013-2014	2014-2015
<b>Support Targets</b>		
<ul style="list-style-type: none"> <li>• Support for Personalized Learning (SPL) Overview</li> <li>• Specific Learning Disabilities (SLD) Eligibility</li> <li>• Framework of Support:               <ul style="list-style-type: none"> <li>○ District-Level Practice Profile</li> <li>○ School-Level Practice Profile</li> <li>○ Classroom-Level Practice Profile</li> </ul> </li> <li>• Support for Personalized Learning (SPL) Documentation Utilizing WVEIS On the Web (WOW)</li> <li>• Parent and Community Partnerships</li> <li>• Support for Personalized Learning (SPL) Scheduling: Elementary/Middle/High</li> </ul>	Instructional Practices for ELA and Mathematics /NXGen CSOs and Behavior: <ul style="list-style-type: none"> <li>• Formative/Classroom Assessment Processes</li> <li>• Differentiated Instruction</li> <li>• Scaffolding</li> <li>• Vocabulary</li> <li>• Universal Design for Learning</li> <li>• Cognitive Strategy Instruction</li> <li>• Technology</li> </ul> 1. CORE 2. TARGETED 3. INTENSIVE	<ul style="list-style-type: none"> <li>• Leadership</li> <li>• Teams and Processes: Problem-Solving</li> <li>• School Climate and Culture</li> <li>• Assessment               <ul style="list-style-type: none"> <li>○ Screening/Interim</li> <li>○ Progress Monitoring/Documentation</li> <li>○ Diagnostic</li> <li>○ Summative</li> </ul> </li> </ul>

While awareness training related to SPL began in summer 2011, more extensive professional development related to implementation commenced in spring 2012, after the above-referenced SPL guidance document was issued. These professional development opportunities have included full-day and follow-up sessions to provide contextual information about SPL, including policy requirements and revisions; the six core principles of SPL; and the related resources available to districts, schools, and educators to support effective SPL implementation. This content has been paired with opportunities for participants to work with the WVDE to clarify misconceptions about the SPL process and to examine district and school practice profiles. The goal is to allow districts/schools an opportunity to engage in self-assessment, to prioritize their needs related to SPL, and to customize the SPL process to best suit their organizations.

During these initial sessions, participants engaged in conversations and planning focused specifically on their local cultures, needs, and resources and relevant to the rigorous expectations of the WV Next Generation CSOs. Regional directors, district superintendents, special education directors, Title I directors, psychologists, principals, coaches, and specialists have all had opportunities to participate in Phase 1 overview sessions and to review and discuss the available guidance and resource materials. The WVDE has tailored the content and activities to make this professional development relevant to various audiences, including IHEs, community members, parents, principals, school faculties, coaches, and teachers. From the beginning, the WVDE has communicated an expectation that the participants must scale up this professional development by sharing their learning at the district and school levels. Table 1.1 presents an

overview of the initial SPL professional development schedule.

**Table 1.1. SPL Initial Professional Development Schedule**

Date	Topic	Audience
July 2011	SPL, Including RTI and Critical Skills within a Common Collaborative Structure	District Administrators
September 2011	SPL – Specific Learning Disabilities (SLD) – Connecting Policy to Practice	Special Education Administrators Curriculum and Instructional Services
October 2011	SPL: An Overview	Federal Program Directors Superintendents
March 2012	SPL Guidance for West Virginia Schools and Districts SPL Guidance for West Virginia Schools and Districts – Specific Learning Disabilities (SLD) Guidance Document Regional Education Service Agency (RESA) Preview of SPL	Office of Special Programs Staff RESA Special Education Staff SLD Stakeholders RESA Teams
April 2012	SPL: An Overview SPL: An Overview/SLD Eligibility SLD Eligibility	New Principals School Psychologists Special Education Administrators
May 2012	SPL/SLD Overview	District Administrators Superintendents WVDE Leadership
June 2012	SPL/SLD Overview West Virginia Education Information System (WVEIS) on the Web (WoW) Interventions Tab (SPL Documentation)	District Administrators Parent Educator Resource Center (PERC) Parent/Educators Information Systems Staff
August 2012	SPL/SLD Overview	Teachers Principals

Planning for the remainder of the SPL professional development is currently underway. The WVDE's Office of Special Programs expects to finalize the schedule for Phase 1 in the coming months and Phases 2 and 3 by the conclusion of school years 2012-13 and 2013-14, respectively.

### **Technical Assistance for LEAs and Schools to Support Implementation Fidelity of SPL Processes**

A second dimension of capacity building is the development of regional technical assistance support specialists. By participating in all the WV Next Generation CSOs trainings, the Phase 1 SPL workshops, monthly meetings, and ongoing correspondence with the WVDE and with local leaders and teachers, the technical assistance support specialists are poised to facilitate needs assessment processes, interpret the core principles of SPL, and connect to relevant WV Next Generation CSOs and practices for the districts they serve.

### **CONTENT ACADEMIES FOR SPECIAL EDUCATORS**

The WVDE's Office of Special Programs also offers a series of content-specific professional development academies to help prepare special educators to deliver high-quality instruction that aligns with the

expectations set forth in the WV Next Generation CSOs. Table 1.2 provides an overview of the Mathematics Academies and Literacy Academies during 2011-12 and plans to continue the Mathematics Academies through 2012-13 and the Literacy Academies through 2013-14. Each academy is described in further detail below.

**Table 1.2. Schedule for the Mathematics and Literacy Academies to Support the Transition to the WV Next Generation CSOs**

	Mathematics Academies		Literacy Academies		
Focus	Deepen teachers' understandings of mathematics and their pedagogical knowledge.		Develop instructional expertise to provide strategically designed instruction that is relevant, engaging, and supportive of students' use of learning strategies to access all content effectively.		
Grade Levels	Grades K-4 Grades 5-8 Grades 9-12		Grades 5-9 Teams of 2-5 teachers from each participating school		
	2011-12	2012-13	2011-12	2012-13	2013-14
Summer Dates	June 13-17 June 27-July 1 July 11-15 July 25-29	June 11-15 June 18-22 June 25-29 July 16-20 July 23-27	June 13-14 June 16-17 June 27-28 July 11-12 July 14-15 July 26-27 August 4-5	June 11-12 June 14-15 June 18-19 June 21-22	June 17-18 June 20-21 June 24-25 June 27-28
Fall Dates	October 11 October 12 October 13 October 14	October 15 October 16 October 18 October 17 October 19 October 22	October 10 October 12 October 13 October 25 October 26	October 2 October 4 October 16 October 18	October 8 October 10 October 15 October 17
Spring Dates	March 26 March 27 March 28 March 29	February/March		April 16 April 17 April 18 April 19	April 15 April 16 April 17 April 18

### Literacy Academies

In these academies, special educators who serve students in grades 4-9 can deepen their understandings of formative assessment processes by examining and drawing conclusions on the value of descriptive vs. evaluative feedback. Teachers design and implement classroom investigations in collaboration with a small group of academy participants around their choices of one of these five questions:

- How can I incorporate and use more student self-assessment?
- What is school like from my students' points of view?
- How can I use formative/classroom assessment to determine my students' needs?
- How can I incorporate all the stages of gradual release of responsibility?

- How can I expose my students more to whole concepts as a meaningful reference for embedded information?

The WVDE's Office of Special Programs hosted Literacy Academies during 2011-12 and summer 2012 and plans to offer them again during 2012-13 and 2013-14. These academies build the capacity of educators to analyze, socialize, contextualize, and personalize reading/language arts instruction. The goal is to increase student engagement and to teach students to use a set of learning strategies to access independently, process more deeply, and respond to content in ways that align with the expectations set forth in the WV Next Generation CSOs across all content areas.

In addition to increasing the ability of students to access content, it is expected that achievement in reading/language arts will increase as students begin using these strategies more consistently. Participating educators will have access to technical assistance, provided by the WVDE's Office of Special Programs technical assistance specialists (formerly RTI specialists), and will be guided to respond to and generate formative feedback from students. Additional support for participants' learning will be provided through two annual follow-up meetings in each Regional Education Service Agency.

### Mathematics Academies

Special educators can build their capacity to customize instruction by participating in Mathematics Academies. A vendor, [Carnegie Learning](#), customizes and provides the content for these academies to special educators at all programmatic levels. The academies allow teachers to strengthen their mathematics content knowledge and better adjust their instruction to support student understanding and fill critical gaps. Additionally, their enhanced knowledge helps them better understand the WV Next Generation CSOs and design more relevant learning experiences for all students. The academies create a targeted learning experience for specific mathematics content areas and grade levels. They also help teachers make richer connections between early mathematics concepts and algebraic thinking. Project outcomes also can include student achievement gains in mathematics, especially among special education students. Additionally, these academies provide special educators with access to a professional learning community—enhanced through social networking tools.

### Autism Academies

Though not focused specifically upon the Next Generation CSOs, the Autism Academies, offered through a partnership between the WVDE's Office of Special Programs and the Autism Training Center at Marshall University, are a series of professional development opportunities that strengthen the instructional expertise of special educators who serve students with Autism Spectrum Disorders. Academies were held during 2011-12 and will continue in 2012-13. Additionally, training in the Autism Diagnostic Observation Schedule occurred during 2011-12. This assessment provides diagnostic information for psychologists, speech-language pathologists, and specialists to plan special programming for students with autism.

## SHELTERED INSTRUCTION OBSERVATION PROTOCOL MODEL FOR TEACHERS OF ELLS

The WVDE recognizes the linguistic demands that ELLs will experience in accessing the WV Next Generation CSOs. As previously mentioned, guidance and professional development provided through SPL as well as resources that utilize Universal Design for Learning are support strategies that serve the needs of all learners, including ELLs. Additionally, several districts have already begun implementing the SIOP® (Sheltered Instruction Observation Protocol) model to support ELLs. This research-based model provides protocols and supports to improve overall student comprehension, especially in content-area instruction. It also strengthens overall increased content literacy and facilitates the implementation of the WV Next Generation CSOs. During the WVDE 2012 Summer Institute for Teachers for ESL and World

Languages, the key ESL presenter provided an introduction to SIOP® fundamentals. SIOP® will be introduced to general educators during the summer 2013 Teacher Leadership Institutes and will provide yet another scaffold to support ELLs.

For more information about tasks related to the provision of professional development and supports for teachers see Table 1-5 in Appendix 1.

## PROFESSIONAL DEVELOPMENT FOR PRINCIPALS

The WVDE recognizes the critical role that administrators are playing in transitioning their schools to the WV Next Generation CSOs. Instructional leadership is the leading skill needed by principals to navigate this transition, and, as such, it was identified as a critical component of the WVBE's 2011-12 goals for statewide professional development—that individuals who participate in state-sponsored professional development shall, as a result, “exhibit increased leadership and collaboration to facilitate school improvement.” During 2011-12, professional development providers conducted 352 sessions aligned to this goal.

Likewise, the previously mentioned WVBE Goals 1 and 2 for 2011-12 explicitly communicated the expectation that professional development must build participants' capacity to recognize and implement instruction and leadership practices that align to the CCSS. According to evaluation data collected by the WVDE's Office of Research, school and district administrators attended many of the 793 professional development sessions that aligned to these two goals during 2011-12.

For the past three years, the WVDE has included school administrators as required team members at Teacher Leadership Institutes and will continue to do so as the state moves closer to full implementation of the WV Next Generation CSOs. These institutes have included breakout sessions for principals, focusing on the monitoring and accountability aspects required for the transition.

Further, during 2011-12, the WVDE's Office of Instruction staff conducted regional trainings to build the expertise of staff at the eight Regional Education Service Agencies, central office administrators, and principals regarding the new standards. The Office of Instruction also provided six days of professional development to the principals and leadership teams of low-performing schools—in addition to both district- and school-level trainings.

The WVDE benefits from a unique relationship with the West Virginia Center for Professional Development in designing and delivering professional development for principals, assistant principals, and teachers. Successful completion of the center's Evaluation Leadership Institute is a requirement for administrative certification. Representatives of the WVDE's Division of Educator Quality and System Support's Office of Professional Preparation and the Office of School Improvement have collaborated with the center's chief executive and the director of principal programs in coordinating a redesign of the evaluation institute, based on the revised West Virginia Professional Teaching Standards and the WV Next Generation CSOs. A special emphasis has been placed on the new content standards and objectives as they relate to the professional teaching standards that involve curricula, planning, the learner, and the learning environment. This initiative has been undertaken principally to build capacity for implementing the state's revised educator evaluation system in 2013.

This initial collaborative effort between the center and the WVDE is seen as a gateway to continued joint projects related to specialized training for principals and assistant principals in understanding and implementing the WV Next Generation CSOs. The WVDE will continue exploring other opportunities to collaborate with the center and for other professional development venues to prepare principals and assistant principals for the transition to the WV Next Generation CSOs.

For more information about the provision of professional development and supports for principals see Table 1-6 in Appendix 1.

## DEVELOPMENT AND DISSEMINATION OF HIGH-QUALITY INSTRUCTIONAL MATERIALS

The WVDE's Office of Instruction uses [Teach 21](#) as a springboard for publicizing the WV Next Generation CSOs and for providing high-quality instructional resources to teachers. To date, the site has been visited by approximately 900,000 visitors from 187 countries and territories and boasts approximately 41,400 regular users (individuals accessing the site 200 times or more).

During 2012-13, all existing instructional resources available on Teach 21 (e.g., model lessons, units, project-based learning [PBL] units of study, video clips, and professional development resources) will be reviewed and revised for alignment with the WV Next Generation CSOs for ELA, literacy, and mathematics. This effort will use a peer-review process designed by Jay McTighe and Grant Wiggins and rubrics aligned with the Understanding by Design framework. Resources that cannot be brought into direct alignment with the new standards will be removed from the site. Additional resources, with an emphasis on PBL and inquiry, will be identified or designed by classroom teachers under contract with the WVDE to support the content and expectations set forth in the WV Next Generation CSOs. The teachers will prioritize any standards that are weakly represented or nonexistent in the state's current instructional materials.

Teach 21 currently contains high-quality instructional resources aligned to the following key areas:

- ninth-grade ELA units, developed using the WV Next Generation CSOs:
  - <http://wvde.state.wv.us/teach21/Grade9NxGUnitPlans.html>
- elementary mathematics cluster lessons:
  - [http://wveis.k12.wv.us/Teach21/public/ng\\_unit\\_plans/LP/LPO\\_menu.cfm](http://wveis.k12.wv.us/Teach21/public/ng_unit_plans/LP/LPO_menu.cfm)
- units for teachers of Math I:
  - <http://wvde.state.wv.us/teach21/Math1Units.html>
- units for teachers implementing English 12 College and Career Readiness (English 12 CR)—this course assists students who have not met the requirements of the college and career readiness standards as evidenced by the Smarter Balanced summative assessment (to be administered in the 11th grade):
  - <http://wvde.state.wv.us/teach21/English12CR.html>

In addition to teacher developed instructional resources, West Virginia is an adoption state; current law and WVBE [Policy 2445.41](#) have been revised to support the use of instructional materials developed by publishing companies aligned with the WV Next Generation CSOs. The adoption schedule, determined by WVBE [Policy 2445.40](#), is based on a six-year cycle with opportunities to review newly developed resources in off-cycle years. To provide teachers with the tools to deliver the curriculum and meet the WV Next Generation CSOs, the instructional materials review committee analyzes, assesses, selects, and recommends to the WVBE print, electronic, and kit-based instructional resources; learning technologies; and other instructional materials. The instructional materials adoption procedure is guided by a select set of criteria, originating from the WV 21<sup>st</sup> Century CSOs, and includes requirements for equity and accessibility. The review committee comprises master teachers recognized for their content expertise and recommended by WVDE content coordinators.

West Virginia is currently in the process of adopting instructional materials for social studies grades in

grades K-12, including literacy in grades 6-12, and for mathematics in grades K-8. All resources must be aligned with the WV Next Generation CSOs. The full calendar for instructional materials adoption for 2012-13 can be found at <http://wvde.state.wv.us/materials/calendar.html>.

Additionally, as a governing state in the SBAC, West Virginia will have access to all resources in the digital library, as described in the [Smarter Balanced Work Plan for the Digital Library with Formative Assessment Practices and Professional Learning](#). It includes examples of instructional best practices at each grade level; strategies for cross-classroom collaboration; and professional development resources, such as scoring rubrics for performance tasks that promote reliability on teacher-scored portions of the assessments. To ensure a successful transition to the new assessments, SBAC will convene teacher cadres from each member state in summer 2013. These meetings will introduce professional development modules and exemplar modules of formative tasks and tools. West Virginia will identify a cadre of master teachers to participate in these meetings, design a quality professional development experience based upon what they learn at the meetings, and disseminate this professional development experience to all teachers across the eight Regional Education Service Agencies by 2014. WVDE staff and the cadre of master teachers will collaborate to help educators across the state learn how to use the new assessment system efficiently by focusing on the effectiveness of all three assessment components—formative processes, interim assessments, and summative assessments—in monitoring the progress of all students.

For more information about tasks related to instructional materials development/adoption see Table 1-7 in Appendix 1.

## **EXPANSION OF ACCESS TO ACCELERATED LEARNING OPPORTUNITIES AND SUCCESSFULLY TRANSITIONING STUDENTS TO COLLEGE AND CAREERS**

The WVDE is committed to providing rigorous and accelerated learning opportunities for all students. West Virginia has set broad goals aligned to this expectation and has set forth on a path to establish and maintain a system of high-quality and coordinated policy and programming in this area. The WVBE also recently approved the reorganization of the WVDE to support a more personalized learning system for students—one that supports anywhere/anytime learning and that represents true transformation. This new organizational structure will require major policy revisions that acknowledge learning in a variety of settings tailored to the progress of each individual student. Implementation of these initiatives will bolster the quality of instruction for students who take part in accelerated learning opportunities, increase participation in innovative and rigorous programs with proven track records of success, and create a culture of high expectations that lead to postsecondary success.

### **ADVANCED PLACEMENT®**

According to the College Board's annual *Report to the Nation*, West Virginia continues to show significant growth in its Advanced Placement® (AP®) program. The national report reveals that 20 percent of the state's 2011 class of high school graduates took an AP course before graduation—the highest percentage ever for West Virginia. The data illustrate that the state is closing in on the goal set by WVAP2014 ([WV AP Plan](#))—a partnership among the College Board, West Virginia Department of Education and the Arts, the West Virginia Center for Professional Development, the WVDE, the WVBE, and the West Virginia Higher Education Policy Commission. This initiative is working to ensure that by 2014, at least 25 percent of the state's high school students will have taken an AP course before graduation. Additional goals of the WVAP2014 include ensuring that 15% of the graduating class of 2014 earns a score of 3+ on AP exams and closing the equity/excellence gap for African American students by 2014.

The *Report to the Nation* results are reflective of the productivity of this coordinated effort. Over the past 10

years, West Virginia has gone from 8.8 percent high school participation in AP (2001) to 20.5 percent participation (2011). In addition, more low-income students are taking AP courses—low-income students in the 2011 graduating class took nearly 1,100 exams.

West Virginia requires every high school to offer at least one AP® course in each of the four core subjects and is one of only four states that mandates professional development for AP® teachers, principals, and AP® coordinators (Arkansas, Mississippi, South Carolina, and West Virginia). Per WVBE Policy [2510](#), county boards of education must ensure that

- students have access to at least four College Board AP® courses annually (at least one from each of the core content areas of ELA, mathematics, science, and social studies)—these courses also can be accessed through the West Virginia Virtual School: <http://virtualschool.k12.wv.us/vschool/courses/coursecatalog.cfm>;
- all AP® courses must have syllabi approved by the College Board;
- any AP® or International Baccalaureate course can be substituted for a content-related graduation requirement;
- all AP® courses shall be taught by a teacher who has completed the required professional development (effective 2012-13)—WVBE Policy 2515 requires that grades earned in an AP® course be weighted;
- all secondary teachers who teach College Board AP® courses complete the required professional development—the West Virginia Center for Professional Development’s Advanced Placement® Summer Institute (APSI) or another College Board-endorsed APSI;
- teachers of AP® courses (a) attend an APSI once every three years after completing the initial APSI and (b) attend an AP® fall workshop every two years (effective 2012-2013);
- all high school principals attend a College Board-endorsed AP®-related workshop (such as the ones delivered by the West Virginia Center for Professional Development) once every two years (effective 2012-2013); and
- all AP® coordinators attend an AP® coordinator’s workshop annually (effective 2012-2013).

The WVDE has also linked student achievement on the ACT PLAN assessment, taken each fall by all 10<sup>th</sup>-grade students, to predict success in AP® courses. All high schools are provided a PLAN to AP® [brochure](#) and a PLAN to AP® [parent letter](#), which strongly encourage students who achieve the PLAN college readiness benchmarks to participate in AP® courses. Additional AP® initiatives include the following:

- **Advanced Placement® Incentive Program (APIP).** This program, funded through a federal grant, provides low-income students with financial assistance to cover part or all of the costs of AP® test fees. It has enabled West Virginia to offer the courses to an increasing number of students.
- **Advanced Placement® Rising Scholars.** This program recognizes students who earn a three, four, or five on at least three AP exams before their senior years of high school. The College Board named 199 West Virginia students as rising scholars, representing the sixth consecutive year that West Virginia has broken its record for AP® scholars. In addition to the Rising Scholars, this program recognizes two State Scholars—the male and female students who earn a three, four, or five on the most AP® exams during their high school careers.
- **Advanced Placement® Success Initiative.** This initiative supports teachers and students in designated AP® courses. The program is divided into two strands: Language Arts/Social Studies and Mathematics/Science. Funded, in part, by the Claude Worthington Benedum Foundation, the initiative offers (1) professional development for teaching content effectively while also preparing

students for AP® exams, (2) academic enrichment sessions for students outside regular classroom times, and (3) an outreach campaign to make parents more familiar with the potential benefits of AP®.

In light of these accomplishments, West Virginia recently received the College Board Beacon Award, celebrating the state's commitment to enhancing college readiness through AP®: <http://www.wvcpd.org/cmswiki.aspx?name=apbeaconaward>).

## DUAL CREDIT COURSES FOR COLLEGE CREDIT

Many of West Virginia's high schools offer dual credit programs, which allow high school students to earn college credit at participating IHEs. The WVBE uses a waiver process when high schools wish to offer dual credit courses that substitute for graduation requirement. Schools may offer dual credit as elective credit without a waiver. One area that has been identified for improvement is the establishment of statewide standards for dual credit courses. Currently, those standards depend on agreements between individual high schools and IHEs. The state Superintendent of Schools and the Vice Chancellor for the state Higher Education Policy Commission agree to address this issue jointly during 2012-13 and present recommendations to their respective boards.

In addition to individual school systems' dual credit offerings, the WVDE established West Virginia EDGE (Earn a Degree—Graduate Early) in 2001. EDGE helps align curricula between the secondary and postsecondary levels. The alignment process identifies curriculum gaps, eliminates curriculum duplication, and sets curriculum mastery levels to predetermined standards. Through EDGE, students can earn community and technical college credit free of charge for the duplicated secondary and postsecondary courses identified during the curriculum alignment process. Students earn EDGE credits by receiving a passing grade for identified career/technical education (CTE) courses and also by passing end-of-course exams. During 2011-12, West Virginia students earned more than 80,000 EDGE college credits (compared to less than 1,000 at the beginning of the initiative).

## ADDRESSING POSTSECONDARY REMEDIATION RATES

WVBE [Policy 2510](#) (*Assuring the Quality of Education: Regulations for Education Programs*) requires students who do not achieve the college and career readiness standard on the grade 11 West Virginia Educational Standards Test 2 (WESTEST 2) in either mathematics or ELA to enroll in the Transition Mathematics for Seniors course and/or the English 12 College and Career Ready (English 12 CR) course. To address the number of high school graduates entering postsecondary education in need of remediation, the WVDE and the state Higher Education Policy Commission developed these transition courses to improve alignment between K-12 and higher education. The courses are designed for high school seniors who plan to attend college but who score below the legislatively mandated level for placement into credit-bearing courses. The Transition Mathematics for Seniors course was implemented in all West Virginia high schools beginning in 2011-12. The English 12 CR course was piloted in 2011-12 and will be integrated into the high school curriculum in 2012-13. These courses align with the CCSS and have been informed by West Virginia's leadership in the SBAC. More information about these courses can be found at

Mathematics: <http://wvde.state.wv.us/policies/p2520.2b.pdf>

English language arts: <http://wvde.state.wv.us/policies/p2520.1a.pdf>

WVBE Policy 2510 also requires students enrolled in the Transition Mathematics for Seniors course and the English 12 CR course to take end-of-course assessments to provide timely feedback on their readiness for college-entry level course work and career. The end-of-course exams (COMPASS®) will align with the state Higher Education Policy Commission's *Series 21, Freshman Assessment and Placement Standards*. In June 2012, ACT updated the item pools for COMPASS® to reflect the CCSS. Students who meet the COMPASS® benchmarks, as defined by *Series 21, Freshman Assessment and Placement Standards*, will be placed in college credit-bearing mathematics and English courses and not in developmental courses.

## CAREER READINESS

West Virginia has developed a series of rigorous CTE career concentrations around six career clusters (<http://careertech.k12.wv.us/careerpathways/cp.php>). Students who complete one or more of the CTE concentrations must complete WorkKeys® assessments to demonstrate the acquisition of necessary mathematics and reading skills for the workplace. Students who meet the established WorkKeys® standards receive the Governor's Work Readiness Credential. CTE students also must complete a performance-based assessment that demonstrates they have achieved the technical knowledge and skills needed to enter the workplace and/or continue in further job training and education. The WVDE also requires CTE programs to offer students an opportunity to acquire industry-recognized credentials and/or licenses (e.g., American Welding Society, Certified Nurse Assistant).

In 2012, the West Virginia Legislature passed [Senate Bill 436](#): Community Technical College/Career Technical Education Consortia Planning Districts. It establishes community and technical college/CTE consortia districts for all community and technical colleges to ensure that the full range of programs and services is provided throughout the state.

## TRANSITION TO POST-SCHOOL OUTCOMES

Moving all students toward college and career readiness is essential. The WVDE coordinates efforts to address the postsecondary transition needs of students with disabilities (<http://wvde.state.wv.us/osp/Transition/TransitionIntro.html>). The WVDE and a stakeholder group of education and non-education agencies and advocates have developed guidance documents, protocols, and resources (<http://wvde.state.wv.us/osp/Transition/wvguidancedocuments.html>) to support students, parents, school staff, and community members.

## COLLEGE AND CAREER EDUCATION AND DEVELOPMENT

The WVDE understands it is critical to increase the number of students (especially high-poverty, at-risk students) who are prepared to enter and succeed in postsecondary education. It is essential that students have the appropriate supports to access appropriate resources as part of purposeful college and career plans.

In 1996, the West Virginia Legislature passed an act requiring every public school student to have an Individualized Student Transition Plan. WVBE Policy 2510, Section 5.5.2, promulgated the rule: “An Individualized Student Transition Plan (hereinafter ISTP) covering grades 9-12 and the first year beyond graduation from high school is developed for every student in consultation with her/his parents/guardian and school counselor or advisor. The ISTP must be reviewed annually with the student and his/her parent or guardian.” A variety of resources are available for developing and revising the ISTP:

- **LINKS.** The Learning Individualized Needs, Knowledge and Skills initiative (LINKS) establishes a research- and standards-based West Virginia Student Advisement Model that provides implementation tools, curriculum maps, and web-based standards-based lesson plans that enhance academic, career, and personal-social development for all West Virginia middle and high school students (<http://wvde.state.wv.us/counselors/links/about.html>).
- **Strategic Compass.** This program is a customized career assessment and exploration system available to West Virginia students (<http://westvirginia.strategiccompass.com/>).
- **College Foundation of West Virginia.** This one-stop website allows students of all ages to access information about higher education and financial aid options and to apply to college (<https://secure.cfwv.com/>). Since the College Foundation of West Virginia website was launched in October 2009, more than 67,000 accounts have been created, and more than

28,000 college applications have been submitted.

- **Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP).** This federally funded six-year program—coordinated through the state Higher Education Policy Commission—helps students in 10 high-need counties plan, apply, and pay for training beyond high school (<http://www.wvgearup.org/index.html>).
- **PROMISE Scholarship.** In this merit-based financial aid program, West Virginia students who achieve certain academic goals are eligible to receive funds to help pay for college. Eligible high school graduates can receive annual awards of up to \$4,750 to cover the costs of tuition and mandatory fees at public or independent IHEs in West Virginia. Since the program started, more than 32,796 college students have received PROMISE scholarship funds ([http://secure.cfww.com/Financial\\_Aid\\_Planning/Scholarships/Scholarships\\_and\\_Grants/West\\_Virginia\\_PROMISE.aspx](http://secure.cfww.com/Financial_Aid_Planning/Scholarships/Scholarships_and_Grants/West_Virginia_PROMISE.aspx)).

## OTHER ACCELERATED LEARNING OPPORTUNITIES

There are other significant examples of collaborative partnerships with state agencies, high schools, IHEs, and/or other business and community entities that provide West Virginia students with opportunities to experience rigorous courses and experiential learning that support college and career readiness.

- **Teach21** (<http://wvde.state.wv.us/teach21/>). This website was designed by West Virginia teachers to help colleagues plan and deliver effective 21st century instruction. It enables educators to access 21st century content standards, learning skills, technology tools, and other resources that exemplify rigorous and relevant instructional design and delivery. The depth of resources support West Virginia's goal to prepare students to be successful in tomorrow's world.
- **Parents21** (<http://wvde.state.wv.us/parents21/>). This website provides parents and guardians with tools to help their children succeed in the 21st century classroom. Research shows that parental involvement in a child's education is a critical factor in improving academic achievement.
- **Learn21** (<http://wvde.state.wv.us/learn21/>). This site provides students with access to anywhere/anytime learning. By clicking on a subject (mathematics, science, social studies, language arts, the arts, CTE), students can access links to external websites that provide extra help or enrichment through a variety of interactive resources.
- **West Virginia Youth Science Camp.** In 2011, the National Youth Science Camp partnered with the WVDE for the inaugural year of the project. The West Virginia Youth Science Camp seeks to honor and encourage high-achieving science-oriented students while introducing them to explore vital 21st century science topics they may not have otherwise considered. Guest lecturers in different STEM (science, technology, engineering, and mathematics) fields attend the camp and provide directed studies. During follow-up weekends throughout the school year, the students come back together to report the findings of their ongoing research.
- **West Virginia Spanish Language Immersion Camp.** The WVDE, in partnership with the Canaan Valley Institute and the National Youth Science Foundation, sponsored the inaugural West Virginia Spanish Language Immersion Camp. Inspired by the nationally known Concordia Language Villages, the camp fully immerses students in the language, food, music, art, history, and customs of the Spanish-speaking world while engaging in authentic hands-on studies.
- **Innovation Zones.** This program, created by an act of the West Virginia Legislature in 2009, encourages schools to innovate by permitting certain state laws, rules, and policies to be waived. Such provisions give educators greater local control over the curriculum, schedule, and site-based leadership in their schools. Schools designated as *innovation zones* essentially become learning laboratories with the flexibility to try innovative teaching strategies. A national report on school innovation has cited West Virginia's innovation zones as models for other states seeking to improve their schools. *Innovation in U.S. Public School Districts* by Hanover Research analyzed educational innovations in public schools with a focus on 21st century learning skills. States

selected for inclusion in the report were chosen based on their comprehensive 21<sup>st</sup> century skills curriculum and agenda. The report said West Virginia’s innovation zones “allow selected districts more flexibility with established state education policy in order to experiment with new educational structures and teaching techniques.” The report also noted that innovation zones allow for flexible scheduling, integration of the arts, the improvement of dropout rates, curriculum centered on the real world, and foreign language instruction in elementary schools.

For more information about tasks related to expanding access to and participation in accelerated learning programs see Table 1-8 in Appendix 1.

## **COLLABORATION WITH WEST VIRGINIA IHEs TO HELP TEACHERS AND PRINCIPALS TRANSITION TO THE WV NEXT GENERATION CSOs**

The WVDE’s Division of Educator Quality and System Support and Division of Teaching and Learning are collaborating to ensure that all of West Virginia’s 20 IHE teacher and principal preparation programs better prepare teachers to instruct students on the WV Next Generation CSOs. The divisions’ efforts also prepare principals to support teachers in designing unique opportunities that engage students meaningfully in learning the newly adopted ELA and mathematics curricula based on the CCSS.

## **SPECIALIZED PROFESSIONAL DEVELOPMENT FOR INSTITUTIONS OF HIGHER EDUCATION IN THE WV NEXT GENERATION CSOs**

In February 2012, the WVDE’s Office of Professional Preparation invited faculty and administrators from the 20 West Virginia IHEs with state-approved educator preparation programs to attend a meeting cosponsored by the WVDE’s Office of Instruction. Representatives of schools of education as well as arts & sciences faculty were asked to join in common purpose to better understand the WV Next Generation CSOs and the effective implementation of these standards and objectives in the K-12 continuum and educator preparation programs. More than 150 professors and deans of education and the arts & sciences participated in this comprehensive in-depth exploration of teaching and learning. A special emphasis was placed on personalized learning for all K-12 learners and underscored the designing of learning opportunities for students with exceptionalities and low-achieving students.

The executive director of the Office of Instruction began the meeting with a perspective on developing and implementing the WV Next Generation CSOs. She communicated that the new standards are critical to continuing national and statewide efforts to create opportunities for students to enjoy relevant and rigorous learning in a system that prepares students to attend college or pursue careers of their choice. Participants also were informed about the key stakeholders who helped develop the standards.

The participants received a thorough overview of the ELA standards and objectives. The presentation gave special importance to key differences between the WV Next Generation CSOs and West Virginia’s existing curriculum standards: the WV 21<sup>st</sup> Century CSOs. Resources, including a multimedia presentation featuring David Coleman and other coauthors of the CCSS for ELA, were shared with attendees. Additionally, the participants had ample opportunities to develop preliminary instructional designs for various learners across multiple contexts. Particular emphasis was placed on designing personalized instruction based on the results of formative assessments and addressing all learners within the self-contained ELA learning environment.

Likewise, WVDE staff provided a comprehensive review of key components and innovations in the WV Next Generation CSOs for mathematics. The staff paid significant attention to teaching secondary

mathematics since the new standards for this area represent a critical paradigm shift in West Virginia. The staff also emphasized that the new CCSS-based curriculum replaces specific mathematics courses such as Algebra I, Algebra II, and Geometry with more fully integrated courses such as Math I and Math II. The participants explored numerous examples of these and other instructional shifts in the new curriculum through meaningful hands-on activities. They also were challenged to envision how mathematics might best be taught across the developmental continuum. Additionally, representatives of West Virginia IHEs examined how to better prepare elementary educators and secondary mathematics teachers in light of these changes.

This meeting was just the first in a series of meetings that will continue in 2012-13 and 2013-14 to support IHE faculty and administrators in reinvigorating their educator preparation programs. In particular, these meetings will help ensure that the standards and objectives will be implemented with fidelity and address the specific needs of low-achieving students, students with disabilities, and ELLs. This collaborative effort is consistent with other initiatives undertaken by the WVDE to enhance educator effectiveness.

### **Preparation to Teach Math I through Online e-Learning for Educators Sessions**

One particular outgrowth of this exploratory partnership among representatives of higher education and staff from the Divisions of Teaching and Learning and Educator Quality and System Support has been the development of an online, e-learning series for a cohort of West Virginia teachers who hold Mathematics thru Algebra I certification to transition to teaching the Next Generation CSOs associated with Math I. The three-session online series is designed to align with the content necessary to teach the Math I course while also deepening teachers' own mathematical content knowledge. The first of three required sessions in 2012-2013 will be offered in October and November with the second session following in January and February. The final session will be presented in March and April. Teachers who attend all three consecutive sessions will receive a \$500 stipend upon successful completion of the 19-week series.

Among the expected outcomes of the online, e-learning series in mathematics is the creation of a sustainable cohort that will build capacity among the districts to teach secondary mathematics with fidelity to the Next Generation CSOs while also creating specialized focus on students with low achievement and/or with disabilities. University faculty who developed the courses for the series have included an action research component to gain additional insight into best practices to address multiples contexts for personalized and competency-based learning of mathematics.

### **Enhancing Rigor in the Selection and Preparation of Elementary Educators to Teach Next Generation CSOs**

Representatives of the 19 West Virginia institutions of higher education who offer educator preparation in Elementary Education have begun a series of meetings to evaluate selection and other evaluation criteria for candidates for elementary certification. The first two meetings, held in Charleston on April 5 and June 8, 2012, initiated a review of current assessments used to evaluate content and pedagogical knowledge of candidates who complete elementary education preparation programs. The university and college administrators and faculty deliberated whether to migrate to a new Praxis II test developed by the Educational Testing Service that delineates four separate sub-tests to assess candidates' content knowledge in reading and language arts, mathematics, science and social studies as an indicator of readiness to teach across the elementary programmatic level. Participants actually took a sampling of each of the four sub-tests to determine whether the rigor and expectations were appropriate for each content area to engage the heightened rigor and content knowledge demand essential to teaching and learning through the Next Generation CSOs in the elementary school.

Discussion ensued about how best to reflect elementary educators' competency to teach a rigorous curriculum through assessment upon program completion. Consensus was reached by the institutions that an introductory year would precede full implementation of the new Praxis II series test for candidates for elementary certification as recommended for adoption. Liaisons from the Office of Professional

Preparation will monitor closely results based on the newly adopted test while encouraging West Virginia's elementary educator preparation programs to discern additional avenues for ensuring elementary educators understand deeply the content they teach. Higher education faculty will convene in fall 2013 for a roundtable discussion of preliminary testing data to highlight areas of instructional focus to improve candidates' completion outcomes as appropriate.

### **Higher Education Community of Practice to Address Economically-Insecure Low-Achieving Students**

The Office of Professional Preparation is working with the Office of Federal Programs to convene a community of practice among higher education faculty to develop specific strategies and a specialized knowledge base for educator preparation programs to prepare West Virginia teachers to address low educational achievement among low-income students. The Office of Professional Preparation will invite key stakeholders of the 20 West Virginia universities and colleges that prepare teachers to share research and best practices related to educating students who live in rural poverty.

The first topical face-to-face meeting of the community of practice is scheduled for spring 2013 and will focus on interpretation of current achievement and economic data. Staff from the Office of Federal Programs will unpack these data for participants to prioritize the work of community of practice. An electronic forum will be in place to continue the community of practice's evolving understanding, developing strategies and exchange of ideas and best practices. The community of practice's primary goal is to alleviate to the degree possible through our educator preparation programs, and subsequently through our educational system, the double burden of economic insecurity and low achievement faced by many West Virginia children.

### **Collaboration with the Office of Special Programs**

The Office of Instruction and the Office of Professional Preparation are investigating the creation of a series of professional development for school of education faculty designed and delivered in the collaboration with the Office of Special Programs. This series will seek to build educator preparation programs' capacity to prepare educators to teach students with disabilities and other exceptionalities using Next Generation Content Standards and Objectives. The executive directors of all three offices are committed to the development of this initiative as the resulting series will greatly benefit educators and students alike. Representatives from educator preparation programs will likewise gain essential knowledge and practical experience in designing specialized learning opportunities for students with disabilities. The series will build on the conceptual framework developed through the Support for Personalized Learning initiative. Faculty of educator preparation programs, especially those working to prepare West Virginia's special educators, have responded favorably to this potential development. The first offering in this already highly anticipated specialized professional development series is being planned for early 2013.

### Capacity-Building Series for Educator Preparation

Table 1.3 provides an overview of additional capacity building activities to be undertaken by the WVDE to better prepare educators to deliver CCSS-aligned instruction.

**Table 1.3. Capacity Building Series for Educator Preparation**

Milestone & Timeline	Parties Responsible	Evidence	Resources	Challenges
<u>Fall 2012</u> (Ongoing)  Math I e-Learning Cohort	Offices of Instruction, Instructional Technology, and Professional Preparation	Mathematics through Algebra I teachers enrolled	WV e-Learning for Educators	Recruitment and completion
<u>January/February 2013</u>  Support for Personalized Learning Framework Initiative	Offices of Instruction, Professional Preparation and Special Programs	Increased university and college faculty and educator capacity to support students with disabilities through Next Generation CSOs	Support for Personalized Learning framework	Extending to all educator preparation endorsement areas other than Special Education
<u>Spring 2013</u>  Community of Practice on Economically Insecure Low-Achieving Students	Offices of Federal Programs and Professional Preparation	Electronic forum established  Emerging strategies and specialized knowledge base  Improved student outcomes	University- and college-level scholarship and research  WVDE data management systems	Connecting educator preparation program completion results to school-based student outcomes
<u>April 2013</u>  Math I e-Learning Cohort – Final 2012-2013 Session	Offices of Instruction, Instructional Technology, and Professional Preparation	Effective transition from Mathematics through Algebra I to Math I Fidelity to Next Generation CSOs	WV e-Learning for Educators  Research Findings  Teacher cohort	Retention and completion
<u>Fall 2013</u>  Elementary Education Roundtable	Office of Professional Preparation	Improved elementary teacher and student performance	Praxis II assessment data for elementary education candidates	Uneven candidate selection and distribution

## EDUCATIONAL PERSONNEL PREPARATION ADVISORY COMMITTEES

The WVBE mandates that each of the 20 IHEs offering an educator preparation program maintain an educational personnel preparation advisory committee, including faculty and community members, students, and public school teachers. These committee members serve the institution as advisors in the development and improvement of educational programs. A teacher quality coordinator from WVDE's Office of Professional Preparation serves as a nonvoting liaison to each institution's committee. These committees not only coordinate the review of schools of education programming but also seek opportunities for preparing teachers and school leaders more effectively. In this capacity, the committees often request presentations and other resources to explore new ideas and approaches in educator preparation.

[Policy 5100](#) (*Approval of Educational Personnel Preparation Programs*) stipulates that these committees meet at least once each semester. The emerging, progressive implementation of the WV Next Generation CSOs has been a consistent agenda item at these semiannual events. The WVDE's liaisons have responded to multiple requests for information regarding the adoption and implementation of the WV Next Generation CSOs. These information sessions have steadily built capacity for higher education faculty to prepare teachers and school leaders to implement the standards. A consistent theme has been increasing the awareness and understanding of how teaching and learning must be designed to address a variety of learners across multiple contexts in terms of readiness to learn and achievement.

## EDUCATOR PREPARATION FACULTY PARTICIPATION IN TEACHER LEADERSHIP INSTITUTES

A key collaborative venture between the WVDE's Office of Professional Preparation and the Office of Instruction has been to sponsor a cohort of faculty from the IHEs to participate in the state's signature professional development opportunity: Teacher Leadership Institutes. These annual weeklong institutes are led by and for teachers to learn state-of-the-art instructional designs and theoretical, as well as pragmatic, approaches and best practices. The institutes have recently served primarily to deliver specialized professional development and build statewide instructional capacity for implementing the WV Next Generation CSOs in ELA and mathematics.

This particular emphasis began in summer 2011, when the institute sponsored a Kindergarten Academy that centered exclusively on implementing the WV Next Generation CSOs for kindergarten. Various West Virginia educator preparation faculty attended the entire weeklong institute, which focused on ensuring that all teachers understand the necessity of providing a solid learner-centered educational foundation for all West Virginia children. During the institute, educator preparation faculty took part in a variety of activities, including seminars and hands-on investigations that explored the new content and pedagogical approaches.

The WVDE's Office of Instruction and Office of Professional Preparation are currently exploring the development of specialized learning activities that allow a cohort of IHE faculty to investigate the WV Next Generation CSOs more purposefully and in greater depth. These activities would apply specifically to preparation programs that target students with disabilities and low-achieving students, especially within the clinical practicum setting. The first such cohort is tentatively scheduled to begin with the 2013 summer Teacher Leadership Institute. The Office of Professional Preparation will take the lead in identifying the cohort participants, while the Office of Instruction will assume the primary responsibility for designing higher education professional development modules to be delivered at the institute.

## **BUILDING CAPACITY FOR PERSONALIZED LEARNING WITH THE WV NEXT GENERATION CSOS**

The WVDE's Office of Instruction and Office of Professional Preparation also partnered in an initiative to optimize opportunities for students to learn using the WV Next Generation CSOs. This event, which took place in July 2012 as part of the Teacher Leadership Institute, included several higher education faculty members from the arts & sciences and from schools of education serving as staff and facilitators. The half-day meeting focused on developing student learning goals as part of instructional design and evaluating educator performance. Particular emphasis was given to establishing a clear context for learning; participants designed learning progressions with robust formative assessments to measure progress. The teachers and professors created learning sequences to address the academic and social-emotional needs of special student populations, including students with disabilities and ELLs. Participants worked collaboratively to design student learning targets and content-specific student learning goals using two data points and multiple measurements for specific groups of students with differing degrees of readiness for learning. College and university faculty specifically asked how to improve collaboration with students in the design of instruction to meet specific personalized student needs.

## **STANDARDS FOR PREPARATION PROGRAMS FOR PRINCIPALS AND TEACHERS**

Teaching and learning through the WV Next Generation CSOs will form an integral part of teacher and school leader practice and preparation. Preparing principals to be strong instructional leaders is essential to implementing the new standards. The Office of Professional Preparation has convened a series of meetings with representatives from the state's six IHE that prepare principals to develop revised standards for the state's leadership preparation programs. These meetings also involved key stakeholders, including department chairs, professors, district administrators, graduate students, and principals. The stakeholder group first met in February 2012 and then again in April 2012; the series will continue in fall 2012. This leadership standard stakeholder group is built on the model established by the taskforce that developed the West Virginia Professional Teaching Standards, which led eventually to all 20 West Virginia educator preparation programs undergoing a rigorous reapproval process to demonstrate alignment with the new teaching standards. The leadership preparation programs will carry out a similar reapproval process once the standards have been approved—anticipated to begin in fall 2013.

## **CROSS-STATE ENGAGEMENT THROUGH THE STATE CONSORTIUM ON EDUCATOR EFFECTIVENESS**

West Virginia enjoys active membership in the CCSSO's State Consortium on Educator Effectiveness (SCEE). At the June 2012 SCEE National Summit on Educator Effectiveness, West Virginia's team included higher education representatives for teacher and principal preparation. Team members participated in sessions on evaluating teachers in nontested grades and subjects and on enhancing principal and leader effectiveness through alignment with leadership standards. By collaborating with other states, the WVDE is now better informed in terms of developing revised leadership standards and other initiatives. The WVDE's Office of Professional Preparation has also benefited from the technical assistance provided by the consortium's Educator in Residence Mary-Dean Barringer.

In October 2011, prior to the 2012 summit, West Virginia's state team participated in an SCEE topical meeting in St. Louis that focused on educator evaluation. At this meeting, Office of Professional Preparation staff presented West Virginia's evaluation framework for discussion and review. The state's team will participate in the upcoming SCEE topical meeting in Charlotte, North Carolina, in September 2012. This meeting will focus specifically on teacher and leader preparation. The West Virginia team looks forward to working with colleagues from other SEAs to provide input into policies on teacher and leadership readiness and on educator preparation program approval, licensure, and certification. West Virginia's team has already made considerable progress in implementing a reapproval process for educator

preparation programs and seeks to share these experiences with colleagues from other states while gaining insight into how to improve them.

For more information about tasks related to collaboration with WV IHEs see Table 1-9 in Appendix 1.

## **EVALUATION OF CURRENT ASSESSMENTS AND TRANSITION PLAN FOR IMPLEMENTING THE WV NEXT GENERATION CSOs**

The WVDE, in collaboration with the state’s education community, has taken bold actions to implement a comprehensive assessment system that aligns with rigorous 21<sup>st</sup> century proficiency expectations and that includes summative and interim/diagnostic components. The available assessments employ a variety of challenging items, online administration for some components, and an array of opportunities for educators to gather formative and summative data about their students. By investing in this modern assessment system, West Virginia received an “A” grade from Quality Counts in the area of Standards, Assessment, and Accountability in 2006, 2008, 2009, 2010, and 2011<sup>1</sup>.

Additionally, West Virginia is in the process of augmenting the current assessment system, which provides excellent coverage for grades 3–11, to include standards-aligned formative assessments in pre-kindergarten, kindergarten, and grades 1 and 2. The inclusion of these new assessments, which will help prepare students for the CCSS, will ensure that valid and reliable information about student achievement is available to guide instruction and inform accountability at all levels of the education system.

Furthermore, because of the WVDE’s experience in this area, West Virginia serves as a governing state in the SBAC and has taken a key leadership role in developing the new assessment. WVDE staff currently serve on the following workgroups/committees for the consortium:

- Test Administration
- Formative Processes and Tools
- Technology Approach
- Technology Review Board
- Accessibility and Accommodations
- Performance Tasks

West Virginia also serves in a governing capacity in the following consortium areas:

- Teacher Involvement
- Procurement Study
- Technology Readiness Team

West Virginia has an ambitious plan to transition to the SBAC assessment by 2014-15. This plan includes field tests of the new SBAC assessment and online administration of a separate pilot assessment during 2012–13. These activities will help West Virginia gauge the level of administrative effort necessary to administer the SBAC assessment statewide in 2014-15.

The following section briefly describes the components of the current assessment system and the WVDE’s plans to transition these assessments during the coming years. The section is organized into five subsections: (1) Formative Assessments Available in Grades PK-2, (2) Summative Assessments Available

<sup>1</sup> In 2007, Quality Counts did not include state grades. However, West Virginia was ranked 9th of 51 in Standards, Assessment, and Accountability this year: <http://www.edweek.org/media/ew/qc/2007/17shr.wv.h26.pdf>.

in Grades 3-12, (3) Interim/Diagnostic Assessments to Aid Teachers in Transitioning Students to the CCSS, (4) College Readiness Assessments, and (5) Career Readiness Assessments.

## FORMATIVE ASSESSMENTS AVAILABLE IN GRADES PK-2

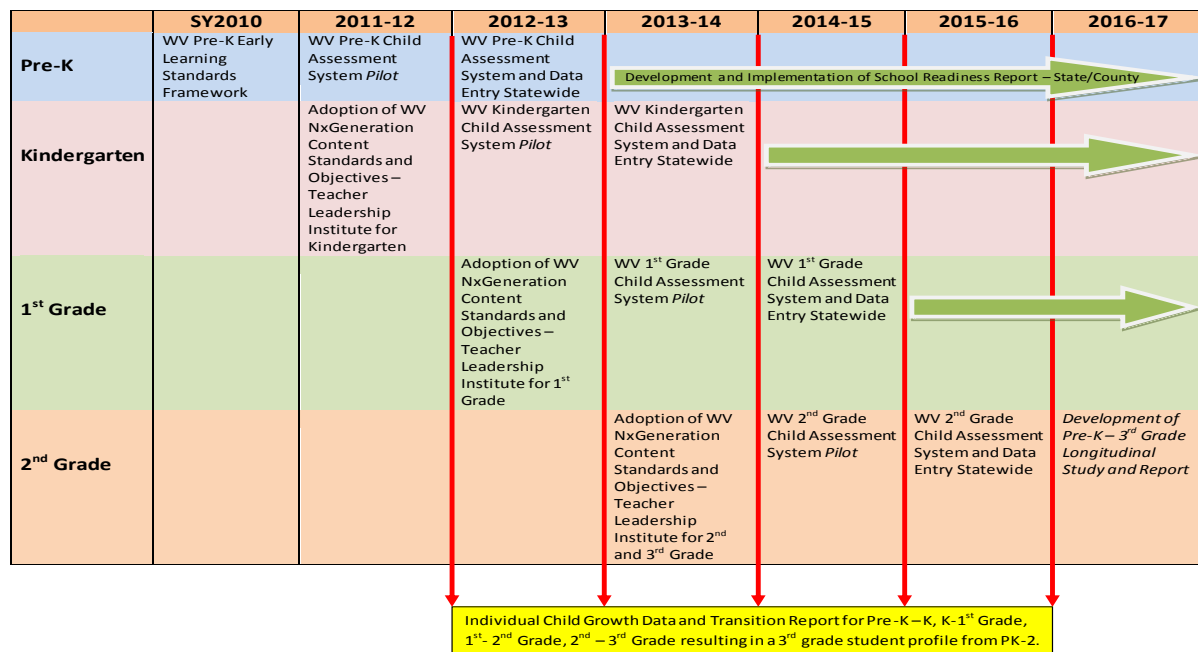

### Early Learning Scale (ELS)

The Early Learning Scale, developed by Rutgers University's National Institute for Early Education Research, is a formative, ongoing, performance-based classroom assessment tool that allows teachers to observe children's development over time, that informs intentional teaching, and that is user friendly to facilitate parent communication. Data for the Early Learning Scale are derived from ongoing assessment techniques that occur daily. The Early Learning Scale was included in the 2010 revisions to the West Virginia Early Learning Standards (WVBE [Policy 2520.15](#)).

**Expansion Plan for Early Childhood Assessment.** Over the next five years, the WVDE is projected to complete an ambitious project that will yield population and individualized growth data for children in grades pre-K through 2. These data will be available as part of a multiyear plan to pilot and establish a statewide system for early childhood formative assessment that benefits personalized learning for all children and that informs classroom instruction, planning, and family communication for children in grades pre-K through 2.

This project is already underway via the ongoing pilot of the West Virginia Kindergarten Child Assessment System in selected counties during 2012-13. Figure 1.3 displays a comprehensive timeline for piloting and implementing the early childhood assessment project in conjunction with the rollout of the West Virginia Early Learning/Next Generation CSOs. The project will be undertaken by the WVDE's Office of Early Learning in collaboration with the offices of Assessment and Accountability, Research, Information Systems, and Instruction.

**Figure 1.3. Rollout of Additional Early Childhood Assessment Components**

The early childhood assessment project will measure children's development across all learning domains, with specific growth data available for language and literacy, mathematics, science, and

social emotional/social studies. Components have been built in to ensure instrument validity and teacher reliability. Work with the Early Learning Scale will provide a reliability process that requires teachers to score at a certain percentage before their classroom data can be considered valid for use in the state's early childhood data reporting system. Additionally, the integration of various report components into the system will clearly articulate student growth to a variety of audiences, including administrators, teachers, and families. The student profile, or Child Accomplishments Summary, will provide a narrative based on individual children's development across domains at various points throughout the school year. It also will generate annual outcome reports with aggregate growth data based on the accomplishments of children at the state, district, site, classroom, and individual levels. This information will provide guidance to the WVDE regarding decisions about professional development, instruction, planning, and communication.

The completion of this plan will culminate in the development of a comprehensive system of assessments for grades pre-K-2 to complement the existing grades 3-12 system. This will bridge a critical gap in the current education data system, removing a black box that has posed considerable challenges to ascertaining information about student readiness and objectively evaluating the effectiveness of early interventions. The information from these assessments also could dramatically increase the quality of instruction for young students. For the first time in West Virginia history, teachers will have valid and reliable information regarding the ability of each student in early grades to access the state's academic achievement standards. Because these standards are aligned with elementary standards and the CCSS, students should enter the third grade more prepared than ever to participate actively in a quality education. Further, this assessment system will allow West Virginia to conduct unprecedented research utilizing longitudinal designs—informing both policy and program selection.

## SUMMATIVE ASSESSMENTS AVAILABLE IN GRADES 3–12

### West Virginia Educational Standards Test 2 (WESTEST 2)

The adoption of the WV 21<sup>st</sup> Century CSOs transitioned the state's education system from a set of standards that were aligned with only basic skills proficiency expectations to a nationally rigorous set of expectations based on nationally and internationally assessed content (e.g., NAEP, TIMSS, PIRLS, PISA). This produced a 180-degree turnaround in terms of academic expectations and compelled the state to develop and adopt an entirely new assessment system, the centerpiece of which is the West Virginia Educational Standards Test 2 (WESTEST 2).

**Test Development and Features Aligned to 21st Century Expectations/CCSS.** WESTEST 2, developed in 2007 and 2008, is administered annually in grades 3-11 in mathematics, reading/language arts, science, and social studies. The reading/language arts subtest of WESTEST 2 includes two components: (1) a selected response session that uses single or multiple connected passages of text and (2) an online writing assessment session that asks students to respond to writing prompts via a secure computer program—these prompts align to four genres (narrative, informative, persuasive, and descriptive). WESTEST 2 was adopted to ensure compliance with No Child Left Behind.

WESTEST 2 items were developed purposefully to align to 21<sup>st</sup> century expectations, many of which form the basis of the CCSS. Some of these characteristics include the following:

- engaging formats that employ various types of graphic organizers;
- increased item rigor to mirror the depth of knowledge level of the content standards and objectives;

- language and tools that reflect 21st century skills;
- scenarios and answers that reflect 21st century skills;
- real-world applications;
- items that require critical-thinking skills, including extrapolation and application; and
- application of problem solving and the potential for multiple approaches.

These parameters incorporate many of the characteristics of the CCSS's Standards for Mathematical Practice and the English Language Arts Anchor Standards. Table 1.4 and Table 1.5 provide overviews of this alignment:

**Table 1.4. Features of WESTEST 2 Aligned with CCSS Standards for Mathematical Practice**

Selected CCSS Standards for Mathematical Practice	Corresponding Features of WESTEST 2
Make sense of problems and persevere in solving them.	Many WESTEST 2 items have multiple methods for solving and still arriving at the same solution.  Many items include illustrations and/or graphic organizers to help students frame their thinking.
Reason abstractly and quantitatively.	WESTEST 2 items expect students to consider multiple pathways to solutions and to give attention to units of measurement.
Construct viable arguments and critique the reasoning of others.	WESTEST 2 items require students not only to calculate an answer but to identify a reasonable justification or to determine a viable argument.
Model with mathematics.	Many WESTEST 2 items incorporate scenarios as part of the information.  Students can use charts, graphs, or other models to solve the problems.
Use appropriate tools strategically.	Students can use calculators, rulers, and paper to solve problems; additionally, students can use embedded graphic organizers, if necessary.
Attend to precision.	Some items contain justifications for responses that require students not only to determine precise answers but to justify their processes.
Make use of structure.	A major component is pattern recognition and application to other situations.
Look for and express regularity in repeated reasoning.	Students are expected to recognize situations where common mathematical algorithms are required as part of the problem-solving process.

**Table 1.5. Features of WESTEST 2 Aligned with College and Career Readiness Anchor Standards for ELA**

College and Career Readiness Anchor Standards for ELA	Corresponding Features of WESTEST 2
Reading	Reading passages address the college and career readiness anchor standards for reading and language.  The passages represent a variety of writing genres and informational text.

	Students are expected to respond to items that link multiple texts, requiring them to use higher-order thinking skills and to generalize information.
Writing	<p>A separate online writing component addresses three of the four components of the college and career readiness anchor standards for writing and language. Each student responds to a randomly assigned passage and prompt from one of four genres: narrative, descriptive, informative or persuasive (only narrative or descriptive in grade 3). Passages and prompts are delivered electronically, and students respond via computer.</p> <p>The writing assessment is performance based and delivered online. As such, West Virginia has several years' experience developing and administering online performance assessments. The ability to include performance task assessments via an online platform is a cornerstone of the SBAC proposal.</p>
Speaking and Listening	WESTEST 2 does not assess speaking and listening.
Language	Several multiple-choice items on the reading/language arts test assess student knowledge of various components of the language standard. Additionally, student responses on the online writing assessment are scored in five analytic writing traits, including organization, development, sentence structure, word choice/grammar usage, and mechanics.

**2009 Benchmark Standard Setting.** West Virginia educators established the original 2008 cut scores for WESTEST 2 via the bookmark standard-setting methodology based on the fall 2008 field test of the assessment. These cut scores resulted in a distribution of performance, ranging from approximately 60 percent mastery in third grade to 40 percent in 11<sup>th</sup> grade—decidedly more rigorous than the prior assessment (WESTEST). However, in 2009, as West Virginia continued the transition to rigorous 21<sup>st</sup> century standards and assessments, the WVDE worked closely with its Technical Assistance Committee, LEA representatives, and educators to redefine mastery expectations through a groundbreaking benchmark standard-setting process recommended by Dr. Gary Phillips of the American Institutes for Research. The rationale was that the revision of proficiency expectations would more accurately reflect the policy expectation that West Virginia students would be able to meet and exceed national and international proficiency expectations. Ultimately, this transition has resulted in West Virginia being better positioned to transition to the CCSS.

As described by Phillips (2010), the benchmark method of standard setting begins with a review of empirical data. These data set the stage for policy decisions about the appropriateness of a set of cut scores, given real-world expectations that exist for students. This is contrary to traditional standards setting, which ends with a review of empirical data that results from stakeholder decisions about what “proficiency” represents.

In February 2009, the WVDE and test vendor CTB/McGraw-Hill (hereafter, CTB) conducted a benchmark standard setting for WESTEST 2 for grades 3-11 in mathematics, reading/language arts, and social studies, and for grades 3-9 in science to recommend cut scores associated with five performance levels: *Novice*, *Partial Mastery*, *Mastery*, *Above Mastery*, and *Distinguished*. Four committees—comprising 128 classroom teachers (69% of the committee), administrators, policy makers, parents, and community members—focused on individual content areas. These four

groups were divided into four subgroups for grades 3-4, 5-6, 6-7, and 9-11. Within these subgroups, participants worked in small groups of four with single table leaders.

Using Phillips's (2010) recommendations and following the Bookmark Standard Setting Procedure (BSSP; Lewis, Mitzel, & Green, 1996), the WVDE examined previous WESTEST 2 and NAEP data to determine target percentages of *Mastery*-level students—West Virginia's performance level representing proficiency. Using these target cut scores for proficiency, CTB trained participants in the Bookmark Standard Setting Procedure and how to use and interpret target cut scores. Participants then participated in the Bookmark Standard Setting Procedure for the initial grades of 3, 5, 8, and 11 in mathematics, reading/language arts, and social studies and for grades 3, 5, 7, and 9 in science. Participants then engaged in the Bookmark Standard Setting Procedure for the interim grades. This approach maximized efficiency while ensuring that the participants considered the cut scores for all grades.

After two rounds of participant recommendations, the WVDE and CTB reviewed the proposed cuts to determine the percentage of students classified in each performance level. All adjustments were presented to the standard-setting participants, who then gave feedback on the new targets and provided content-based rationales and alternate bookmarks and rationales, if necessary. This process was repeated for the interim grades.

At the conclusion of the standard-setting process, the participants analyzed and refined the WESTEST 2 performance-level descriptors—summarizing the knowledge, skills, and abilities of students at each level. The WVDE reconvened and adjusted the cut scores to be within acceptable industry standards (Cizek & Bunch, 2007), using standard errors of measurement and cut scores. These cut scores were approved by the WVBE in May 2009. The same approach was taken for science in grades 10 and 11.

**2010 Cut Score Revision to Accelerate the Transition to the CCSS.** In November 2009, the WVDE convened a meeting of the National Technical Assistance Committee to discuss the operational results from the 2009 WESTEST 2 and the necessity of a second standard-setting meeting to adjust cut scores and performance descriptors, if needed.

In December 2009, as part of a statewide initiative to promote 21<sup>st</sup> century skills and to adjust the WESTEST 2 achievement standards to match national and international benchmarks more closely, the WVDE targeted new cut scores and developed new performance-level descriptors (renamed achievement-level descriptors). When evaluating the cut scores for WESTEST 2, the WVDE considered the percentage of students at or above proficient on the NAEP. Additionally, data from the Trends in International Mathematics and Science Study (TIMSS) were considered in evaluating the appropriateness of the new cut scores. By applying these new cut scores to the spring 2009 operational data, the WVDE calculated the percentage of students classified in each achievement level for each grade and subject area.

In February 2010, the WVDE and CTB conducted a cut score review using the 2009 WESTEST 2 operational data. The same Bookmark Standard Setting Procedure from 2009 was used to determine the new cut scores based on the 2009 operational test data. All 27 individuals who participated in this review also had been part of the February 2009 standard setting, and most had served as table leaders. Approximately 35% of the participants were classroom teachers, and most of the remainder were county test coordinators.

At the conclusion of the cut score review process, the participants analyzed and refined the WESTEST 2 achievement-level descriptors. The WVDE reconvened and adjusted the cut scores to be within acceptable industry standards (Cizek & Bunch, 2007), using standard errors of

measurement and cut scores. These new cut scores were approved by the WVBE in March 2010.

**Impact of Transition in Standards/Assessment, Benchmark Standard-Setting, and Cut Score Revision.** In mathematics, the median percentage of grade 3, 4, and 5 students who were proficient in 2008—the last year of WESTEST—was 76.19%. After the transition to the WV 21<sup>st</sup> Century CSOs and WESTEST 2 in 2009, this percentage decreased to 64.51%. Further revisions to the cut scores for WESTEST 2 following the February 2009 benchmark standard-setting process resulted in even more dramatic reductions in the percentage of students meeting proficiency expectations—from a median of 64.51% in 2010 to 44.78% in 2011. The data illustrate similar reductions for elementary grade students in reading and language arts—the median percentage of students meeting proficiency expectations declined from 79.57% in 2008, to 64.73% in 2009, to 43.56% in 2010, reflecting the increased rigor that resulted during these transitions.

As these figures illustrate, the transition from WESTEST to WESTEST 2, the subsequent 2009 benchmark standard setting, and the 2010 cut score revision resulted in a dramatic decrease in the percentage of elementary students who met the state’s new rigorous performance expectations in mathematics and reading/language arts [see Figure 1.4 for more details].

**Figure 1.4. Impact of Transition in Standards/Assessment, Benchmark Standard-Setting Process, and Cut Score Revision for Elementary Grades**

The transition for middle school students—grades 6, 7, and 8—was similarly dramatic. The median percentage of students meeting proficiency expectations in mathematics declined from 77.08% in 2008 to 43.84% in 2010. The median percentage of students meeting the expectations for reading/language arts also declined significantly from 82.09% in 2008 to 43.25% in 2010 [see Figure 1.5 for more details].

**Figure 1.5. Impact of Transition in Standards/Assessment, Benchmark Standard-Setting Process, and Cut Score Revision for Middle School Grades**

Finally, the transition for high school students—grades 9, 10, and 11—also reflects the increased rigor of the new expectations. The percentage of grade 10 students meeting proficiency expectations in mathematics declined from 67.98% in 2008 to 38.73% in 2010. The percentage of students meeting these expectations for reading/language arts declined from 73.88% in 2008 to 42.83% in 2010. West Virginia also began testing grades 9 and 11 in the transition to WESTEST 2, and these data clearly show that the transition in standards/assessment as well as adjustments to the cut scores had a significant impact [see Figure 1.6 for more details].

**Figure 1.6. Impact of Transition in Standards/Assessment, Benchmark Standard-Setting Process, and Cut Score Revision for High School Grades**

West Virginia's transition to more rigorous standards clearly resulted in a dramatic decrease in

student proficiency rates at all tested grade levels. However, due to this transition to more nationally/internationally rigorous proficiency expectations, West Virginia was recently lauded for having standards that are “about right,” according to the Southern Regional Education Board. This resetting of academic standards communicates West Virginia’s commitment to broad reform and positions the state to transition successfully to the CCSS and the SBAC assessment.

**Development of the West Virginia Growth Model.** West Virginia is committed to helping educators better understand how individual students perform and grow academically. With a robust longitudinal data system and unique individual student identifiers in place since the early 1990s, West Virginia has had the ability to track individual student progress longitudinally for many years. However, the current status model of school accountability used in West Virginia and in many other states has not encouraged this approach. Instead, student performance has traditionally been captured annually at isolated points in time with little consideration of investigating performance over time (i.e., growth). The status approach is limited because students who perform at or above *Mastery* at a given point in time under this model may or may not be on track to maintain this level of performance in the future. Conversely, students who perform below *Mastery* at a given point in time could potentially be on track to attain *Mastery* within a reasonable amount of time. The current status model is insensitive to both possibilities.

Having identified the need to familiarize stakeholders with measurements of student growth in preparation for implementing the next generation of student assessments—and acknowledging the need for such information to guide instruction and program evaluation—the WVDE contracted with Dr. Damian Betebenner of the National Center for the Improvement of Educational Assessment in 2010 to develop the West Virginia Growth Model. The model uses the student growth percentile methodology developed by the state of Colorado to determine individual student growth on the state’s summative assessment. It is described in detail in Dr. Betebenner’s 2008 publication *Norm- and Criterion-Referenced Student Growth*: [http://www.nciea.org/publication\\_PDFs/normative\\_criterion\\_growth\\_DB08.pdf](http://www.nciea.org/publication_PDFs/normative_criterion_growth_DB08.pdf).

The West Virginia Growth Model applies an extension of least-squares regression, known as quantile regression, to all available prior academic performance data and determines an annual conditional student performance distribution, which is used to calculate a student growth percentile for each individual student with at least two consecutive WESTEST 2 scale scores. The student growth percentile provides descriptive and diagnostic information about how much growth has occurred for a given student over a single year when compared with students across the state with similar academic histories. Put another way, the process examines a student’s current performance relative to those who have previously “walked the same performance path.” The student growth percentile can be readily converted to an easy-to-understand probability statement that informs stakeholders about the spectrum of observed growth for West Virginia students—shining the light on both exemplary and troubling levels of individual growth.

Furthermore, student growth percentile analysis allows the state to apply the results forward and determine various percentile growth trajectories for each student. These trajectories (one for each percentile) provide a real-time view of the necessary levels of growth, expressed in the growth percentile metric, for students to reach a given level of performance within one to three or even more years. These trajectories allow stakeholders to quantify what it will take for a student to reach any performance outcome that might be established. In conjunction with predefined performance goals and timelines, the results can be used to define an adequate growth level for achieving or retaining *Mastery* of the state’s academic achievement standards within a reasonable period of time.

Taken together, student growth percentiles and percentile growth trajectories allow the state to answer two key questions. “How much growth has occurred?” can be quantified using the student

growth percentile. “Is it enough growth?” can be determined using pre-established performance goals and timelines together with percentile growth trajectories.

In 2011, the WVDE, under Dr. Betebenner’s guidance, conducted preliminary calculations based on the 2008-09 and 2009-10 operational WESTEST 2 assessment data. Customizations to the statistical program used to derive the student growth percentiles were subsequently completed in 2011 with Dr. Betebenner’s assistance. The WVDE has used these customizations to brand the student, class, school, district, and state reports with its own nomenclature and to customize the underlying mathematical calculations within the program syntax to reflect variable constraints specific to West Virginia. As a result, West Virginia can now produce student, class, school, district, and teacher growth reports in house with only minimal external technical assistance each year. Moreover, because West Virginia employs a common student information management system in all LEAs (the West Virginia Educational Information System), the WVDE projects that early during the 2012-13 school year, all teachers of record will have access to interactive growth reports for their rostered students for the current and previous school years. These reports will be updated dynamically as rosters change and will provide teachers with unprecedented access to live assessment data and innovative data visualizations. These changes will help drive instructional improvement for students who are not achieving the necessary growth to reach or maintain the state’s proficiency expectations for reading/language arts and mathematics. Additionally, the WVDE’s Office of Assessment and Accountability will conduct regional professional development related to the West Virginia Growth Model Accountability during 2012-13. This professional development will include an overview of the available reports as well as guidance for interpreting growth data and using this information for planning purposes.

Data from the West Virginia Growth Model will also be used for the following:

- **School Improvement.** School-level growth data—such as the median student growth percentile, percentages of students who achieve probabilistically low or high levels of growth, and students who achieve growth-to-standard—will help determine the relative need for and the impact of various school improvement interventions. Status and growth measurements of academic progress also will inform school classifications.
- **Educator Effectiveness.** The median student growth percentile can be calculated for nearly any group and interpreted as a summary statistic quantifying the average growth for that group. At the classroom level, the median growth percentile can be conceptualized as one estimate of a classroom teacher’s impact during an academic year. Likewise, with respect to principals and administrators, a schoolwide median growth percentile for all students and for relevant subgroups can reasonably be considered with other measurements of student performance as meaningful evaluative criteria. Student growth data from the model are incorporated into the current educator evaluation system [see narrative for Principle 3].
- **Informing Instruction Decisions.** Teachers will use student growth data to help determine a range of instructional interventions for their students. Specifically, growth data will provide teachers with individualized information regarding which students are progressing toward proficiency and which ones require more intensive intervention to meet proficiency.
- **Program Evaluation and Research.** Data from the West Virginia Growth Model will provide unprecedented value to WVDE’s systemic research initiatives and program evaluation. The individual student-level data generated via the model will offer an entirely

new window into the academic growth of students, who are impacted by various intervention programs provided by the WVDE and external vendors. This information will produce better-informed policy decisions about which programs should receive continued support and which programs should be abandoned in pursuit of more effective alternatives.

- **Informing Stakeholders.** The West Virginia Growth Model will make statewide assessment data more accessible and useful to a wide variety of stakeholders, including parents, students, teachers, and school administrators. This is because the model will quantify individual student growth within a norm-referenced framework that is easily understood by the public. Beyond student growth percentiles, growth-to-standard calculations will make the state’s criterion-referenced goals and objectives much more accessible to parents and other stakeholders by simply illustrating the necessary levels of sustained growth to keep students at proficiency or to ensure they meet proficiency within a predetermined period of time. This information will be valuable to educators as they select instructional techniques and for parents as they provide the necessary supports for their children. Student growth reports will be widely available to LEAs, teachers, and principals during 2012-13; parent reports should be accessible by 2013-14.

West Virginia’s plans to include growth data in the state’s accountability system are further detailed in the narrative for Principle 2.

### **Alternate Performance Task Assessment (APTA)**

As noted earlier, the Alternate Task Performance Assessment (APTA) is West Virginia’s Alternate Assessment Based upon Alternate Academic Achievement Standards (AA-AAS). It is administered in mathematics and reading/language arts in grades 3-11 and in science in grades 4-6 and 10. As a member of the Dynamic Learning Maps (DLM) assessment consortium, West Virginia has plans to transition to the new DLM assessment by 2014-15.

### **West Virginia Test of English Language Learning (WESTELL)**

This is West Virginia’s English language acquisition proficiency examination for K-12 students who are not native English speakers or who have a home language other than English. The state’s transition plan for instruction/assessment of ELLs was detailed earlier under the major heading “*Linguistic Demands of WV Next Generation CSOs and the Development of Corresponding ELP Standards.*”

### **INTERIM/DIAGNOSTIC ASSESSMENTS TO AID TEACHERS IN PREPARING STUDENTS FOR THE CCSS**

**Acuity** – Acuity is an online program developed by CTB that provides schools with formative and interim/diagnostic assessments aligned to both the WV 21st Century CSOs and CCSS. The program provides feedback, scoring, and reporting in mathematics, reading/language arts, science, and social studies. It is designed to inform teaching and improve student learning. Instructional resources guide students through step-by-step mini-lessons targeted to a variety of skill sets. Districts currently use West Virginia-developed benchmark assessments, develop their own benchmarks aligned with their curriculum pacing, and/or develop individual teacher-made assessments using the available item bank. The WVDE’s Office of Assessment and Accountability provides professional development and technical assistance support to LEAs and school staff in using these resources to drive instructional and school improvement decisions.

In preparing for the transition to the CCSS, West Virginia has developed a variety of mathematics and ELA custom items within the Acuity Platform—all aligned to the CCSS. CTB has also included additional

CCSS-aligned items and a set of CCSS diagnostic forms in the item bank. Existing WV custom items written to the WV 21<sup>st</sup> Century CSOs have been aligned, where applicable, to the CCSS. Teachers can use these items to determine their students' levels of readiness to access the WV Next Generation CSOs. Additionally, West Virginia plans to develop additional Common Core resources for ELA and mathematics, as illustrated in Table 1.6.

**Table 1.6. CCSS Augmentation Schedule for Acuity Assessment**

School Year	Grades	ELA Resources	Mathematics Resources
2012-13	4,5, and 9	<p>Additional CCSS-aligned items for LEA/school use</p> <p>New performance tasks that assess students' speaking and listening skills</p> <p>ELA units that use text-based questioning and that address content aligned to the CCSS</p>	<p>Additional CCSS-aligned items for LEA/school use</p> <p>CCSS Math I unit assessments</p> <p>CCSS Math 4 and Math 5 cluster assessments</p> <p>CCSS Math I and Math II readiness tests for placing students in the correct mathematics classes</p> <p>Gridded response items and performance task items aligned with the CCSS</p>
2013-14	3,6,7, and 10	<p>Additional CCSS-aligned items for LEA/school use</p> <p>New performance tasks that assess students' speaking and listening skills</p> <p>ELA units that use text-based questioning and that address content aligned to the CCSS</p>	<p>Additional CCSS-aligned items for LEA/school use</p> <p>CCSS Math II unit assessments</p> <p>CCSS Math 3, Math 6, and Math 7 cluster assessments</p> <p>Gridded response items and performance task items aligned with the CCSS</p>
2014-15	8 and 11	<p>Additional CCSS-aligned items for LEA/school use</p> <p>New performance tasks that assess students' speaking and listening skills</p> <p>ELA units that use text-based questioning and that address content aligned to the CCSS</p>	<p>Additional CCSS-aligned items for LEA/school use</p> <p>CCSS Math III unit assessments</p> <p>CCSS Math 8 cluster assessments</p> <p>Gridded response items and performance task items aligned with the CCSS</p>

### West Virginia Writes (WV Writes)

WV Writes is a performance-based formative assessment that allows students to practice their writing using an online program. It provides formative writing assessments that inform teaching and that improve student learning. It also generates important data on student performance relative to the West Virginia writing rubric areas of organization, development, sentence structure, word choice/grammar usage, and

mechanics; these data allow educators to target their writing instruction more effectively. CTE programs have also created custom prompts within WV Writes to help students refine writing skills that relate to specific career clusters.

In transitioning to the CCSS, WV Writes will be augmented with additional writing prompts and lesson plan units that align with the current WV 21<sup>st</sup> Century CSOs and the CCSS writing standards. The prompts will allow teachers to determine their students' levels of readiness to access the CCSS. The WVDE plans to develop additional resources, as indicated in Table 1.7.

**Table 1.7. CCSS Augmentation Schedule for WV Writes**

School Year	Grade(s)	Resources
2012-13	4, 5, and 9	Four grade 4 Common Core prompts and writing units (2 informative, 2 argumentative)  Four grade 5 Common Core prompts and writing units (2 informative, 2 argumentative)  Eight grade 9 Common Core prompts and writing units (4 informative, 4 argumentative)
2013-14	3, 6, 7, and 10	Four grade 3 Common Core prompts and writing units (2 informative, 2 argumentative)  Four grade 6 Common Core prompts and writing units (2 informative, 2 argumentative)  Four grade 7 Common Core prompts and writing units (2 informative, 2 argumentative)  Four grade 10 Common Core prompts and writing units (2 informative, 2 argumentative)
2014-15	8 and 11	Four grade 8 Common Core prompts and writing units (2 informative, 2 argumentative)  Eight grade 11 Common Core prompts and writing units (4 informative, 4 argumentative)

## COLLEGE READINESS ASSESSMENTS

### ACT EXPLORE®

EXPLORE® is a norm-referenced test given to all eighth-grade students in West Virginia. It includes mathematics, English, reading, and science subtests. All items are selected response. It also includes an interest inventory component to predict potential college/career pathways.

### ACT PLAN®

PLAN® is a norm-referenced assessment that measures English, mathematics, reading, and science skills for 10<sup>th</sup>-grade students. It can also gather information and generate reports regarding students' educational career plans, interests, high school course work plans, and self-identified needs for assistance. The purpose of this assessment is to provide career awareness and exploration activities; additionally, 10<sup>th</sup>-grade students can use it to revise their individualized plans for the 11th and 12th grades. ACT® is the vendor for ACT PLAN®.

**ACT COMPASS®**

COMPASS® is an untimed computer-adaptive college placement test that quickly evaluates students' skill levels in mathematics and English (writing). As a computer-adaptive test, it adjusts the item difficulty to the skills of the individual student, eliminating items that are too easy or too difficult and that contribute little to the student's score. Such flexibility reduces the number of items and testing time while maintaining the accuracy of the results. This adaptive nature means that few students receive the same items or even the same number of items. Students begin testing with a question of medium-level difficulty. If they answer correctly, more difficult questions are generated; to the contrary, if they answer incorrectly, a less difficult question is provided. The software continues to provide more or less difficult questions until a reliable score is obtained.

**CAREER READINESS ASSESSMENTS****ACT WorkKeys®**

This assessment targets grade 12 CTE students in applied mathematics, reading for information, and locating information regarding specific CTE concentrations.

**Global 21 CTE**

This assessment is administered in grades 9-12 for CTE students who have completed a career concentration.

For more information about tasks related to transitioning West Virginia's assessment system see Table 1-10 in Appendix 1.

## **FACTORS TO BE ADDRESSED IN PREPARING TEACHERS OF STUDENTS WITH DISABILITIES WHO PARTICIPATE IN THE STATE'S ALTERNATE ASSESSMENT BASED ON MODIFIED ACADEMIC ACHIEVEMENT STANDARDS (AA-MAAS)**

West Virginia does not currently employ an AA-MAAS; however, the WVDE acknowledges the need to prepare teachers of students with disabilities, who should ideally be instructed on modified academic achievement standards to utilize the Next Generation CSOs. In 2009, Measurement Inc., under contract with the WVDE, studied the issue in West Virginia schools and determined the target student characteristics for a potential AA-MAAS:

- The target student group functions significantly below grade and/or age level, and the achievement gap does not close over grade levels.
- Progress for these students does not consistently match expectations given their scale score loss/gain statuses on general or alternate assessments—as measured by their IEP Narrative Description, Progress Ratings on IEP Goal/Short Term Objectives, and Report Card grades.
- No typical student profile adequately captures the range of social, emotional, cognitive, and behavioral strengths and weaknesses of these students (e.g., some students might be described as hard workers, while others lack motivation; some might be described as disruptive, while others seem polite).
- The target students remain at the *Novice* level in reading/language arts on general assessments because of the gaps between their skill levels and the difficulty of the test.
- The target students instructed on alternate academic achievement standards remain indefinitely at the *Above Mastery* level on the reading/language arts subtest of the alternate assessment due to the

lack of a more appropriate test on which they could demonstrate progress.

- The representation of males within the population is significantly stronger than females across reading/language arts and mathematics.
- Girls taking the 1% alternate assessment are more likely to move up to the general assessment, and boys are more likely to move down from the general assessment to the alternate.

Additionally, within the randomly selected sample of students who held the same performance levels for three years, the study identified 62% as being mildly mentally impaired.

With respect to instruction, the researchers found the following:

- There were only slight differences in the data on student learning activities, instructional time, and levels of modification for students who exhibited reading gains (RG) and students who exhibited reading losses (RL).
- Accommodations and modifications were used extensively to meet students' needs. The IEP review conducted as part of this study illustrated broad diversity in this area.
- There was a high variance in the percentage of participation in the special education versus general education environments.
- Formal and informal assessments were being administered to students in classrooms.
- Teachers of the target group, and their administrators, supported inclusion.
- Teachers of RG and RL students reported similar obstacles. The three most common were
  1. insufficient multilevel instructional materials;
  2. insufficient time in the schedule; and
  3. general education teachers who were resistant to and inadequately prepared for teaching students with disabilities.

With respect to assessment, the researchers found the following:

- Test assignments and reassignments for these students were based on data documenting the severity of students' needs.
- The reading/language arts subtest of the general assessment measured only a *small extent* of what the target students know and can do; the alternate assessment's reading/language arts subset did so to a *moderate extent*.
- Based on teacher self-reported data, there was a clear mandate to reassign most target students to new, more appropriate assessments if they were available.
- The appropriate new assessment should be less rigorous than the general assessment but more rigorous than the alternate. It should also include modifications that match more closely the accommodations and modifications used for instruction—specifically, shortened text, simpler language, and reduced choices.

The transition to the SBAC assessment and the DLM alternate assessment will expand the WVDE's ability to measure the target population's ability—that is, due to its computer-adaptive nature, the SBAC assessment should greatly expand the “floor” of the general assessment and allow a more robust measurement of achievement for these students. Likewise, the DLM assessment will vastly extend the “ceiling” of the current alternate assessment and better measure the ability of students who have significant cognitive disabilities but who currently achieve consistently at the highest levels of performance on APTA.

## 1.C DEVELOP AND ADMINISTER ANNUAL, STATEWIDE, ALIGNED, HIGH-QUALITY ASSESSMENTS THAT MEASURE STUDENT GROWTH

Select the option that pertains to the SEA and provide evidence corresponding to the option selected.

<p>Option A</p> <p><input checked="" type="checkbox"/> The SEA is participating in one of the two State consortia that received a grant under the Race to the Top Assessment competition.</p> <p>i. Attach the State's Memorandum of Understanding (MOU) under that competition. (Attachment 6)</p>	<p>Option B</p> <p><input type="checkbox"/> The SEA is not participating in either one of the two State consortia that received a grant under the Race to the Top Assessment competition, and has not yet developed or administered statewide aligned, high-quality assessments that measure student growth in reading/language arts and in mathematics in at least grades 3-8 and at least once in high school in all LEAs.</p> <p>i. Provide the SEA's plan to develop and administer annually, beginning no later than the 2014–2015 school year, statewide aligned, high-quality assessments that measure student growth in reading/language arts and in mathematics in at least grades 3-8 and at least once in high school in all LEAs, as well as set academic achievement standards for those assessments.</p>	<p>Option C</p> <p><input type="checkbox"/> The SEA has developed and begun annually administering statewide aligned, high-quality assessments that measure student growth in reading/language arts and in mathematics in at least grades 3-8 and at least once in high school in all LEAs.</p> <p>i. Attach evidence that the SEA has submitted these assessments and academic achievement standards to the Department for peer review or attach a timeline of when the SEA will submit the assessments and academic achievement standards to the Department for peer review. (Attachment 7)</p>

West Virginia is a Governing State in the Smarter Balanced Assessment Consortium (SBAC) See Attachment 6, Page 200

## **PRINCIPLE 2: STATE-DEVELOPED DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT**

### **2.A DEVELOP AND IMPLEMENT A STATE-BASED SYSTEM OF DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT**

2.A.i Provide a description of the SEA’s differentiated recognition, accountability, and support system that includes all the components listed in Principle 2, the SEA’s plan for implementation of the differentiated recognition, accountability, and support system no later than the 2013–2014 school year, and an explanation of how the SEA’s differentiated recognition, accountability, and support system is designed to improve student achievement and school performance, close achievement gaps, and increase the quality of instruction for students.

## INTRODUCTION AND BACKGROUND

When the West Virginia Department of Education (WVDE) announced its intent to submit an ESEA Flexibility Request by September 6, 2012, the state immediately filed for a waiver from the No Child Left Behind Act (NCLB) to allow for sufficient time to develop a comprehensive and supportive accountability system. This allowed West Virginia to freeze our 2011-12 annual measurable objectives (AMOs) to those levels approved in the Accountability Workbook for the 2010-11 school year. This essential action enabled West Virginia to work in a focused manner with the education community to craft a thoughtful, fair, and constructive accountability system—one that addresses student achievement and growth, provides a measure of achievement gaps, includes other important metrics such as graduation/attendance rates, and sets rigorous but attainable objectives for schools. The accompanying differentiated identification and support system provides support to struggling schools and districts and will promote data-driven changes and quality strategic planning. It is our strong belief that this system, which is outlined within this request, will build capacity in West Virginia schools and districts to close persistent achievement gaps by encouraging and incentivizing student achievement and progress. This supports our ambitious goal of ensuring all West Virginia’s students are taught in effective schools by the year 2020.

### WEST VIRGINIA’S PRIOR ACCOUNTABILITY SYSTEM: A CONTEXT FOR TRANSITION

Following passage of NCLB, West Virginia revised its accountability and accreditation systems to include expectations that schools must improve student achievement, attendance, and dropout rates for all students. As such, the accountability and accreditation systems were adapted to foster the following:

- Rigorous and fair statewide goals for students and schools around their participation in statewide assessments, student achievement, attendance rates, and graduation rates
- Improved student achievement and graduation rates for all students and subgroups
- Clear communications to parents and stakeholders around the state’s goals and expectations for student learning and school performance
- Guidelines and guidance at the state and local levels to focus support and intervention on those schools and school systems with the greatest needs

The state’s federally based accountability system communicates a “pass/fail” designation that indicates whether a school has made Adequate Yearly Progress (AYP) or falls under the category of “Needs Improvement” while a concurrent state-based system assigns schools an accreditation status based on whether or not a school makes AYP. As part of the federally based accountability system, schools are required to meet increasingly stringent AMOs through 2014. NCLB prompted West Virginia to develop a criterion-based assessment that defined student proficiency across five performance levels (i.e., *Novice*, *Partial Mastery*, *Mastery*, *Above Mastery*, and *Distinguished*). Using the West Virginia Educational Standards Test (WESTEST), the target of 100% proficiency by 2014 seemed potentially attainable. However, as operational assessment data were compiled and compared to national (e.g., NAEP) and international (e.g., TIMSS) performance distributions, the WVDE realized that the state’s standards, assessments, and expectation must be revamped. Please see Table 2.1 below for West Virginia’s currently approved AMOs.

**Table 2.1. West Virginia Title I AMOs**

Year	Elementary Math	Elementary Reading / Language Arts	Middle School Math	Middle School Reading / Language Arts	High School Math	High School Reading / Language Arts
2004-05	72.00	67.00	75.00	64.00	71.00	59.00
2005-06	72.00	67.00	75.00	64.00	71.00	59.00
2006-07	76.67	72.50	79.17	70.00	75.83	65.83
2007-08	76.67	72.50	79.17	70.00	75.83	65.83
2008-09	56.00	57.00	57.00	50.00	48.00	48.00
2009-10	34.00	37.00	37.00	35.00	28.00	31.00
2010-11	50.50	52.75	52.75	51.25	46.00	48.25
2011-12	67.00	68.50	68.50	67.50	64.00	65.50
2012-13	83.50	84.25	84.25	83.75	82.00	82.75
2013-14	100.00	100.00	100.00	100.00	100.00	100.00

In West Virginia's first approved Accountability Workbook the state used a back-loaded trajectory that would have required equal increments of increases in student proficiency over time. If the standards and assessment had remained the same from 2003 to 2014, this would have been a reasonable approach to reach the policy expectation of 100% proficiency by 2013-14.

The 2009 shift in AMOs which is evidenced in Table 2.1 resulted from a total overhaul of the standards resulting in adoption of the WV 21<sup>st</sup> Century CSOs and a new assessment—WESTEST 2. This new assessment was far more rigorous and assessed new concepts and skills rather than basic knowledge. In 2010, upon review of impact data from field tests and the first year of operational administration of WESTEST 2, West Virginia further increased proficiency expectations by revising cut scores to better align with the state's performance on national and international assessments.

As shown in Table 2.1, the new starting points beginning in 2010 were an incredibly stringent set of expectations—and are more reflective of West Virginia's performance historic performance on the NAEP. While the decision to revise the cut scores was intended to better align with national and international expectations, the state also hoped to communicate the urgency of students becoming ready for college and careers. The major concern, however, came with revising the AMO trajectory. Table 2.1 illustrates that maintaining a policy expectation of all students reaching proficiency by the 2013-14 school year required approximately 15% proficiency increases each year—an absolute impossibility given the increased rigor and heightened expectations inherent in the new standards and assessments. As a point of context, without the waiver to freeze AMOs to 2010-11 levels, nearly 90% of schools would have failed to make AYP at the conclusion of the 2011-12 school year—grossly miscommunicating the state of education in West Virginia at a time when we have enacted substantial reforms to truly confront our educational challenges.

In the face of such steeply increasing expectations, the state would have applied the state accountability system to determine sanctions in addition to those based on Title I sanctions, as per Section 1116 of NCLB. Depending on the number of consecutive years a school failed to make AYP, the WVDE's Office of Educational Performance Audits, the state's accrediting body, issued a revised accreditation status. Table 2.2 depicts the differences between [WVBE Policy 2320](#) and NCLB's Title I school sanctions.

**Table 2.2. West Virginia School Sanctions**

Not Meeting AYP after:	WVBE Policy 2320	Title I School Section 1116
Year 1	Recommend Unified School Improvement Plan (USIP) revision to address identified deficiencies	Recommend USIP and Title I Plan revision to address identified deficiencies
Year 2	Temporary Accreditation Status <ul style="list-style-type: none"> <li>Revise USIP with improvement date certain (1-5 years)</li> <li>Upgrade to Conditional Status when approved</li> <li>Provide assistance (SEA)</li> </ul>	School Improvement <ul style="list-style-type: none"> <li>Implement improvement plan</li> <li>Identify 10% of Title I allotment for staff development</li> <li>Provide technical assistance (SEA &amp; LEA)</li> <li>LEA must offer School Choice</li> </ul>
Year 3	Continue Conditional Status or be designated as Seriously Impaired if date certain not met <ul style="list-style-type: none"> <li>Assign improvement consultant team</li> <li>Designate a Distinguished Educator to provide assistance (optional)</li> </ul>	School Improvement <ul style="list-style-type: none"> <li>Continue previous year sanctions plus               <ul style="list-style-type: none"> <li>Add supplemental services for eligible students</li> </ul> </li> </ul>
Year 4	Continue Conditional Status or be designated as Seriously Impaired <ul style="list-style-type: none"> <li>Revise USIP with a date certain</li> <li>Implement School Choice after one year as Seriously Impaired</li> </ul>	School Improvement <ul style="list-style-type: none"> <li>Continue previous year sanctions plus               <ul style="list-style-type: none"> <li>Implement corrective action</li> </ul> </li> </ul>

While the state and Title I accountability systems exhibit a degree of alignment in terms of sanctions, the classification systems reveal a disconnect. The Title I accountability system requires an increasing number of students to be proficient as schools work toward achieving progressively higher AMOs. Depending on a school's designation of making AYP, that school is on a list. In turn, when schools fail to make AYP due to a lack of proficient students, the Office of Educational Performance Audits (OEPA), the state's accrediting body, applies a different set of criteria to determine a school's accreditation status. This yields two separate sets of criteria schools must monitor that are often considered misaligned. Further, many of the state accreditation criteria are only applied to a subset of schools—those schools not making AYP—disincentivizing continuous improvement among those schools that have made AYP but have room to grow.

## **ACCOUNTABILITY SYSTEM THAT PROVIDES DIFFERENTIATED RECOGNITION, ACCOUNTABILITY, AND SUPPORT FOR ALL LEAS AND ALL TITLE I SCHOOLS**

### **INTRODUCTION AND BACKGROUND**

This Flexibility Request affords West Virginia an opportunity to align the classification of schools for both Title I and state sanctions under a single system, *the West Virginia Accountability Index (WVAI)*. The WVAI assigns points to schools for progressively higher performance on a balanced set of metrics that will be in place no later than the 2013-14 school year. The resulting school classifications carry with them a thorough

and well-articulated system of differentiated recognition, accountability, and supports to encourage continuous improvement among schools and LEAs. When coupled with a rigorous, but attainable set of AMOs and a set of designations that prioritize rewards and services to high performance/progress schools (*Reward* schools), persistently low achieving schools (*Priority* schools), and schools with persistent achievement gaps (*Focus* schools), we believe the proposed accountability system is at once rigorous, fair, valid, and transparent.

This system has three key purposes which we believe will lend themselves to the accomplishment of our primary goal that all West Virginia students will be taught in effective schools by the year 2020:

1. Legitimately and purposefully identify improvements or declines in academic achievement and school performance promoting intentional intervention to correct these deficiencies;
2. Draw attention to persistent and pervasive achievement gaps and require associated supports to close these gaps; and
3. Point to areas of improving, declining, or stagnating instructional quality and provide supports to improve these areas.

## OVERVIEW OF THE WEST VIRGINIA ACCOUNTABILITY INDEX

West Virginia's new accountability system will use an index comprising a balanced set of indicators based on student achievement in mathematics and reading/language arts. In light of the requirement that an accountability system will address all necessary aspects of ESEA section 1111(b)(2)(C)(v)(II)(II), the index components will differentiate between elementary/middle schools and high schools.

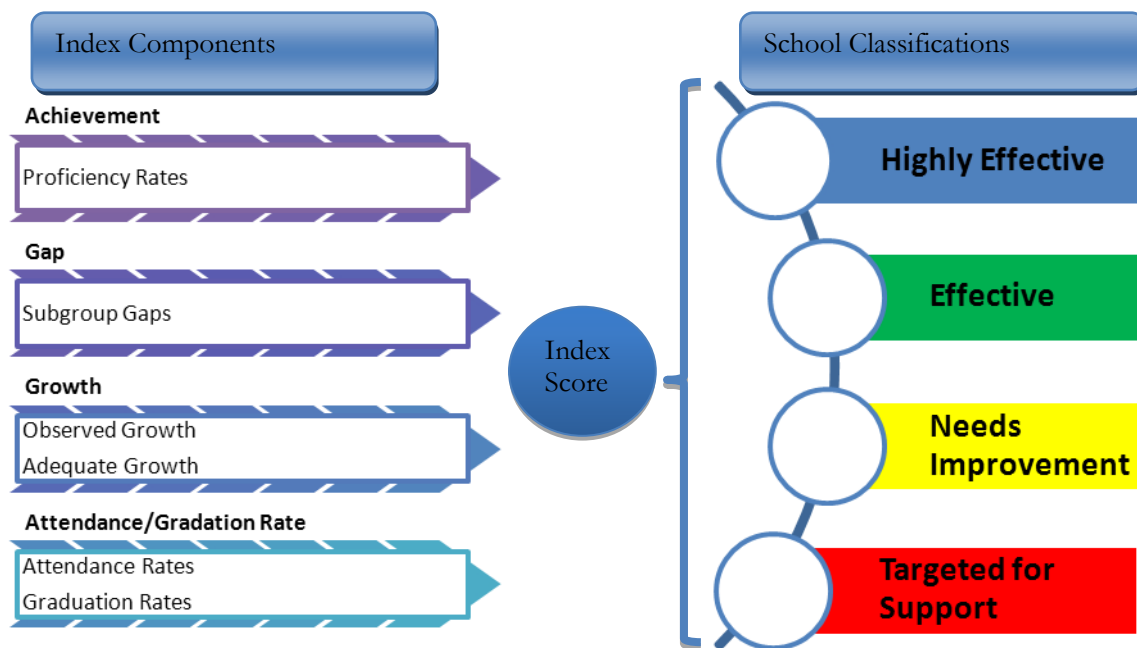

From the public's standpoint, the West Virginia Accountability Index will be easy to understand. A school will receive an overall score based on multiple components of student and school success; these scores will be used to classify the school into one of four classifications: *highly effective*, *effective*, *needs improvement*, or *targeted for support*. In addition to these four classifications, schools with persistent and pervasive achievement gaps will be labeled *focus schools* while the persistently lowest achieving schools will be labeled *priority schools*. Our highest progress and achieving schools will be labeled *reward schools*. Depending on classification a school receives, a variety of support services and actions will be enacted with the goal of all schools reaching the *effective* designation by the year 2020.

The index will comprise the following performance indicators:

- Proficiency rates in mathematics and reading/language arts (32.5%)
- Achievement gaps of subgroups in mathematics and reading/language arts (20%)
- Student academic growth (32.5%), comprising
  - observed growth of subgroups in mathematics and reading/language arts
  - adequate growth (e.g., the amount of growth required to be proficient) in mathematics and reading/language arts
- Attendance rates for elementary and middle schools (15%)/graduation rates for high schools (15%)

Figure 2.1 depicts an overview of the West Virginia Accountability Index components which contribute to an overall index score which subsequently drives school classifications.

**Figure 2.1. The West Virginia Accountability Index**

## THE DEVELOPMENT AND COMPONENTS OF THE WEST VIRGINIA ACCOUNTABILITY INDEX

### Introduction and Background

Once the WVDE committed to applying for flexibility, the state worked actively to garner stakeholder buy-in during the accountability system development. The involvement of stakeholders was a deliberate strategy to avoid insular thinking and to ensure the inclusion of appropriate values. As mentioned previously in this application, the WV Accountability and Accreditation Stakeholders Advisory Committee (AASAC)—which included members of the WVBE, WVDE staff, teachers, administrators, districts, and Regional Education Service Agency staff—worked with department staff to make recommendations and suggestions that would guide the development of the West Virginia Accountability Index. Based on stakeholder recommendations, department staff compiled data reflecting each of the performance indicators to include in the index.

The development process was iterative in nature and required multiple simulations, applications of various use cases—both common and rare—and subsequent validations that included examining lists of all schools in the state with live data. The initial index was taken back to the AASAC for feedback and recommendations regarding validity and practical applications. From these recommendations, further adjustments were made, and the index was tested again. During this phase, national content experts and members of the West Virginia Technical Advisory Committee were consulted to ensure performance indicators were applied in a valid manner.

Once the index was finalized, data were compared from prior academic years to determine changes in the system and to explore various cut point scenarios across index values. Further, schools' index values were examined longitudinally to ensure there were not excessive drifts or drastic changes in school rankings that appeared to be unwarranted. These validations allowed WVDE staff to bring the data to a group of educators, practitioners, policy makers, and researchers in the state to participate in an empirically based standard setting on August 15, 2012. During this event, participants examined index values to derive operational definitions for each school classification, using the components of achievement, gap, growth, and attendance/graduation rates. The stakeholders' recommendations were defined separately for each

programmatic level (i.e., elementary, middle, high school) and informed the selection of a set of index starting points which were used to derive a set of empirically linked proficiency-based AMO targets (see 2.B for details) for the proposed accountability system.

### Overall Index Development

The initial components of the West Virginia Accountability Index were informed by West Virginia Code, AASAC recommendations, and the requirements set forth in the *One-Year AMO Waiver Guidance*. Using these sources, an initial list of components was proposed to the AASAC to ensure it met the philosophical underpinnings of a more balanced accountability system. The finalized set of components included achievement, achievement gaps among subgroups, and a combination of observed growth and adequate growth in mathematics and reading/language arts. In addition to academic indicators around those two content areas, attendance rates were included for elementary schools and middle schools, and graduation rates were included for high schools.

Measures of central tendency were used to define thresholds for minimum and maximum weights for each component. Because index components with the highest degrees of variance could overemphasize increases or decreases in school rankings, they were weighted slightly less than those measures with lower degrees of variance for initial scenarios. Various weights were tested to determine potential indexing scenarios across schools within a given programmatic level. Several variations of the West Virginia Accountability Index were presented to the AASAC to identify (1) the consequences of weights that compared a school's potential ranking (using one of three scenarios) to traditional indicators of school success (e.g., proficiency, attendance, and graduation rates) and how school-level demographics may have played a role. WVDE staff culled recommendations from the AASAC to revise the component weights and arrive at a final makeup for the index. While the recommendations from the AASAC were important, the group's rationale had to interface with expert recommendations to maintain consequential validity.

Once the index weights and individual component calculations were finalized, the index was again calculated against live data to examine the impact of conditions on the final index score. Specifically, the following cases were considered:

- Schools with high growth, high achievement, and low gaps,
- Schools with low growth, low achievement, and high gaps, and
- Schools with moderate growth, moderate achievement, and moderate gaps

As one would expect, schools in the first two conditions were consistently at the top and bottom quintiles, respectively, of the index across all programmatic levels. Schools in the third condition exhibited more variability and less predictability, which is to be expected as the index was designed to promote a sense of balance—that is, lower proficiency rates may be ameliorated with higher amounts of growth. However, a third consideration of low achievement gaps could result in a school falling into the upper third or fourth quintile. Conversely, high proficiency may not be sufficient to push a school outside the second quintile (i.e., 20-40<sup>th</sup> percentile schools) if it exhibits low growth *and* high achievement gaps.

The following section describes the measurement process for each core index component and how these component scores contribute to overall index scores.

### Operationalization of Individual Index Components

**Achievement** – The achievement component of the West Virginia Accountability Index includes proficiency for all students based on the mathematics and reading/language arts sections of WESTEST 2 and APTA. Achievement on these measures for all students constitutes 32.5% of the total index and is split evenly between mathematics and reading/language arts.

The operationalization of achievement proved to be a concern because quantitative differences in

proficiency rates among schools do not necessarily reflect all qualitative differences. For example, when comparing schools that exhibit 25% and 50% proficiency, respectively, the quantitative distinction of twice as many proficient students does not necessarily reflect the qualitative characteristics of that school—that is, twice as much proficiency does not necessarily mean a school is twice as good as another. Assigning points using a multiplier based on the percentage of proficient students does not take into account the lack of variation in the distribution of schools or the majority of schools exhibiting proficiency rates around the policy target—40% of students being proficient [for details on the 2010 cut score revision, see Principle 1, heading “*Evaluation of Current Assessments and Transition Plan for Implementing the WV Next Generation CSOs*” subheading “*West Virginia Educational Standards Test 2*”].

To combat the potential unintended negative consequences of this method, two different equations were used to estimate an S-type curve based on the percentage of proficient students. See Figure 2.2 for a depiction of point assignments.

**Figure 2.2. Point Assignments Based on Percentage Proficient**

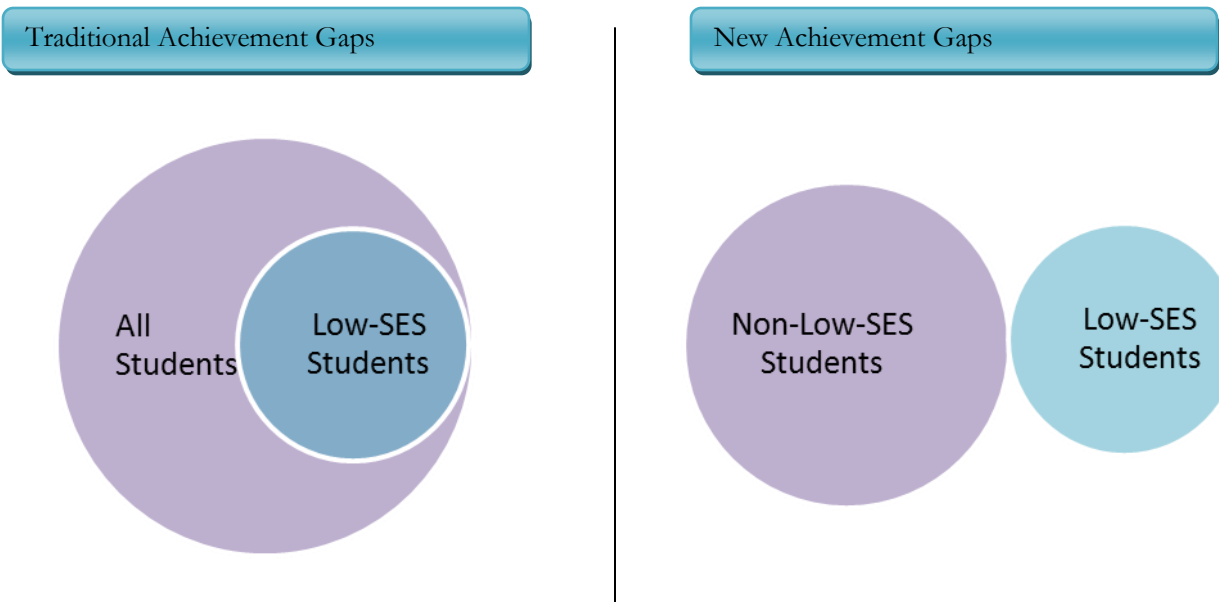

As shown in the figure above, schools receive 100% of the possible points if all students are proficient. However, schools are awarded a progressively higher percentage of the possible points as they approach 100% proficiency. Conversely, schools are assigned progressively fewer points as fewer of their students reach proficiency. While schools between 48% and 52% proficient are nearing a 1:1 multiplier, schools approaching 40% proficient (the baseline policy goal in 2010) are awarded only approximately one-third of the available points, thereby setting high expectations for student learning in schools.

**Achievement Gap** – The achievement gap component of the West Virginia Accountability Index includes the differences in proficiency rates between subgroups and non-membership students based on the mathematics and reading/language arts sections of WESTEST 2 and APTA (e.g., Low SES vs. non-low SES students). As noted, the achievement gap component comprises 20% of the total index and is split evenly between mathematics and reading/language arts. West Virginia views an achievement gap as a means to identify differences in performance that may lead to inferences about equity of access, disadvantages of a particular subgroup of students, or contextual variables in need

of attention. Operationally, it refers to a school's achievement gap across all subgroups, which is derived by comparing proficiency rates of a membership group to a non-membership group. For example, if one were examining students in the low-socioeconomic status (SES) subgroup, the proficiency rates of low SES students would be compared to the proficiency rates of non-low-SES students. If low-SES students were compared to the “all” subgroup, there would be an overlap of students in the two groups—in other words, some “all” students would also be low-SES students, diminishing the accuracy of calculating achievement gaps. See Figure 2.3 for an example.

**Figure 2.3. Comparison of the Traditional and West Virginia's Approach to Achievement Gaps**

As shown in the figure above, using the traditional achievement gaps measure, the number of students included in the “all” students group would be inflated, which could mask some of the lower-performing low-SES students. The new process ameliorates this concern and is applied for the all subgroups in the accountability system. West Virginia shall include the following subgroups in the achievement gap calculation:

- low-SES vs. non-low-SES students
- Asian, African American, Hispanic or Latino, American Indian, Multiracial, or Pacific Islander vs. White students (each calculated differently)
- migrant vs. non-migrant
- ELLs vs. non-ELLs
- students with disabilities vs. students without disabilities

Traditionally, West Virginia has used grades 3-8 and 11 for accountability when a subgroup hits a “minimum n” of 50. For the purposes of this flexibility request, West Virginia proposes lowering the minimum cell size to 20 across all assessed grades in a given school. Furthermore, West Virginia proposes to include students in all assessed grade levels in the new accountability system.

By way of example, under the old accountability model, a school with grades 6-12 that assessed students in grades 6-11 would count only those students in grades 6, 7, 8, and 11 for accountability purposes. Further, if that school's low-SES population was under 50, that subgroup would not have been reported. Under the proposed West Virginia Accountability Index, this school would be

required to include any subgroup that meets or exceeds an “n” of 20 across all assessed grades, which, in this case, would be grades 6-11.

Under the new model, the achievement gap in a given school will be operationalized as the average potential gap that is observed among each subgroup with a valid cell size and their respective referent non-membership groups. Specifically, the following steps will be taken to calculate the percentage of points a school is assigned based on the presence or lack of an achievement gap:

1. A subgroup’s proficiency rate is identified (i.e., the numerator).
2. A subgroup’s corresponding non-membership proficiency rate is identified—the potential gap possible (i.e., the denominator).
3. The subgroup’s proficiency rate is divided by the non-membership proficiency rate to obtain a percentage of the possible gap closed—the higher the percentage, the more the achievement gap will have been closed. Any number equal to or greater than 1.0 is referred to as *lack of an achievement gap*.
4. This calculation is replicated for each subgroup.
5. If there are less than 20 students in a particular subgroup in a school, that subgroup’s gap value is suppressed.
6. The valid number of subgroups for each school is identified.
7. The valid subgroup gap values are summed and divided by the valid number of subgroups to arrive at an overall gap percentage.
8. The average gap percentage is used as the multiplier for the achievement gap calculation. Values approaching 1.0 indicate smaller achievement gaps; values approaching 0 indicate very large achievement gaps.

It is noteworthy that the revision to the minimum “n” for accountability will result in a drastic increase in the number of schools identified with specific subgroups. Reducing the “minimum n” to 20 will result in nearly every school in West Virginia with an assessed grade having at least one subgroup of interest—a significant departure from the prior accountability system—placing more emphasis on students who have been historically disadvantaged due to contextual and historical variables. See Table 2.3 for details.

**Table 2.3. Number of Schools Identified with Subgroups**

Number of Schools Identified with a Valid Cell Size					
Subgroup	2009	2010	2011	2012	2012 Index
Asian	1	1	1	2	9
African American	38	39	34	33	108
Migrant	N/A	N/A	N/A	N/A	N/A
American Indian	0	0	0	0	0
LEP	1	1	2	1	14
Students with Disabilities	112	106	99	105	456
Low SES	494	520	507	493	661
Pacific Islander	0	0	0	0	0
Total	657	667	663	651	674
White	600	614	615	603	673

**Growth** – The growth component of the West Virginia Accountability Index will include (1) observed growth and (2) adequate growth as measured by the mathematics and reading/language arts sections of WESTEST 2. As a whole, the growth component accounts for 32.5% of the total index, but the split between observed and adequate growth varies by programmatic level. The basis of the index’s growth component will be the West Virginia Growth Model, which calculates a student

growth percentile—a descriptive estimation of how much growth has occurred for a given student when compared with students across the state with similar prior academic scale scores. The student growth percentile methodology relies on quantile regression to estimate conditional probabilities, establishing a normative reference for year-to-year scale score changes. This application of a normative framework to an otherwise criterion-based score allows one to contextualize changes in performance (e.g., observed growth) while still holding student performance to a predetermined amount of growth, as defined by proficiency expectations in mathematics and reading/language arts (e.g., adequate growth) [for more information on the West Virginia Growth Model, see Principle 1, heading “*Evaluation of Current Assessments and Transition Plan for Implementing the WV Next Generation CSOs*” subheading “*West Virginia Educational Standards Test 2*”].

Table 2.4 shows the differences in growth weights by programmatic level. Note that index weight is split evenly between mathematics and reading/language arts. The rationale for the varying weights for the adequate growth component by programmatic level are described further below in the section titled “*Adequate Growth*.”

**Table 2.4. Growth Component Values for the West Virginia Accountability Index**

Growth Component	Elementary School	Middle School	High School
Observed Growth	22.5%	22.5%	27.5%
Adequate Growth	10.0%	10.0%	5.0%

### Observed Growth

Observed growth answers the question, “How much growth has occurred?” Observed growth (22.5% for elementary and middle schools, 27.5% for high schools) is split evenly between mathematics and reading/language arts. The observed growth component represents the median student growth percentile (SGP) for each subgroup with a combined n count of at least 20 across all assessed grades in a school.

To arrive at an observed growth score, the following steps will be taken to calculate the percentage of points a school is assigned based on student growth during the most recent year’s assessment administration:

1. A subgroup’s median growth percentile is calculated for every student in a given school.
2. The total number of students in the school is calculated and disaggregated by subgroup.
3. If there are less than 20 students in a particular subgroup *across all grades*, that subgroup’s gap value is suppressed.
4. The observed SGPs for each valid subgroup are combined.
5. A multiplier is assigned to the combined observed subgroup SGP to calculate the total index value.

To assign multiplier values to the various observed combined subgroup SGPs, West Virginia’s student growth categories were first examined. These categories were informed by other states that use the SGP methodology—most notably the Colorado Department of Education’s SGP classifications: low (SGPs between 1 and 34), typical (between 35 and 65), and high (between 66 and 99). The categories initially led to a straightforward consideration of the following cut points for schoolwide subgroup growth: 1-35, 36-50, 51-65, and 66-99, allowing for a quartile-like assignment of points: 0, 0.25, 0.50, 0.75, and 1.00, respectively. While this distinction is sound at the student level—where there is a uniform distribution of SGPs ranging from 1 to 99—school-level SGPs exhibit a much different kind of range.

When examining school-level SGPs, maximum and minimum values typically range from 55 to 65. Further, approximately 80 percent of schools fall between the 35<sup>th</sup> and 65<sup>th</sup> median percentiles,

approximately 60 percent fall between the 40<sup>th</sup> and 60<sup>th</sup> median percentiles, and approximately 50 percent fall between the 42.5<sup>th</sup> and 57.5<sup>th</sup> median percentiles. This relatively normal distribution indicates a “chunking” of schools around the 50<sup>th</sup> percentile, which is to be expected as students in a school are aggregated and thus mirror the averages or medians close to that of the population.

Because a large proportion of schools exhibit median subgroup SGPs so close to the 50<sup>th</sup> percentile, point assignments are cut in smaller increments around the 50<sup>th</sup> percentile. Observed median subgroup SGP point allocations were based on the ranges shown in Table 2.5.

**Table 2.5. Observed Growth Multipliers**

<b>SGP Range</b>	<b>Multiplier</b>
$1 \leq \text{SGP} < 30$	.125
$30 \leq \text{SGP} < 42.5$	.25
$42.5 \leq \text{SGP} < 47.5$	.375
$47.5 \leq \text{SGP} < 50$	.50
$50 \leq \text{SGP} < 52.5$	.625
$52.5 \leq \text{SGP} < 57.5$	.75
$57.5 \leq \text{SGP} < 60$	.875
$60 \leq \text{SGP} \leq 99$	1.00

Though subgroup growth scores are combined to arrive at an index value, in order to support the effective use of growth data for all students and all subgroups, the WVDE will report growth values at multiple levels and aggregations/disaggregations. Teachers and administrators will have access to various growth and achievement plots to examine the degrees to which students, grades, schools, and districts exhibit growth and to drive improvement efforts aimed at increasing growth for specific subgroups. These multiple levels of access and the ability to track observed growth through the West Virginia Accountability Index will allow teachers and administrators to focus on instructional decisions that produce continued improvement and appropriate remediation for all students and all subgroups.

### **Adequate Growth**

Adequate growth answers the question, “Is the growth we have observed enough for students to reach policy expectations?” This component of the West Virginia Accountability Index is weighted at 10% for elementary and middle schools and at 5% for high schools. Further, these values are split evenly between mathematics and reading/language arts.

Furthermore, unlike observed growth, the adequate growth measure encompasses only the all students group. While individual subgroups are not specified, the WVDE believes this is a valid examination of academic performance because students are disaggregated into one of four designations, as shown in Table 2.6.

**Table 2.6. Adequate Growth by Prior Proficient Status**

<b>Prior Proficient: Yes</b>		<b>Prior Proficient: No</b>	
<b>Not Keeping Up (i.e., falling behind)</b>	<b>Keeping Up</b>	<b>Not Catching Up (i.e., staying behind)</b>	<b>Catching Up</b>
Student was proficient but is on track not to be proficient within three years, or by 11 <sup>th</sup> grade, whichever is first.	Student was proficient and is on track to stay proficient within three years, or by 11 <sup>th</sup> grade, whichever is first.	Student was not proficient and is not on track to be proficient within three years, or by 11 <sup>th</sup> grade, whichever is first.	Student was not proficient but is on track to be proficient within three years, or by 11 <sup>th</sup> grade, whichever is first.

The decision to reduce the relative weight of adequate growth came about from conversations with content experts, including Dr. Betebenner, local and internal practitioners, and WVDE staff members after discussing multiple use cases that led to unintended negative effects.

While the notion of adequate growth communicates that an underperforming student should acquire content knowledge and skills at a much faster rate than other students, in some cases, it is simply unreasonable that a student will make up sufficient academic ground to reach grade-level expectations within three years. Additionally, this expectation is further exacerbated as a student enters high school and has even less time to accelerate learning due to the absence of certain foundational skills. Finally, for students in 11<sup>th</sup> grade, the notion of adequate growth is moot because they are either proficient or not, regardless of the distance between where they are and where they need to be.

Despite this reality, the WVDE believes it is imperative to make schools more aware that students must grow toward specific targets. Because of the normative nature of the West Virginia Growth Model, without a proficiency target, one could potentially exhibit “growth to nowhere” or demonstrate the highest growth among the lowest-performing group of students—neither of which is desirable without a referent point for success. By including adequate growth in this manner, the West Virginia Accountability Index will focus attention on progress toward a growth target without penalizing a school or classroom due to unreasonable targets based on effects incurred in prior settings.

To arrive at an adequate growth score, the following steps are taken:

1. The distance between the observed SGP and target SGP (required for a student to be proficient within three years, or by 11<sup>th</sup> grade) is calculated for every student in a given school.
2. Median distances are calculated using all available target distances in the school.
3. A multiplier is assigned to each observed and target SGP distances for each valid subgroup to calculate the total index value. The multiplier for adequate growth is shown in Table 2.7.

**Table 2.7. SGP Target Distance Multipliers**

SGP Distance Range	Multiplier
$\geq -50$	0
$> -50$ and $\leq -45$	.05
$> -45$ and $\leq -40$	.1
$> -40$ and $\leq -35$	.0
$> -35$ and $\leq -30$	.35
$> -30$ and $\leq -25$	.4
$> -25$ and $\leq -20$	.55
$> -20$ and $\leq -15$	.7
$> -15$ and $\leq -10$	.8
$> -10$ and $\leq -5$	.9
$> -5$ and $\leq 0$	.95
$> 0$	1

Again, to support the effective use of adequate growth data for all students, the WVDE will report growth at various levels and aggregations/disaggregations. By providing teachers and administrators with access to information based on the required growth needed to reach proficiency, differentiated efforts can be directed toward students who need dramatic improvement, who are at risk of falling

below standard, and who need additional support to continue improvement.

**Attendance Rates/Graduation Rates** – The application of attendance and graduation rates in the West Virginia Accountability Index will differ by programmatic levels. In the current accountability system, elementary schools and middle schools must have at least a 95% attendance rate. West Virginia has also utilized the four-year adjusted cohort for high schools (those that graduate students) since the *Consolidated State Application Accountability Workbook* was approved in 2010. Under the proposed West Virginia Accountability Index, the state will continue to apply the four-year adjusted cohort graduation rate using one-year lagged graduation cohort data. Either the attendance or graduation rates, depending on school configuration, will account for 15% of the total index weight.

### Attendance Rates

Schools are expected to reach an attendance rate of 95% over the course of a year. Because 95% is the current policy expectation, each school receives a multiplier depending on the degree to which it approaches/exceeds 95%. To calculate multipliers for elementary and middle schools within each programmatic level, the following steps are taken:

1. Schools are ranked in order of their attendance rates.
2. Attendance rates are then divided into quartiles.
3. Each quartile is assigned 0.25, 0.50, 0.75, or 1.00 as a multiplier.
4. For any school with an attendance rate that meets or exceeds 95%, its multiplier is converted to 1.0 and is awarded the maximum multiplier for meeting the target.

### Graduation Rates

Graduation rate expectations have been developed by examining the distribution of high schools across West Virginia. Using the four-year adjusted cohort graduation rate, only 35% of schools meet the target expectation of 80% of incoming ninth graders graduating in four years. As a result, there is a need to delineate how points are assigned to schools when so many are below the target. The following steps have been taken to calculate multipliers for high schools based on graduation rates:

1. High schools are ranked in order based on their graduation rates.
2. Graduation rates are then divided into deciles.
3. Each decile is assigned consecutive 10ths of a point through the top decile.
4. For any school with a graduation rate that meets or exceeds 80%, its multiplier is converted to 1.0 and is awarded the maximum multiplier for meeting the target.

The weighting scenarios for attendance and graduation rates incentivize meeting the policy targets of 95% for attendance and 80% for graduation as quickly as possible.

**Participation Rates** – While participation rates will not be included in the West Virginia Accountability Index, they will serve as traditional “on/off switches” in the sense that they will be minimum requirements for all schools. If a school fails to meet the 95% participation criteria for any valid subgroup, it will be automatically be identified as the lowest school classification, *Targeted for Support*. Additionally, it will not be eligible to be included in the West Virginia Accountability Index scoring process but will be provided with reports that align with the index components to ensure it makes sound data-driven decisions to support academic improvement.

## FINAL INDEX CALCULATIONS

To derive the final index score for each school, the multipliers for each component, achievement, gaps, observed growth, adequate growth, and attendance/graduation rates will be applied to the predetermined weights that were identified at the beginning of this section. Table 2.8 shows the set weights based on a

possible 100 points.

**Table 2.8. Weights by Programmatic Level**

Category	Elementary/Middle Schools	High Schools
Proficiency Rates in Mathematics and Reading/Language Arts	32.5%	32.5%
Achievement Gaps in Mathematics and Reading/Language Arts for All Subgroups	20.0%	20.0%
Observed Growth in Mathematics and Reading/Language Arts for All Subgroups	22.5%	27.5%
Adequate Growth in Mathematics and Reading/Language Arts for All Students	10.0%	5.0%
Attendance/Graduation Rates	15.0% (Attendance)	15.0% (Graduation)

## REPORTING COMPOSITE AND COMPONENT PERFORMANCE ON THE WVAI

Reporting will play a large role in how schools, districts, and the public can interpret the West Virginia Accountability Index. At its core, the index will communicate a multifaceted and balanced accountability system through intuitive reporting. Effective reporting focuses attention to correct indicators, in turn guiding initial data-driven decision making at the state and local levels. By drawing attention to (1) whether students are currently meeting academic expectations, (2) the degree to which achievement gaps are present, (3) how much growth students exhibit in a given year, (4) how many students are growing enough to be ready for college and careers, and (5) attendance and graduation rates, educators can differentiate supports and incentives from a much earlier point in students' academic careers.

The index also will allow the WVDE to identify recommended courses of action based on individual school performance and results. Each level of the reporting structure will be developed with a specific audience in mind. Further, pilot versions of each report will undergo development and focus group testing once peer reviewers have provided initial feedback on the index. At a minimum, the following target groups will be considered during report development:

### School-Level Reporting

The school level will comprise the most granular level of reporting, with drillable information provided to teachers, administrators, school staff, and principals to ensure they have the most actionable data around each index component. Each indicator, where applicable, will be available for each content area and, at a minimum, will allow school staff to examine high-level information about the school, which will include but not be limited to the following:

**Overall Index Score** — The overall index score and classification assigned to each school will be reported. West Virginia will also include the average index score obtained by all schools in that programmatic level, the maximum and minimum values obtained by schools during that year, and the distance to the next cut point for classification. Additionally, the overall index score will indicate whether the school was designated as a *Priority*, *Focus*, or *Reward* school.

**Achievement Index Score** — This score will likely be a visual representation using a gradient (and textured for low-vision users) bar that quickly identifies a school's relevant position on this indicator. The graphic will quickly communicate the percentage of proficient students in that school and the points awarded based on that proficiency score. Additionally, the "slider bar" will indicate the average, maximum, and minimum scores obtained by schools that year. This indicator will allow for a drill-down examination of subgroups initially then subgroups by grades to ensure schools have

sufficient actionable data to make instructional and building-wide decisions that promote continued success or that turn around low performances.

**Achievement Gap Score** — This visual representation will identify how much of the achievement gap has been closed, with indicators for both mathematics and reading/language arts. Further, each indicator will identify the average, maximum, and minimum achievement gaps by schools that year. To provide the most actionable data possible, it will also have drill-down capabilities that allow a school to disaggregate the achievement gap into individual achievement gaps by (1) subgroup vs. non-membership groups and into (2) subgroups by grades.

**Observed Growth Score** — This visual representation will identify the points obtained and the median SGP for all valid subgroups in a school. Again, this indicator will also identify the average, maximum, and minimum point values obtained by schools that year. Drill-down capabilities will allow a school to identify the individual median SGPs by subgroup and by grade-level subgroups.

**Adequate Growth Score** — This visual representation will communicate the number of points obtained and the median distance between observed and target SGPs for all students in a school. Again, this indicator will show the average, maximum, and minimum points obtained by schools that year. Like the prior indicators, it will allow schools to examine target distance median SGPs by subgroups for that school and by grade-level subgroups.

**Attendance Rates/Graduation Rates** — Depending on the programmatic level, this indicator will show the number of points and the attendance or graduation rates for a given school. Again, this indicator will identify the average, maximum, and minimum values obtained by other schools that year. Additionally, users will be able to disaggregate it into attendance rates by grade. High schools also can use this to view attendance rates and the reported four-year adjusted cohort graduation rate.

### District-Level Reporting

District-level reporting will be very similar to school-level information but will focus primarily on drill-down information for each individual school within a given district. These data will include indicators for each index component and comparative information for every school in a given district. Additionally, districts will be able to disaggregate school-level results on each indicator by various school groupings (e.g., proportion of low-SES students, ranges of valid subgroups used in the index). Districts will be notified prior to public dissemination of what schools of schools, if applicable, are identified as *Priority*, *Focus*, or *Reward*.

### Public Reporting at the State Level

First, state-level reporting will meet the requirements of the ESEA and will provide state-, district-, and school-level reporting across all aspects of the index. State-level reporting will be driven primarily by each component rather than providing an interactive and comprehensive school report for each individual school. However, the state will still provide index and component scores for every school. State reporting will also meet the reporting requirements for designating *Priority*, *Focus*, and *Reward* schools.

### Public Reporting for Parents

Parents are at the heart of education reform. Their buy-in and support is essential to ensure that students are prepared to attend school ready to learn and that schools have sufficient support to educate students effectively. Parent reports will provide high-level information around each academic indicator. Additionally, the WVDE will ensure that parent reports reflect each aspect of the West Virginia Accountability Index: achievement, gaps, growth, and attendance/graduation rates.

## DEFINING SCHOOL CLASSIFICATION LEVELS USING THE WEST VIRGINIA ACCOUNTABILITY INDEX

### INTRODUCTION AND BACKGROUND

The WVDE turned to the Accountability and Accreditation Stakeholders Advisory Committee for guidance in determining markers to best classify schools using the index. Further, the WVDE worked with a select group of knowledgeable individuals during a school-focused standard setting process enabling the state to develop empirically based cut points to delineate each school classification. Ultimately, the standard setting yielded the following four classifications (referenced earlier in this section):

- *Highly Effective*
- *Effective*
- *Needs Improvement*
- *Targeted for Support*

This four-tiered classification system is designed to complement, not replace *Priority*, *Focus*, and *Reward* designations. West Virginia has verified empirically that those schools designated as *Priority* schools align very closely with those schools classified as *Targeted for Support* and *Needs Improvement* via the West Virginia Accountability Index. However, those schools designated as *Focus* schools, because of the special emphasis that is placed upon achievement gaps, may include some schools that fall outside the *Targeted for Support* or even *Needs Improvement* classifications. This is an important nuance of our classification system because it communicates that even the highest performing schools may have persistent achievement gaps which must be addressed through focused support.

The process used to develop Index classifications had two primary goals: (1) to define a valid and empirically driven set of school classification cut points with corresponding data-based rationales and (2) to determine a rationale based upon those classifications that would articulate expected improvement over time and identify corresponding and aligned proficiency-based AMOs for schools. West Virginia felt particularly strongly that the corresponding proficiency-based AMOs must be empirically linked to the Index classifications or else they would be wholly disconnected from the broader accountability system and lack credibility. Both of these goals were driven by a modified benchmark standard setting process.

### THE MODIFIED BENCHMARK STANDARD SETTING PROCESS—AN “EDUCATIONALLY SOUND RATIONALE” FOR DETERMINING SCHOOL CLASSIFICATIONS AND PROFICIENCY-BASED AMOS

West Virginia defined the cut point for determining an *Effective* school based upon a modified version of the benchmark standard setting process which is commonly used during the development of state summative assessments. Via this process, we sought to define the characteristics of an *Effective* school in terms of both narrative and data-based descriptions. These descriptions served as “benchmarks” against which impact data were applied to refine classifications. Once we settled upon a satisfactory cut point for *Effective* schools, the proficiency rates associated with schools meeting this benchmark were then used as the starting points for our proposed proficiency-based AMOs. Thus, the standard setting process serves as our educationally sound rationale for both the state’s school classification system and our proficiency based AMOs. We believe standard setting to be a defensible rationale in this case because it is a logical extension of practices that are routinely used by experts to make judgments about the content which students should know and be able to do in order to be classified at a particular performance level (e.g., proficiency). The only difference is that, in this case, we applied the methodology to the school level where experts made judgments about the characteristics of an *Effective* school based on a set of criteria.

The standard setting approach blended both conceptual/philosophical and empirical approaches. A purely empirical approach using actual index values, along with their respective component scores—including proficiency rates, progress as student growth, achievement gaps, and attendance/graduation rates—would have limited participants to think only about school classifications from a normative standpoint. This could inhibit participants from articulating high expectations for *Effective* schools and could limit further what expectations should be placed on schools around continuous improvement. As a result, participants were primed to consider the characteristics of *Effective* schools both generally and across the components of the index using their own conceptually driven benchmarks that align with their beliefs about school success.

The standard setting process and its outcomes are described below.

### Small-Scale Standard Setting Committee (SSSC) Representation

The WVDE sought to continue the collaborative approach through which the ESEA Flexibility Request elements have been conceptualized and articulated—the development of school classifications and proficiency-based AMOs should be no different. To ensure there was an appropriately balanced representation of perspectives, the following groups of stakeholders participated in the process:

- School administrators
- District administrators
- Policy makers
- Practitioners
- Researchers
- Analysts

These groups were able to manage a balance of (1) real-world experience in driving school improvement efforts, (2) local considerations promoting continuous improvement, (3) policy-based expectations for school success and state success, and (4) empirical and statistical considerations in setting targets and improvement thresholds.

### SSSC Process

The small-scale standard setting began by articulating the purpose of the meeting: to define an accountability system that applied rigorous expectations in a fair, valid, and transparent manner. This process was conducted through the following steps:

1. Establishing the number and conceptual definitions of proposed school classifications
2. Setting cut points along the index to operationalize each classification
3. Defining guidelines for long-term improvement to inform AMO development

Each step of the process is delineated further below.

**Establishing School Classifications** – To establish school classifications, participants were first briefed on the *ESEA Request for Flexibility* offered by US ED and WV’s approach to seeking flexibility. Participants were then briefed on the index components and how they interfaced to calculate an index score. This allowed people to think about the characteristics that would be considered in the proposed index. After participants were briefed on the standard-setting process and step-by-step directions, they engaged in conceptualizing the number of school level classifications that would define the benchmarking process. Participants decided that at least 3 school classifications would be necessary but any more than 5 would be too unwieldy.

While performance categories were not initially labeled, participants came to consensus on a desire to identify four school classifications, in order to align with West Virginia’s educator, principal, and

counselor evaluation systems, which also include four levels of performance. Further, participants felt that a four-classification system was contextually intuitive because of comparisons to various student performance levels on national assessments (e.g., NAEP). Following the standard setting and using participant input, school classifications were ultimately labeled as:

- Level 1: *Targeted for Support*
- Level 2: *Needs Improvement*
- Level 3: *Effective*
- Level 4: *Highly Effective*

Upon choosing 4 classification categories, participants within their programmatic level groups were asked to draft a narrative describing the characteristics of an effective school, as well as schools in the other 3 levels. Responses for Level 3 (i.e., *Effective*) schools included phrases like:

- “The majority of all students are performing above expectations.”
- “...a higher proportion of students [are] in the high growth category.”
- “A significant percentage of students are proficient,”
- “Growth [should] equal the state mean...”
- “The achievement gap is less than 20%...”
- “[Students] are prepared for post-secondary opportunities in higher education or careers.”

Examining these and other statements indicated that SSSC members felt that *Effective* schools should be well rounded in terms of achievement, growth, and achievement gaps while preparing students throughout their educational careers.

**Setting Cut Points for Each Classification** – After framing narrative conceptualizations of schools within programmatic level groups, participants were asked to arrive at recommended numerical values for proficiency rates, achievement gaps, observed growth, adequate growth, and attendance/graduation rates for all the four proposed school classification levels. After an initial set of values were provided by each participant, the standard-setting leader calculated the median values and standard errors associated with each group’s recommendations and provided these values back to the participants. Participants in each group were instructed to consider whether those values represented appropriate expectations for each classification level. Participants were then asked to reach consensus on the recommended values for each component of the index including proficiency rates, achievement gaps, observed growth, adequate growth, and attendance/graduation rates for each school classification level.

Once participants reached consensus, the standard-setting leader provided live data for the 2011 school year, the most recent data available at the time. Participants were asked to compare their level 3 school classification (i.e., *Effective*) against the actual data provided. These data showcased a set of school index scores in ranges of 5% (i.e., median values) for the top-scoring, lowest-scoring, and for each decile. Each group was asked to review the impact data and identify where their conceptually-defined consensus cuts fell on each indicator.

Using those identified consensus values and impact data, participants then selected a row that best fit their conceptualization considering all indicators. Participant groups were again asked to come to a final consensus set of values that would define an *Effective school*. This process was replicated for each school classification level to arrive at 3 distinct cut points. The final consensus values for each school classification would ultimately correspond to a blend of their conceptually-defined cuts (i.e., benchmark cuts) and the normatively ranked impact data. Participants were then asked to respond to attitudinal survey items questioning whether they believed their cuts were too high/too low. All but

one group believed their school classification consensus values were neither too high nor too low. The elementary school group believed that their Level 2 cut (i.e., the cut values that delineated between Level 1 and Level 2 schools) was too low and adjusted their cut values accordingly. Once final consensus values were identified, the standard setting leader entered values into an index calculator that calculated a predicted index value using the prior calculations for each component and the overall weighting for the full index.

Participant groups were then provided the index values representing each of their final consensus values, as well as the normative position for each programmatic level. In all but the effective cut point for schools, participants generally selected cuts that corresponded to approximately the 15<sup>th</sup> and 90<sup>th</sup> percentiles of current performance on the index for *Needs Improvement* and *Highly Effective* schools, respectively. This provided initial validation of the process. For the *Effective* cut, the elementary and middle school groups both selected cuts corresponding to the 50<sup>th</sup> percentile of current performance upon the index; the high school group selected cuts corresponding to the 60<sup>th</sup> percentile.

Programmatic level groups then reconvened into a large group setting and discussed the discrepancy between varying starting points by programmatic level and concluded that this met their school-level expectations because of the difference in indicator distributions across programmatic levels. The specific distributions are described in a later section detailing information about the index and proficiency-based AMOs. The final index values and percentile rankings are indicated in Table 2.9 below.

**Table 2.9. Participant Index Values and Percentile Ranks for Each School Classification**

School Classification Cut	Elementary Schools		Middle Schools		High Schools	
	Index Value	Percentile School (based upon 2011-12 performance)	Index Value	Percentile School (based upon 2011-12 performance)	Index Value	Percentile School (based upon 2011-12 performance)
<b>Needs Improvement</b>	60 points	15 <sup>th</sup>	60 points	15 <sup>th</sup>	48 points	15 <sup>th</sup>
<b>Effective</b>	71 points	50 <sup>th</sup>	70 points	50 <sup>th</sup>	62 points	60 <sup>th</sup>
<b>Highly Effective</b>	84 points	90 <sup>th</sup>	80 points	90 <sup>th</sup>	75 points	90 <sup>th</sup>

As described above, the expected index values decrease slightly as we progress up the programmatic levels, indicating that high schools are facing the greatest challenges in ensuring children are meeting grade level expectations. Participants believed this to be additional validation of their cut points due to the cumulative effect of learning loss at the high school level. Despite this increased contextual difficulty, the SSSC recommended to increase the minimum threshold by 10 percentiles due to the need to indicate high expectations against the absolute index value (i.e., 60<sup>th</sup> percentile schools representing the *Effective* benchmark for high schools).

Using these proposed classification points, the WVDE has structured the selection, implementation, and recommendation of support services and resources for all schools. In addition, the index classifications will serve to validate and complement the *Priority*, *Focus*, and *Reward* designations that schools will receive.

Figures 2.4 and 2.5 provide a graphical representation of the classification cut points by programmatic level.

**Figure 2.4. Distribution of Elementary and Middle School Classifications****Figure 2.5. Distribution of High School Classifications**

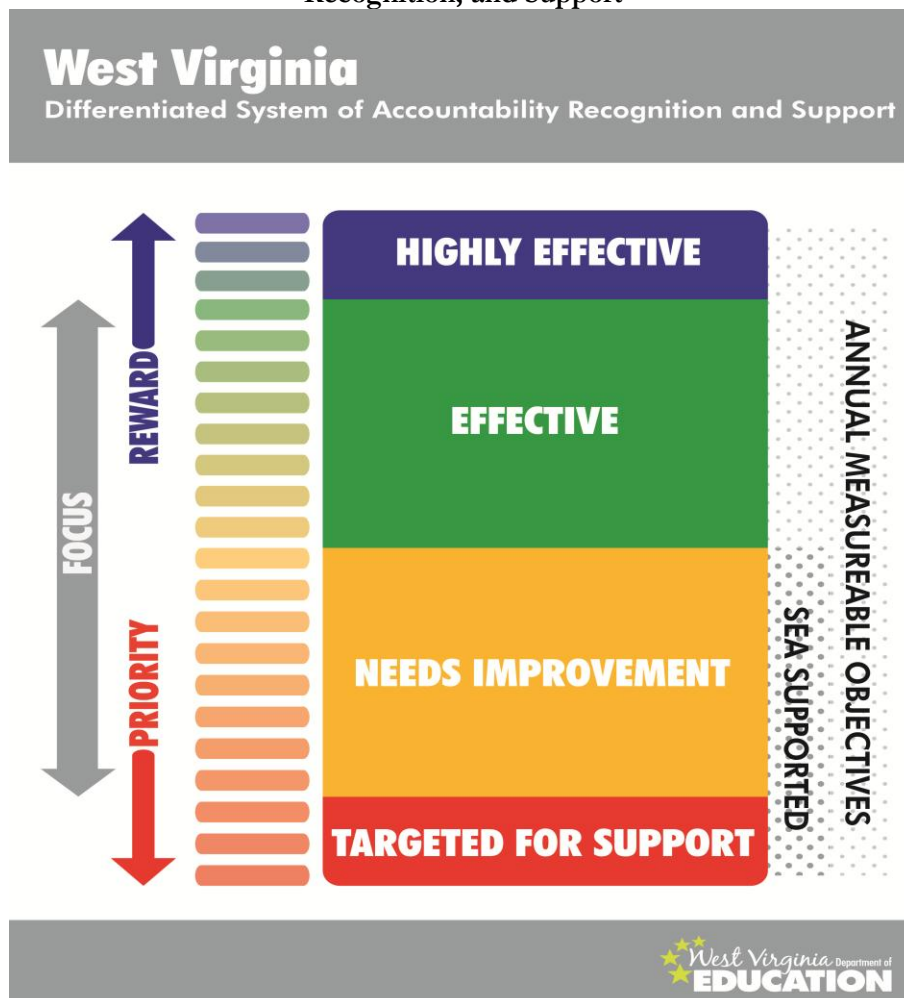

## DIFFERENTIATED RECOGNITION AND SUPPORT FOR EACH SCHOOL CLASSIFICATION

The process through which the state will classify schools will be multi-layered in nature to ensure schools of every level of quality are represented. This process strives to ensure schools are pushed to improve continuously, regardless of demographic or preconceived notions defining high performance. This process includes the following approaches:

- Rank ordering schools using the West Virginia Accountability Index.
- *Priority* school ranking
- *Focus* school ranking
- Identification of *Targeted for Support* Schools using the index
- Recommended supports for schools identified as *Needs Improvement*

Figure 2.6 presents a graphical overview of this system. A brief overview of the types of supports and services that schools in each designation will receive is included below, but provided in more detail in sections 2.C through 2.G.

**Figure 2.6. Overview of West Virginia’s Proposed Differentiated System of Accountability, Recognition, and Support**

## WEST VIRGINIA ACCOUNTABILITY INDEX RANKING

The WVDE will rank order schools using the West Virginia Accountability Index from the largest to the smallest index value. As detailed above, composite index values are based on overall achievement, the size of a school's achievement gaps for all possible represented subgroups, academic progress using the West Virginia Growth Model, and graduation/attendance rates. Schools' performance on the index components will be described using the previously proposed reporting structures for each LEA and school. Each school's classification will be publicly reported and will impact the way in which the SEA or LEA must deliver services to the school.

## REWARD SCHOOLS

*Reward* schools will be identified using the West Virginia Accountability Index and shall be delineated as either high performing (i.e., Next Generation High Performing Schools) or high progress (i.e., Next Generation High Progress Schools) based on their performance over time on the WVAI. Within each programmatic level, schools that have demonstrated long-term high performance or high progress that do not have persistent achievement gaps will be identified. *Reward* schools will be recognized publicly, provided collaborative professional development opportunities, and awarded a grant. Additional details regarding *Reward* Schools are provided in section 2.C.

## PRIORITY

Using the West Virginia Accountability Index, West Virginia will identify a number of *Priority* schools equal to at least the number represented by the bottom 5% of Title I schools. These schools will receive a specific set of support services. Once the bottom 5% of Title I schools are identified, the index value that corresponds to the highest performing of those schools will be applied against the entire list of schools. All schools falling below this index value shall be designated as *Priority* schools, regardless of their WVAI classification. This will ensure that the WVDE is including schools that may not be Title I eligible for consideration, ensuring that all schools with the lowest performance are included in the *Priority* school designation.

For those schools identified as *Priority* schools, the SEA will provide targeted support that promotes school-wide efforts aligned to West Virginia's Standards for High Quality Schools which are as follows:

1. Establishing a Positive Climate and Cohesive Culture
2. Building capacity and supporting effective School Leadership
3. Aligning instruction with Standards-Focused Curriculum and Assessments
4. Building infrastructure for Student Support Services and Family/Community Connections
5. Developing and maintaining Educator Growth and Development
6. Building the infrastructure to support Efficient and Effective Management
7. Building a culture of Continuous Improvement

The SEA will scaffold local and building-based efforts through consistent contact with SEA school improvement specialists, diagnostic visits, measuring school culture and climate, data-driven decision making, targeted and differentiated professional development, assessments of instructional practices, and assignment to a cohort-based school leadership support group. For more information on how specific supports will be delivered, please refer to section 2.D.

## FOCUS

Using the achievement gaps component of the West Virginia Accountability Index, West Virginia will identify a number of *Focus* schools equal to at least the number represented by the bottom 10% of Title I schools

when ranked only upon this component of the index. Once the bottom 10% of Title I schools are identified, the achievement gap component score that corresponds to the highest performing of those schools will be applied against the entire list of schools. All schools falling below this value for achievement gaps shall be designated as *Focus* schools, regardless of their WVAI classification.

West Virginia initially considered using an overall index ranking to identify *Focus* schools. We believed this was important to maintain simplicity and consistency with the method used to identify all four classifications of schools as well as *Priority* and *Reward* schools. However, upon further examination, we concluded that the component weight for achievement gaps that is incorporated into the overall index calculation (i.e., 20%) would make it difficult for a total index value to accurately identify those schools with the highest achievement gaps. Instead, we use the method described above.

There is one important implication of the decision to use the achievement gaps component of the index in isolation to identify *Focus* schools. That is, *Focus* schools can potentially be identified among any of the four WVAI classification levels. For example, a school that would otherwise be labeled as *Effective* based upon its overall index value but that exhibits a large and persistent achievement gap could potentially be labeled a *Focus* school, if the achievement gap component for that school is below a certain level. This is an important capability of the accountability system because it communicates the expectation that, even if a school is performing very well in other areas, but significant achievement gaps still exist, we must provide immediate supports to address the obstacle. This is an important “safety net” to the system to ensure achievement gaps are considered in isolation of other factors.

Once schools are designated as *Focus* schools, the SEA will work closely with LEAs to ensure improvement efforts are aligned and focused. These supports include:

- RESA/LEA consultant assigned supports
- Analysis of achievement gaps and an initial root cause analysis
- Self-assessment validating root cause analyses
- Gap specific interventions targeting root causes of achievement gaps
- PD/TA support from RESA/LEA
- Process checks with SEA

For more information on how specific supports will be delivered, please refer to section 2.E.

## **SCHOOLS IDENTIFIED AS TARGETED FOR SUPPORT**

While *Priority* and *Focus* schools are clearly in need of very specific supports, the development of West Virginia’s Differentiated Recognition, Accountability, and Support System delineates a clear message: any school that is *Targeted for Support* is in need of immediate assistance. Schools identified as *Targeted for Support* that are not *Focus* or *Priority* schools are demonstrating a combination of low achievement, large achievement gaps, low growth, or low attendance/graduation rates. Using the index classification, this classification amounts to approximately 15% of the state’s elementary, middle, and high schools based upon 2011-12 data.

While services have traditionally been directed to Title I eligible schools, West Virginia believes that schools in this classification should be served regardless of Title I status. However, time, effort, and monetary constraints limit the number of schools the SEA can directly serve. As such *Priority* schools are the state’s main target. These schools currently exhibit significant overlap with the lowest rated of those schools identified as *Targeted for Support* schools. The remaining schools that are designated as *Targeted for Support* schools work closely with their LEAs, but the SEA will provide some direct supports to the extent possible. The majority of services will be structured around promoting LEA leadership, LEA self-assessments, SEA-driven capacity building at the LEA level to maximize services to schools, SEA support of LEAs to focus on

outcomes for schools *Targeted for Support*.

### ALL OTHER SCHOOLS FALLING BELOW THE EFFECTIVE CUT POINT

While West Virginia’s primary concerns revolve around those schools that are designated as *Priority* or *Focus* and those schools that fall in the *Targeted for Support* classification, the state’s goal is to have 100% of schools be *Effective*. This cannot be achieved without designated supports bolstering continuous improvement efforts. While majority of schools in the state require constant improvement, with many in need of substantial gains on a varied set of indicators, the SEA believes that enhanced capacity at the LEA level can streamline district efforts and focus local personnel to best leverage resources and time to move individual schools forward.

To that end, LEAs of schools designated as in *Needs Improvement* will receive services targeting their ability to provide supports and resources to the individual schools. It will be the role of the SEA to enhance leadership, strategic planning, instructional improvement, and outcome-focused capacity at the local level. This will allow districts flexibility in how they can best serve groups of schools with similar needs. For more information on how services are delivered, please see section 2.G.

### OVERVIEW OF IDENTIFICATION NUMBERS AND PROPOSED SUPPORTS

To better illustrate the number of schools in each designation, along with the required or recommended supports, please see Table 2.10 below.

**Table 2.10. The Number of Schools in Each Designation and Accompanying Scores**

	Schools < Effective Cut	Priority Schools	Focus Schools	Schools Targeted for Support	Needs Improvement
<b>Elementary: 392 schools</b>	195 Schools*	17	47	39	115
<b>Middle: 155 schools</b>	77 Schools*	8	17	16	50
<b>High: 115 schools</b>	69 Schools*	8	18	11	30
<b>Services Provided to these schools</b>		<ul style="list-style-type: none"> <li>• School Improvement Coordinator Assigned</li> <li>• Diagnostic Visit</li> <li>• Culture Survey</li> <li>• Data Analysis</li> <li>• Focused weekly visits</li> <li>• Collaborative Teams (PLC)</li> <li>• Targeted embedded professional development</li> <li>• Instructional Practice Inventory</li> <li>• School Leadership</li> </ul>	<ul style="list-style-type: none"> <li>• RESA/LEA Consultant Assigned</li> <li>• Self-assessment</li> <li>• Gap analysis</li> <li>• Gap specific interventions</li> <li>• PD/TA support from RESA/LEA</li> <li>• Process checks with SEA ESEA</li> <li>• Consolidated Plan for LEAs revised to focus programs on <i>Focus</i> schools</li> </ul>	<ul style="list-style-type: none"> <li>• LEA Leadership Team Meeting</li> <li>• Self-Assessment to measure district capacity</li> <li>• SEA will provide LEA Leadership capacity to build district capacity for those requesting assistance.</li> <li>• ESEA Consolidated Plan for LEAs revised to focus programs on</li> </ul>	<ul style="list-style-type: none"> <li>• LEAs not represented in the Targeted for Support will be included in the Leadership Meeting.</li> <li>• ESEA Consolidated Plan for LEAs revised to focus programs on <i>Needs Improvement</i> schools</li> <li>• SEA will revise ESEA Consolidated</li> </ul>

	team Conferences • ESEA Consolidated Plan for LEAs revised to focus programs on <i>Priority</i> schools • SEA will revise ESEA consolidated monitoring to focus on outcomes for <i>Priority</i> schools	• SEA will revise ESEA consolidated monitoring to focus on outcomes for <i>Focus</i> schools	<i>Targeted for Support</i> schools • SEA will revise ESEA consolidated monitoring to focus on outcomes for <i>Targeted for Support</i> schools • Technical Assistance/Progress twice a year.	monitoring to focus on outcomes for <i>Needs Improvement</i> schools
--	---	--	---	--

\*Sum of rows may exceed total number schools below *Effective* cut because *Focus* schools can include schools exceeding the *Effective* threshold on the total index, but exhibiting achievement gaps.

2.A.ii Select the option that pertains to the SEA and provide the corresponding information, if any.

<p>Option A</p> <p><input checked="" type="checkbox"/> The SEA includes student achievement only on reading/language arts and mathematics assessments in its differentiated recognition, accountability, and support system and to identify reward, priority, and focus schools.</p>	<p>Option B</p> <p><input type="checkbox"/> If the SEA includes student achievement on assessments in addition to reading/language arts and mathematics in its differentiated recognition, accountability, and support system or to identify reward, priority, and focus schools, it must:</p> <ul style="list-style-type: none"> <li>a. provide the percentage of students in the “all students” group that performed at the proficient level on the State’s most recent administration of each assessment for all grades assessed; and</li> <li>b. include an explanation of how the included assessments will be weighted in a manner that will result in holding schools accountable for ensuring all students achieve college- and career-ready standards.</li> </ul>
--	--

The WVDE does not currently propose to use student achievement on assessments outside of mathematics and reading/language arts.

## 2.B SET AMBITIOUS BUT ACHIEVABLE ANNUAL MEASURABLE OBJECTIVES

Select the method the SEA will use to set new ambitious but achievable annual measurable objectives (AMOs) in at least reading/language arts and mathematics for the State and all LEAs, schools, and subgroups that provide meaningful goals and are used to guide support and improvement efforts. If the SEA sets AMOs that differ by LEA, school, or subgroup, the AMOs for LEAs, schools, or subgroups that are further behind must require greater rates of annual progress.

<p>Option A</p> <p><input type="checkbox"/> Set AMOs in annual equal increments toward a goal of reducing by half the percentage of students in the “all students” group and in each subgroup who are not proficient within six years. The SEA must use current proficiency rates based on assessments administered in the 2011–2012 school year as the starting point for setting its AMOs.</p> <ul style="list-style-type: none"> <li>i. --------------------------------	-------	--

## INTRODUCTION AND BACKGROUND

The approach taken to develop the state's ambitious but achievable Annual Measurable Objectives (AMOs) has been underway for some time. Beginning in February of 2012, the state began its outreach to LEAs, the media, and community as the WVDE filed for the *NCLB* Waiver, requesting both comments on the waiver itself and on the broader ESEA Flexibility Request. Conversations around the core components of Principle 2 began in March of 2012 and included LEA staff comprising West Virginia's Assessment Advisory Committee. This initial meeting focused on the appropriate use of assessment data in an accountability system that transitioned from a lever-based system to a gradient-based index.

Using guidance from these initial conversations, the state turned to their Accountability and Accreditation Stakeholders Advisory Committee (AASAC), which was established in April of 2012. Throughout April, May, June, and July of 2012, the WVDE met with the AASAC to discuss potential revisions to federal and state accountability systems, component weights for the index, guiding principles around defining AMOs, and establishing fair, yet rigorous, trajectories. This collaborative process culminated with the meeting of a small-scope standard setting committee (SSSC) who would ultimately define the cut points for school classifications using empirically-based rationales. The following sections detail the development of index trajectories and a set of linked proficiency-based AMOs presenting the expectation that all schools will strive toward equipping all students to be prepared for college and careers.

## DEVELOPING WEST VIRGINIA'S AMBITIOUS BUT ACHIEVABLE AMOs

West Virginia believes that Annual Measurable Objectives (AMOs) must be ambitious, but legitimately attainable, to drive system-wide change. As detailed in the narrative for Principle 1 and earlier in this section, the state made a bold decision, once in 2009 and again in 2010, to realign proficiency-level expectations with national and international performance benchmarks. Given the short amount of time that was left to reach 100% proficiency by 2014, West Virginia's schools were left with an approximate required increase of 16% and 17% percent proficient *per year* in AMOs for mathematics and reading/language arts, respectively. This reality became an impediment to focused statewide efforts supporting improved teaching and learning as many local systems were discouraged from making improvement efforts before they even began the school year. The opportunity to revise the federal accountability system and set new AMOs reflecting continuous attainable improvement are necessary to ensure West Virginia's public education system continues to move forward.

As per US ED guidance the WVDE understands that it must define AMOs and trajectories using proficiency rates in reading/language arts and mathematics. In response, West Virginia has designed AMOs and trajectories around the central goal of every student being in an *Effective* school, as classified by the West Virginia Accountability Index by the year 2020. We believe this approach is extremely rigorous and innovative in that it promotes alignment among our proposed system of school classifications and a well-articulated set of proficiency-based AMOs that will ensure schools meet our central goal. Our approach to derive these AMOs was as follows:

1. Use stakeholders' recommendations regarding school classifications to develop a set of starting points based upon the expectations for an *Effective* school at each programmatic level;
2. Use input from stakeholders to determine a rigorous but attainable trajectory for improvement in terms of total index points which aligns to the following system goals:
  - a. All schools should meet or exceed the current effective school cut by 2020 (i.e., perform at or above the total index value assigned to the 50<sup>th</sup>/60<sup>th</sup> percentile school);

- b. All schools, including those designated as *Effective*, should strive to become and maintain their status as *Highly Effective* schools (i.e., reach at least the 95<sup>th</sup> percentile of current performance); and
3. Use the resulting trajectories to extrapolate the required increases in terms of proficiency in reading/language arts and mathematics to determine AMOs for each programmatic level.

## STEP 1 - INDEX STARTING POINTS

West Virginia used the aforementioned set of recommendations made by the SSSC regarding the four school classifications to develop starting points (the standards setting process and school classification cut points are described in detail in the narrative for Principle 2.A under the heading titled, “*The Modified Benchmark Standards Setting Process—An Educationally Sound Rationale for Determining School Classifications and Proficiency-Based AMOs*”).

## STEP 2 - INDEX TRAJECTORIES FOR EACH PROGRAMMATIC LEVEL

Upon finalizing the index cuts and associated percentiles for each school classification, standard setting participants were asked to provide guidance and recommendations around defining targets for the proposed index-based accountability system. Participants were provided with 2010 and 2011 index data and reviewed how the distributions of overall performance and maximum and minimum values differed across programmatic levels and over time. This information was then compared to where participants believed schools *should* score on the overall index over time in order to demonstrate adequate progress.

To define the trajectories for each programmatic level, participants were asked to consider the following as they extrapolated targets forward:

1. Should there be different rates of change for different school classifications?
2. Should the same rates of change apply across school classifications?
3. What is the end target for all schools/each type of school?
4. How does this intersect with the expected index improvement for various trajectories from last year? Over time?

Participants’ examination of the WVAI data and rankings for schools played a large role in framing how much improvement *should* be expected from year to year. Figures 2.7 through 2.9 depict the distribution of index rankings and trajectories recommended for each programmatic level. Index distributions are described below each figure. Please note that these projected index values utilize all components of the index, not just proficiency rates. These total index values defined the stakeholders’ expectations for continued improvement and served to anchor AMO development by providing a referent point (the index) from which to determine the required proficiency rate increases.

**Figure 2.7. 2012 Elementary School Distributions and Trajectory**

The elementary school index showed consistent gains across the 2010, 2011, and 2012 data with an approximate two point increase per year. While the ranges varied between 50, 45, and 54 points from year to year, the key metric used to determine overall school improvement was median changes. Averages were also examined but appeared to be slightly inflated due to the distribution of index values for higher performing schools. As shown in the figure above, the cut point for an effective school was set by the SSSC at the 50<sup>th</sup> percentile school, or approximately 71 points of the index. The end point of the elementary school trajectory corresponds to the number of points accumulated by the 95<sup>th</sup> percentile school, or 87 points of the total index. While the index values that define school classifications will remain static over time, the trajectory is included to showcase how the SSSC articulated expectations for improvements based on proficiency, progress, and gaps. It is this trajectory that will be used to define expected improvements on proficiency-based AMOs that are challenging, yet attainable specific to elementary schools.

**Figure 2.8. 2012 Middle School Distributions and Trajectory**

The middle school index also showed consistent gains across the 2010, 2011, and 2012 data, but gains appeared to level off from four to two points. While the ranges varied between 55, 52, and 51 points from year to year, the key metric used to determine overall school improvement was again median changes. Averages were also examined and comparable, reflecting less than a 1 index point at each level. As shown in the figure above, the cut point for an effective school was set at the 50<sup>th</sup> percentile school, or

approximately 70 points of the index. The end point corresponds to the 95<sup>th</sup> percentile school, or 84 points of the index. While the index values that define school classifications will again remain static, the trajectory is included to showcase how the SSSC articulated expectations for improvements based on proficiency, progress, and gaps. This trajectory will help define expected improvements on proficiency-based AMOs that are challenging, yet attainable specific to middle schools.

**Figure 2.9. 2012 High School Distributions and Trajectory**

The high school index also showed consistent gains from 2010 to 2012 with similar gains observed among middle schools: a four point and two point increase. Ranges varied between 56, 57, and 48 points from year to year, the key metric used to determine overall school improvement was again median changes each year. Averages were also examined and comparable, but reflected slightly more variability. As shown in the figure above, the cut point for an effective school was set at the 60<sup>th</sup> percentile school, rather than the 50<sup>th</sup> percentile school due to lower observed index values. This corresponds to approximately 70 points of the index. The end point corresponds to the 95<sup>th</sup> percentile school, or 78 points of the index. Similar to elementary and middle schools, the index values that define school classifications will remain static but the trajectory is included to showcase how the SSSC articulated expectations for improvements based on proficiency, progress, and gaps. This trajectory will define the expected improvements on proficiency-based AMOs for high schools.

Another way to consider the changes in expected index values against the effective school classification is presented below in Table 2.11. This highlights the expected yearly increase for each programmatic level in terms of total index points, as well as the starting index value that corresponds to the 50<sup>th</sup> percentile school moving to the 95<sup>th</sup> percentile school in the state.

**Table 2.11. Expected School Classification Index Improvements to Inform AMOs Using 8 Years**

School Classification Cut	Effective Cut Point			Additional Information	
	Starting Index Value	Required Yearly Index Increase	Total Required Increase	Standard Deviation	Number of Years to meet SD Increase
Elementary	71	2.00	16.00	9.89	5
Middle School	70	1.75	14.00	9.67	6
High School	62	2.00	16.00	11.17	6

Over the course of the proposed timeline, the WVDE is proposing an index shift encompassing a full standard deviation within 6 years—an ambitious proposal considering the need for consistent and

sustained improvement in proficiency, progress, and achievement gaps that are differentiated by programmatic level. Although the index starting and end points vary by programmatic level, the expected rates of improvement are determined using normative distributions (i.e., 50<sup>th</sup> percentile school moving to the 95<sup>th</sup> percentile school on the index). This in turn requires each programmatic level a different amount of index score change over time (see Table 2.12), but serves to move the entire distribution of schools forward.

This approach was also applied to proficiency rates alone to determine the required rates of change using similarly derived cut points. These proficiency rates (i.e., AMOs) are designed to increase over time with differentiated expectations for each programmatic level. Additionally, regardless of a school's classification, the proficiency-based AMOs will ensure that those schools that are *Targeted for Support* or *In Need of Improvement* will need to accelerate improvement. Sections 2C through 2G detail the targeted support that will assist schools in accelerating improvement efforts to become effective schools.

### STEP 3 - EXTRAPOLATING TRAJECTORIES TO PROFICIENCY-BASED AMOS

While the index standard setting approach adhered to the philosophical considerations of the AASAC and provided empirical evidence for the SSSC to determine school classifications, it only defined the initial justification for AMO identification. Schools will still be expected to strive for proficiency-based targets (i.e., Annual Measurable Objectives) that will continue to increase each year based on a defined trajectory. While initially seeming myopic in vision, the way in which the WVAI was designed was to ensure a balanced representation of *equal performance and progress*. Thus, proficiency rate progress is a natural extension of improvement on the WVAI.

We used the SSSC's recommended school classification cuts and the aforementioned index improvement trajectories to determine the specific AMOs for each programmatic level. Specifically, schools were rank ordered on their proficiency rates and the 15<sup>th</sup>, 50<sup>th</sup>/60<sup>th</sup>, and 90<sup>th</sup> percentile schools were identified using 2011-12 data (as a reminder, these percentiles correspond to the cut points for *Needs Improvement*, *Effective*, and *Highly Effective* suggested by the SSSC). The amount of change in proficiency rates required to move from the *Effective* school classification (i.e., 50<sup>th</sup> or 60<sup>th</sup> percentile value depending on the programmatic level) to the 95<sup>th</sup> percentile school were then examined to arrive at proficiency-based AMOs. The expected index increases intended to raise **criterion-based** expectations along with the following normative expectations:

1. All schools should meet or exceed the current effective school cut by 2020 (i.e., perform at or above the total index value assigned to the 50<sup>th</sup>/60<sup>th</sup> percentile school)
2. All schools, including those designated as Effective, should strive to become and maintain their status as Highly Effective schools (i.e., reach at least the 95<sup>th</sup> percentile of current performance).

This same set of expectations was then applied to schools rank-ordered using proficiency rates. This corresponds to increases in each category of school classification, with the greatest amount of improvement expected among the lowest performing schools. Conversely, the highest performing schools are expected to increase the smallest relative amount, but still exhibit increases over time. The resulting AMOs appear in Table 2.12. Table 2.13, Table 2.14, and Table 2.15 communicate the required improvements for each programmatic level to meet the AMOs.

**Table 2.12. Proposed AMOs for Reading/Language Arts and Mathematics by Programmatic Level**

Year	Elementary Math	Elementary Reading / Language Arts	Middle School Math	Middle School Reading / Language Arts	High School Math	High School Reading / Language Arts
2011-12	52	50	47	48.5	45	45
2012-13	54.25	52.5	49.375	50.5	47.25	47.125
2013-14	56.5	55	51.75	52.5	49.5	49.25
2014-15	58.75	57.5	54.125	54.5	51.75	51.375
2015-16	61	60	56.5	56.5	54	53.5
2016-17	63.25	62.5	58.875	58.5	56.25	55.625
2017-18	65.5	65	61.25	60.5	58.5	57.75
2018-19	67.75	67.5	63.625	62.5	60.75	59.875
2019-20	70	70	66	64.5	63	62

**Table 2.13. Starting Points, Targets, and Required Increases for Each Programmatic Level for Mathematics**

School Classification Cut	Starting Point and Percentile	Target and Percentile	Yearly Required Increase	Corresponding Required Median Index Improvement
Effective Elementary Schools (AMO)	52% (50 <sup>th</sup> )	70% (95 <sup>th</sup> )	2.25%	71.93 to 85.31
Effective Middle Schools (AMO)	47% (50 <sup>th</sup> )	66% (95 <sup>th</sup> )	2.375%	69.57 to 83.1
Effective High Schools (AMO)	45% (50 <sup>th</sup> )	63% (95 <sup>th</sup> )	2.25%	58.7 to 74.96

\*Index ranges were calculated by taking the median of a range of schools based on the proficiency ranking in either math or R/LA.

**Table 2.14. Starting Points, Targets, and Required Increases for Each Programmatic Level for Reading/Language Arts**

School Classification Cut	Starting Point and Percentile	Target and Percentile	Yearly Required Increase	Corresponding Required Median Index Improvement
Effective Elementary Schools (AMO)	50% (50 <sup>th</sup> )	70% (95 <sup>th</sup> )	2.5%	71.76 to 84.23
Effective Middle Schools (AMO)	48.5% (50 <sup>th</sup> )	64.5% (95 <sup>th</sup> )	2.0%	70.88 to 81.89
Effective High Schools (AMO)	45% (50 <sup>th</sup> )	62% (95 <sup>th</sup> )	2.125%	60.03 to 76.02

\*Index ranges were calculated by taking the median of a range of schools based on the proficiency ranking in either math or R/LA.

When compared to historical proficiency rate changes, these increases are challenging, especially when considering that the policy-driven goal is to expect all schools to strive for **at least** the 50<sup>th</sup> percentile schools in the first year and ending at the 95<sup>th</sup> percentile school's performance by the end of the proposed timeline, all of which in the context of a challenging test with challenging cuts. Furthermore, this expectation holds true for all schools, including those that are below the 50<sup>th</sup> percentile school in terms of proficiency rates. The index changes serve to justify the rigorous nature of these proficiency rate increases given that each corresponds to an excess of a standard deviation in only 8 years (see Table 2.12. Expected School Classification Index Improvements to Inform AMOs Using 8 Years).

Under the prior model of NCLB, school proficiency rate starting points were determined by the 20<sup>th</sup> percentile school. Using the West Virginia Accountability Index, a natural starting point for referenced would be the 15<sup>th</sup> percentile school. To contextualize the required increase for schools at or below the 15<sup>th</sup> percentile (i.e., Targeted for Support) classification, dramatic improvements exceeding historical improvements would be required. The following table depicts the expected improvement for those schools.

**Table 2.15. Expected Improvement for Schools at the 15<sup>th</sup> Percentile of Performance**

School Classification Cut	Mathematics			Reading/Language Arts		
	Starting Point and Percentile	Target and Percentile	Yearly Required Increase	Starting Point and Percentile	Target and Percentile	Yearly Required Increase
Targeted Elementary Schools	40% (15 <sup>th</sup> )	70% (95 <sup>th</sup> )	3.75%	38% (15 <sup>th</sup> )	70% (95 <sup>th</sup> )	4.00%
Targeted Middle Schools	40% (15 <sup>th</sup> )	66% (95 <sup>th</sup> )	3.25%	40% (15 <sup>th</sup> )	64.5%	3.06%
Targeted High Schools	33% (15 <sup>th</sup> )	63% (95 <sup>th</sup> )	3.75%	36% (15 <sup>th</sup> )	66% (95 <sup>th</sup> )	3.75%

### Examining the Rigor of the Proposed AMOs

To determine the adequacy of our proposed AMOs, West Virginia examined the required yearly increases in proficiency under both Options A and B. The required *average* increases for each of these options are shown in Table 2.16 and Table 2.17 below. These do not reflect the required increases by programmatic level, which in some cases, are much steeper

**Table 2.16. Increases in AMOs for Options A and B for Mathematics.**

Group	2012 Proficiency Rates	Option A Increases	Option B Increases
All	46.55	4.45	6.68
White	47.17	4.40	6.60
Black	33.80	5.52	8.28
Hispanic	41.51	4.87	7.31
Asian	74.52	2.12	3.19
Indian	43.52	4.71	7.06
Multi-Racial	41.91	4.84	7.26
Pacific Islanders	48.78	4.27	6.40
Spec. Ed.	19.95	6.67	10.01
Low SES	35.99	5.33	8.00
LEP	43.16	4.74	7.11

**Table 2.17. Increases in AMOs for Options A and B for R/LA.**

Group	2012 Proficiency Rates	Option A Increases	Option B Increases
All	48.44	4.30	6.45
White	48.97	4.25	6.38
Black	37.52	5.21	7.81
Hispanic	44.09	4.66	6.99
Asian	71.32	2.39	3.59
Indian	50.23	4.15	6.22
Multi-Racial	44.67	4.61	6.92
Pacific Islanders	46.34	4.47	6.71
Spec. Ed.	16.74	6.94	10.41
Low SES	37.40	5.22	7.83
LEP	38.55	5.12	7.68

Both Option A and Option B are certainly rigorous, but are undesirable because they present unattainable scenarios that would stifle morale and progress. West Virginia’s major changes to their standards, assessment, and accountability system, first in 2003, then again in 2009 and 2010, set expectations at an all-time high for students to show evidence of their knowledge, skills, and abilities on a challenging assessment with nationally and internationally aligned cuts. Goal-setting research highlights the need to specify time-bound goals that are challenging yet attainable in order to ensure they are relevant to those setting goals. In effect, establishing AMOs in West Virginia’s context with current expectations around standards, assessment, and accountability renders Options A and B as practically impossible to schools buildings and LEAs. As such, Option C was the most appropriate method through which the state could define AMOs and trajectories.

### USING AMOS TO DRIVE CHANGE AND SCHOOL IMPROVEMENT

Since the state revised its standards, assessment, and accountability system in 2009 and 2010, the “bubble” mentality has been prevalent when considering progress toward West Virginia’s current AMOs. Because of the unreasonable increases embedded within the current accountability system, schools often target services to students who are just short of proficiency expectations (i.e., “bubble kids”). The revised AMOs reframes the reality of what schools should expect for students to reach, *at a minimum* within the context of the system.

West Virginia’s proficiency-based AMOs are derived from an empirical consideration of schoolwide improvement from the 2009-10, 2010-11, and 2011-12 school years. The AMOs set the expectation that all schools shall exhibit proficiency rates that correspond to the proficiency rate of the 95<sup>th</sup> percentile school by the year 2020. This not only communicates a high expectation for student achievement within a school, but progressively stipulates higher rates of improvement for lower performing schools. While public reporting will help drive expectations toward preparing students to be ready for college and careers, a set of articulated AMOs will also allow the SEA, LEAs, and schools to point to a larger conviction adhering to continuous improvement and educating all students. Public reporting will create an incentive for LEAs and schools to work toward the AMOs and specific actions will be taken when schools do not meet the AMOs each year.

### Public Reporting of the AMOs

West Virginia will comply with all requirements regarding public reporting of school progress as per ESEA sections 1111(b)(2)(C)(v)(II) and 1111(h)(1)(C) and 1111(h)(2)(B). Under this request, the SEA and LEAs will report for the all subgroup and any valid subgroup in a school (i.e., a subgroup with an “n” size of at least 20 across all assessed grade levels) whether students are meeting the AMOs.

School may meet AMOs for a given subgroup by any of the following methods:

- Exhibition of absolute performance that meets or exceeds the AMOs;
- Application of a confidence interval to account for measurement error for any subgroup not meeting or exceeding the AMOs on absolute performance alone;
- Averaging to account for any year-to-year anomalies in data for any subgroup not meeting or exceeding the AMOs on absolute performance alone; or
- Application of a safe harbor metric to account for significant improvement from one year to the next for any subgroup not meeting or exceeding the AMOs on absolute performance alone.

#### **Actions Taken When Schools Do Not Meet AMOs**

For any case where a school does not meet the AMO for a valid cell using any of the methods described above, the school shall be required to do the following:

- Revise and resubmit their strategic plans to the LEA for review, including intervention strategies to address deficiencies in performance;
- Make available their strategic plans to the public.

Additionally, for each of these schools, the LEA will be required to review the revised strategic plans and monitor school implementation efforts to ensure that the specified strategies and supports proposed by schools are being delivered with fidelity.

The SEA and/or OEPA will conduct an audit the lowest performing schools' strategic plans so long as those schools are not already designated as *Priority*, *Focus*, or *Targeted for Support*. The purpose of the SEA/OEPA monitoring will be to ensure that LEAs are complying with the aforementioned responsibilities.

## 2.C REWARD SCHOOLS

2.C.i Describe the SEA’s methodology for identifying highest-performing and high-progress schools as reward schools . If the SEA’s methodology is not based on the definition of reward schools in *ESEA Flexibility* (but instead, e.g., based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department’s “Demonstrating that an SEA’s Lists of Schools meet ESEA Flexibility Definitions” guidance.

Under West Virginia’s proposed accountability system, *High Performing Reward* schools will be identified using the following process:

1. Schools will be ranked using the WVAI.
2. The top ten percent of schools will be used as the pool for selecting *High Performing Reward* schools.
3. Any school identified as a *Focus* school will be removed from the list.
4. Schools below the fiftieth percentile in the achievement gap component of the WVAI will be removed from the list.
5. Schools that do not meet the AMO for the all students subgroup in either math or reading/language arts will be removed from the list.
6. The remaining schools will be identified as *High Performance Reward* schools.

To identify *High Progress Reward* Schools, West Virginia proposes to use the following process:

1. Schools will be ranked using the growth component of the WVAI.
2. The top ten percent of schools will be used as the pool for selecting *High Progress Reward* schools.
3. Any school identified as a *Focus* school will be removed from the list.
4. Schools below the fiftieth percentile in the achievement gap component of the WVAI will be removed from the list.
5. Schools that do not meet the AMO for the all students subgroup in either math or reading/language arts will be removed from the list.
6. Schools that are not in the top quartile of the WVAI will be removed from the list.
7. The remaining schools will be identified as *High Progress* schools.

Given these procedures, the WVDE has identified the following number of *Reward* schools with at least one Title I school identified:

- 30 elementary schools
- 9 middle schools
- 8 high schools

2.C.ii Provide the SEA’s list of reward schools in Table 2.

2.C.iii Describe how the SEA will publicly recognize and, if possible, reward highest-performing and high-progress schools.

## CURRENT RECOGNITION PROGRAMS FOR HIGH PERFORMANCE AND HIGH PROGRESS SCHOOLS

The WVBE and the WVDE have long histories of publicly recognizing and rewarding high-performing schools. Different offices within the WVDE as a whole and within the WVDE's Office of Educational Performance Audits have various recognition programs for schools. In the past, these programs have been implemented individually; the ESEA Flexibility Request will allow the WVDE to merge these programs, which include the following:

- West Virginia Schools of Excellence for 21<sup>st</sup> Century Learning
- Title I Distinguished School Award Program
- Exemplary Accreditation Status
- Distinction Accreditation Status
- Career and Technical Education Exemplary Schools

Each of these recognition programs are described in further detail below.

### WEST VIRGINIA SCHOOLS OF EXCELLENCE FOR 21<sup>ST</sup> CENTURY LEARNING

The instructional programs at these schools meet rigorous academic standards, have supportive and learning-centered school environments, and demonstrate student achievement results significantly above the average for comparable schools. Additionally, West Virginia *Code* 18-5A-4 requires these schools to demonstrate the following:

- Improvements in student achievement, dropout rates, standardized test scores; parent and community involvement; parent, teacher, and student satisfaction; and student attendance
- The implementation of advanced or innovative programs and the goals of college and career ready
- Other factors that promote excellence in education

Each School of Excellence recipient is honored at a banquet and receives a plaque, banner, and small grant award.

### TITLE I DISTINGUISHED SCHOOL AWARD PROGRAM

A Title I Distinguished School must meet the following criteria:

- Be operational for at least three or more consecutive years
- Be a Title I program for three or more consecutive years
- Exhibit full West Virginia accreditation status
- Demonstrate AYP in both reading and mathematics for three or more consecutive years

Title I Distinguished Schools must demonstrate 60% proficiency for all subgroups in both reading/language arts and mathematics based on 10 or more students tested ("n" count for reporting assessment data). K-2 Title I schools must make AYP for three or more consecutive years as determined by the Office of Educational Performance Audits.

## EXEMPLARY ACCREDITATION STATUS

Schools are designated as exemplary based on a ranking system. All schools are ranked according to the percentage of proficiency in each subject (reading/language arts, mathematics, science, and social studies). All students in these schools are ranked by a student achievement index in each of the above subjects based on their scores on the WESTEST 2, with progressive weighting for scores at each performance level. Based on these weighted rankings for elementary, middle, and high schools, the top 10 percent of schools are designated as “exemplary” if they meet other criteria—including attendance rates; graduation rates; percentage of high school graduates who declare their intentions to enroll in college or other postsecondary education; and percentage of students who successfully complete Advanced Placement®, dual credit, and honors classes.

## DISTINCTION ACCREDITATION STATUS

A school is issued distinction accreditation status when its students’ performances are below the criteria for exemplary status but when it still achieves in the upper quartile on the annual performance measures, as specified in Section §126-13-6: *State Annual Performance Measures for School Accreditation Status and School System Approval Status*.

## CAREER AND TECHNICAL EDUCATION EXEMPLARY SCHOOLS

Career and Technical Education (CTE) Exemplary Schools are those that have met standards on all determiners, and have a school average on State administered end-of-course technical skills tests given to students in that school during the previous school year as determined annually by the West Virginia Department of Education, Division of Career and Technical Education. The determiners are: Academic Skill Proficiency, Technical Skill Proficiency, Placement, and Placement in Field.

# PROPOSED RECOGNITION PROGRAM FOR HIGH PERFORMANCE AND PROGRESS SCHOOLS

## “NEXT GENERATION SCHOOLS OF SUCCESS”

The WVDE proposes to develop a new system of school recognition to align with ESEA Flexibility. The new comprehensive recognition systems will label high performance and progress schools as “*Next Generation Schools of Success*.” The following categories of schools will be recognized within this new system using the WV Accountability Index described in 2A:

**Next Generation High Performing Schools** – Next Generation High Performing Schools exhibit the highest absolute performance on the WVAI and do not have persistent achievement gaps in any subgroup. At least 1 Title I school will be identified as high performing.

**Next Generation High Progress Schools** – Next Generation High Progress Schools are making the greatest progress in improving performance on the WVAI over a number of years with no significant achievement gaps across subgroups that are not closing. At least 1 Title I school will be identified as high progress.

Schools awarded these designations will receive the following:

- **“Next Generation Schools of Success Ceremony”:** This ceremony will be a full day event hosted by the WVDE which provides a celebration of participating schools’ achievements while creating a network of participating schools through collaborative professional

development sessions. A recognition ceremony will include participation by the Governor, members of the West Virginia Board of Education, members of the West Virginia Legislature and the State Superintendent of Schools. Press releases will be developed and distributed to media outlets around the state. Certificates and banners will be provided to each participating school.

The timeline for the “Next Generation Schools of Success” recognition process will be as follows:

- The first “Next Generation Schools of Success” will be identified and announced in August 2013.
- The annual “Next Generation Schools of Success Ceremony” will be held in October of each year beginning in 2013. The ceremony will be hosted by the WVBE with coordination support from the WV OEPA and the WVDE Division of Educator Quality and System Support.

## CONSULTATION

In order to design a recognition and rewards system that would be meaningful and beneficial to the LEAs and schools, the WVDE consulted the Accountability and Accreditation Stakeholder Advisory Committee, the Title I Committee of Practitioners, the WVDE and the OEPA program staff for Title I Distinguished Schools and Exemplary Schools. This group plans to continue to work during the 2012-13 school year to develop one comprehensive system of school recognition that will merge the various recognitions that currently exist with the Next Generation Schools of Success to recognize schools in multiple categories with differentiated rewards. This systems merger will require policy change.

## 2.D PRIORITY SCHOOLS

2.D.i Describe the SEA’s methodology for identifying a number of lowest-performing schools equal to at least five percent of the State’s Title I schools as priority schools. If the SEA’s methodology is not based on the definition of priority schools in *ESEA Flexibility* (but instead, e.g., based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department’s “Demonstrating that an SEA’s Lists of Schools meet ESEA Flexibility Definitions” guidance.

## PROCESS USED TO IDENTIFY PRIORITY SCHOOLS

Under West Virginia's proposed accountability system, priority schools will be identified using the following process:

1. Schools will be grouped within programmatic levels (i.e., elementary, middle, and high schools).
2. Schools will then be ranked using WVAI values.
3. The WVDE will identify the lowest performing **Title I** schools on the WVAI for the most current year.
4. The number of schools corresponding to the proportion of Title I schools within each programmatic level will be identified as the initial *Priority* school list
5. The highest performing Title I school's Index score will be identified
6. **All schools (i.e., Title I and non-Title I schools)**, will then be ranked using WVAI values.
7. Any schools falling below the highest performing Title I school will also be identified as a *Priority* school.
8. Historical trend data will be used to validate *Priority* school selections:
  - Using **only achievement** data (i.e., proficiency rates), all schools will be coded from lowest to highest using quartiles (i.e., red, orange, yellow, green)
  - Schools will also be coded by quartile using the three most recent years of achievement data establish a trend of performance (e.g., 2012, 2011, 2010).
  - Trend data will be compared to ensure the WVAI is identifying the correct schools.

Using the process outlined above, the number of Title I schools that would be selected at each programmatic level will be based on the proportion of Title I schools represented at each programmatic level (i.e., Step 4). Examining 2011-2012 data, these proportions indicate that:

- 87% of Title I schools are elementary schools (303)
- 13% of Title I schools are middle schools (44)
- Less than 1% are high schools (3 schools)

Given these proportions, the WVDE would identify the following number of Priority schools that are limited to Title I eligibility (i.e., 5% or 18 of the Title I schools):

- 16 elementary Title I schools (i.e., 87% of 303 elementary schools)
- 2 middle Title I schools (i.e., 13% of 44 middle schools)

Because West Virginia is proposing to implement a statewide model and believes that low-performing schools, irrespective of Title I eligibility, should receive support, the state would apply the same criteria to all schools in the State (i.e., Steps 6 and 7). Expanding the scope to non-Title I schools would identify the following using 2011-2012 data:

- One (1) non-Title I elementary school had a WVAI score less than the highest ranked Title I elementary *Priority* school. It was therefore also included as a *Priority* school.
- Six (6) non-Title I middle schools that had a WVAI score less than the highest ranked Title I middle *Priority* school. Therefore they were also included as *Priority* schools.

West Virginia understands that 5% (18) of the Title I schools in the state must be identified as *Priority* schools. However, the state will have to approach the identification of *Priority* schools carefully because of potential imbalance in under-identifying low-performing schools. More specifically, using the ESEA

Flexibility Request guidance, West Virginia would not be able to identify any high school as a *Priority* school using our proposed process because:

- All three of the state's Title I high schools are K-12 schools and are considered anomalies when comparing demographics and performance to other high schools in the state.
- None of the three have a graduation rate less than 60%.
- None of the 3 have achievement Index scores in the bottom quartile.
- Two of the three exhibit index values in the upper two quartiles.

Given this context, it is important to note that the federally required criteria would not allow the state to identify any Title I high schools as *Priority* schools. As such, West Virginia proposes to identify the same number of high schools that would be identified in middle schools to ensure there is a balanced school improvement effort across all programmatic levels in the state. Applying the proposed steps to include an equal representation of schools across programmatic levels would yield the following number of *Priority* schools:

- 17 Priority elementary schools
- 8 Priority middle schools
- 8 Priority high schools

2.D.ii Provide the SEA's list of priority schools in Table 2.

2.D.iii Describe the meaningful interventions aligned with the turnaround principles that an LEA with priority schools will implement.

## WVDE SCHOOL IMPROVEMENT MODEL

The WVDE will utilize its current school transformational model, which is based on the research of Project ASSIST at the University of Missouri-Columbia, the Education Alliance at Brown University, and the Center on Innovation and Improvement. The framework will support LEAs and their priority schools in selecting and implementing interventions to improve student achievement. West Virginia has successfully implemented this framework with the current School Improvement Grant (SIG) 1003(g) initiative, since 2010. This transformational model will be implemented in *Priority* schools and emphasize the development of teacher and leader effectiveness, comprehensive instructional reform programs, increased learning time, the creation of community-oriented schools, and operational flexibility with sustained support.

The WVDE's Office of School Improvement will provide sustained support for *Priority* schools. This office supported districts and schools in the implementation of the transformational model with the SIG schools. The office employs school improvement coordinators, who will serve as liaisons to the *Priority* schools and provide weekly mentorship and support to school leadership teams. They also will collaborate with each LEA's school improvement staff and provide technical assistance to each school's leadership teams around the West Virginia Standards for High-Quality Schools ([Policy 2322](#)).

The process to be implemented by *Priority* schools will include the components in Table 2.18. School leadership teams will use the online strategic plan site to complete a self-assessment on the WV High Quality Standards Schools and analyze data from a variety of sources in determining the goals and action steps for continuous improvement.

**Table 2.18. Processes to be Implemented in *Priority* Schools**

### **Governance and Identification**

- District Governance: The LEA will identify a local LEA support team.
- WVDE school improvement coordinator will collaborate regularly with the school principal, staff and LEA support team to implement WVDE's school improvement framework and transformational model.

### **Protocols and Expectations**

- The WVDE School Improvement Coordinator will schedule a diagnostic visit utilizing the West Virginia Standards for High-Quality Schools (WVBE Policy 2322) as the framework for conducting interviews and observations. The diagnostic visit includes a team from the WVDE and RESA.
- The LEA will hire or identify a school improvement specialist to provide district support for school transformation efforts on a daily basis.
- The school will develop a leadership team with representation across grade levels/subjects.
- The school, with the assistance of the LEA and school improvement coordinator, will revise its strategic plan, including the professional development section, to address the findings of the diagnostic visit. The strategic plan will be used to monitor progress monthly.
- The LEA/school may hire an external supporting partner from a WVDE-approved list (optional).

### **Progress Determinants—as Determined Necessary by the Diagnostic Visit**

- Culture survey developed by Dr. Jerry Valentine, University of Missouri, for administration, teachers and staff regarding the culture of the school as it relates to: collaborative leadership, teacher collaboration, professional development, unity of purpose, collegial support, learning partnerships, and efficacy.
- Cultural typology is completed by the faculty and staff to begin discussions and address concerns relating to student achievement, collegial awareness, shared values, decision making, risk-taking,

trust, openness, parent relations, communication, leadership, socialization, and organization history.

- WV School Climate Survey is administered to staff, students and parents to obtain perceptual data on how individual actions contribute to collective beliefs about the school in the domains of safety, engagement and support.
- Principal Effectiveness Audit is completed by the faculty to obtain perceptual data related to perceived behaviors and organization of the principal.
- Instructional practices inventory (IPI) gathers data regarding the engagement of students in the classroom utilizing a rubric that goes from complete disengagement to engagement in higher order thinking skills.
- WV School Counseling Audit is adapted from the ASCA Model to determine strengths and weaknesses in the comprehensive counseling program.
- WESTEST 2 data

#### **Data Collection**

- Walkthrough data based on county-formats
- IPI data
- Evidence of leading and lagging indicators (SIG) progress
- assessment data (e.g., DIBELS, benchmark tests, WESTEST 2, AP® exams, ACT EXPLORE®, ACT PLAN®, ACT®, SAT)

#### **Essential Components/Capacity Building**

- weekly administrative and school leadership team meetings
- weekly collaborative team meetings by content area and/or grade level
- regularly scheduled meetings for school improvement coordinators to network with others across the state
- advisory council, including community agencies (local school improvement councils)
- regularly scheduled staff meetings
- embedded professional development on the transition to the West Virginia Next Generation Standards and College and Career Ready Standards
- job-embedded professional development to meet the needs of individual schools
- support for personalized learning (based on the RTI framework)
- supporting teachers in meeting the needs of students with disabilities and ESL students
- family/community engagement
- schedules and strategies to increase learning time during the regular day
- extended day/year program
- critical skills program for grades 3 and 8
- transition plan for students at each programmatic level
- WVDE Early Warning System
- student leadership component (e.g., student council, principal's advisory committee, student representation on other school committees)
- collaboration with partners (e.g., WVDE programmatic teams, Regional Education Service Agency support programs)
- faculty mentors for at-risk students
- WVDE school leadership team meetings

#### **Monitoring**

- WVDE Early Warning System
- Monthly reports during Office of School Improvement/Federal Programs/Early Learning

#### Meetings

- Annual report to the State-wide System of Support
- Annual self-assessment utilizing High Quality Standards within the data analysis section of the strategic plan

#### Evaluation and Consequences

- summative test results
- progress determinants as mentioned in above section

Upon approval of this ESEA Flexibility Request, the WVDE will help the LEAs and *Priority* schools revise their strategic plans for continuous school improvement to incorporate the key components of the transformational model and the principles articulated in the flexibility request. The plans will describe how the LEAs will help *Priority* schools meet AMO targets and emphasize specific interventions to achieve these targets. School improvement coordinators will assist *Priority* schools in using the WVDE early warning system to target specific supports for at-risk students; this system will work in conjunction with multiple program resources (e.g., support for personalized learning, safe and supportive schools, dropout prevention, optional educational pathways) to help priority schools address identified needs. School improvement coordinators will also track progress on the leading and lagging indicators.

The WVDE and LEA set-aside funds for 1003(a) will support the school improvement framework implementation in *Priority* schools. The WVDE will use the ESEA Flexibility Request to waive the School Choice and Supplemental Educational Services (SES) from the new accountability system. Data indicate that very few parents use this option; as such, compliance activities for this requirement are not an efficient or effective use of administrative resources at the WVDE or LEA levels. The WVDE and LEA will redirect the time and resources currently dedicated to implementing, maintaining, and monitoring School Choice and SES programs to provide more support to *Priority* schools in implementing the transformational process.

*Priority* schools will receive special consideration for inclusion in state-level professional development and program enhancement activities (described in Principle 1). School improvement coordinators and the LEA school improvement contact will provide on-site support to help school leadership teams integrate these programs and strategies into their daily routines.

- 2.D.iv Provide the timeline the SEA will use to ensure that its LEAs that have one or more priority schools implement meaningful interventions aligned with the turnaround principles in each priority school no later than the 2014–2015 school year and provide a justification for the SEA’s choice of timeline.

## PROCESS AND TIMELINE TO SUPPORT *PRIORITY* SCHOOLS

The timeline for implementation under this flexibility request will begin with the new *Priority* school identification process in 2012-13. This means that each school identified as a *Priority* school in August 2012 will be assigned a school improvement coordinator, who will lead a diagnostic visit and begin instituting structures and processes to implement the transformational model components and school improvement framework, with WVDE and LEA support, during 2013-14. The milestones and timeline for continued support is depicted in Table 2.19.

**Table 2.19. Milestones and Timeline for Continued Support**

Milestones & Timeline	Parties Responsible	Evidence	Resources	Challenges
<u>August 2012 – July 2013</u>  2012 <i>Priority</i> schools complete a diagnostic visit, debrief, and establish a school leadership team to develop and implement a quality school improvement plan.	WVDE Office of School Improvement: school improvement coordinators in collaboration with the LEA school improvement contact  School leadership team	Diagnostic analysis report  Appropriate school leadership team membership  Collaborative teams structure  Trained instructional practices inventory (IPI) team/4 IPI data collections and faculty debriefs  Appropriate schedule to accommodate the work of the school leadership team and collaborative teams	10-12 WVDE school improvement coordinators  Regional Education Service Agency (RESA) school improvement personnel  LEA school improvement contacts  IPI trainers and tools  Culture typology & survey trainers and tools  School improvement diagnostic protocol	Building stakeholder knowledge of the WVAI measures to that they can appropriately analyze student achievement data  Addressing personnel and scheduling issues to allow for appropriate time and structure for school teams to meet  Building communication processes within the school and between the LEA, RESA and SEA
<u>August 2013 – July 2014</u>  2012 <i>Priority</i> schools build capacity in high-quality standards and continue and adjust improvement plans with an	WVDE Office of School Improvement—school improvement coordinators in collaboration with the LEA school improvement contact	School leadership teams and collaborative teams focused on learning  System to measure and document progress in all high-quality standards  Improve instruction	Resource list continued from previous year with the addition of the following:  WVDE coordinators from the Division of Teaching and Learning	Nurturing school teams to work effectively and to prioritize work into phases of time that are appropriate and feasible  Maintaining communication

2.D.v Provide the criteria the SEA will use to determine when a school that is making significant progress in improving student achievement exits priority status and a justification for the criteria selected.

## EXIT CRITERIA FOR *PRIORITY* SCHOOLS

*Priority* schools, due to their significant need, will not be eligible to exit *Priority* status until the end of the third year. At the end of three years, a school must meet the following criteria to exit *Priority* status:

1. The school no longer satisfies the initial criteria for identification (as described in section 2A).
2. The school demonstrates successful implementation of school turnaround strategies (as measured by monitoring leading and lagging indicators for two consecutive years.
3. The school meets its AMOs for two consecutive years, or, based on the two most recent years of data, demonstrates the necessary improvement.

## 2.E FOCUS SCHOOLS

2.E.i Describe the SEA’s methodology for identifying a number of low-performing schools equal to at least 10 percent of the State’s Title I schools as “focus schools.” If the SEA’s methodology is not based on the definition of focus schools in *ESEA Flexibility* (but instead, e.g., based on school grades or ratings that take into account a number of factors), the SEA should also demonstrate that the list provided in Table 2 is consistent with the definition, per the Department’s “Demonstrating that an SEA’s Lists of Schools meet ESEA Flexibility Definitions” guidance.

## PROCESS USED TO IDENTIFY FOCUS SCHOOLS

Under West Virginia's proposed accountability system, *Focus* schools will be identified using the following process:

1. Schools will be grouped within programmatic levels (i.e., elementary, middle, and high schools).
2. School will be ranked using the Gap component of the WVAI.
3. Schools that were already identified as *Priority* schools were removed from the list.
4. The WVDE will identify Title I schools with the largest achievement gaps.
5. The number of schools corresponding to the proportion of Title I schools within each programmatic level will be identified as the initial *Focus* school list
6. The Title I *Focus* school with the smallest gap will be identified
7. All schools (Title I and non-Title I) will then be ranked using the gap component of the WVAI.
8. Any non-Title I schools falling below the smallest achievement gap Title I school will also be identified as a *Focus* school

Using the process outlined above, the number of Title I schools that would be selected at each programmatic level will be based on the proportion of Title I schools represented at each programmatic level (i.e., Step 4). As with *Priority* school designation, these proportions indicate that :

- 87% of Title I schools are elementary (303)
- 13% of schools are middle (44)
- Less than 1% are high school (3)

Given these proportions, the WVDE would identify the following number of *Focus* schools that are limited to Title I eligibility (i.e., 10% or 37 of the Title 1 schools):

- 32 elementary schools were selected
- 5 middle schools were selected

West Virginia believes that schools with high-achievement gaps, regardless of Title I classification, should receive support in addressing individual student learning. Thus, the state proposes to implement a statewide model. Expanding the scope to non-Title I schools identify the following using 2011-2012 data:

- Fifteen (15) non-Title I elementary schools with an achievement gap larger than the highest ranked Title I elementary *Focus* school.
- Twelve (12) non-Title I middle schools with an achievement gap larger than the highest ranked Title I middle *Focus* school.

Replicating the process that was used to identify *Priority* high schools, West Virginia proposes to identify the same number of high schools that would be identified among middle schools to ensure there is a balanced focus on closing achievement gaps across all programmatic levels in the state. Applying the proposed steps to include an equal representation of schools across programmatic levels would yield the following number of *Focus* schools:

- 47 *Focus* elementary schools
- 17 *Focus* middle schools
- 18 *Focus* high schools

2.E.ii Provide the SEA’s list of focus schools in Table 2.

2.E.iii Describe the process and timeline the SEA will use to ensure that each LEA that has one or more focus schools will identify the specific needs of the LEA’s focus schools and their students. Provide examples of and justifications for the interventions focus schools will be required to implement to improve the performance of students who are the furthest behind.

## PROCESS AND TIMELINE TO SUPPORT *FOCUS* SCHOOLS

The WVDE will work closely with the state's eight Regional Education Service Agencies (RESAs), each of which serve six to twelve districts of the state, to provide support to their *Focus* schools. Each RESA has a Special Education Director, Wellness Specialist, Professional Development Director and Support For Personalized Learning Specialist. These individuals have provided cost-effective services to students, schools, and districts for more than 25 years. They have been involved extensively in the state's current school improvement efforts and have experience with the WVDE's Office of School Improvement processes. As such, their staff members are uniquely positioned to support LEAs and their *Focus* schools. WVDE will consider the number of *Focus* schools within each of the service areas to determine if additional support and resources are needed. The RESA staff will provide technical assistance and job-embedded professional development to struggling schools based on their identified gaps.

*Focus* schools will be identified according to those with the largest within school gaps. While the WVDE believes that achievement gaps of any kind are of concern, the demographic composition of West Virginia highlights that the three most prevalent achievement gaps (i.e., Low SES, Students with Disabilities, and African American students) are often a function of minimum cell size. However, a review of data indicates that these are both the most prevalent, and often, widest achievement gaps present. At the high school level, the graduation rate is disproportionately impacting these three subgroups. Schools will utilize the WVDE Early Warning System, based on the research of Dr. Robert Balfanz, to identify at-risk students in need of targeted interventions. *Focus* schools will receive specialized assistance from their LEA and RESA school improvement contacts to utilize the WVDE early warning system to target specific supports to their most at-risk students. This system will work in conjunction with multiple program resources (e.g., support for personalized learning, safe and supportive schools, dropout prevention, optional educational pathways) to help *Focus* schools address the needs of their high risk subgroups. The WVDE will assist each LEA in the use of WESTEST 2 gap data to identify appropriate interventions in *Focus* schools.

Focus school consultation visits will be conducted by the LEA and SPL specialists to identify appropriate interventions to address each school's gap areas. Based on feedback from the visit, each school leadership team, with assistance from the LEA and RESA, will develop action steps within their strategic plan for continuous school improvement to address the identified gaps. The revised school plans will establish targets for decreasing gaps and outline specific interventions to do so.

Through this request for flexibility, the LEA may redirect the time and resources currently dedicated to implement, maintain, and monitor the School Choice and SES programs to provide more support to help *Focus* schools implement selected interventions. The LEA Title I funds set aside for School Choice, SES, and professional development may be redirected to fund the additional support required from the RESA and other external partners to support *Priority* and *Focus* schools. The WVDE will consider the number of *Focus* schools within each RESA and may provide additional resources as needed to assure that RESAs can provide the necessary support.

*Focus* schools will receive special consideration for inclusion in state-level professional development and program enhancement activities around statewide efforts (as described in Principle 1). The WVDE Federal Programs and School Improvement staff assigned as liaisons to these schools will facilitate the integration of intervention to close achievement gaps within their strategic plans for continuous school improvement.

The timeline for implementation will begin with the new *Focus* school identification process in 2012-13. Schools identified as *Focus* schools in August 2012 will receive focused visits from the RESA and LEA teams during 2012-13 to begin planning/implementation activities.

2.E.iv Provide the criteria the SEA will use to determine when a school that is making significant progress in improving student achievement and narrowing achievement gaps exits focus status and a justification for the criteria selected.

## EXIT CRITERIA FOR *FOCUS* SCHOOLS

Research indicates that a school must actively engage in intentional school improvement processes for at least three years to change its culture and normal operations. As such, *Focus* schools will receive RESA and LEA support for up to three years. To exit *Focus* status, a school must meet both of the following criteria for two consecutive years:

- A school no longer satisfies the initial criteria for identification (described in 2A).
- A school meets established targets for decreasing the subgroup gaps as identified in their school's strategic plan for continuous school improvement and their ESEA consolidated plan.

**TABLE 2: REWARD, PRIORITY, AND FOCUS SCHOOLS**

Provide the SEA's list of reward, priority, and focus schools using the Table 2 template. Use the key to indicate the criteria used to identify a school as a reward, priority, or focus school.

## 2.F PROVIDE INCENTIVES AND SUPPORTS FOR OTHER TITLE I SCHOOLS

- 2.F Describe how the SEA’s differentiated recognition, accountability, and support system will provide incentives and supports to ensure continuous improvement in other Title I schools that, based on the SEA’s new AMOs and other measures, are not making progress in improving student achievement and narrowing achievement gaps, and an explanation of how these incentives and supports are likely to improve<sup>2</sup> student achievement and school performance, close achievement gaps, and increase the quality of instruction for students.

The WVDE’s differentiated recognition, accountability, and support system will provide incentives and support to other Title I schools that are not making progress with the goals of improving student achievement and narrowing achievement gaps. All schools will receive clearly articulated information on their progress toward meeting the state’s AMOs in a manner that allows teachers to analyze student growth needs and to support them with personalized learning plans. Each school will be categorized *Highly Effective*, *Effective*, *Needs Improvement* or *Targeted for Support*. The WVDE will support those Title I schools that are identified as *Needs Improvement* and *Targeted for Support* through activities to increase the capacity of their LEA’s School Improvement Leadership Team.

The leadership support provided to SIG schools by the WVDE, RESA, and LEAs since 2010 has improved capacity at every level as staff have become more experienced in helping schools implement the transformational model. A focus of this work has been the development and implementation of the LEA School Improvement Leadership Academy, an academy designed to build and enhance local capacity to lead school improvement at the building level. The WVDE will implement a LEA School Improvement Leadership Academy to build the capacity of LEA staff in districts with *Targeted for Support* and *Needs Improvement* schools over a three year period. All LEA School Improvement Leadership Teams (ESEA Program Directors, IDEA Program Directors, Curriculum Leaders and others) with *Targeted for Support* and *Needs Improvement* Schools will participate in an institute conducted by the WVDE to enhance understanding of the WVAI and how it should be used by LEAs and counties to guide school improvement efforts using the West Virginia School Improvement Framework. Each LEA will then have the opportunity to participate in a sustained professional development process that focuses on providing LEA program leaders the knowledge and skills to support the transformational model on their own. This opportunity will be initiated during the 2013-14 school year with preference going to the LEAs with *Targeted for Support* schools. If necessary, the opportunity will be repeated for a new cohort of LEAs in 2014-15. This opportunity specifically addresses West Virginia’s major need to build LEA capacity to lead school improvement at the school level. Building this capacity will have a significant impact on all schools and overall student achievement.

In addition, the ESEA Consolidated Plan for WV will be revised for both the LEA and the school to reflect new data analysis process using the WVAI. The school improvement process and support structure will be differentiated among *Priority*, *Focus*, *Targeted for Support* and *Needs Improvement* schools based on building and local contexts. Through the LEA and School Continuous School Improvement Plan, all schools will work through their school leadership teams to complete a self-assessment based on the West Virginia Standards for High-Quality Schools as part of their data analysis. The strategic plan will address the areas identified through various data sources including the Early Warning System. The strategic planning process will facilitate the coordination of various statewide program resources (e.g., support for personalized learning, safe and supportive schools, dropout prevention, optional educational pathways) that can support school improvement. The ESEA Consolidated Plan will be coordinated with the strategic plan to assure that ESEA resources are appropriately and effectively supporting necessary activities with the strategic plan for struggling Title I schools.

Through the ESEA Flexibility Request, struggling Title I schools can participate in professional development

and school improvement activities intended for *Priority* and *Focus* schools, pending sufficient resources and appropriateness. The ESEA consolidated plan will be revised for 2013-14; *Targeted for Support* and *Needs Improvement* schools will be required to include activities that support their improvement needs. The ESEA consolidated monitoring process will also be revised for 2013-14 school year to reflect the shift toward outcome/ performance-based monitoring that assists LEAs and Title I schools with analysis of their WVAI data and selection and implementation of appropriate improvement interventions. This process will be embedded in the LEA School Improvement Leadership opportunity provided to LEAs with *Targeted for Support* and *Needs Improvement* schools.

## 2.G BUILD SEA, LEA, AND SCHOOL CAPACITY TO IMPROVE STUDENT LEARNING

- 2.G Describe the SEA's process for building SEA, LEA, and school capacity to improve student learning in all schools and, in particular, in low-performing schools and schools with the largest achievement gaps, including through:
- i. timely and comprehensive monitoring of, and technical assistance for, LEA implementation of interventions in priority and focus schools;
  - ii. ensuring sufficient support for implementation of interventions in priority schools, focus schools, and other Title I schools identified under the SEA's differentiated recognition, accountability, and support system (including through leveraging funds the LEA was previously required to reserve under ESEA section 1116(b)(10), SIG funds, and other Federal funds, as permitted, along with State and local resources); and
  - iii. holding LEAs accountable for improving school and student performance, particularly for turning around their priority schools.

Explain how this process is likely to succeed in improving SEA, LEA, and school capacity.

## BUILDING SEA, LEA AND SCHOOL CAPACITY TO IMPROVE STUDENT LEARNING

The WVDE's differentiated recognition, accountability and support system will support all schools in their efforts to improve student achievement. The following table articulates the differing roles and levels of accountability for the WVDE, RESAs, LEAs and schools as all strive to implement improvements in *Priority*, *Targeted*, *Needs Improvement* and *Focus* schools:

**Table 2.21. Differentiated Supports by School Classification.**

Differentiation of Support for School Improvement (Highlighting indicates lead agency for supporting school level implementation)				
Roles	<i>Priority</i> Schools	<i>Targeted for Support</i> Schools	<i>Needs Improvement</i> Schools	<i>Focus</i> Schools
SEA	Facilitate the transformational process utilizing the SEA School Improvement Coordinators (SIC)	Provide LEA Leadership Team capacity building support to lead the transformational process within the schools in their districts	Provide LEA Leadership Team capacity building support to lead the transformational process within the schools in their districts	Provide the RESA support and resources to serve the varied needs of focus schools with appropriate interventions for which much state and regional capacity already exists
	Require ESEA plans to include support for Priority schools	Require ESEA plans to include support for Targeted schools	Require ESEA plans to include support for Improvement schools	Require ESEA plans to include support for Focus schools
RESA	Provide service with existing program resources as needed based on individual school needs with guidance from the SEA's SIC and/or LEA Leadership Team			<p>Serve the focus schools with program planning, implementation support and PD for effective interventions that meet the gap areas identified for each school</p> <p>Coordinate interventions with other school improvement efforts of the SEA and LEA that will be on-going in Targeted and Improvement schools</p>

LEA Leadership Team	<p>Provide district leadership for the transformational process with guidance from the SEA's SIC</p> <p>Include specific objectives for Priority schools within the LEA Strategic Plan and ESEA Consolidated Plan</p>	<p>Lead the transformational process with support from the SEA</p> <p>Include specific objectives for Targeted schools within the LEA Strategic Plan and ESEA Consolidated Plan</p>	<p>Lead the continuous school improvement process with support from the SEA</p> <p>Include specific objectives for Improvement schools within the LEA Strategic Plan and ESEA Consolidated Plan</p>	<p>Collaborate with the RESA to identify and coordinate delivery of appropriate interventions for high risk subgroups and required supports for each Focus school</p> <p>Include specific objectives for Focus schools within the LEA Strategic Plan and ESEA Consolidated Plan</p>
School Teams	Engage in the transformational process with frequent TA visits and support from the SEA's SIC and the LEA (RESAs as needed)	Engage in the transformational process with frequent TA visits and support from the LEA (RESAs as needed)	Engage in the continuous school improvement process with support from the LEA (RESAs as needed)	Implement interventions to improve academic achievement of specific subgroups exhibiting the greatest within school gaps with LEA and RESA support

In addition to the process supports described above, the WVDE's ESEA consolidated monitoring protocols will be revised for 2013-14 to focus on the principles of the ESEA Flexibility Request and to highlight performance outcomes. The monitoring schedule will be adjusted to focus more on desk audits for fiscal/compliance issues with all LEAs. More ESEA monitoring time will be spent with struggling Title I schools and the protocol for these visits will facilitate collaborative technical assistance relationships to support LEAs and schools in achieving AMO performance targets.

The WVDE will continue to support the state's lowest-performing schools by implementing the transformational model through the detailed frameworks (described in 2D). In *Priority* schools, school improvement coordinators will support the transformational model. The WVDE will also provide school improvement leadership support (described in 2.F.) for LEAs and their RESAs to increase their capacity—namely, staff resources and knowledge—to support all schools. This will be a critical strategy, particularly for small LEAs, which often lack the expertise and staff size to support struggling schools. The request for flexibility will allow the WVDE and LEAs to support this capacity building with existing ESEA Title I, Title II and Title VI-RLIS funds.

The LEAs will be held accountable for improving school and student performance in all *Priority*, *Focus*, *Targeted for Support* and *Needs Improvement* schools. The ESEA Consolidated Plans and monitoring process will be used to assure that the appropriate supports are provided to Title I schools in these categories. In addition, all LEAs will be held accountable for school and student performance through the state's Educational Performance Accountability process, which is codified in state statute 18-2E-5: *Process for Improving Education: Performance Based Accreditation System*. The WVBE oversees this accountability system with regular oversight from the state legislature.

## PRINCIPLE 3: SUPPORTING EFFECTIVE INSTRUCTION AND LEADERSHIP

### 3.A DEVELOP AND ADOPT GUIDELINES FOR LOCAL TEACHER AND PRINCIPAL EVALUATION AND SUPPORT SYSTEMS

Select the option that pertains to the SEA and provide the corresponding description and evidence, as appropriate, for the option selected.

<p><b>Option A</b></p> <p><input checked="" type="checkbox"/> If the SEA has not already developed and adopted all of the guidelines consistent with Principle 3, provide:</p> <ul style="list-style-type: none"> <li>i. the SEA’s plan to develop and adopt guidelines for local teacher and principal evaluation and support systems by the end of the 2012–2013 school year;</li> <li>ii. a description of the process the SEA will use to involve teachers and principals in the development of these guidelines; and</li> <li>iii. an assurance that the SEA will submit to the Department a copy of the guidelines that it will adopt by the end of the 2012–2013 school year (see Assurance 14).</li> </ul>	<p><b>Option B</b></p> <p><input type="checkbox"/> If the SEA has developed and adopted all of the guidelines consistent with Principle 3, provide:</p> <ul style="list-style-type: none"> <li>i. a copy of the guidelines the SEA has adopted (Attachment 10) and an explanation of how these guidelines are likely to lead to the development of evaluation and support systems that improve student achievement and the quality of instruction for students;</li> <li>ii. evidence of the adoption of the guidelines (Attachment 11); and</li> <li>iii. a description of the process the SEA used to involve teachers and principals in the development of these guidelines.</li> </ul>
--	--

## INTRODUCTION AND BACKGROUND

At the close of the 2012 legislative session, West Virginia Governor Earl Ray Tomblin signed House Bill (HB) 4236, requiring the implementation of a statewide educator evaluation system that includes student learning as an indicator among extensive measures of educator performance. The legislation, which the governor requested during his State of the State address, was approved by overwhelming majorities in both chambers of the legislature. The bill specifies that schoolwide student learning growth, as measured by summative assessment data, must be employed as an evaluative measure for teachers and principals. West Virginia's educator evaluation system sets clear expectations for all students to achieve at high levels by recognizing student growth in a variety of classrooms across diverse social and academic contexts. The new law requires that the West Virginia Board of Education (WVBE) establish policies to ensure that the comprehensive educator evaluation system is fully implemented in all 55 counties beginning in 2013-2014. The WVBE will report regularly on the progress of this effort to the Legislative Oversight Commission on Education Accountability. The West Virginia Department of Education (WVDE), in cooperation with the West Virginia Center for Professional Development, is implementing a statewide scale-up of the revised evaluation system with a select number of demonstration schools from each of the 55 counties as well as one school representing institutional education programs and one school representing career and technical education.

### THE INVOLVEMENT OF TEACHERS AND PRINCIPALS IN THE DEVELOPMENT OF EVALUATION GUIDELINES

In 2007, the WVBE and the state superintendent directed the work to develop new teaching standards. The new standards, which align with the state's teaching and learning initiative, were approved as part of the WVBE Policy 5100 in April 2009 [see Appendix 3-1]. A broad group of stakeholders, including WVBE members, teachers, teacher organization leaders, institutions of higher education (IHEs) representatives, county and building administrators, and legislative liaisons were involved in the revision process. These stakeholders became known as the Teacher Evaluation Task Force.

The work of national experts including Charlotte Danielson and Linda Darling-Hammond provided the foundation for the development of these teacher standards, and Charlotte Danielson served as a consultant during the development of the associated rubrics. The West Virginia Professional Teaching Standards are performance-based, measurable, focused on improving student achievement, and have four performance levels each with their own set of rubrics (distinguished, accomplished, emerging, unsatisfactory) [see Appendix 3-2]. For each of the five standards – Curriculum and Planning, The Learner and the Learning Environment, Teaching, Professional Responsibilities for Self-Renewal, and Professional Responsibilities for School and Community – critical standard elements clearly define what educators must know and do and provide precise measures of standards in practice during the evaluation process.

Teachers and principals were directly involved in developing the revised educator evaluation standards; this work was coordinated by the WVDE's Office of Professional Preparation and Office of School Improvement through multiple meetings of the Teacher Evaluation Task Force (see below). The scope of work was sequenced across three work groups of representative stakeholders, including teachers and principals as well as the leadership of teacher and administrative organizations, who were also members of the Teacher Evaluation Task Force. The Appalachian Regional Comprehensive Center provided extensive, ongoing technical assistance to support the work of the task force and its three work groups.

### Teacher Evaluation Task Force

This task force began to explore requirements for the revised system in fall 2010, when Dr. Laura Goe of the National Comprehensive Center for Teacher Quality addressed the group and presented current

research related to teacher effectiveness. Task force members considered the various purposes of evaluating teachers and how different measures could be appropriate. The work group began aligning evaluation measures with the West Virginia Professional Teaching Standards and identifying critical standard elements with technical assistance from the Educational Testing Service. The work group also established a multiyear timeline for developing and deploying a new evaluation system. For more details about the new standards, see the section titled “*Revised Educator Evaluation Systems for Continual Improvement of Instruction*.”

In October 2010, Dr. Linda Darling-Hammond, the Charles E. Ducommun Professor of Education at Stanford University, gave a presentation to the task force entitled “Developing and Assessing Teacher Effectiveness: Launching an Extreme Makeover of Teacher Evaluation.” This presentation provided the group with an intellectual framework for examining teacher performance using standards-based measures focused on professional practice, teacher decision making, and student work. The Appalachian Regional Comprehensive Center also provided technical assistance in rubric development for critical standard elements and facilitated access to national experts.

The Teacher Evaluation Task Force reconvened during spring 2011 and designed a comprehensive teacher evaluation system, which includes extensive, detailed rubrics. The task force also created measures that incorporate student learning as a significant outcome of effective teacher performance. Dr. James Stronge, Heritage Professor in the Educational Policy, Planning, and Leadership Area at the College of William and Mary, guided the development of the student learning rubric and the framework for student learning goals. Dr. Stronge’s research focuses on how to identify and enhance teacher effectiveness. He worked with the task force with sponsorship by the Appalachian Regional Comprehensive Center.

On July 13, 2011, the WVBE authorized a pilot of the revised teacher evaluation system by waiving an established evaluation policy for 25 schools [see Appendix 3-4]. Twenty of the 25 pilot schools were identified through the School Improvement Grant (SIG) program with the other five schools volunteering to participate—but based on WVDE-developed selection criteria. The pilot, implemented during 2011-12, will help ensure high-quality instruction that focuses on increased student achievement and that encourages continuous growth and improvement over time. The pilot brought to fruition the task force’s mission of West Virginia having a comprehensive and equitable evaluation system that clearly articulates, measures, rewards, and develops educator effectiveness. The WVBE recently approved another waiver of Policy 5310 to allow an additional set of approximately 110 additional demonstration sites to expand the educator evaluation pilot [see Appendix 3-5].

### **Principal Evaluation Task Force**

In fall 2009, parallel to the design of new teacher standards, another stakeholder group, the West Virginia Collaborative for Leadership Development and Support, developed new leader standards. These new standards serve as a policy framework for developing, supporting, and focusing West Virginia leaders on creating school conditions that prepare all students for the 21st century. Appendix 3-4 provides an executive summary of this plan for improving teacher and principal leadership in West Virginia.

The WVDE’s Office of School Improvement facilitated the Principal Evaluation Task Force, comprising principals and teachers, to design a revised evaluation system for school leaders. The resulting system, modeled after the new teacher evaluation system, evaluates principals and assistant principals using standards-based measures that include measures of student learning growth in the same manner prescribed for teachers. It includes nine standards plus a student learning standard and a standard associated with professional conduct. Both the teacher and principal evaluation systems use the same rubric to evaluate educator performance related to student growth. The Principal Evaluation Task Force initiated its work in May 2011 and merged with the Teacher Evaluation Task Force in spring 2012 to form a single, combined Educator Evaluation Task Force—following passage of HB 4236.

The new leader evaluation standards have served as starting basis for another stakeholder group representing the six IHEs in West Virginia that offer leadership preparation programs for principals. This group met in March and April 2012 to devise revised standards for leadership preparation programs. It incorporated the new leader standards with those established by the Educational Leadership Constituent Council of the National Policy Board for Educational Administration to ensure compliance with both national accreditation standards and state-based approval standards for the six leadership programs. The group will meet in fall 2012 to finalize its recommendations for the revised leadership program standards, which will be considered for approval by the WVBE in early 2013.

The 20 IHEs in West Virginia with teacher education programs have already realigned their programs to the West Virginia Professional Teaching Standards. The six institutions that prepare principals will undergo a similar reapproval process, pending the approval of the revised leadership program standards.

Table 3.1 provides an overview of activities completed to date which supported the development of West Virginia's revised teacher and leader evaluation systems.

**Table 3.1. Activities Completed to Date Supporting the Development of West Virginia's Revised Teacher and Leader Evaluation Systems**

Timeline	Activities	Responsible Parties
2010-11	<ul style="list-style-type: none"> <li><i>Alignment:</i> Methods were reviewed for alignment of the current state policy for personnel evaluation with the new standards; changes were recommended.</li> </ul>	<ul style="list-style-type: none"> <li>Teacher and Leader Task Force, WVDE, technical experts</li> </ul>
	<ul style="list-style-type: none"> <li><i>Teacher and leader standard roll-out:</i> The WVDE disseminated information about the revised standards using the following methods: (1) regional meetings, (2) webcasts/webinars; and/or (3) virtual meetings.</li> </ul>	<ul style="list-style-type: none"> <li>Teacher and Leader Task Force, WVDE, technical experts</li> </ul>

	<ul style="list-style-type: none"> <li><i>Review of research and best practices; reform of the teacher and leader performance assessment system:</i> To enhance the current teacher and principal performance assessment system, task force members heard from experts and practitioners in the field regarding examples of performance-based assessment systems; West Virginia's goal was to establish a performance-assessment system in which the evaluation component is rooted in self-reflection, student learning goal setting, and administrator review. Based on a</li> </ul>	<ul style="list-style-type: none"> <li>Teacher and Leader Task Force, WVDE, technical experts</li> </ul>

	<p>review of research and best practices, the task forces recommended revised teacher and principal performance assessment systems—rooted in the new teacher and leader standards—and indicator rubrics. These recommended performance evaluation systems were based on multiple components, such as evaluation/observation measures, a multiple-measure student growth model (as a significant factor), and other measures.</p> <ul style="list-style-type: none"> <li>• <i>Evidence and artifacts:</i> Task force members reviewed examples of evidence or artifacts of observable teacher and leader behavior that are utilized in the revised teacher and leader evaluation system. These approved examples became the basis for how evaluators would measure observable instances of behavior outlined in the new standards. The task force will continue to review and recommend evidence and artifacts for this purpose until full implementation.</li> </ul>	<ul style="list-style-type: none"> <li>• Technical experts/researchers, WVDE, task forces</li> </ul>
2011-2012	<ul style="list-style-type: none"> <li>• <i>Progressive scale-up:</i> The revised educator evaluation system was piloted in 20 SIG schools and in five additional schools with a majority of faculty support to implement the revised teacher and principal performance-assessment system in twelve of fifty-five districts statewide.</li> <li>• <i>WVEIS Online Educator Evaluation System:</i> This was developed as the primary mechanism for teachers and principals to input important and reliable data about their self-assessments, student learning goals, observation data, and evidence to inform their performances and the overall evaluation process. This online system allows for timely and constructive feedback and identifies areas for improving instruction or for targeting professional development.</li> <li>• <i>Technical Assistance:</i> All pilot schools received technical assistance and professional development from consultants and technical experts, who shared their experiences and learnings with the teacher/leader evaluation task forces three times during the implementation period.</li> <li>• <i>Evaluation study:</i> This formal research study was</li> </ul>	<ul style="list-style-type: none"> <li>• Participants in 20 SIG schools and five non-SIG volunteer schools, task forces, WVDE, and technical experts</li> <li>• WVDE offices of Information Systems, Assessment, Professional Preparation, Research, technical experts</li> <li>• Technical experts, WVDE Office of Professional Preparation, Research, task forces</li> <li>• Office of Research, West</li> </ul>

	<p>conducted to track results of survey feedback from all pilot participants and implementation results from the online platform.</p> <ul style="list-style-type: none"> <li>• <i>Communication:</i> To make the design and implementation of the revised evaluation systems more transparent, West Virginia instituted a comprehensive communication plan that relies on one or more of the following methods: (1) regular presentations and updates given to the WVBE, (2) regular weekly updates sent to all district superintendents and principals, and (3) presentations regarding the evaluation pilot given at various state-level and regional conferences.</li> </ul>	<p>Virginia Department of Education, Technical experts</p> <ul style="list-style-type: none"> <li>• Teacher and Leader Task Force; WVDE; representatives from pilot schools, districts, and Regional Education Service Agencies</li> </ul>
--	---	--

\*These completed activities also included the reviews and recommendations described in Principle One around the multiple-measure student growth model.

## REVISED EDUCATOR EVALUATION SYSTEMS FOR CONTINUAL IMPROVEMENT OF INSTRUCTION

As noted above, House Bill (HB) 4236 mandated a progressive scale-up implementation of the revised educator evaluation system. The legislation ensures that West Virginia will have a comprehensive and equitable evaluation system that clearly articulates, measures, rewards, and develops educator effectiveness to increase student learning.

The West Virginia Professional Teaching Standards, developed in response to this legislation, are performance based and measurable, focus on improving student achievement, and feature four performance levels—each with its own set of rubrics (distinguished, accomplished, emerging, unsatisfactory) [see Appendix 3-2]. Five standards are evaluated: Curriculum and Planning, The Learner and the Learning Environment, Teaching, Professional Responsibilities for Self-Renewal, and Professional Responsibilities for School and Community. For each, critical standard elements clearly define what educators must know and do and provide precise measurements.

A particular emphasis of this effort ensures that specialists and other educators who work with students with disabilities or English language learners (ELLs) are evaluated based on performance—including improved teaching and learning and responsiveness to all learners across multiple learning contexts. For example, when designing student learning goals, teachers must enumerate within the context description, the types of students, including those with disabilities and ELLs that the goals will target. The performances of students and teachers will be measured based on these goals. Teachers have similarly been encouraged to be especially inclusive of low-achieving students.

The approximately 1,000 teachers who attended the summer 2012 Teacher Leadership Institute received specialized professional development on developing student learning goals that align to the WV Next Generation CSOs. Under the direction of the WVDE's Office Instruction and Office of Professional Preparation, institute staff, who are principally practicing master teachers, participated in an intensive half-day professional development session on student learning goal design. This was completed in preparation for integrating student learning goals as an essential component of the educator evaluation system. A cohort of institute staff volunteered to coordinate the development of a series of grade- and content-specific rubrics to articulate baseline data for student learning goals and to better evaluate teacher and

student progress in achieving academic goals. The institute focused on implementing the revised standards to guide instruction in grades one, four, five, and nine; future Teacher Leadership Institute sessions will address the remaining grade levels. Kindergarten was the emphasis of the preceding year's institute.

At the institute, teachers from all grade levels developed a deeper understanding of how to evaluate teacher and student performance through student learning goals as a means to improve instruction. Institute participants were guided through lesson and unit design that incorporated appropriate learning targets directly associated with student learning goals based on evaluation system criteria, which included the required two data points and were rigorous and comparable across classrooms. A particular emphasis was placed on providing adequate time to ensure that all learners, including those with disabilities and ELLs, have sufficient opportunities to learn the curricula in meaningful ways to ensure growth in learning and, ultimately, readiness for college and career, across the developmental continuum. A major focus of the professional development was the learning context and how to identify learners' needs and dispositions within the learning environment. Teachers were encouraged to establish learning goals that (1) addressed the needs of all students, especially low-achieving students, and that (2) met evaluation system requirements to bolster continuous improvement of instruction and increase teacher and student performance.

Various criteria were used to select teacher leaders for participation in the 2012 Teacher Leadership Institute. One key criterion was the potential ability of each to provide district- and school-based professional development on teaching and learning through the WV Next Generation CSOs—integrating the design of student learning goals associated with the revised educator evaluation system as an integral part of instructional planning, delivery and assessment. Participants committed to sharing lessons learned from the institute with other teachers in their schools and districts to build system capacity to use educator evaluation components—in particular, student learning goals, which can improve instruction and learning outcomes for all students.

In summer 2012, the WVDE's Division of Educator Quality and System Support, in cooperation with the eight Regional Education Service Agencies, offered additional professional development to the school leadership teams of the 111 demonstration schools serving as demonstration sites for the revised educator evaluation systems for teachers and school leaders. The participants had multiple opportunities to explore the development and use of student learning goals to improve instruction. In eight venues across the state, hundreds of additional teachers participated in comprehensive guided practice to develop actual student learning goals, based on established evaluation criteria, to ensure fidelity in implementing this essential evaluation component. As a result, the school leadership teams joined in reflective conversations about how teaching and learning at their schools might best be improved through well-designed student learning goals.

The leadership teams then developed specific plans for providing school-based professional development to further develop capacity to use evaluation components, including student learning goals, as a means to enhance effective teaching practice at the local level based on the uniform state model. The eight Regional Education Service Agency professional development directors will continue to support and monitor the effective implementation of the revised evaluation system at the school and district levels, with additional technical assistance to be provided by the Division of Educator Quality and System Support.

## **MEANINGFULLY DIFFERENTIATE PERFORMANCE, USING AT LEAST THREE PERFORMANCE LEVELS AND MULTIPLE VALID MEASURES TO DETERMINE PERFORMANCE LEVELS, INCLUDING DATA ON STUDENT GROWTH FOR ALL STUDENTS**

Rubrics guide teachers and evaluators in recognizing teacher performance at four distinct levels: distinguished, accomplished, emerging, and unsatisfactory. Teachers receive an overall summative rating derived from evidence based on the West Virginia Professional Teaching Standards and the results from two student learning goals and two schoolwide growth scores, as reflected in standardized assessment data for reading and mathematics. Student learning goals span a quarter, semester, or school year and may be measured using both published and teacher-created assessments; they must include two data points, be rigorous, and be comparable across classrooms. The schoolwide growth scores are identified through standardized assessment data—not adequate yearly progress (AYP)—in mathematics and reading. For additional information on the methodology behind the West Virginia Growth Model, please refer to West Virginia’s narrative for Principle 1, under the heading “*Evaluation of Current Assessments and Transition Plan for Implementing the WV Next Generation CSOs*” subheading “*Development of the West Virginia Growth Model*.” More information is also available via the West Virginia Growth Model Website at: <http://wvde.state.wv.us/growth/> or Dr. Damian Betebenner’s [2008](#) and [2009](#) technical papers which provide specific details of the conditional growth percentile methodology which is used in West Virginia.

## EVALUATE TEACHERS AND PRINCIPALS ON A REGULAR BASIS

House Bill 4236 stipulates that all teachers, counselors, principals and assistant principals must be formally evaluated at least annually. Educators with less than six years’ experience also receive interim evaluative feedback related to classroom performance at designated intervals, depending on the assigned progression related to length of experience. Unsatisfactory performance at the standard level requires immediate evaluation and remediation through a corrective action plan.

The pilot includes three progressions through which teachers may demonstrate high levels of performance. In the initial and intermediate progressions, teachers are observed in the classroom as part of the evaluation process. Teachers on the initial progression are in the first three years of their careers and are observed four times throughout the year; teachers in the fourth and fifth years comprise the intermediate progression and are observed twice. Teachers on the advanced progression—those with six or more years of experience—conduct a self-reflection. All teachers are evaluated within the revised system and set goals to demonstrate evidence of growth in student learning. All teachers are also assigned two schoolwide student growth scores based upon summative assessment data as part of the evaluation process. The revised teacher evaluation system highlights accomplished teaching across the professional continuum through the progressions. At each step, the system’s goal is to improve teaching and learning continuously.

Teachers are evaluated based on performance related to the West Virginia Professional Teaching Standards. The standards guide reflection on improved educator effectiveness through alignment with professional development at the county and school level as well as in teacher preparation programs at colleges and universities across West Virginia.

## PROVIDE CLEAR, TIMELY, AND USEFUL FEEDBACK TO IDENTIFY NEEDS, GUIDE PROFESSIONAL DEVELOPMENT, AND INFORM PERSONNEL DECISIONS

The WVDE’s Office of Information Systems, in cooperation with other offices within the Division of Educator Quality and System Support has developed a sophisticated yet user-friendly data system for the West Virginia Educator Evaluation Systems for Teachers and School Leaders through its web-based West Virginia Education Information System (WVEIS). This data system allows evaluators and educators to exchange confidential information immediately about educator performance. Observations and other

evidence collections are entered directly into the system in real time, and users can access, aggregate, and interpret the data and receive feedback instantaneously.

The system likewise accumulates data to inform personnel decisions that support continuous improvement. While offering educators nuanced data related to actual performance, the data system also provides teachers, principals, and other district-level administrators with aggregated data reports to identify school-based and district-level instructional needs. These data guide selection of appropriate professional development. The aggregated data reports also highlight specific areas that require professional development as indicated, in particular, by data related to the emerging performance level. The emerging performance level provides insights into potential areas of improvement for teachers or principals; teams or departments; and schools, divisions, or districts. These data sets are informative on multiple levels and help determine which form and topic of professional development will best improve teaching and learning through effective practice.

The combined Educator Evaluation Task Force recommended two plans to support a meaningful process for data-driven decision making regarding personnel actions. In July 2011, the WVBE approved two plans for continuous improvement as part of a waiver for the demonstration sites. The board's minutes for this meeting can be found at <http://wvde.state.wv.us/boe-minutes/2012/wvbeminutes7-11-12.doc> (see item XXVI).

The first of the two plans is the Focused Support Plan, defined as a “proactive, preventative measure.” The plan is initiated when an area of concern that may lead to unsatisfactory performance has been identified. The Focused Support Plan may begin at any time, with a nine-week timeline for implementation. At the conclusion of nine weeks, if the standard has been met, the Focused Support Plan is discontinued. If adequate progress has been made, a second Focused Support Plan is developed and implemented; however, in the event of inadequate progress, a second type of plan a Corrective Action Plan, is put in place. The Corrective Action Plan is implemented for 18 weeks, during which time unsatisfactory performance at the standard level must be remediated and the standard must be fully met. At the conclusion of the 18-week plan, if the evidence does not demonstrate adequate progress in the educator's performance, “termination for unsatisfactory performance shall ensue.” The required components of both plans provide necessary information regarding performance and the adequacy of supports and resources to inform personnel decisions.

### **3.B ENSURE LEAS IMPLEMENT TEACHER AND PRINCIPAL EVALUATION AND SUPPORT SYSTEMS**

- 3.B Provide the SEA's process for ensuring that each LEA develops, adopts, pilots, and implements, with the involvement of teachers and principals, including mechanisms to review, revise, and improve, high-quality teacher and principal evaluation and support systems consistent with the SEA's adopted guidelines.

## **ENSURING THAT EACH LEA DEVELOPS, ADOPTS, PILOTS, AND IMPLEMENTS—WITH THE INVOLVEMENT OF TEACHERS AND PRINCIPALS, INCLUDING MECHANISMS TO REVIEW, REVISE, AND IMPROVE—HIGH-QUALITY TEACHER AND PRINCIPAL EVALUATION AND SUPPORT SYSTEMS CONSISTENT WITH THE WVDE’S ADOPTED GUIDELINES**

Per HB 4236, the revised educator evaluation system, must be expanded into a “multi-step statewide implementation” model. The legislation mandates, “Beginning with the schools included in the evaluation processes for professional personnel piloted by the Department of Education during the 2011-2012 school year, additional schools or school systems shall be subject to the provisions of this article in accordance with a plan established by the state board to achieve full statewide implementation by no later than the school year 2013-2014.”

For 2012-13, two schools in each county school system will participate in the revised system. This approach encompasses approximately 110 schools (a few counties may have only one participant) and accomplishes the following objectives for 2012-13:

- Build capacity at the local level by involving county school systems and Regional Education Service Agencies in training and supporting the 110 schools—this also reduces later fiscal implications for statewide implementation by building local and regional expertise to support future professional development.
- Allow researchers additional time to get more results from the pilot and finalize research recommendations prior to statewide implementation,
- Reduces the fiscal implications for statewide implementation in 2013-14 by building county/RESA expertise to enable training that is supported primarily at the local level,
- Ensure that a strong catalog of web-based resources will be available prior to statewide implementation.

HB 4236 also includes a provision requiring a comprehensive system for teacher induction and professional growth:

- (a) The intent of the Legislature is to allow for a multistep statewide implementation of a comprehensive system of support for building professional practice of beginning teachers, specifically those on the initial and intermediate progressions, consistent with sound educational practices and resources available. In this regard, it is the intent of the Legislature that the transition of schools and school systems to a comprehensive system of support that includes support for improved professional performance targeted on deficiencies identified through the evaluation process will be implemented concurrent with the first year that a school or system receives final evaluation results from the performance evaluation process pursuant to section two of this article. Further, because of significant variability among the counties, not only in the size of their teaching force, distribution of facilities and available resources, but also because of their varying needs, the Legislature intends for the implementation of this section to be accomplished in a manner that provides adequate flexibility to the counties to design and implement a comprehensive system of support for improving professional performance that best achieves the goals of this section within the county. Finally, because of the critical importance of ensuring that all teachers perform at the

accomplished level or higher in the delivery of instruction that at least meets the West Virginia professional teaching standards and because achieving this objective at a minimum entails providing assistance to address the needs as indicated by the data informed results of annual performance evaluations, including the self-assessed needs of the teachers themselves, the Legislature expects the highest priority for county, regional and state professional development will be on meeting these needs and that the transition to a comprehensive system of support for improving professional practice will reflect substantial redirection of existing professional development resources toward this highest priority.

As shown here, West Virginia is comprehensively reforming its entire teacher and leader evaluation system. WVBE Policy 5310 establishes a detailed rule for teacher evaluation [see Appendix 3-3]. This policy assures that teacher evaluation *across the state* must provide the following:

- indicators of improved performance
- indicators of satisfactory performance
- documentation for dismissal
- basis for programs of professional growth
- standards for satisfactory performance and the criteria for levels of performance, including technology standards
- provisions for a written improvement plan
- notification to persons with unsatisfactory performance—to include a remediation plan and timeline
- guidelines for recommending dismissal should the performance continue to be unsatisfactory

HB 4236 requires the state's performance evaluation system, outlined in WVBE 5310 [see Appendix 3-3], to be revised to align to the new educator evaluation system by July 1, 2013. This will be the driving force in the design and statewide implementation of an effective, streamlined, and rigorous system for improving teacher effectiveness. HB 4236 likewise contains provisions outlining requirements for a comprehensive system of support to ensure that all districts implement the revised evaluation system with fidelity with the intended goals of equity and continuous improvement in performance by teachers, principals, and, most importantly, students.

As stipulated by this legislation, the WVBE has promulgated guidelines for a Comprehensive System of Support for Improving Professional Practice. Based on these guidelines, the 55 districts will design a specialized system of support to meet the specific professional development needs of teachers within individual districts. The legislation explicitly requires the following:

“Focused improvement in teaching and learning through the use of evaluation data to inform the delivery of professional development and additional supports to improve teaching based on the evaluation results ....” (§18A-3C-3(a)).

For county boards to receive state funding for beginning teacher internships and mentor teachers, counties must submit plans for a comprehensive system of support using the required template by March 15, 2013—to be approved for implementation effective July 1, 2013. The legislation sets aside the previous formula, which appropriated funds based on the number of novice teachers, in favor of a new approach, which gives districts flexibility in identifying professional development needs based on educator evaluation data, among other factors.

Counties may refer to Cabell County's Teacher Induction Program (IIP), which was approved as part of the district's innovation zone in January 2010, as a model of state-supported flexibility in induction and mentoring as part of a comprehensive system of support. This unique district-directed program provides

comprehensive services to teachers through collaborative efforts, including a cohort of mentor teachers advised by instructional coaches and faculty from the education department at Marshall University (<http://boe.cabe.k12.wv.us/schoolimprovement/TeacherInductionProgram.htm>).

Among the essential requirements for a comprehensive plan of support to be considered for approval is the necessity that the proposed plan must identify areas of professional development for teachers and principals based on data from individual professional evaluations, the needs identified by teachers and principals in a self-reflection evaluation component, and student learning data from the multiple measures used in educator evaluations. The plan must describe the manner in which the county will monitor and evaluate the effectiveness of implementation and outcomes; as such, the plans inherently predispose districts to implement the revised evaluation system with fidelity—encouraged by the motivation to achieve outcomes as measured through the remediation and continuous improvement of instruction and growth in student learning outcomes. The plans must clearly connect how educator evaluation data supports the identification and acquisition of professional development that subsequently leads to better results for teachers and students.

The county-designed plan will be an accountability mechanism that directly links the requirement for a comprehensive system of support with the revised educator evaluation system. This will incentivize districts and schools to implement all evaluation components with fidelity to collect the necessary data that inform decisions to improve instruction through professional development at the local level. The legislation intends that that educator evaluation will transform instruction by identifying appropriate areas for improvement, recognizing best practices and strategies, and directing resources and supports to improve teaching and learning throughout West Virginia's public education system.

This expansion of the revised evaluation system and design and implementation of a comprehensive system of support to improve professional practice will incorporate the following actions as detailed in Table 3.2.

**Table 3.2. Action Steps to Build Capacity to Ensure LEAs Implement Teacher and Principal Evaluation and Support Systems**

<b>Milestones &amp; Timeline</b>	<b>Parties Responsible</b>	<b>Evidence</b>	<b>Resources</b>	<b>Challenges</b>
<u>August 2012 – June 2013</u>  Pilot revised educator evaluation system with approximately 110 schools	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> </ul>	Pilot data collected from observations, using the WV Professional Teaching and Leader Standards  Student and staff survey data  Student learning goal data  Process data collected by field teams and research evaluators	8 Regional Education Service Agency (RESA) specialists in the field  Central office staff in all 55 districts  Teacher and leader guidebooks	Compressed timeline of pilot

<u>July and August 2012/Ongoing</u>  Integrate student learning goal evaluation component into the Teacher Leadership Institute Instructional Design	WVDE offices of <ul style="list-style-type: none"> <li>• Instruction</li> <li>• Professional Preparation</li> </ul>	Consistent high-quality student learning goals developed at the school level, correlated with improved teacher performance and student outcomes	West Virginia Education Information System (WVEIS) student learning goal component  teacher leaders  established rubrics  student learning goal research and calibration	Effective monitoring of goal setting at the school and classroom level
<u>August 2012</u>  Open the WVEIS <i>Online Educator Evaluation System</i> to collect data from observations and documentation	WVDE offices of <ul style="list-style-type: none"> <li>• Information Systems</li> <li>• Professional Preparation</li> <li>• School Improvement</li> </ul>	Working electronic platform  Observation and documentation data collected in the platform	WVEIS data system as a basis for the <i>WVEIS Online Educator Evaluation System</i> electronic platform	Broadband and other technology capability limitations at the local level
<u>August 2012 – June 2013</u>  Expand and strengthen guidance, exemplars, and the supporting assessments for student learning objectives	WVDE offices of <ul style="list-style-type: none"> <li>• Professional Preparation</li> <li>• School Improvement</li> <li>• Instruction and Assessment</li> </ul>	Completed <ul style="list-style-type: none"> <li>• revised guidance for student learning goals</li> <li>• print materials (guidance, exemplars, table of specifications for assessments, etc.)</li> </ul>	Appalachian Regional Comprehensive Center (ARCC)  U.S. Department of Education (US ED) technical assistance providers  Central office staff in 55 districts and RESA specialists	Aggressive timeline for developing resources  Identification of additional subject area expertise for consultation on assessments  Development of school-level valid, reliable assessments

<u>February – May 2013</u>  Administration of student, staff, parent surveys on leader practice and school climate	WVDE Offices of School Improvement and Healthy Schools	Completed student/staff/parent surveys  Survey data analysis at the school and district level	Office of Research	
<u>January 2012 – May 2013</u>  Development of Policy 5310 revisions for implementation and effectiveness determinations 2013-2014	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> </ul>	Completed policy revisions  WVBE's adoption of Revision Policy 5310	Collaborative work team across WVDE divisions  WVDE legal department  Experienced legal technical assistance provider—for district human resources perspective	
<u>March 2013</u>  Submit plans for comprehensive system of support	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> <li>Federal Programs</li> </ul>	Consistent high-quality county plans align with WVBE guidelines	Data reports (educator evaluations, personnel data)  WVDE planning template Coaching for Learning Network	
<u>May 2013</u>  Perform initial data analysis and determine teacher and leader effectiveness measures based on multiple measures from the revised educator evaluation system	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> <li>Federal Programs</li> </ul>	Initial completion of <i>WVEIS Online Teacher Evaluation</i> for each teacher involved in the pilot  Initial completion of <i>WVEIS Online Leader Evaluation</i> for each principal involved in the pilot		

<u>August 2013</u>  Perform final data analysis and determine teacher and leader effectiveness measures based on summative assessment data	WVDE offices of <ul style="list-style-type: none"> <li>Assessment</li> <li>Information Systems</li> </ul>	Completed <i>WVEIS Online Teacher Evaluation</i> for each teacher involved in the pilot  Completed <i>WVEIS Online Leader Evaluation</i> for each principal involved in the pilot		Ensuring seamless data collection, analysis, and upload
<u>May 1 – June 2013</u>  Analyze teacher and leader pilot data from each component	WVDE offices of <ul style="list-style-type: none"> <li>Research</li> <li>Professional Preparation</li> <li>School Improvement</li> </ul>	Completed data and process analyses  Completed teacher and leader evaluation pilot report  Completed internal validation study of and pilots	ARCC  Focus group participants	
<u>May – June 2013</u>  Revise and strengthen training materials and print resources  Develop trainer and evaluator certification protocols and modules	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> </ul> WV Center for Professional Development	Completed <ul style="list-style-type: none"> <li>revised training plan</li> <li>print materials (handbook, research resource, etc.)</li> <li>trainer and evaluator certification</li> </ul>	WV Center for Professional Development  ARCC	

<u>July 2013</u> Train trainers for revised teacher and leader evaluation system and full WVDE electronic platform full implementation	WV Center for Professional Development	WV Center for Professional Development district <u>certified</u> trainers	WV Center for Professional Development ARCC Central office staff in 55 districts 8 RESA evaluation specialists	
<u>August 2013</u> Conduct teacher orientation for using revised materials and procedures  Conduct principal orientation for using revised materials and procedures	County central office evaluation contact  RESA evaluation specialists	Electronic signatures indicating completion of orientation in WVDE electronic platform	Central office staff in 55 districts  8 RESA evaluation specialists	
<u>School Year 2013 – 2014</u> Fully implement the revised teacher and leader evaluation system	WVDE offices of <ul style="list-style-type: none"> <li>Professional Preparation</li> <li>School Improvement</li> <li>Federal Programs</li> </ul>	Teacher effectiveness measures for each teacher involved in <u>all</u> districts  Leader effectiveness measures for each principal involved in <u>all</u> districts	State data system as a basis for the WVEIS electronic platform  Central office staff in all 55 districts  RESA evaluation specialists	
<u>September – October 2013</u> Complete teacher self- assessment  Complete student learning goals with principals	School principals and teachers  County central office evaluation contact  RESA evaluation specialists	Electronic completion of self-assessments and goal setting in <i>WVEIS Online Educator Evaluation System</i>  Leader goals evident in electronic platform	Central office staff in 55 districts  8 RESA evaluation specialists	

<u>September 2013 – April 2014</u>  Conduct observations and collect documents	School principals and teachers  County central office evaluation contact  RESA evaluation specialists	Data collected from observations using professional teaching and leader in <i>WVEIS Online Educator Evaluation System</i>	Central office staff in 55 districts  8 RESA specialists  Teacher and leader guidebooks and support materials  Orientation video and student learning goal videos  State data system as a basis for the WVEIS electronic platform	
<u>February – May 2014</u>  Administrate student, staff, parent surveys on leader practice and school climate	WVDE offices of <ul style="list-style-type: none"> <li>• School Improvement</li> <li>• Healthy Schools</li> </ul>	Completed student/staff/parent surveys  Survey data analysis at the school and district levels	WVDE Office of Research	
<u>April – May 2014</u>  Complete student learning goal post-assessments	WVDE offices of <ul style="list-style-type: none"> <li>• Professional Preparation</li> <li>• School Improvement</li> </ul> District principals and teachers	Student performance data uploaded to online system  Analysis of growth-to-target for each teacher in electronic platform	State data system as a basis for the WVEIS electronic platform	

<u>September 2014</u> <u>(or date specified</u> <u>in policy)</u>  Complete summative evaluations	<u>All</u> school principals and teachers  <u>All</u> district staff	Data collected from observations using WV Professional Teaching and Leader Standards  Completion and electronic signatures on summative annual evaluations for all teachers and leaders	State data system as a basis for the WVEIS electronic platform	
<u>Summer 2014</u>  Complete validation and reliability studies for the revised system	WVDE offices of <ul style="list-style-type: none"> <li>• Research</li> <li>• Professional Preparation</li> <li>• School Improvement</li> <li>• Federal Programs</li> </ul>	Final report on validity and reliability of the revised teacher and leader evaluation systems	Technical advisory committee	
<u>Ongoing</u>  Expand and strengthen guidance, exemplars, and the supporting assessments for student learning objectives	WVDE offices of <ul style="list-style-type: none"> <li>• Assessment</li> <li>• Professional Preparation</li> <li>• School Improvement</li> </ul>	Continuously updated <ul style="list-style-type: none"> <li>• student learning goal development plan</li> <li>• print materials (guidance, exemplars, table of specifications for assessments, etc.)</li> <li>• database of shared, reviewed assessments</li> </ul>	US ED technical assistance providers  Student learning goal guidance materials	Development of district- and school-level valid, reliable assessments

## **Attachment 1:**

Notice to LEAs

West Virginia Informed LEAs of our intent to submit an ESEA Flexibility Request and solicited written feedback on our request using three primary methods.

First, in February 2012, the WVDE created a Google Site where we posted our initial request to the US Department of Education to seek a waiver from NCLB to freeze our Annual Measurable Objectives (AMOs) for Reading/Language Arts and Mathematics for the 2011-12 school year to those levels approved in West Virginia's Accountability Workbook for the 2010-11 school year. The link to this site was sent to West Virginia's 57 district superintendents with instructions that it be forwarded to all LEA staff for comment. Figure 1 below provides a screen capture of the website. Figure 2 provides a screen capture of the comment feature that was utilized to solicit LEA feedback. Attachment 2 includes all LEA comments received via this option.

Second, West Virginia established a public Google site for the West Virginia Accountability and Accreditation Stakeholder Advisory Committee (WV AASAC) to solicit comments and to provide access to continually updated information about West Virginia's ESEA Flexibility Request throughout its development. As described in the narrative of this request, the WV AASAC was made up of representatives from LEAs, schools, teacher organizations, institutions of higher education, legislators, and members of the WVBE and general public. Figures 3 through 5 provide screen captures of the information provided through this site.

Third, along with the general public, LEA staff including District Superintendents, Directors of Curriculum, Special Education Directors, County Test Coordinators, and all other LEA staff were invited to comment on draft versions of West Virginia's ESEA Flexibility Request at four times throughout the process of developing the narrative. Attachment 3 provides a series of screen captures illustrating this comment option and includes Table 1 which indicates to which groups the request for comments was sent. A link to this comment option was also provided on the West Virginia Department of Education Homepage. All comments received via this option are included in Attachment 2.

**Figure 1. Website Created to Gather LEA Comments on West Virginia's Decision to Request Flexibility from ESEA.**

The screenshot shows a web browser window displaying the "NCLB Waiver - LEA Comments" website. The browser's address bar shows the URL: <https://sites.google.com/a/wvde.k12.wv.us/nclb-waiver---lea-comments/>. The website header includes the West Virginia Department of Education logo and a search bar. A sidebar on the left contains links: "Welcome", "Please Enter Comments Here", and "Sitemap". A red arrow points from the "Please Enter Comments Here" link to a text box at the bottom left. The main content area is titled "Welcome" and addresses County Superintendents. It explains the purpose of the notification and lists three requirements for the waiver. A second red arrow points from the "Achievement and Graduation Rate Gaps" link in the attachments section to a text box at the bottom right.

**Links for LEAs to provide comments regarding their support or lack of support for West Virginia's decision to seek Flexibility.**

**Links to provide LEAs with:**

- 1. A copy of West Virginia's Formal Request to US ED to Freeze AMOs to the levels approved in the 2010-11 Accountability Workbook to allow time to draft a request for flexibility from ESEA; and**
- 2. A copy of the current Achievement and Graduation Gaps for all Subgroups based upon the most recent assessment data available.**

Comments on Request Received from LEAs  
(and the general public)

Table 1 provides all comments received from LEAs via the Google site created to solicit feedback regarding West Virginia's Decision to seek Flexibility from ESEA. See Attachment 1 for more details of this process.

**Table 1. Comments Received from LEAs Regarding West Virginia's Decision to Seek Flexibility from ESEA**

Timestamp	Please enter your comments in the text box below. Feel free to use as much space as necessary.	LEA/County Name:
2/27/2012 14:52:21	I applaud the WVDE for submitting a waiver while the WVDE takes steps necessary to plan for the implementation of ESEA flexibility. I have reviewed the letter and attachments and feel that our State Department of Education is moving in the right direction.	Kanawha
2/27/2012 18:33:24	On behalf of the Members of the Clay County Board of Education, and the Clay County Schools Staff, I fully support the WVDE request for an NCLB Waiver as specified in the letter from Dr. Joree Marple, West Virginia State Superintendent of Schools.  Kenneth Tanner, Superintendent Clay County Schools	Clay County School/Clay County
2/28/2012 8:53:49	On behalf of Ohio County Schools, I would like to enter this letter of support for the West Virginia Department of Education request for a waiver of section 1111(b)(2)(H) of the Elementary and Secondary Education Act of 1965 (ESEA) to permit West Virginia to use the same annual measurable objectives (AMOs) that West Virginia used for AYP determinations based upon assessments administered in the 2010-2011 school year to make such determinations for the 2011-2012 school year.  This one-year waiver from escalating AMOs will allow all schools in Ohio County to continue to improve the quality of instruction, to utilize a balance of assessment data to monitor student learning and achievement, to provide reasonable and practical solutions for Ohio County's graduation rate, and to develop greater knowledge and understanding of student growth data among all teachers, principals, students, parents, and stakeholders in the district.  In addition, the one-year waiver allows Ohio County Schools the opportunity to develop greater understanding of the Common Core Next Generation Content Standards and Objectives and to expand implementation of Next Generation CSOs without facing the negative consequences of the escalating AMOs and resulting AYP designation.  Ohio County Schools fully supports the West Virginia Department of Education's request for the One-Year AMO Flexibility.	Ohio
2/29/2012 21:55:36	The WV Schools for the Deaf and the Blind supports the WV Department of Education's request for a waiver while it works to complete a comprehensive flexibility package. Our teachers will appreciate the absence of burdensome stress and anxiety associated with striving for higher AMOs in exchange for the opportunity for targeted focus on identified student needs. Dr. Lynn Boyer Superintendent	West Virginia Schools for the Deaf and the Blind

Timestamp	Please enter your comments in the text box below. Feel free to use as much space as necessary.	LEA/County Name:
3/1/2012 9:08:53	Logan County Schools is in favor of the WVDE flexibility waiver and the AMO freeze. This allows for more of our schools to meet AYP and encourages teachers and students with a more reachable goal.	Logan
3/1/2012 10:53:57	Although, NCLB had the right goals in mind, the law's one size fits all approach has proven ineffective as a mechanism for accountability and, as a result, discouraged state efforts to improve student achievement and make progress in education. NCLB provides too simplistic a view of whether schools are meeting children's needs. The way NCLB measures proficiency is flawed because it fails to account for meaningful progress and improvement. The 2014 goal is statistically impossible to attain. We fully support the WVDE in their attempt to secure a waiver of this flawed piece of legislation.	Raleigh County
3/1/2012 11:08:16	On behalf of the Kanawha County Title I schools, I encourage the WVDE to select both waivers #2 and #3 as part of the application process. By doing so, Title I schools will be relieved of the stringent NCLB sanctions.	Kanawha
3/1/2012 12:59:17	Mingo County's central office directors and coordinators have carefully reviewed the information provided by Dr. Jorea Marple's office and the West Virginia Board of Education. Our questions and concerns following the February 24, 2012, webinar on the request for a waiver of section 1111(b)(2)(H) of the Elementary and Secondary Education Act of 1965 (ESEA), as amended, have been addressed in the documents provided. Mingo County Schools Local Education Agency supports this much needed waiver.	Mingo
3/1/2012 14:19:09	We commend the WVDE for requesting this waiver to give our schools a fighting chance. We too believe this allowance will increase the quality of instruction and thus improve the overall academic achievement by removing the pressure to meet the ever increasing AMO's. This waiver will provide our schools the opportunity to show growth on the WESTEST 2 and thus make AYP and be rewarded for their hard work.	Monongalia

3/1/2012 15:00:07	<p>The Marion County Board of Education supports the West Virginia Department of Education's (WVDE) request to waiver section 1111(b)(2)(H) of the Elementary and Secondary Education Act of 1965 (ESEA). We understand this 1-year waiver will permit WV districts to use the 2010-2011 annual measurable objectives (AMOs) in determining AYP for the 2011-2012 school year.</p> <p>Seven of nineteen Marion County schools were identified for improvement under the 2010-2011 AMOs for AYP. If the current AMO-AYP trajectory is enforced - and the percent of students performing at the mastery and above level is the same in 2011-2012 as in 2010-2011 - all but one of Marion County's schools will be identified for improvement during the 2012-2013 school year. Although much effort has been devoted this school year to improving student achievement at the seven identified schools, the resources available to offer assistance are limited. The financial and personnel resources of Marion County would not be great enough to assist eighteen schools – each having unique issues relative to student performance.</p> <p>The Marion County Board of Education believes the U.S. Department of Education's requirements for granting the 1-year waiver have or will be met:</p> <ul style="list-style-type: none"> <li>• WV students have college and career readiness standards in both reading/language arts and mathematics. A senior level course utilizing adaptive computer technology is offered to Marion County students who need better mathematics preparation for college entry-level courses or the workplace. A college and career readiness senior level reading/language arts course is being developed for implementation during the 2012-2013 school year.</li> <li>• Measures of annual performance growth by students will be available to school districts – including Marion County. A potential performance growth model developed by the WVDE Office of Assessment and Accountability has been reviewed by Marion County's Superintendent and curriculum staff. Given such a model, the teachers and administrators of the district believe they will be better informed when making instructional decisions.</li> <li>• The WVDE has identified the persistent achievement and graduation gaps that exist among WV's students. The Marion County Board of Education has the necessary data to identify the achievement and graduation gaps that are particular to Marion County students. We further agree to provide such data to the WVDE or to the U.S. Department of Education.</li> </ul> <p>The Marion County Board of Education supports and agrees to provide assistance to the WVDE in its effort to seek ESEA flexibility. We believe the comprehensive flexibility package will permit our district to move forward with the implementation of the Next Generation Content Standards and Objectives (Common Core) as well as the development of a better accountability assessment program.</p>	MARION COUNTY
3/2/2012 15:02:58	<p>After listening to the information provided via the earlier communication and reading the waiver request to be submitted to the USDE, we fully support the waiver request. We believe that it is important, with the transition to the Common Core Standards, that our school administrators and teachers have the opportunity to make necessary adjustments in order to meet those</p>	Boone County

	standards.	
3/2/2012 15:39:41	We support the NCLB Waiver. It is the right thing to do for our schools, our teachers, and our students. The elimination of using one accountability measure to "grade" schools will be a relief. The development of a meaningful accountability system using multiple measures makes sense and will give schools and school districts a clear picture of where they stand. We support the three key sections: college and career ready provisions, revision of the accountability system, and the revised teacher system. We especially support the development of an achievement model that provides teachers, students and parents growth data on student performance.	Berkeley County
3/2/2012 15:53:56	Brooke County supports the efforts of Dr. Jorea Marple in her quest to seek the NCLB waiver enabling West Virginia to freeze its Annual Measurable Objectives (AMOs) to the 2010-2011 school year percentages. Brooke County Educators understand that the waiver request seeks temporary relief as West Virginia works toward crafting a comprehensive flexibility package.	Brooke
3/5/2012 10:30:15	Excellent! Thank you, Dr. Marple, WVBOE and WVDE staff!	Grant

Table 2 includes all comments received from LEAs and the general public via the online comment option provided to gather feedback on West Virginia's plans for each Principle (See *Attachment 3 – Notice and Information Provided to the Public Regarding the Request* for more details about the online comment feature used in West Virginia).

<b>DATE SUBMITTED</b>	<b>INDIVIDUAL AND ORGANIZATION</b>	<b>COMMENTS</b>
15-Aug	NAME REMOVED Sp. Ed Case Manager Upshur County School Buckhannon, WV	No Child Left Behind is a "pipe-dream". The fact that all students are to be on grade level by a certain date is an unreasonable expectation. All special education students are not going to be at the mastery level regardless of how fantastic the teacher or school system. If that could happen you would need a magic wand. We need to have realistic expectations with strong accountability. Tighten the ropes on some administration that allows less than competent educators in the classroom. Bring out all the stops to bring the lower-achieving students up to their maximum potential. To use a term not commonly adhered to in public education, get some common sense with our student, teachers and schools in general.
16-Aug	NAME REMOVED Principal Nicholas BOE Richwood WV	The No Child Left Behind Act is a joke, if you have a large cell size of special ed look out. Let us go with growth or improvement from one year to the next.
16-Aug	NAME REMOVED Ex. Director of Special Education Berkeley County Schools Martinsburg WV	I really believe that the whole Waiver will end up being just one more thing to add to the already burdensome mound of paper work. I thought the waivers were to give us relief. This will end up being just one even larger monitoring program. What we really need to do is get to the heart of the problem in education, finding, hiring and keeping good teachers. This applies to items 2 and 3. Thanks
16-Aug	NAME REMOVED Principal Kanawha County Schools, Nitro Elem. Nitro WV	I support the petition to grant a waiver to allow schools more time to concentrate on fully developing their plans to meet the requirements of NCLB.
16-Aug	NAME REMOVED PARENT FAIRVIEW WV	I do not believe in the no child left behind act. I think if a child is failing in certain areas they need to be held back if they cannot make the grade.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
16-Aug	NAME REMOVED Teacher Dunmore WV	<p>I am a special education teacher and I have many concerns about the upcoming demands with the new next generalizations CSO's will be putting on special education students. I am most familiar with the math curriculum and the demands of the upcoming math classes do not meet the needs of the students and the goals set forth in their IEP's. These students need math skills that will prepare them for life! They will not be using Trig/PreCal but now they will be required to take these classes. This will lead to frustration and will contribute to higher dropout rates among students with disabilities. I also have so many frustrations with the fact that the classes now are based on professional or skilled, we have always had students and will continue to have students who will go straight to the work place, to tell them they cannot choose that route is a slap in the face to many. So now if they are not professional they have to take a vocational pathway in something we offer that might not be a thing that they have any interest in or plan to pursue as a career. This is just not right.</p> <p>As a parent of an elm child I worry that my son is going to fall behind by the changes that the state of WV is making. They are going to be focusing on learning the changes and the quality of education is going to suffer.</p>
16-Aug	NAME REMOVED Principal Mercer County/ Bluewell School Bluefield WV	<p>I like how Acuity and WV Writes will gradually transition to the Next Generation standards. I believe this will prepare students and teachers for testing expectations for the future Smarter Balanced Assessment.</p> <p>In regard to the Pre-K through 2 assessment, it depends on the rigor. Yes, we need to know their levels for instructional purposes. However, we need to be careful about how much stress we put on young students. They may be tired of testing by the intermediate grades, which can lead to a lack of interest in education later on. How accurate will the assessment results be for students in grades Pre-K through 2?</p>

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
17-Aug	NAME REMOVED Assistant Principal Spring Valley High School Huntington WV	I am of the opinion that the No Child Left Behind Legislation is a failure. It sets goals that are frankly impossible.
17-Aug	NAME REMOVED Teacher AFT Huntington WV	<p>The goals for the lower functioning special education students are not appropriate for these students. We need to focus more on basic skills with them. 55 IQ should not be taking the Westest. They are moderately mentally impaired and are incapable of passing the Westest, just ask any Special Education college professor. When IDEA first started I had a severe to moderate classroom of students and many of them had jobs when they left high school. Most of them still have the same job or jobs or a similar type now, 18 years later. Due to the academic push with these students instead of teaching them functional skills, they no longer have jobs when they leave high school and are nonproductive citizens as adults.</p> <p>Also, professors on the college level in the area of child development should be consulted on the appropriate depth of knowledge level questions for the Westest. Questions on the Westest do not match the depth of knowledge skill level appropriate for the age of the child and makes it very difficult for them to succeed. It also causes frustration in all students, especially Special Education students. Abstract thought is not developed until at least middle school age and expecting elementary students to be able to use abstract thought is unattainable.</p>
17-Aug	NAME REMOVED teacher Wyoming County BOE Pineville WV	West Virginia needs additional time to plan for and deliver a program of study that meets and exceeds the demands of college and career readiness.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
17-Aug	NAME REMOVED 6th Grade Language Arts teacher Oak Glen Middle School New Cumberland WV	<p>In my opinion, Principle 1 is ambitious and well-written. Detailed explanations for how we will address our goal of preparing all of our students for college and career-readiness are evident. The Next Generation CSOs are definitely more rigorous, definitely in the middle and upper grade levels, and especially for special education students. Professional development is needed in order to implement these standards effectively, which this principle acknowledges. Some positives I have noted in this principle include: increase in professional development opportunities, much-needed textbook adoption for social studies and mathematics, and aligning ACUITY, WV Writes, and Teach 21 to Next Generation CSOs so teachers do not have to learn a new system considering we are already use to the format of these resources and teaching tools. Some things I think the WVDE should be aware of include the fact that some counties do not communicate PD opportunities to their staff. I am fortunate to live in a county that is great about passing along information from the WVDE, but I know some teachers who aren't as fortunate. Furthermore, if TLI is one of the only options for PD open to us, how will that work for counties who may adopt a balanced calendar, effectively year-round, when the PD opportunity is scheduled during the summer? Who will pay for subs for the counties who are under the balanced calendar to send teacher leaders to attend the PD? Finally, the new standards are much more rigorous and require us to prepare all children, regardless of disabilities, for college and career-readiness. This will require more professional development for general educators and special educators alike; however, in some counties general educators are shut-out of PD for special educators. This needs to be addressed because we have the responsibility of educating all children according the child's LRE, and children with special needs deserve to have general educators who are professionally trained and knowledgeable.</p>
17-Aug	NAME REMOVED teacher Lumberport Middle School Lumberport WV	Please support Principle one provisions.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
17-Aug	NAME REMOVED teacher Lumberport Middle School Lumberport WV	Please support all provisions in this policy!
17-Aug	NAME REMOVED	I can only hope that this change will liberate the children of this state from the "test". There is such a stifling crush to "teach to the test" that it seems our children all over the state are being prevented from learning and expressing themselves creatively. As a parent, it breaks my heart that so much emphasis is on one test. It's a good snapshot to have but it should not be the end-all, be-all.
17-Aug	NAME REMOVED Principal Melrose Elementary Princeton WV	It is very important for all involved to feel successful. At this rate, everyone will feel like a failure.
18-Aug	NAME REMOVED SPED Teacher Teacher Summersville WV	The No Child Left Behind has left so many children behind that our test scores are getting lower and there are more teachers putting their students on the APTA test just so they won't have to take the Westest. This is due to the fact that children are being left in the dark and are falling further behind.
20-Aug	NAME REMOVED Counselor Kanawha County Schools Charleston WV	Specific career guidance materials should be developed and adopted so that all students at each grade level will receive the same instruction.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
20-Aug	NAME REMOVED CTE Instructor John Marshall HS Glen Dale WV	All I ask is keep in mind that not all students aspire to be college graduates as statistics have shown. We need to gear our focus on industry and what it requires of our future workforce. A good way to do this is have ALL teachers of every subject have a workforce advisory committee. When developing curriculum, we need to ask ourselves "Can this be applied to industry?" If the answer is "No", then we need to ask what the relevance is. I realize there are key core classes--reading, writing, math-- that students should be proficient in. However, they should have mastered these core subjects by high school so that they can focus on career building classes. With that said, we need to ask why Perkins funding is being cut rather than increased.
20-Aug	NAME REMOVED Fairmont WV	Laws should only be changed by Congress. Allowing the Department of Education to grant waivers allows them to determine the measurements. I do not like the imbalance of power. We the people need to demand an overhaul of the law and then have on representative with our input develop the standards.
21-Aug	NAME REMOVED Teacher WV	Disagree with NO Child Left Behind.
22-Aug	NAME REMOVED Science Chair Hurricane High School Hurricane WV	I would love to see some emphasis on helping our children develop work habits that allow them to STAY in college...that said, this is an excellent initiative that presents us with an opportunity to REALLY HELP WV CHILDREN!

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
22-Aug	NAME REMOVED Principal Ritchie County Schools Pennsboro WV	We must look at directing services toward individual needs. From what I can tell, NCLB is expecting all students to meet the same requirements; regardless of what the student's needs may be. I see this separation toward individual needs during a student's 11th and 12th grade years, but by this time it is too late for many students. This separation of skill levels need to be more of a focus in the earlier grades, like around the 7th grade, in order for a student to get the basic skills needed; not just for college, but also for a vocational area or toward the workforce. I realize that the design of the current plan is meant for equal opportunities; but I feel that it is working the opposite effect by causing a separation of student abilities before some even start high school.
22-Aug	NAME REMOVED Counselor Weberwood Elementary School Charleston WV	The proposed access to AP courses sounds very fair to me, as well as being fair to the students! (And, giving them an excellent chance to compete with others in the world of academia and eventually the work force).
22-Aug	NAME REMOVED Principal Adult institutional Education Grafton WV	I like the proposal to move away from NCLB and use the guidelines mentioned for measuring student achievement and instructional practices throughout West Virginia. Could read... "So and So will provide the SEA's college-career readiness transition and implementation plans by..." etc.</p> <p>Also is "an SEA" correct? "a SEA" seems more appropriate - unless the agency is what we are referring to and the State part doesn't matter. I understand we are asked for content comments but this paragraph bothers me :) Thanks!</p> <p>1.B TRANSITION TO COLLEGE- AND CAREER-READY STANDARDS</p> <p>Provide the SEA's plan to transition to and implement no later than the 2013–2014 school year college- and career-ready standards statewide in at least reading/language arts and mathematics for all students and schools and include an explanation of how this transition plan is likely to lead to all students, including English Learners, students with disabilities, and low-achieving students, gaining access to and learning content aligned with such standards. The Department encourages an SEA to include in its plan activities related to each of the italicized questions in the corresponding section of the document titled ESEA Flexibility Review Guidance for Window 3, or to explain why one or more of those activities is not necessary to its plan.</p>

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
23-Aug	NAME REMOVED Counselor Wyoming County Board Oceana WV	<p>As a former high school counselor and now elementary and middle school counselor, I can say it would be in the interest of the students and educators to waive testing. The reasons, in my opinion, are many; however, I will name a few that I have seen firsthand.</p> <p>As a high school counselor, I was responsible for all testing in the building. The first year I was in the high school setting, 3 years ago, I administered 9 tests. I was unable to work with the students one-on-one for any reason other than testing.</p> <p>The curriculum has been narrowed to such a point that each student is on the same pathway regardless of college bound students or vocational students. Educators are expecting students to pass Trigonometry in order to graduate even if they do not plan to attend high school. I agree we must prepare students to attend college, but not every student will need to take Trigonometry. As a result, the dropout rate sky rocketed because many students could not pass the math requirements. The curriculum should be more individualized rather than "lumping" the students in one category such as "college bound".</p> <p>I can mention at least 2 areas we have failed our students. As a parent, my youngest daughter was graduating high school and she could not address an envelope. I had to explain to her how to address her high school graduation announcements. My daughter could not balance a check book. In years past, when I graduated from high school, these were skills I knew. We must teach our students life skills as well as to be college bound students. The other area is with the use of technology. I am a fan of technology; however, calculators should not be used in mathematics. When my daughter graduated from high school, she could do Trigonometry on a calculator, but when she went to college, she forgot her multiplication tables, decimals, and how to work fractions because she was accustomed to using a calculator. The professors at her college did not allow the use of calculators. My daughter had to re-learn these skills.</p> <p>As a counselor, almost every student I work with has a parent or parents who are addicted to drugs. Many students are being raised by their grandparents.</p>

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
		<p>Many have lost a parent or both parents to drugs or their parents are incarcerated. How can we expect our children to come in our classrooms and sit in a seat to take a test when they may have had to witness a fight before they came to school?</p> <p>My hopes are that we get back to a more individualized way of teaching and we cannot do that if we are so concerned about the test.</p> <p>West Virginia has wonderful educators who only want the best for our students. I am so impressed with the things the state department has in the works for our students. Policy 4373 is an outstanding policy that I believe will help the students. We have much to be thankful for and proud of in our state. I enjoy my position and I enjoy working with the students. Let's get back to working with our students and preparing them for life beyond high school.</p> <p>Thank you for taking my thoughts into consideration.</p>
24-Aug	NAME REMOVED Principal WVDE/OAIEP WV	I support the state wide initiative to prepare our students (both K-12 and adult level) for college and career readiness futures. I believe this request will provide that common blend of postsecondary and career job related skilled employment opportunities for our students and our state.
25-Aug	NAME REMOVED Teacher/Parent Shady Spring Middle School Daniels WV	I am concerned about the AYP requirement regarding the % of HS graduates. Students who take more than 12 years to finish their graduate requirements or finish HS by completing their GED are not in the equation for the HS's APY. In fact, the school is penalized by not having those students not finish high school in 12 years. I feel that there should be flexibility in this matter. The effort a student and the teachers make to ensure the goal of graduation is achieved is being ignored and, in some cases, made to look like poor judgment instead of the persistence and financial responsibility.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
27-Aug	NAME REMOVED Principal NAESP/WVAEMSP/Winchester Avenue School Martinsburg WV	<p>The WV ESEA Waiver Proposal accurately reflects WV's efforts to increase the rigor and instructional methods to adequately prepare our students ((Pre-K through 12) for college and career readiness upon graduation.</p> <p>I did notice in the 'Public Involvement in the Development' of the request that the teachers' organizations were mentioned, but there is no mention of the Principals' Associations: West Virginia Association of Elementary and Middle School Principals (WVAEMSP) and the West Virginia Association of Secondary School Principals (WVASSP) that are the state affiliates of NAESP and NASSP respectively.</p> <p>I served on the task force for the development of the new Principal's Evaluation as a representative on the elementary principals' association.</p>
27-Aug	NAME REMOVED Teacher RLBMS Weston WV	No Child Left Behind was a failure from the start. Education Plans should be developed at the state level because History, Location, Economic Conditions, and other areas must be considered. I welcome the new approach.
28-Aug	NAME REMOVED Parkersburg WV	Principle 1 looks fine to me.

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
29-Aug	WV Developmental Disabilities Council Charleston WV	<p>The WV Developmental Disabilities Council appreciates the opportunity to provide comments on the proposal for an ESEA Waiver. They are as follows.</p> <p>Principle 1: College-And Career-Ready Expectations for all Students The WV Developmental Disabilities Council (WVDDC) is pleased to see the intent to deliver special education services within the context of general education. The Council would like to see an increase in the percentage of students who are in general education for more than 80% of the day.</p> <p>The WVDDC is also pleased to see an emphasis being placed on strengthening the instructional expertise of special and general educators. Students with disabilities will improve as teachers improve their abilities to develop and modify curriculum to meet each child's needs. In this area, the Council would also like to see increased challenge in the curriculum and instructions for students with disabilities, since low expectations guarantee low results. The WVDDC commends the Board for its focus on students with severe cognitive disabilities and encourages all attempts to increase teachers' knowledge and expertise in technology options. Teachers' knowledge of options and expertise in tailoring technology to meet individual student need is crucial for the enhancement of the competencies of all students in general, and students with severe cognitive disabilities in particular.</p> <p>The WVDDC appreciates the focused attempts to prepare teachers to provide appropriate services to students with autism, and encourages the same focus on all students with significant disabilities.</p> <p>The WVDDC would also encourage more efforts to be made in the area of transition for all students with disabilities from high school to adult life, particularly to meaningful employment, and also including the exploration of opportunities for higher learning.</p> <p>The Council has worked closely with staff from the OSP over the past three years to modify curriculum for Career Technical Education (CTE) programs which would allow students with disabilities to obtain an Individualized Work Readiness Certificate (IWRC) in a program in order to obtain employment in</p>

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
		<p>the area for which they are qualified.</p> <p>The Council encourages the WVDE to accelerate its plans to formalize and clarify CTE program completion and compliance requirements for the IWRC. Questions regarding testing have resulted in reluctance on the part of some CTE programs to move forward with plans to modify curricula for students with developmental disabilities.</p> <p>The CTE IWRC program is recognized as a national model for employment and career training for students with developmental disabilities. The WVDCC would like to see the WVDE work to make this program available to students with developmental disabilities in each of the 55 counties, and will make available the technical assistance and support to begin the process of developing IWRC programs.</p>
29-Aug	NAME REMOVED WVTESOL Board, Advocacy Representative WVTESOL (ESL teachers professional association) Charles Town WV	<p>Assurances Section: How are ELLs and ESL teachers represented on the Committee of Stakeholders?</p> <p>Principle 1: For the Universal Design process and Teacher Leadership Institutes, what is the role/representation of ESL professionals?</p> <p>Are ESL teachers included in SPL training?</p> <p>"The Office of Special Programs and the Office of Assessment will address this challenge by assuring that students with disabilities including those who are English Language Learners (ELLs) have opportunities to access the curriculum ..." How? Planning for ELLs with special needs is a difficult area. Who will provide the expertise?</p> <p>Is SIOP training specifically part of the plan for all counties? Will the state fund it?</p> <p>Will Principals Training include training on ELLs? WVTESOL member comments indicate administrators more ELL training.</p> <p>How much ELL information will be incorporated in the Higher Ed Institutes?</p>

DATE SUBMITTED	INDIVIDUAL AND ORGANIZATION	COMMENTS
		WVTESOL members identified needs in this area.
31-Aug	NAME REMOVED ELL Teacher WVTESOL K-12 Board Member Berkeley Springs WV	<p>I appreciate that there is language that prioritizes college or job readiness. Every year these goals are part of my discussions with parents and students. Has it been considered that for ELL students who have not achieved ELP by the time they graduate, that there needs to be resources at the secondary level to help these students transition? West Virginia ELL students strive to go on to secondary education, but once there they do not always have support to help them continue their path to ELP.</p> <p>I am also concerned that the ACT and SAT exams do not allow portions of the test to be read; neither are they provided small group or lone testing rooms like students with IEPs. Some students have relied on the accommodations they have received on WESTEST and other assessments through their LEPs, but they are at a disadvantage when taking college exams. They do not have the accommodations they need.</p>

### **Attachment 3:**

Notice and Information Provided to the Public Regarding the Request

West Virginia has solicited continuous two-way communication regarding the development of our ESEA Flexibility Request via an online comment option provided to stakeholders statewide at <http://wvde.state.wv.us/policies/esea.html>. West Virginia posted an extended executive summary of our request via this site in early August 2012 and provided the complete draft of our ESEA Flexibility Request at four week-long intervals for public comment. Version 1.0 was provided on August 10, 2012, Version 2.0 on August 17, 2012, Version 3.0 on August 24, 2012, and Version 4.0 on August 31, 2012. The site featured an embedded commentary feature whereby any member of the public or visitor to the site could provide input regarding the state's plan to address each principle included in the Request

The online comment option was promoted among every media outlet in West Virginia, sent to every Parent Teacher Association president, to all of the state's 25,000 teachers and representatives of West Virginia's major teacher organizations, to all county superintendents, chief instructional leaders, curriculum directors, special education directors, county test coordinators, to every county board member in our 55 county school districts, to student organizations, to the state's minority communities, to West Virginia law makers and statewide business organizations. The link was also sent to representatives from the WV Advisory Council for the Education of Exceptional Children, the WV Autism Training Center, and the WV Developmental Disabilities Council. Feedback from this online option is included in Attachment 2. All public comments were reviewed and appropriate items were incorporated into the final Request prior to submission. Figures 1 and 2 in this section provide screen captures illustrating the public comment option.

The remaining Figures in this section (Figure 3 through Figure 6) provide screen captures from this site.

**Body of Email Inviting Comments:**

SUBJECT: Seeking Comments

Dear Education Colleague,

The West Virginia Board of Education is requesting public comment on a proposal seeking relief from certain provisions of the Elementary and Secondary Education Act (ESEA), also known as the No Child Left Behind Act.

The flexibility request requires the West Virginia Department of Education to develop a rigorous and comprehensive plan designed to improve educational outcomes for all students, close achievement gaps, increase equity and improve the quality of instruction. Work on the request is being guided by the Accountability and Accreditation Stakeholder Committee, which includes representatives of the West Virginia Board of Education, county school superintendents, school principals, parents, teachers, teacher organizations and others.

Educators, parents and community members are encouraged to review and provide comment on the proposed flexibility request. The request can be viewed on the West Virginia Department of Education website at <http://wvde.state.wv.us/policies/esea.html>

The proposal will remain on public comment until Aug. 31. If approved by the U.S. Department of Education, the waiver would free West Virginia public schools from certain federal rules and deadlines to focus on improving learning and instruction.

## ESEA Flexibility Request

### Summary

Under the leadership of the State Board of Education, and after consultation with teacher organizations, principals, superintendents, legislative leaders and the governor, the West Virginia Department of Education is proposing on behalf of our students, parents, leaders, schools and district staff and citizens of the state, a flexibility request of the Elementary and Secondary Education Act (ESEA), also known as the No Child Left Behind Act.

The flexibility request requires the West Virginia Department of Education to develop a rigorous and comprehensive plan designed to improve educational outcomes for all students, close achievement gaps, increase equity and improve the quality of instruction.

This page is a clearinghouse of documents related to this request and provides a place for the public to comment. As updates are made to the ESEA flexibility request documents, they will be posted to this page.

Please note this is an **incomplete working draft** and is to be considered a work in progress. There are sections yet to be written and/or fleshed out and many details to add in the days/weeks ahead. A revised second version of the document will be posted on Friday, August 17th; a third revised version will be posted on Friday, August 24th; and a fourth revised version will be posted on Wednesday, August 29th. A final and complete version will be posted on Thursday, August 30th. Please feel free to check back at these intervals to track the progress of this proposal.

## West Virginia Pursues a Waiver From No Child Left Behind Legislation

Posted: February 27, 2012

**CHARLESTON, W.VA.** – It is the right thing to do for students. That is how the West Virginia Department of Education (WVDE) is describing its decision to file for a Flexibility Waiver to No Child Left Behind (NCLB).

The WVDE announced on Monday that it will seek a NCLB Flexibility Waiver. The waiver will provide West Virginia with the flexibility needed as it continues to implement the Next Generation Content Standards and Objectives, expand the Teacher Evaluation Pilot and establish a high-quality accountability system that values individual student academic growth and supports schools.

"We spent a lot of time working with our state Board of Education, teachers, parents and other education experts to determine if filing for the Flexibility Waiver to NCLB was the right thing to do for students," said state Superintendent of Schools Joree Marple.

"Without a waiver, West Virginia would be forced to continue to identify schools with inappropriate measures and labels. What we value in our education system is personalized learning. In other words, learning that engages students whether it's the arts, world languages or career technical education, just to name a few. We also value student academic growth."

While the writers of the NCLB had the right goals in mind, the laws' one-size-fits-all approach has proven ineffective as a mechanism for accountability and, as a result, has discouraged state efforts to improve student achievement and make progress in education. For example, NCLB provides too simplistic a view of whether schools are meeting children's needs. The way that NCLB measures proficiency is flawed because it fails to account for meaningful progress. NCLB evaluates schools based on whether students meet proficiency without regard to growth or improvement from year to year.

West Virginia fully expects that by 2014 no school in the state will meet the stringent NCLB requirement and therefore be labeled a failing school ultimately at risk of losing much needed federal funding. In addition, the U.S. Department of Education has been very clear that any state that does not apply or receive a NCLB waiver will be held fully accountable under NCLB requirements.

"We are already beginning the work to convene educators and other stakeholders to develop the components of the NCLB Flexibility Waiver and we expect to file the waiver by Sept. 6, 2012," added Marple. "Filing for the waiver will allow our state to continue its work on crafting a thoughtful, fair and constructive state accountability system. In addition, we fully expect our state's waiver to align with our state's long-range education priorities and goals."

The new accountability system will

- focus on assessing both student learning and growth, as well as the learning strategies employed in schools;
- build capacity in schools and districts to provide evidence of improvement and engage parents and communities as key stakeholders in the improvement process;
- provide differentiated identification and support systems; and
- implement data-driven changes in order to improve the learning of all students.

In addition to filing for the Flexibility Request, the WVDE will request from the federal government that the current NCLB Adequate Yearly Progress (AYP) targets are frozen for one year so that additional schools are not identified as failing.

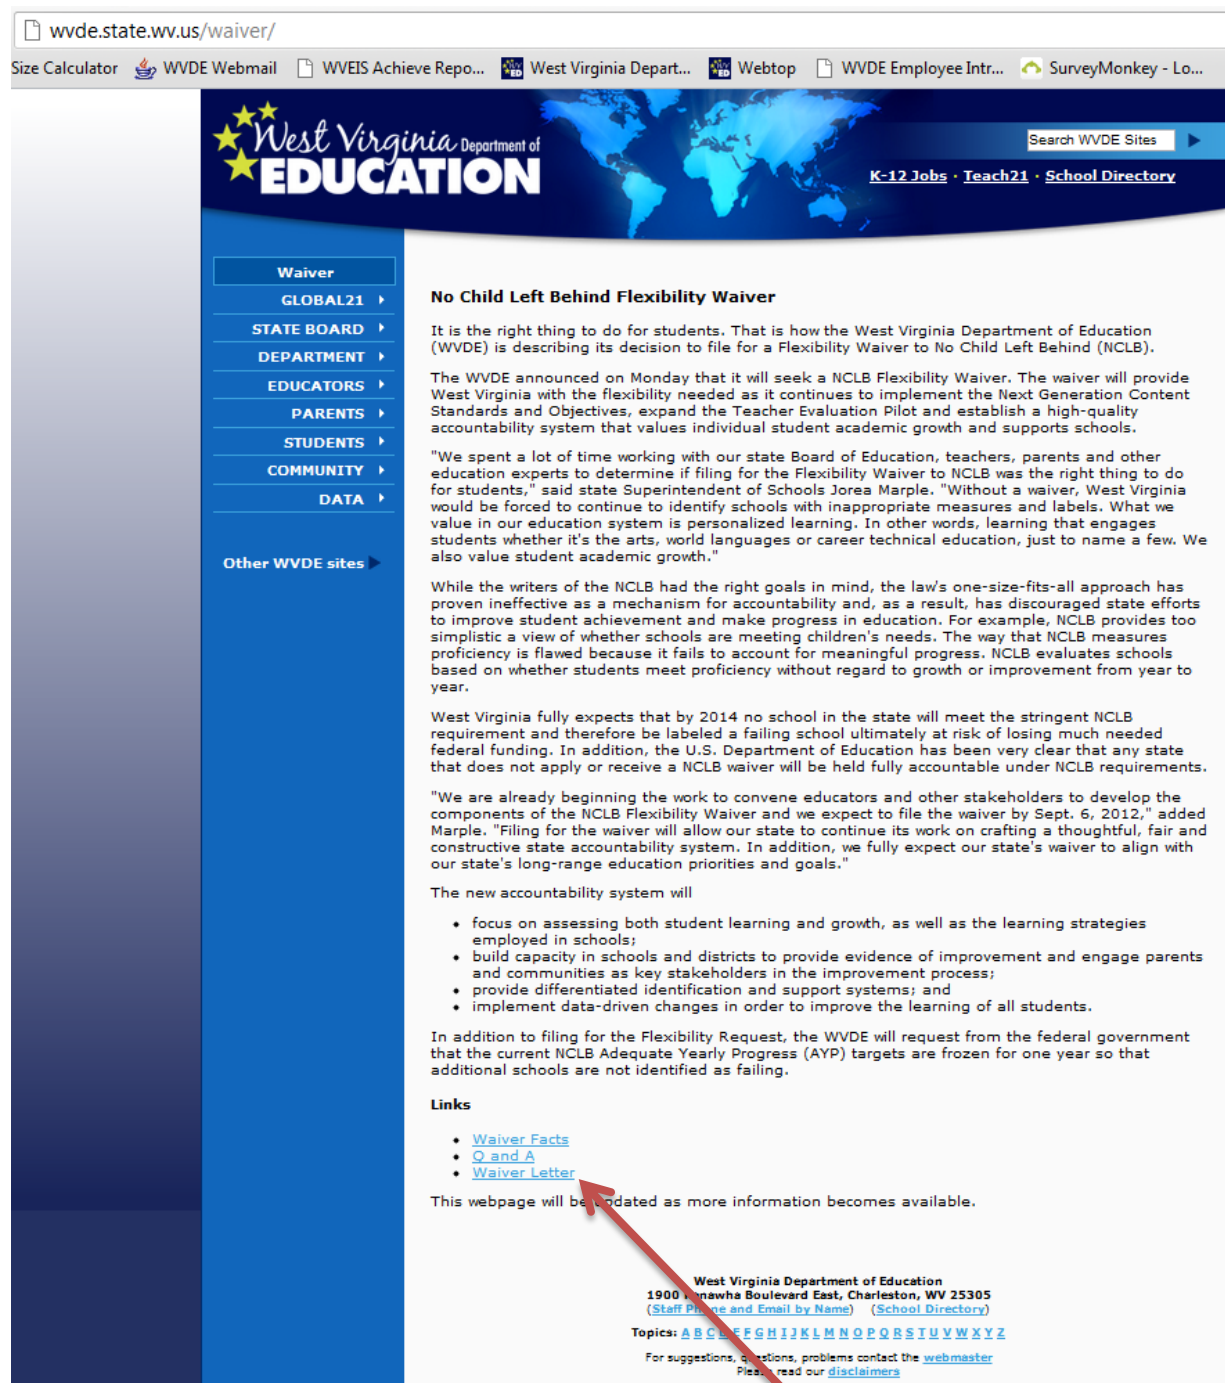

For more information, visit <http://wvde.state.wv.us/waiver/> or contact the WVDE Communication Office at 304-558-2699.

### No Child Left Behind Flexibility Waiver

**SUMMARY**

Under the leadership of the State Board of Education, and after consultation with teacher organizations, principals, superintendents, legislators and the governor, the West Virginia Department of Education is submitting on behalf of our students, parents, leaders, schools and district staff and citizens of the state, our intent to request a Waiver of No Child Left Behind (NCLB) statute by September 6, 2012. This flexibility waiver will allow the state to take two significant steps to support the State Board goals and strategic priorities:

1. Craft a thoughtful, fair and constructive state accountability system. The new accountability system will focus on assessing both student learning and growth, as well as the learning strategies employed in our schools. It will build capacity in our schools and districts to provide evidence of improvement and engage parents and communities as key stakeholders in the improvement process. It will provide differentiated identification and support systems, and implement data-driven changes in order to improve the learning of all students.
2. Freeze West Virginia's annual measurable objectives (AMOs) under No Child Left Behind for one year. West Virginia will use the same AMOs for 2011-12 Adequate Yearly Progress (AYP) determinations as it used in the 2010-2011 school year. This will reduce the number of new schools that will be labeled inappropriately and forced to undertake improvement plans that are not necessary, warranted, or appropriate.

**WAIVER EXPECTATION**

The West Virginia Board of Education has made a deep commitment to support the learning of each child in our state. This commitment ensures that we create a high quality public education system that develops students who are healthy, responsible, self-directed and who have the knowledge and Global21 skills necessary for living satisfying and productive lives. In order to attain these goals, the Board is committed to several core actions that we will include in our Waiver request.

- First, we must continue to implement the Next Generation curriculum (Common Core State Standards) and assessment system that prepares students for college and careers, sets new targets for improving achievement among all students and focuses on helping students who need the most support.
- Second, the WVDE has worked with the Teacher Evaluation Task Force to design a revised educator evaluation system that is being piloted in 25 schools across the state. The revised system is based on multiple measures including classroom observation and student learning. It not only evaluates the performance of teachers but also provides meaningful results to inform data-driven professional development. Governor Earl Ray Tomblin recently introduced legislation which would expand the pilot in 2012-2013 and be fully implemented by 2013-2014. The Teacher Evaluation legislation is currently progressing through the legislative process. If enacted, it will strengthen West Virginia's efforts to secure the NCLB waiver.
- Finally, West Virginia is now approaching a critical juncture and must work to move beyond narrow criteria that define student and school success as it revamps its accountability system. Student academic growth is at the center of the updated accountability structure. In other words, how much has an individual student improved from the beginning of the school year to the end of the school year along with multiple measures that will provide a more comprehensive look at what school success really means.

**WITHOUT A WAIVER**

Without a Waiver, West Virginia will be forced to continue to identify schools with inappropriate measures and will not be allowed to focus on personalized learning for our students. Without a waiver, the state fully expects that by 2014 no schools will meet the stringent NCLB requirement and therefore be labeled a failing school ultimately at risk of losing much needed federal funding. In addition, the U.S. Department of Education has been very clear that any state that does not apply or receive a NCLB waiver will be held fully accountable under NCLB requirements. Applying for a waiver is the right thing to do for our students.

**NEXT STEPS**

We are already beginning the work to convene educators and other stakeholders to develop the components of the Flexibility Waiver. We will work aggressively to encourage full participation and meaningful communication as we develop a new accountability and improvement system.

**No Child Left Behind Flexibility Waiver**

**QUESTIONS AND ANSWERS**

**Q: Why are you proposing an accountability system in addition to the Waiver?**

A: The Waiver application requires each state to describe its plans for a robust and meaningful accountability system. We believe that it is important to be clear about the role an accountability system plays. The goal is not about labeling a school as good or bad. Its value is in helping all schools, wherever they are, to improve. The system should be about generating valuable information that can be used to make improvements. Similarly, we never label schools as "failing," as it's a stigmatizing moniker that's insufficient in providing a balanced picture about a school's performance.

**Q: Why not just go for the waiver request now and improve the accountability system later?**

A: We need an integrated and meaningful federal and state accountability system that complement one another. This is our state's opportunity to take our time, involve a wide variety of people and get it right as we simultaneously construct a new way of teaching, assessing, and honoring students' unique talents, interests, and abilities.

**Q: Why hold the proficiency targets flat for a year? How does that help?**

A: It does two things: it will reduce the number of new schools that will be labeled "not making progress." And, because of that, fewer schools will be forced to undertake improvement plans that are not necessarily warranted, or appropriate.

**Q: What's unfair and unrealistic about the No Child Left Behind system?**

A: The basic concept of NCLB is good: all students should make progress, not just some. It is imperative that schools find a way to support all students in learning the skills and knowledge they need to be successful in college, careers, and civic life by delivering a broad yet personalized curriculum. Unfortunately, the accountability measures in No Child Left Behind have forced teachers and schools to focus on "teaching to the test," at the expense of other content areas and skill sets. In addition, the system places far too much emphasis on a single statewide summative assessment. While standardized testing should play a role in measuring progress by students, teachers, schools and states, it is only one measure. Furthermore, No Child Left Behind measures this year's students in a grade against last year's students in the same grade. But they are not the same kids. There is national consensus now that what is needed is to focus on student growth by examining a student's prior performance to determine whether they are improving enough to be considered ready for college and careers. That is, a student might be two years below reading level at the beginning of third grade, and only one year behind by the time he or she reaches fourth grade. While that student is still behind, he or she made two years' progress in one year. That should count in favor of the student's teacher and school, not against. It is a more useful assessment of how the school is doing and where improvements can be made.

**Q: So what would be in West Virginia's new accountability and improvement system?**

A: We are already making plans to convene educators and others to help develop the new system. A few elements seem likely:

- Student achievement will be measured by a growth model, not by comparing this year's students with last year's students.
- There will still be an expectation that schools must work to close gaps among groups of students, especially those most at risk, including low-income students, students with disabilities, and English Language Learners.
- High performing schools will be recognized, and lower-performing schools — by the new measures — will be identified, but not stigmatized, and plans will be put in place to help them improve. This is about helping to improve school success and student learning; we can only do that by working together. "Blame and shame" is not conducive to positive collaboration.
- School districts will have more flexibility in developing improvement plans, rather than having set requirements that make sense in some places and not in others.

**Q: So, are West Virginia schools really doing OK and No Child Left Behind just had it all wrong?**

A: No. Like the rest of the country, far too few of West Virginia's students are proficient in reading, math, writing and science.

**Q: How can I stay informed about, and even get involved in, developing a new accountability and improvement system?**

A: You can learn more about the initiatives by reading the West Virginia Board of Education's Strategic Plan <http://wwde.state.wv.us/boardgoals/> and by visiting <http://wwde.state.wv.us/waiver/>.

## Attachment 4

Evidence that the State has formally adopted college- and career-ready content standards consistent with the State's standards adoption process

1. Board Minutes from the May 12, 2010 meeting of the WVBE unanimously approving adoption of the Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and the Common Core State Standards for Mathematics.
2. Board Minutes from the January 12, 2011 meeting of the WVBE unanimously approving a schedule of adoption for the Common Core State Standards
3. Informational Update provided to the WVBE on January 2011 titled, "*Update on Common Core State Standards Implementation.*" Referred to as "Attachment L" in January 12, 2011 meeting minutes.

**MINUTES**  
**WEST VIRGINIA BOARD OF EDUCATION**  
**Board Conference Room**  
**Capitol Building 6, Room 353**  
**1900 Kanawha Boulevard, East**  
**Charleston, West Virginia**  
**May 12, 2010**

**I. Call to Order**

President Priscilla M. Haden called the meeting of the West Virginia Board of Education (WVBE) to order at 12:30 p.m. on May 12, 2010, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Delores W. Cook, Michael I. Green, Burma Hatfield, Lowell E. Johnson, L. Wade Linger Jr., and Gayle C. Manchin, and ex officio Steven L. Paine, State Superintendent of Schools. Members absent were ex officios Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education.

**II. Approval of Agenda**

Upon motion by Ms. Phillips, seconded by Ms. Hatfield, the Board unanimously approved the agenda.

**III. Initial Individual School Education Performance Audit Report  
for Brooke High School, Brooke County**

Dr. Kenna R. Seal, Director, Office of Education Performance Audits (OEPA), reported that an announced on-site review (five days in advance) was conducted at Brooke High School on March 24, 2010. Ms. Mary K. Harvey DeGarmo, Superintendent, Brooke County Schools, addressed the Board regarding the audit report.

Upon the recommendation of Dr. Seal and a motion by Ms. Phillips, seconded by Mrs. Cook, the Board unanimously directed that Brooke High School revise its Five-Year Strategic Plan within 30 days and correct the findings noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment A.)

**IV. Initial Individual School Education Performance Audit Report for  
Oak Glen Middle School, Hancock County**

Dr. Seal reported that an announced on-site review (five days in advance) was conducted at Oak Glen Middle School on March 25, 2010.

Upon the recommendation of Dr. Seal and a motion by Dr. Johnson, seconded by Mr. Dunlevy, the Board unanimously directed that Oak Glen High School revise its Five-Year Strategic Plan within 30 days and correct the finding noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment B.)

**V. Initial Education Performance Audit Reports for  
Roane County School District and Geary Elementary/Middle School,  
Reedy Elementary School, Spencer Elementary School,  
Walton Elementary/Middle School, Spencer Middle School  
and Roane County High School**

Dr. Seal reported that announced on-site reviews (five days in advance) were conducted at the Roane County School District, Geary Elementary/Middle School, Reedy Elementary School, Spencer Elementary School, Walton Elementary/Middle School, Spencer Middle School and Roane County High School on March 31 and April 1, 2010. The OEPA conducted the reviews which concentrated on student, school and school system performance and progress. The reviews also consisted of resource evaluation. Dr. Johnson requested an update regarding Geary Elementary/Middle School be provided at the June meeting, whereupon, Mr. Chuck Heinlein, Executive Director, WVDE Office of Organizational Effectiveness and Leadership, addressed the Board and indicated that the WVDE will be visiting Roane County's three lowest performing schools in the fall. Dr. Johnson requested that, at the June meeting, school counselor responsibilities be revisited.

Upon the recommendation of Dr. Seal and a motion by Mr. Dunlevy, seconded by Ms. Phillips, the Board, with eight members voting yes, and one member, Dr. Johnson, voting no, directed that Roane County School District and its schools revise the Five-Year Strategic Plans within 30 days and correct the findings noted in the reports by the next accreditation cycle. (Copy appended to Official Minutes, Attachment C.)

**VI. West Virginia Secondary School Activities Commission  
Series 2, Athletics, Provisions Governing Eligibility, and  
Series 3, Provisions Governing Contests**

Mr. Gary Ray, Executive Director, West Virginia Secondary School Activities Commission (WVSSAC), presented WVSSAC Series 2 and 3 for the Board's consideration. Proposed changes include adding clarification to existing rules, making rule statements consistent with other sports and clarifying the length of quarters for middle and 9<sup>th</sup> grade teams.

Upon motion by Mr. Dunlevy, seconded by Ms. Phillips, the Board unanimously approved WVSSAC Series 2, at sections 7.2.1 and 7.2.5, and Series 3, at sections 19.1, 21.1, 23.2.1, 23.9.2, 23.9.9 and 26.1 for placement on public comment for 30 days. (Copy appended to Official Minutes, Attachment D-1 and D-2.)

**VII. Break**

President Haden called for a break at 1:50 p.m.

**VIII. Call to Order**

President Haden called the meeting back to order at 2:05 p.m.

**IX. Common Core Standards K-12**

Ms. Carla Williamson, Executive Director, WVDE Office of Instruction, presented Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and Common Core State Standards for Mathematics for alignment with West Virginia's 21<sup>st</sup> Century CSOs and resources with implementation to occur Fall 2011 for the Board's consideration.

Upon motion by Dr. Johnson, seconded by Mrs. Manchin, the Board unanimously approved the Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and Common Core State Standards for Mathematics for alignment with West Virginia's 21<sup>st</sup> Century CSOs and resources with implementation Fall 2011. (Copy appended to Official Minutes, Attachment E-1 and E-2.)

**X. Policy 2422.7, Standards for Basic and Specialized Health Care Procedures**

Ms. Rebecca King, Coordinator, WVDE Office of Healthy Schools, presented Policy 2422.7 for the Board's consideration. The Basic and Specialized Health Care Procedure Policy and the accompanying Procedures Manual for West Virginia Public Schools outline the safe standard of care for performing and delegating health care procedures during curricular and co-curricular activities. W. Va. Code §18-5-22 requires the regular convening of the Council of School Nurses for the purpose of reviewing and recommending additions and revisions to the Procedure Policy and Manual.

Upon motion by Mrs. Cook, seconded by Ms. Phillips, the Board unanimously approved Policy 2422.7 for placement on public comment for 30 days. (Copy appended to Official Minutes, Attachment F.)

**XI. Policy 2520.19, 21<sup>st</sup> Century Advisor/Advisee 5-12  
Content Standards and Objective for West Virginia Schools**

Mr. Heinlein presented Policy 2520.19 for the Board's consideration. Policy 2520.19 was revised to include standards, objectives and performance indicators for grades 5-8 which are aligned with national career transitions and school improvement initiatives.

Upon motion by Mr. Dunlevy, seconded by Ms. Phillips, the Board unanimously approved Policy 2520.19. (Copy appended to Official Minutes, Attachment G.)

**XII. Policy 3233, Establishment and Operation of Regional Education Service Agencies**

Ms. Betty Jo Jordan, Executive Assistant to the State Superintendent, presented Policy 3233 for the Board's consideration. Policy 3233 was revised to implement the recommendations of the RESA stakeholders group and to remove attachments from the policy. The previous policy attachments will become part of a guidance document.

Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously approved Policy 3233, as amended, effective July 1, 2010. (Copy appended to Official Minutes, Attachment H-1 and H-2.)

### **XIII. Policy 5800, Standards of Professional Practice for West Virginia Superintendents, Principals and Teacher Leaders**

Ms. Lydia McCue, Special Assistant, State Superintendent's Office, presented Policy 5800 for the Board's consideration. The West Virginia Collaborative for Leadership Development and Support worked for 18 months to develop leadership standards and a Master Plan for leadership improvement. The adoption of these new standards is the foundational step in the implementation of the collaborative work. Dr. Johnson requested that, at a future revision, the policy be more specific with regard to the school principal and ancillary services. Ms. McCue responded that a policy guidance document, to be distributed with Policy 5800, addresses Dr. Johnson's concern.

Upon motion by Dr. Johnson, seconded by Ms. Hatfield, the Board unanimously approved Policy 5800, as amended, effective July 1, 2010. (Copy appended to Official Minutes, Attachment I.)

### **XIV. Approval of Teacher Preparation Program at Wheeling Jesuit University**

Ms. Lori Wiggins, Executive Director, WVDE Office of Professional Preparation, presented a teacher preparation program at Wheeling Jesuit University, approved by the Educator Preparation Program Review Board (EPPRB), for the Board's consideration.

Upon motion by Mrs. Manchin, seconded by Mr. Dunlevy, the Board unanimously approved the Educational Leadership program leading to an initial administrative licenses endorsed for principal and supervisor of instruction, PreK-Adult and superintendent, submitted by WJU with the understanding that once the leadership standards are adopted into policy and a timeline by which administrator preparation programs are to realign to the new standards that WJU will be required to align its program to the established standards. (Copy appended to Official Minutes, Attachment J.)

### **XV. Elementary Education Program at West Virginia University**

Ms. Wiggins presented, for the Board's information, an educator preparation program at West Virginia University (WVU) that would lead to licensure for a Professional Teaching Certificate endorsed for Elementary Education. The EPPRB is waiting for the authorization from the WVU Board of Governors which is scheduled to meet on June 4, 2010. Once the Board of Governors authorizes the

program to be offered at WVU, the EPPRB will make a recommendation to the WVBE at the June meeting.

**XVI. Future Meetings**

The next regular meeting of the Board will be held May 13, 2010, in Charleston, West Virginia.

**XVII. Adjournment**

President Haden declared the meeting adjourned at 2:42 p.m.

**Minutes approved by the Board on June 9, 2010.**

**MINUTES**  
**WEST VIRGINIA BOARD OF EDUCATION**  
**Board Conference Room**  
**Capitol Building 6, Room 353**  
**1900 Kanawha Boulevard, East**  
**Charleston, West Virginia**  
**January 12, 2011**

**I. Call to Order**

President Priscilla M. Haden called the meeting of the West Virginia Board of Education (WVBE) to order at 12:30 p.m. on January 12, 2011, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Michael I. Green, Lowell E. Johnson, L. Wade Linger Jr., Gayle C. Manchin, William M. White and ex officios John T. Mattern, State Superintendent of Schools, and Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission. Student representative in attendance was Lexi Miller of Vienna, West Virginia, who attends Parkersburg High School (Wood County). Members absent were Burma Hatfield and ex officio James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education.

**II. Recognitions**

President Haden presented the 2010 *Paul J. Morris* Character Educator of the Year Award to Ms. Deb Austin Brown, communications center teacher at Alban Elementary in Kanawha County.

Ms. Liza Cordeiro, Executive Director, WVDE Communications Office, presented *Global21 Moments*, spotlighting Gilmer, Kanawha, and Logan County Schools for the Board's information.

**III. Delegations**

Mr. Dan Matheny (distributed information), Ms. Brenda Troitino and Mr. Thomas Brown, citizens of Fayette County, addressed the Board regarding the proposed closure of Mount Hope High School. Mr. Michael Martin, Mayor (distributed information), City of Mt. Hope, and Reverend Matthew Watts (distributed information), President and CEO, HOPE Community Development Corporation, addressed the Board regarding potential uses for the Mount Hope High School building/property. (Copy appended to Official Minutes, Attachment Q.)

#### **IV. Approval of Agenda**

Upon motion by Dr. White, seconded by Dr. Johnson, the Board unanimously approved the agenda.

#### **V. Middle College Dropout Prevention Program**

Mr. George S. Krelis (distributed information), Superintendent, Dr. Dianna Vargo, Assistant Superintendent, Ohio County Schools, and Mr. Alfred N. Renzella, Superintendent, Marshall County Schools, provided information to the Board regarding a middle college initiative that serves as a dropout prevention program. It was requested that the Board make this a legislative initiative and that it be used as a model for statewide use. Superintendent Mattern reported that legislation is being written to support the Governor's education initiative to specifically address dropout prevention. Dr. Johnson questioned the use of community colleges as an avenue to provide alternative programs; RESAs were also mentioned as possible providers. By consensus, the Board endorsed the middle college dropout prevention program. (Copy appended to Official Minutes, Attachment R.)

#### **VI. Initial Individual School Education Performance Audit Report for Gilmore Elementary School, Jackson County**

Dr. Kenna R. Seal, Director, Office of Education Performance Audits (OEPA), reported that an announced on-site review (five days in advance) was conducted at Gilmore Elementary School November 4, 2010. Mr. Blaine C. Hess, Superintendent of Jackson County Schools, addressed the Board regarding the audit findings.

Upon the recommendation of Dr. Seal and a motion by Mr. Dunlevy, seconded by Ms. Phillips, the Board unanimously directed that Gilmore Elementary School revise its Five-Year Strategic Plan within 30 days and correct the findings noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment A.)

#### **VII. Break**

President Haden called for a break at 2:05 p.m. Chancellor Noland joined the meeting.

#### **VIII. Call to Order**

President Haden called the meeting back to order at 2:24 p.m.

#### **IX. Initial Individual School Education Performance Audit Reports for Flinn Elementary School and Watts Elementary School, Kanawha County**

Dr. Seal reported that announced on-site reviews (five days in advance) were conducted at Flinn Elementary and Watts Elementary Schools November 8-9, 2010. Ms. Jane Roberts, Assistant Superintendent, Kanawha County Schools, Ms. Evelyn Haynes, Principal, Watts

Elementary, and Ms Beth Ann Scott, Principal, Flinn Elementary, addressed the Board regarding the audit reports. Mr. Linger joined the meeting.

Upon the recommendation of Dr. Seal and a motion by Dr. Johnson, seconded by Mr. Green, the Board unanimously approved Flinn Elementary School's report and directed that Watts Elementary School revise its Five-Year Strategic Plan within 30 days and correct the findings noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment B.)

**X. Initial Individual School Education Performance Audit Report  
for McNinch Primary School, Marshall County**

Dr. Seal reported that an announced on-site review (five days in advance) was conducted at McNinch Primary School November 18, 2010.

Upon the recommendation of Dr. Seal and a motion by Mr. Green, seconded by Ms. Phillips, the Board unanimously directed that McNinch Primary School revise its Five-Year Strategic Plan within 30 days and correct findings noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment C.)

**XI. Initial Individual School Education Performance Audit Report  
for Sistersville Elementary School, Tyler County**

Dr. Seal reported that an announced on-site review (five days in advance) was conducted at Sistersville Elementary School November 17, 2010.

Upon the recommendation of Dr. Seal and a motion by Mr. Dunlevy, seconded by Mrs. Manchin, the Board unanimously directed that Sistersville Elementary School revise its Five-Year Strategic Plan within 30 days and correct findings noted in the report by the next accreditation cycle. (Copy appended to Official Minutes, Attachment D.)

**XII. Capacity Building for Low Performing Schools**

Mr. Chuck Heinlein, Executive Director, WVDE Office of School Improvement, provided a brief summary of support services provided to Keyser High School (Mineral County), the Mason County School District, and the West Virginia Schools for the Deaf and the Blind.

**XIII. Consent Agenda**

President Haden requested that *Consent Agenda* items *B.1. Amendment and Closure - Fayette County Comprehensive Educational Facilities Plan (CEFP)* and *B.4. Waivers of West Virginia Board of Education (WVBE) Policies and Regulations, Superintendent Interpretations and State Statutes and Legislative Rules*, be removed from the *Consent Agenda* for discussion and action to immediately follow the approval of the *Consent Agenda*. Upon motion by Dr. Johnson, seconded by Mrs. Manchin, the Board unanimously approved the *Consent Agenda* as amended. (Copies appended to Official Minutes, Attachments E, G and H.)

- Meeting minutes of December 8, 2010 (Attachment E)
- Amendment to the Hardy County Ten Year (2010-2020) Comprehensive Educational Facilities Plan to include the installation of 1,000 L. F. of 6" water line to tie into the East Hardy Early/Middle School and East Hardy High School. It also includes a provision for the installation of a water service pipe riser and a sprinkler system at East Hardy High School. (Attachment G)
- Closure of Harts Intermediate and Harts Primary Schools, effective at the end of the 2010-2011 school year, as approved in the Lincoln County Ten Year (2010-2020) Comprehensive Educational Facilities Plan (Attachment H).

**XIV. Amendment and Closure - Fayette County  
Comprehensive Educational Facilities Plan (CEFP)**

President Haden requested Dr. Dwight Dials, Superintendent of Fayette County Schools, and Mr. Leon Ivey, member of the Fayette County Board of Education, address the Board regarding the Fayette County Board of Education's request to amend its Ten Year (2010-2020) Comprehensive Educational Facility Plan to include the closure of Mount Hope High School and the reassignment of the 5th grade students from Mount Hope High School to Mount Hope Elementary School and the 6th-8th grade students from Mount Hope High School to Collins Middle School. Dr. Jorea Marple, Deputy State Superintendent of Schools, addressed the Board regarding a plan of action for the repurposing of Mount Hope High School should it be closed. Discussion ensued regarding the proposed closure, reassignments and repurposing of Mount Hope High School should it be closed. Concern was issued that a comprehensive plan of action be in place prior to the closure of a facility in order that an orderly transition occur. Superintendent Dials indicated that immediate action would be taken with regard to a comprehensive plan of action for the repurposing of Mount Hope High School should the facility be closed.

Following discussion, Mr. Dunlevy called for the question. Upon motion by Dr. Johnson, seconded by Ms. Phillips and unanimously carried, the Board approved the closure of Mount Hope High School and the reassignment of the 5th grade students from Mount Hope High School to Mount Hope Elementary School and the 6th-8th grade students from Mount Hope High School to Collins Middle School. (Copy appended to Official Minutes, Attachment F.)

**XV. Waivers of West Virginia Board of Education (WVBE)  
Policies and Regulations, Superintendent Interpretations  
and State Statutes and Legislative Rules**

President Haden requested that Ms. Betty Jo Jordan, Executive Assistant to the State Superintendent, provide clarification regarding the countywide waiver request from Marshall County Schools.

Upon motion by Ms. Phillips, seconded by Dr. Johnson and unanimously carried, the Board approved the two requested waivers of WVBE policy. (Copy appended to Official Minutes, Attachment I.)

**XVI. Break**

President Haden called for a break at 3:28 p.m.

**XVII. Call to Order**

President Haden called the meeting back to order at 3:41 p.m. and requested that: 1) Dr. Marple provide (and she complied) information regarding the Globaloria presentation (due to weather issues, Governor Caperton was unable to attend the meeting); and 2) *New Business* item A. *West Virginia School Service Personnel Employee of the Year Award Program* be taken up prior to *Board Reports*.

**XVIII. West Virginia Board of Education  
School Service Personnel Employee of the Year Award Program**

Mr. Keith Burdette (distributed information), Executive Director, WVDE Office of Human Resources, and Ms. Jackee Long, President, West Virginia School Service Personnel Association (AFT-WV), presented a proposed West Virginia Board of Education School Service Personnel Employee of the Year Award Program for the Board's consideration. The WVDE, the West Virginia School Service Personnel Association, and West Virginia Education Association, sought the endorsement of the WVBE to implement a School Service Personnel Employee of the Year Award Program. The program will recognize the contributions of education support personnel to their schools and communities and honor those who have demonstrated exceptional skill and dedication in the performance of their jobs. Finalists for the award would be selected from county nominees and the winner would be announced at a future meeting of the WVBE.

Upon motion by Mrs. Manchin, seconded by Dr. White, the Board unanimously endorsed the West Virginia Board of Education School Service Personnel Employee of the Year Award Program. (Copy appended to Official Minutes, Attachment J and addendum.)

**XIX. Board Reports**

**Legislative Committee (*Committee of the Whole*).** President Haden provided information regarding the committee meeting that took place on December 22 and reported that, as a result of the meeting, a letter has been issued to Governor Tomblin for his consideration in advance of the legislative session. The committee received information regarding the budget and issued support for the technology plan, raising the funding cap for RESAS, and a pay raise for teachers. The Board's Professional Development Committee will meet January 13 to receive information and discuss essential planning time for 21<sup>st</sup> century instruction and learning. It was requested that a legislative update be provided to the Board at its February meeting.

**Common Ground: Education and the Military Committee.** President Haden provided a brief overview of the January meeting; agenda topics included legislative action on a bill for the Interstate Compact for Children of Military Families and expression of interest from the Governor's Office regarding the Interstate Compact, development of Memorandum of Understanding with WVDE and branches of the military, creation of a database for schools, and communication plan. President Haden stated that information regarding Project PASS will be presented to the Board at a future meeting. President Haden requested that Dr. Amelia Courts (distributed information), Assistant State Superintendent, Division of Educator Quality and Student Support, provide an update regarding educator evaluation. (Copy appended to Official Minutes, Attachment S.)

**Local School Improvement Council (LSIC) Committee.** Mrs. Manchin provided a brief overview of the January 11 meeting; agenda topics included school responses to a proposed LSIC PowerPoint for the LSIC webpage, update on resource/module development, report on collection of LSIC chair information and next steps.

**Secondary School Redesign Committee.** Ms. Phillips provided a brief overview of the January 12 meeting; agenda topics included Review of Proposed Process and Timeline for Implementation of the Secondary School Redesign Model and Presentation to WVBE on February 9, 2011.

**Board Member Reports.** President Haden attended a School Building Authority meeting, AP honors event, RESA 5 meeting. Chancellor Noland issued his thanks to the Department's technology staff for assistance provided to his office over the past couple of months.

## **XX. Designation of Recommended Applicants as Education Innovation Zones per Policy 3236**

Dr. Johnson (distributed information) reported that the committee reviewed 26 applications and presented the committee's recommendations (13 applications) for the Board's consideration for Innovation Zone status. Mr. Linger reported that the committee approved Braxton County's implementation plan with funding provided from the previous year. Dr. Johnson stated that it is the consensus of the committee that funding is needed for implementation.

Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously approved the committee's recommendations and granted Innovation Zone status to the applicants found in the attachment. (Copy appended to Official Minutes, Attachment K.)

## **XXI. Recess**

President Haden recessed the meeting at 4:33 p.m. and announced that the meeting would reconvene on January 13, 2011, at 9:00 a.m. in the same location.

**XXII.****Reconvene**

President Haden reconvened the meeting of January 12, 2011, at 9:00 a.m. on January 13, 2011, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Michael I. Green, Lowell E. Johnson, L. Wade Linger Jr., Gayle C. Manchin, William M. White and ex officio John T. Mattern, State Superintendent of Schools. Student representative in attendance was Lexi Miller of Vienna, West Virginia, who attends Parkersburg High School (Wood County). Members absent were Burma Hatfield ex officios Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education.

**XXIII.**

**Approval of Lease/Purchase Agreement for  
Replacement of HVAC Units on behalf of Fayette County Schools**

Ms. Heather L. Deskins, general counsel for the WVDE and WVBE, presented a lease/purchase agreement for replacement of HVAC units on behalf of Fayette County Schools for the Board's consideration. This lease/purchase agreement will finance new 35 ton and 60 ton replacement HVAC units for Fayetteville Institute of Technology due to failures of the existing 37-year old units. Terms are \$490,726 payable over ten years at 4.45% interest with a monthly payment of \$5,073.99.

Upon motion by Ms. Phillips, seconded by Mr. Dunlevy, the Board, with seven members voting yes and one member, Dr. White, voting no, approved the lease/purchase agreement for replacement of HVAC units on behalf of Fayette County Schools with the stated terms of repayment. (Copy of signed resolution appended to Official Minutes, Attachment T.)

**XXIV. Adoption of Common Core State Standards Implementation Schedule**

Mr. Robert E. Hull, Assistant State Superintendent, WVDE Division of Curriculum and Instructional Services, and Ms. Carla Williamson, Special Assignment, WVDE Office of Instruction, presented the implementation schedule for the Common Core State Standards for the Board's consideration. In May 2010 the Board unanimously approved the Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and the Common Core State Standards for Mathematics for alignment with West Virginia's 21st Century Content Standards and Objectives and resources with implementation Fall 2011. In preparation for the 2014-2015 administration of the new assessment developed by the SMARTER Balanced Assessment Consortium, of which West Virginia is a governing state, we are recommending the following schedule for implementation of West Virginia Content Standards and Objectives fully aligned with the Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and the Common Core State Standards for Mathematics: Kindergarten, 2011-2012; First Grade, 2012-2013; Second Grade, 2013-2014; and Third through Twelfth Grades, 2014-2015.

Upon motion by Dr. Johnson, seconded by Dr. White, the Board unanimously approved the implementation schedule for the Common Core State Standards. (Copy appended to Official Minutes, Attachment L.)

**XXV. Approval of 2011-2012 WVBE Statewide Professional Development Goals**

Dr. Johnson presented the Board's 2011-2012 statewide professional development goals for the Board's consideration.

Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously approved the 2011-2012 statewide professional development goals. (Copy appended to Official Minutes, Attachment M.)

**XXVI. WVBE Strategic Plan Data Report**

Dr. Marple presented an update regarding the WVBE's strategic plan data report. (Copy appended to Official Minutes, Attachment Mc and addendum.)

**XXVII. WVBE Personnel Matters**

President Haden, in accordance with W. Va. Code '6-9A-4(b)(2)(A), requested a motion to move into Executive Session to consider the selection of a State Superintendent of Schools. Upon motion by Mr. Green, seconded by Dr. White and unanimously carried, the Board entered into Executive Session at 9:31 a.m.

**XXVIII. Return from Executive Session**

The Board returned from Executive Session at 10:22 a.m. at which time President Haden announced that no action was taken and no decisions were made. Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously approved the Board's personnel items. (Copy appended to Official Minutes, Attachment N.)

**XXIX. Recess**

President Haden recessed the meeting at 10:25 a.m. and announced that the meeting would reconvene, upon conclusion of the Teacher of the Year Press event, on January 13, 2011, in the same location.

**XXX. Reconvene**

President Haden reconvened the meeting of January 12, 2011, at 11:41 a.m. on January 13, 2011, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Michael I. Green, Lowell E. Johnson, L. Wade Linger

Jr., Gayle C. Manchin, William M. White and ex officio John T. Mattern, State Superintendent of Schools. Student representative in attendance was Lexi Miller of Vienna, West Virginia, who attends Parkersburg High School (Wood County). Members absent were Burma Hatfield ex officios Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education.

### **XXXI.**

#### **State Superintendent's Report**

Superintendent Mattern (distributed information) presented Department personnel items for the Board's information and reported that he has met with Governor Earl Ray Tomblin, President Haden, Dr. Marple, former Superintendent Steven L. Paine, and Chancellor Noland, attended various Board committee meetings, met with the RESA executive committee, met with Mingo County and the School Building Authority, and provided an overview of the 2011 Quality Counts State of the States report. (Copy appended to Official Minutes, Attachment O and addenda.)

**Plan of Action for Technology.** Ms. Brenda Williams (distributed information), Executive Director, WVDE Office of Instructional Technology, presented a plan of action for West Virginia's alignment to the National Education Technology Plan. Ms. Miller provided her perspective regarding the use of technology at Parkersburg High School. (Copy appended to Official Minutes, Attachment U.)

### **XXXII.**

#### **Board Items for Future Consideration**

President Haden requested that items, inclusive of any requested during the meeting, that members wish considered for placement on a future agenda are to be provided to her as soon as possible. (Copy appended to Official Minutes, Attachment P.)

### **XXXIII.**

#### **Selection of State Superintendent of Schools Executive Session**

President Haden, in accordance with W. Va. Code '6-9A-4(b)(2)(A), requested a motion to move into Executive Session to consider the selection of a State Superintendent of Schools. Dr. White moved, and Mr. Green seconded, the motion. Prior to the call for the question Mr. Linger requested, and Ms. Cordeiro provided a response, regarding the process used to post the position announcement. Mr. Linger questioned whether the Board should repost the position. Discussion ensued regarding reposting the position. Following discussion, Dr. White and Mr. Green withdrew their motion for an executive session. Mr. Linger then moved that the Board extend the search deadline and hire a firm to assist the Board in conducting a nationwide search. Mr. Green seconded the motion. Discussion ensued regarding the motion. Upon the call for the question the motion failed with four members (Mr. Dunlevy, President Haden, Dr. Johnson, and Ms. Phillips) voting no, and four members (Mr. Green, Mr. Linger, Mrs. Manchin and Dr. White) voting yes.

President Haden, in accordance with W. Va. Code ' 6-9A-4(b)(2)(A), requested a motion to move into Executive Session to consider the selection of a State Superintendent of Schools. Upon motion by Dr. Johnson, seconded by Ms. Phillips and unanimously carried, the Board entered into Executive Session at 12:55 p.m.

**XXXIV. Return from Executive Session**

The Board returned from Executive Session at 1:25 p.m. at which time President Haden announced that no action was taken and no decisions were made. President Haden announced that Ms. Carolyn Long, Dr. Mark Manchin and Dr. Joree Marple would be offered an interview for the position of State Superintendent of Schools.

**XXXV. Future Meetings**

The next regular meeting of the Board will be held February 9, 2011, in Charleston, West Virginia. The meeting will continue on February 10, 2011, if the agenda is not completed on February 9, 2011.

**XXXVI. Adjournment**

Upon motion by Dr. Johnson, seconded by Mr. Dunlevy and unanimously carried, the Board adjourned at 1:27 p.m.

**Minutes approved by the Board on February 9, 2011.**

# **Update on Common Core State Standards Implementation**

## **Informational update to WVBOE – January 2011**

### **1. Board adopted Common Core State Standards in May 2010**

Upon motion by Dr. Johnson, seconded by Mrs. Manchin, the Board unanimously approved the Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science and the Common Core State Standards for Mathematics for alignment with West Virginia's 21<sup>st</sup> Century Content Standards and Objectives and resources with implementation Fall 2011.

2. 85-member stakeholder group, consisting of classroom teachers at all programmatic levels who are responsible for the teaching of English, language arts, literacy and mathematics, as well as faculty representing Higher Education and staff from the WVDE, began the alignment work in October 2010.

3. We anticipate that the alignment work will be completed by May 2011. The work group members are quite positive and complimentary of the content of the CCSS. The work schedule is highly structured and purposeful with specific goals for each of the scheduled sessions between now and April 9. Future Work Session Dates and Locations are as follows:

February 3-5, 2011	Bridgeport Conference Center
March 3-4, 2011	Beckley Country Inn & Suites
April 8-9, 2011	Bridgeport Conference Center

4. The WVDE Office of Instruction has established a Committee of Stakeholders to make recommendations relevant to the implementation of the Common Core State Standards. This stakeholder group is comprised of representatives from professional organizations, principals from each of the three programmatic levels, teachers from each of the three programmatic levels, superintendents, chief instructional leaders, RESA staff and WVDE staff.

5. On June 30, 2010 Dr. Paine requested permission from Secretary of Education Arne Duncan to conduct an alignment of the CCSS to the present WV State Summative Assessment WESTEST2. We have not received a response to this request.

6. In preparation for the 2014-2015 administration of the new assessment developed by the SMARTER Balanced Assessment Consortium, of which WV is a governing state, we are recommending the following rollout schedule for implementation of West Virginia Content Standards and Objectives fully aligned with the Common Core State Standards:

2011- 2012	Kindergarten
2012-2013	First Grade

## Update on Common Core State Standards Implementation

---

2013-2014	Second Grade
2014-2015	Third –Twelfth Grade

Spring 2015 is the first administration of the new assessment developed by the SBAC. Three staff members from WVDE were selected as members of the SBAC Work Groups identified:

Pat Dillon	Assessment Design: Test Administration
Lou Maynus	Assessment Design: Performance Tasks
Carla Williamson	Formative Processes and Tools/Professional Development

Teachers working on the alignment of the CCSS are recommending specific professional development required by the content of the CCSS. The Office of Instruction will begin development and implementation of this professional development in the summer of 2011; professional development will continue through 2015; and a capacity-building model will support teachers in all 55 counties.

7. Teacher Leadership Institute 2011 will have a two-pronged focus:
  - (1) We will continue to provide professional development to school-based teams with a focus on developing an understanding of the *Common Core State Standards for English Language Arts and Literacy in History/Social Studies and Science* and the *Common Core State Standards for Mathematics*. This is a year-long professional development experience with support provided throughout the following school year via technology.
  - (2) We will provide professional development focused on building an understanding of the Kindergarten CCSS to 200 county-identified kindergarten teacher leaders. The professional development will not only develop the teacher leaders' understanding of the CCSS, but it will also prepare them to be facilitators of the learning of other kindergarten teachers in their respective counties and RESAs. This is a year-long professional development experience with support provided throughout the following school year via technology.
8. Common Core State Standards for Social Studies and Science continue to be under development. Three members of the WVDE staff are currently working on CCSSO Social Studies Assessment, Curriculum and Instruction (SSACI) State Collaborative on Assessment and Student Standards (SCASS) that is developing the CCSS for Social Studies: Joey Wiseman, Pat Dillon and Carla Williamson. Martha Burke and Robin Anglin are closely monitoring the work on the CCSS for Science. The conceptual framework, developed by National Research Council's Board on Science Education, will be followed by the actual development of the CCSS and it is our understanding ACHIEVE, Inc. will have a role in this development. The National Science Teacher Association provides frequent updates on the progress being made.

## **Attachment 6**

State's Race to the Top Assessment Memorandum of Understanding (MOU)

**Memorandum of Understanding****SMARTER Balanced Assessment Consortium****Race to the Top Fund Assessment Program: Comprehensive Assessment  
Systems Grant Application**

CFDA Number: 84.395B

This Memorandum of Understanding ("MOU") is entered as of **June 8, 2010**, by and between the **SMARTER Balanced Assessment Consortium** (the "Consortium") and the **State of West Virginia**, which has elected to participate in the Consortium as (check one)

\_\_\_\_\_ An **Advisory** State (description in section e),

**OR**

  **X**   A **Governing** State (description in section e),

pursuant to the Notice Inviting Applications for the Race to the Top Fund Assessment Program for the Comprehensive Assessment Systems Grant Application (Category A), henceforth referred to as the "Program," as published in the Federal Register on April 9, 2010 (75 FR 18171-18185).

The purpose of this MOU is to

- (a) Describe the Consortium vision and principles,
- (b) Detail the responsibilities of States in the Consortium,
- (c) Detail the responsibilities of the Consortium,
- (d) Describe the management of Consortium funds,
- (e) Describe the governance structure and activities of States in the Consortium,
- (f) Describe State entrance, exit, and status change,
- (g) Describe a plan for identifying existing State barriers, and
- (h) Bind each State in the Consortium to every statement and assurance made in the application through the following signature blocks:
  - (i)(A) Advisory State Assurance
  - OR**
  - (i)(B) Governing State Assurance
  - AND**
  - (ii) State Procurement Officer

### **(a) Consortium Vision and Principles**

The Consortium's priorities for a new generation assessment system are rooted in a concern for the valid, reliable, and fair assessment of the deep disciplinary understanding and higher-order thinking skills that are increasingly demanded by a knowledge-based economy. These priorities are also rooted in a belief that assessment must support ongoing improvements in instruction and learning, and must be useful for all members of the educational enterprise: students, parents, teachers, school administrators, members of the public, and policymakers.

The Consortium intends to build a flexible system of assessment based upon the Common Core Standards in English language arts and mathematics with the intent that all students across this Consortium of States will know their progress toward college and career readiness.

The Consortium recognizes the need for a system of formative, interim, and summative assessments—organized around the Common Core Standards—that support high-quality learning, the demands of accountability, and that balance concerns for innovative assessment with the need for a fiscally sustainable system that is feasible to implement. The efforts of the Consortium will be organized to accomplish these goals.

The comprehensive assessment system developed by the Consortium will include the following key elements and principles:

1. A Comprehensive Assessment System that will be grounded in a thoughtfully integrated learning system of standards, curriculum, assessment, instruction and teacher development that will inform decision-making by including formative strategies, interim assessments, and summative assessments.
2. The assessment system will measure the full range of the Common Core Standards including those that measure higher-order skills and will inform progress toward and acquisition of readiness for higher education and multiple work domains. The system will emphasize deep knowledge of core concepts within and across the disciplines, problem solving, analysis, synthesis, and critical thinking.
3. Teachers will be involved in the design, development, and scoring of assessment items and tasks. Teachers will participate in the alignment of the Common Core Standards and the identification of the standards in the local curriculum.
4. Technology will be used to enable adaptive technologies to better measure student abilities across the full spectrum of student performance and evaluate growth in learning; to support online simulation tasks that test higher-order abilities; to score the results; and to deliver the responses to trained scorers/teachers to access from an

electronic platform. Technology applications will be designed to maximize interoperability across user platforms, and will utilize open-source development to the greatest extent possible.

5. A sophisticated design will yield scores to support evaluations of student growth, as well as school, teacher, and principal effectiveness in an efficient manner.
6. On-demand and curriculum-embedded assessments will be incorporated over time to allow teachers to see where students are on multiple dimensions of learning and to strategically support their progress.
7. All components of the system will incorporate principles of Universal Design that seek to remove construct-irrelevant aspects of tasks that could increase barriers for non-native English speakers and students with other specific learning needs.
8. Optional components will allow States flexibility to meet their individual needs.

#### **(b) Responsibilities of States in the Consortium**

Each State agrees to the following element of the Consortium's Assessment System:

- Adopt the Common Core Standards, which are college- and career-ready standards, and to which the Consortium's assessment system will be aligned, no later than December 31, 2011.

Each State that is a member of the Consortium in 2014–2015 also agrees to the following:

- Adopt common achievement standards no later than the 2014–2015 school year,
- Fully implement statewide the Consortium summative assessment in grades 3-8 and high school for both mathematics and English language arts no later than the 2014–2015 school year,
- Adhere to the governance as outlined in this document,
- Agree to support the decisions of the Consortium,
- Agree to follow agreed-upon timelines,
- Be willing to participate in the decision-making process and, if a Governing State, final decision, and
- Identify and implement a plan to address barriers in State law, statute, regulation, or policy to implementing the proposed assessment system and to addressing any such barriers prior to full implementation of the summative assessment components of the system.

### **(c) Responsibilities of the Consortium**

The Consortium will provide the following by the 2014-15 school year:

1. A comprehensively designed assessment system that includes a strategic use of a variety of item types and performance assessments of modest scope to assess the full range of the Common Core Standards with an emphasis on problem solving, analysis, synthesis, and critical thinking.
2. An assessment system that incorporates a required summative assessment with optional formative/benchmark components which provides accurate assessment of all students (as defined in the Federal notice) including students with disabilities, English learners, and low- and high-performing students.
3. Except as described above, a summative assessment that will be administered as a computer adaptive assessment and include a minimum of 1–2 performance assessments of modest scope.
4. Psychometrically sound scaling and equating procedures based on a combination of objectively scored items, constructed-response items, and a modest number of performance tasks of limited scope (e.g., no more than a few days to complete).
5. Reliable, valid, and fair scores for students and groups that can be used to evaluate student achievement and year-to-year growth; determine school/district/state effectiveness for Title I ESEA; and better understand the effectiveness and professional development needs of teachers and principals.
6. Achievement standards and achievement level descriptors that are internationally benchmarked.
7. Access for the State or its authorized delegate to a secure item and task bank that includes psychometric attributes required to score the assessment in a comparable manner with other State members, and access to other applications determined to be essential to the implementation of the system.
8. Online administration with limited support for paper-and-pencil administration through the end of the 2016–17 school year. States using the paper-and-pencil option will be responsible for any unique costs associated with the development and administration of the paper-and-pencil assessments.

9. Formative assessment tools and supports that are developed to support curricular goals, which include learning progressions, and that link evidence of student competencies to the summative system.
10. Professional development focused on curriculum and lesson development as well as scoring and examination of student work.
11. A representative governance structure that ensures a strong voice for State administrators, policymakers, school practitioners, and technical advisors to ensure an optimum balance of assessment quality, efficiency, costs, and time. The governance body will be responsible for implementing plans that are consistent with this MOU, but may make changes as necessary through a formal adoption process.
12. Through at least the 2013–14 school year, a Project Management Partner (PMP) that will manage the logistics and planning on behalf of the Consortium and that will monitor for the U.S. Department of Education the progress of deliverables of the proposal. The proposed PMP will be identified no later than August 4, 2010.
13. By September 1, 2014, a financial plan will be approved by the Governing States that will ensure the Consortium is efficient, effective, and sustainable. The plan will include as revenue at a minimum, State contributions, federal grants, and private donations and fees to non-State members as allowable by the U.S. Department of Education.
14. A consolidated data reporting system that enhances parent, student, teacher, principal, district, and State understanding of student progress toward college- and career-readiness.
15. Throughout the 2013–14 school year, access to an online test administration application, student constructed-response scoring application and secure test administration browsers that can be used by the Total State Membership to administer the assessment. The Consortium will procure resources necessary to develop and field test the system. However, States will be responsible for any hardware and vendor services necessary to implement the operational assessment. Based on a review of options and the finance plan, the Consortium may elect to jointly procure these services on behalf of the Total State Membership.

#### **(d) Management of Consortium Funds**

All financial activities will be governed by the laws and rules of the State of Washington, acting in the role of Lead Procurement State/Lead State, and in accordance with 34 CFR 80.36.

Additionally, Washington is prepared to follow the guidelines for grant management associated with the American Recovery and Reinvestment Act (ARRA), and will be legally responsible for the use of grant funds and for ensuring that the project is carried out by the Consortium in accordance with Federal requirements. Washington has already established an ARRA Quarterly reporting system (also referred to as *1512 Reporting*).

Per Washington statute, the basis of how funding management actually transpires is dictated by the method of grant dollar allocation, whether upfront distribution or pay-out linked to actual reimbursables. Washington functions under the latter format, generating claims against grant funds based on qualifying reimbursables submitted on behalf of staff or clients, physical purchases, or contracted services. Washington's role as Lead Procurement State/Lead State for the Consortium is not viewed any differently, as monetary exchanges will be executed against appropriate and qualifying reimbursables aligned to expenditure arrangements (i.e., contracts) made with vendors or contractors operating under "personal service contracts," whether individuals, private companies, government agencies, or educational institutions.

Washington, like most States, is audited regularly by the federal government for the accountability of federal grant funds, and has for the past five years been without an audit finding. Even with the additional potential for review and scrutiny associated with ARRA funding, Washington has its fiscal monitoring and control systems in place to manage the Consortium needs.

- As part of a comprehensive system of fiscal management, Washington's accounting practices are stipulated in the State Administrative and Accounting Manual (SAAM) managed by the State's Office of Financial Management. The SAAM provides details and administrative procedures required of all Washington State agencies for the procurement of goods and services. As such, the State's educational agency is required to follow the SAAM; actions taken to manage the fiscal activities of the Consortium will, likewise, adhere to policies and procedures outlined in the SAAM.
- For information on the associated contracting rules that Washington will adhere to while serving as fiscal agent on behalf of the Consortium, refer to the Revised Code of Washington (RCW) 39.29 "Personal Service Contracts." Regulations and policies authorized by this RCW are established by the State's Office of Financial Management, and can be found in the SAAM.

### **(e) Governance Structure and Activities of States in the Consortium**

As shown in the SMARTER Balanced Assessment Consortium governance structure, the Total State Membership of the Consortium includes Governing and Advisory States, with Washington serving in the role of Lead Procurement State/Lead State on behalf of the Consortium.

**A Governing State** is a State that:

- Has fully committed to this Consortium only and met the qualifications specified in this document,
- Is a member of only one Consortium applying for a grant in the Program,
- Has an active role in policy decision-making for the Consortium,
- Provides a representative to serve on the Steering Committee,
- Provides a representative(s) to serve on one or more Work Groups,
- Approves the Steering Committee Members and the Executive Committee Members,
- Participates in the final decision-making of the following:
  - Changes in Governance and other official documents,
  - Specific Design elements, and
  - Other issues that may arise.

**An Advisory State** is a State that:

- Has not fully committed to any Consortium but supports the work of this Consortium,
- Participates in all Consortium activities but does not have a vote unless the Steering Committee deems it beneficial to gather input on decisions or chooses to have the Total Membership vote on an issue,
- May contribute to policy, logistical, and implementation discussions that are necessary to fully operationalize the SMARTER Balanced Assessment System, and
- Is encouraged to participate in the Work Groups.

### **Organizational Structure**

#### **Steering Committee**

The Steering Committee is comprised of one representative from each Governing State in the Consortium. Committee members may be a chief or his/her designee. Steering Committee Members must meet the following criteria:

- Be from a Governing State,
- Have prior experience in either the design or implementation of curriculum and/or assessment systems at the policy or implementation level, and
- Must have willingness to serve as the liaison between the Total State Membership and Working Groups.

#### **Steering Committee Responsibilities**

- Determine the broad picture of what the assessment system will look like,

## SMARTER Balanced Assessment Consortium MOU

- Receive regular reports from the Project Management Partner, the Policy Coordinator, and the Content Advisor,
- Determine the issues to be presented to the Governing and/or Advisory States,
- Oversee the expenditure of funds in collaboration with the Lead Procurement State/Lead State,
- Operationalize the plan to transition from the proposal governance to implementation governance, and
- Evaluate and recommend successful contract proposals for approval by the Lead Procurement State/Lead State.

**Executive Committee**

- The Executive Committee is made up of the Co-Chairs of the Executive Committee, a representative from the Lead Procurement State/Lead State, a representative from higher education and one representative each from four Governing States. The four Governing State representatives will be selected by the Steering Committee. The Higher Education representative will be selected by the Higher Education Advisory Group, as defined in the Consortium Governance document.
- For the first year, the Steering Committee will vote on four representatives, one each from four Governing States. The two representatives with the most votes will serve for three years and the two representatives with the second highest votes will serve for two years. This process will allow for the rotation of two new representatives each year. If an individual is unable to complete the full term of office, then the above process will occur to choose an individual to serve for the remainder of the term of office.

**Executive Committee Responsibilities**

- Oversee development of SMARTER Balanced Comprehensive Assessment System,
- Provide oversight of the Project Management Partner,
- Provide oversight of the Policy Coordinator,
- Provide oversight of the Lead Procurement State/Lead State,
- Work with project staff to develop agendas,
- Resolve issues,
- Determine what issues/decisions are presented to the Steering Committee, Advisory and/or Governing States for decisions/votes,
- Oversee the expenditure of funds, in collaboration with the Lead Procurement State/Lead State, and
- Receive and act on special and regular reports from the Project Management Partner, the Policy Coordinator, the Content Advisor, and the Lead Procurement State/Lead State.

**Executive Committee Co-Chairs**

- Two Co-chairs will be selected from the Steering Committee States. The two Co-chairs must be from two different states. Co-chairs will work closely with the Project Management Partner. Steering Committee members wishing to serve as Executive Committee Co-chairs will submit in writing to the Project Management Partner their willingness to serve. They will need to provide a document signed by their State Chief indicating State support for this role. The Project Management Partner will then prepare a ballot of interested individuals. Each Steering Committee member will vote on the two individuals they wish to serve as Co-chair. The individual with the most votes will serve as the new Co-chair.
- Each Co-chair will serve for two years on a rotating basis. For the first year, the Steering committee will vote on two individuals and the one individual with the most votes will serve a three-year term and the individual with the second highest number of votes will serve a two-year term.
- If an individual is unable to complete the full term of office, then the above process will occur to choose an individual to serve for the remainder of the term of office.

**Executive Committee Co-Chair Responsibilities**

- Set the Steering Committee agendas,
- Set the Executive Committee agenda,
- Lead the Executive Committee meetings,
- Lead the Steering Committee meetings,
- Oversee the work of the Executive Committee,
- Oversee the work of the Steering Committee,
- Coordinate with the Project Management Partner,
- Coordinate with Content Advisor,
- Coordinate with Policy coordinator,
- Coordinate with the Technical Advisory Committee (TAC), and
- Coordinate with Executive Committee to provide oversight to the Consortium.

**Decision-making**

Consensus will be the goal of all decisions. Major decisions that do not reach consensus will go to a simple majority vote. The Steering Committee will determine what issues will be referred to the Total State Membership. Each member of each group (Advisory/Governing States, Steering Committee, Executive Committee) will have one vote when votes are conducted within each group. If there is only a one to three vote difference, the issue will be re-examined to seek greater consensus. The Steering Committee will be responsible for preparing additional information as to the pros and cons of the issue to assist voting States in developing consensus and reaching a final decision. The Steering Committee may delegate this responsibility to the Executive Committee. The Executive Committee will decide which decisions or issues are votes to

be taken to the Steering Committee. The Steering Committee makes the decision to take issues to the full Membership for a vote.

The Steering Committee and the Governance/Finance work group will collaborate with each Work Group to determine the hierarchy of the decision-making by each group in the organizational structure.

### **Work Groups**

The Work Groups are comprised of chiefs, assessment directors, assessment staff, curriculum specialists, professional development specialists, technical advisors and other specialists as needed from States. Participation on a workgroup will require varying amounts of time depending on the task. Individuals interested in participating on a Work Group should submit their request in writing to the Project Management Partner indicating their preferred subgroup. All Governing States are asked to commit to one or more Work Groups based on skills, expertise, and interest within the State to maximize contributions and distribute expertise and responsibilities efficiently and effectively. The Consortium has established the following Work Groups:

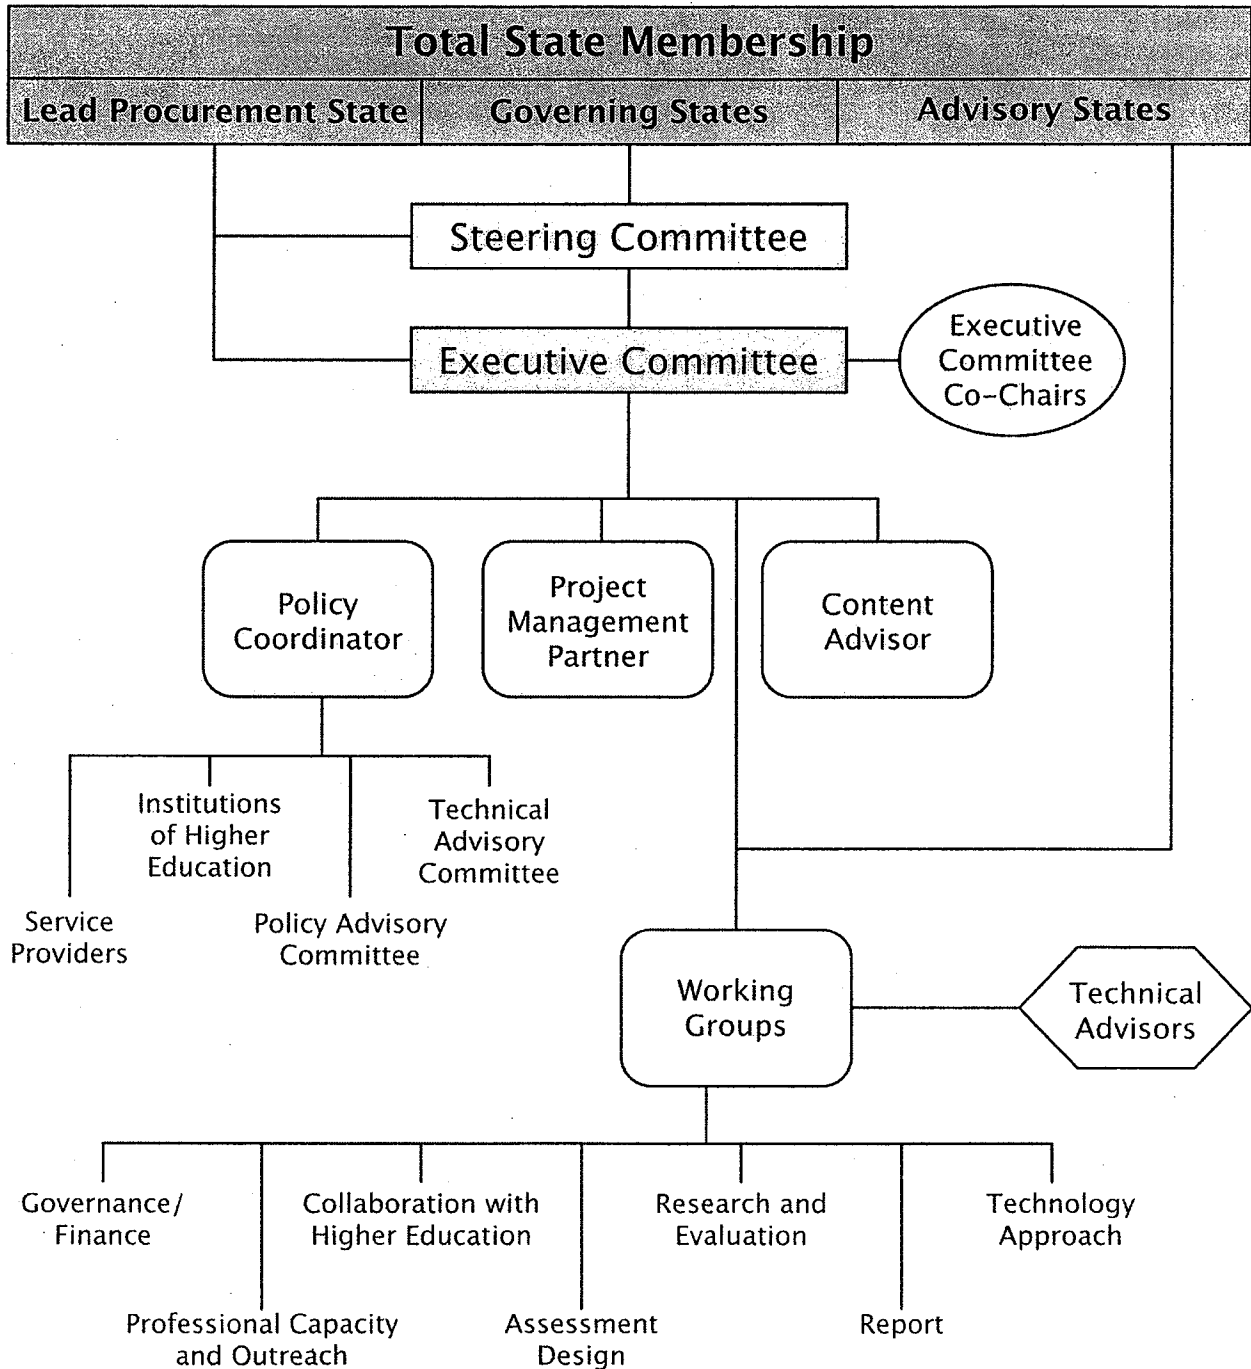

- Governance/Finance,
- Assessment Design,
- Research and Evaluation,
- Report,
- Technology Approach,
- Professional Capacity and Outreach, and
- Collaboration with Higher Education.

The Consortium will also support the work of the Work Groups through a Technical Advisory Committee (TAC). The Policy Coordinator in collaboration with the Steering Committee will create various groups as needed to advise the Steering Committee and the Total State Membership. Initial groups will include

- Institutions of Higher Education,
- Technical Advisory Committee,
- Policy Advisory Committee, and
- Service Providers.

An organizational chart showing the groups described above is provided on the next page.

## SMARTER Balanced Assessment Consortium Organizational Structure

**(f) State Entrance, Exit, and Status Change**

This MOU shall become effective as of the date first written above upon signature by both the Consortium and the Lead Procurement State/Lead State (Washington) and remain in force until the conclusion of the Program, unless terminated earlier in writing by the Consortium as set forth below.

**Entrance into Consortium**

Entrance into the Smarter Balanced Assessment Consortium is assured when:

- The level of membership is declared and signatures are secured on the MOU from the State's Commissioner, State Superintendent, or Chief; Governor; and President/Chair of the State Board of Education (if the State has one);
- The signed MOU is submitted to the Consortium Grant Project Manager (until June 23) and then the Project Management Partner after August 4, 2010;
- The Advisory and Governing States agree to and adhere to the requirements of the governance;
- The State's Chief Procurement Officer has reviewed its applicable procurement rules and provided assurance that it may participate in and make procurements through the Consortium;
- The State is committed to implement a plan to identify any existing barriers in State law, statute, regulation, or policy to implementing the proposed assessment system and to addressing any such barriers prior to full implementation of the summative assessment components of the system; and
- The State agrees to support all decisions made prior to the State joining the Consortium.

After receipt of the grant award, any request for entrance into the Consortium must be approved by the Executive Committee. Upon approval, the Project Management Partner will then submit a change of membership to the USED for approval. A State may begin participating in the decision-making process after receipt of the MOU.

**Exit from Consortium**

Any State may leave the Consortium without cause, but must comply with the following exit process:

- A State requesting an exit from the Consortium must submit in writing their request and reasons for the exit request,
- The written explanation must include the statutory or policy reasons for the exit,
- The written request must be submitted to the Project Management Partner with the same signatures as required for the MOU,
- The Executive Committee will act upon the request within a week of the request, and
- Upon approval of the request, the Project Management Partner will then submit a change of membership to the USED for approval.

**Changing Roles in the Consortium**

A State desiring to change from an Advisory State to a Governing State or from a Governing State to an Advisory State may do so under the following conditions:

- A State requesting a role change in the Consortium must submit in writing their request and reasons for the request,
- The written request must be submitted to the Project Management Partner with the same signatures as required for the MOU, and
- The Executive Committee will act upon the request within a week of the request and submit to the USED for approval.

**(g) Plan for Identifying Existing State Barriers**

Each State agrees to identify existing barriers in State laws, statutes, regulations, or policies by noting the barrier and the plan to remove the barrier. Each State agrees to use the table below as a planning tool for identifying existing barriers. States may choose to include any known barriers in the table below at the time of signing this MOU.

Barrier	Issue/Risk of Issue (if known)	Statute, Regulation, or Policy	Governing Body with Authority to Remove Barrier	Approximate Date to Initiate Action	Target Date for Removal of Barrier	Comments

**(h)(ii) STATE PROCUREMENT OFFICER SIGNATURE BLOCK** for Race to the Top Fund Assessment Program Comprehensive Assessment Systems Grant Application Assurances.

*(Required from all States in the Consortium.)*

I certify that I have reviewed the applicable procurement rules for my State and have determined that it may participate in and make procurements through the SMARTER Balanced Assessment Consortium, provided that the State of West Virginia makes all purchases resulting from participation in the Consortium according to the requirements set forth in West Virginia Code § 5A-3-1 et seq., and the West Virginia Code of State Rules § 148-1-1 et seq.

§ 5A-3-19. Purchases from federal government and other sources

(a) Notwithstanding any other provision of this article, the director may, upon the recommendation of a state spending unit, participate in, sponsor, conduct, or administer a cooperative purchasing agreement or consortium for the purchase of commodities or services with agencies of the federal government, agencies of other states, other public bodies or other state agencies, if available and financially advantageous. At the discretion of the director, bids may be solicited to determine whether participation in such a cooperative purchasing agreement or consortium is financially advantageous.

**TITLE 126  
LEGISLATIVE RULE  
BOARD OF EDUCATION**

**SERIES 114  
APPROVAL OF EDUCATIONAL PERSONNEL PREPARATION PROGRAMS (5100)**

**§126-114-1. General.**

1.1. Scope. - This legislative rule establishes the process for developing, implementing, and receiving West Virginia Board of Education, hereinafter WVBE, approval to operate an educational personnel preparation program leading to West Virginia licensure in an institution of higher education.

1.2. Authority. - W. Va. Constitution, Article XII, §2 and W.Va. Code §§18-2-5, 18A-3-1a, 18A-3-2b, and 18A-3-10.

1.3. Filing Date. – January 12, 2012.

1.4. Effective Date. – February 13, 2012.

1.5. Repeal of Former Rule. - This legislative rule amends W.Va. §126CSR114, West Virginia Board of Education Policy 5100 – Approval of Educational Personnel Preparation Programs filed September 9, 2011, and effective October 11, 2011.

**§126-114-2. Summary.**

2.1. This rule outlines the framework for developing, implementing and approving educational personnel preparation programs. Major program components are defined, assessment instruments and/or procedures are identified, and the minimum proficiency levels are prescribed for the WVBE adopted instruments. Program approval criteria for program implementation are also identified.

**§126-114-3. Purpose.**

3.1. The purposes of this policy are to: a) establish a collaborative process for program approval; b) improve educational personnel preparation programs and potential educational personnel by incorporating program guidelines based on research and best practices; c) ensure that those who are prepared for employment in the public schools have the knowledge, skills and dispositions necessary to function as entry-level members of the profession; and d) ensure that higher education institutions work collaboratively with the public schools in designing and delivering professional educator preparation experiences to increase student achievement through written agreements with public schools. This policy relates only to the approved teacher education program element of licensure. Hence, the policy does not supersede any licensure requirements mandated by West Virginia Code and/or WVBE rules outlined in W.Va. §126CSR136, West Virginia Board of Education Policy 5202 - Minimum Requirements for the

Licensure of Professional/Paraprofessional Personnel and Advanced Salary Classifications (hereinafter Policy 5202).

3.2. This policy commits the WVBE to develop, revise or adopt the program objectives, assessment instruments, and proficiency levels for the professional preparation of educational personnel through a collaborative effort involving the West Virginia Commission for Professional Teaching Standards, hereinafter WVCPTS, the West Virginia Department of Education, hereinafter WVDE, the governing boards for public and private West Virginia institutions of higher education, public school administrators, and classroom teachers.

#### **§126-114-4. Authority of the WVBE.**

4.1. All educational personnel preparation programs that result in West Virginia licensure require the approval of the WVBE. This approval requirement applies to new and continuing programs and to any institution seeking initial approval to offer educational personnel preparation programs.

4.2. The WVBE shall adopt standards and procedures for the approval of educational personnel preparation programs that enable prospective educators who satisfactorily complete such programs and licensure requirements to be licensed in West Virginia.

4.3. The WVBE establishes the WVCPTS to serve as its advisory body on matters related to the preparation of educational personnel. The WVBE shall establish regular communications with the WVCPTS and may solicit its recommendations prior to taking official action on educational personnel preparation policies. (See W.Va. §126CSR154 West Virginia Board of Education Policy 5050 - West Virginia Commission for Professional Teaching Standards.)

4.4. The WVBE acknowledges that the governing boards of public higher education institutions and the appropriate governing body of a private higher education institution may establish standards and accreditation procedures, including a requirement that the institution(s) attain National Council for Accreditation of Teacher Education, hereinafter NCATE, accreditation for the teacher education programs under their respective jurisdictions. The WVBE pledges its cooperation with the governing boards or bodies and the institutions under their control in establishing jointly agreed to program review procedures pursuant to Section 12.3 of this policy that: a) respect any applicable standards or accreditation procedures, whether established by the WVBE or the higher education governing boards(s) or body(ies) and b) emphasize cooperation, minimize duplication, and specify the process and materials to be covered in the review.

#### **§126-114-5. Definitions.**

5.1. Accredited Institution of Higher Education. - A college or university accredited: 1) by the official accrediting agency of the state in which the institution is located and 2) by one of the six (6) regional accrediting agencies recognized by the National Commission on Accrediting (Middle States, New England, Northwest, North Central, Southern, and Western Associations) **OR** by one of the National Faith-Related Accrediting Organizations recognized by the Council

of Higher Education Accreditation and the United States Department of Education (Association for Biblical Higher Education Commission on Accreditation, Association of Advanced Rabbinical and Talmudic Schools Accreditation Commission, Commission on Accrediting of the Association of Theological Schools in the United States and Canada, and Transnational Association of Christian Colleges and Schools Accreditation Commission), OR by the Association of Independent Colleges and Schools, to award degrees at a stipulated level, i.e., bachelor's degree, master's degree, and/or doctorate.

5.2. Admission to an Approved Program. - The filing of an application by a prospective educator declaring himself/herself as a candidate to complete an approved teacher education program and the institution's formal acceptance of the student based on his/her satisfying the admission criteria. The criteria for admission are established by the institution but generally include stated requirements in the form of overall grade point average, successful completion of designated courses, passing standardized tests, and passing institutionally established performance assessments in speaking, listening, and educational technology.

5.3. Approved Program. - A preparation program for professional educators based on WVBE adopted program objectives and guidelines which is delivered by a regionally accredited college or university and which has been approved by the WVBE for issuance of a professional certificate.

5.4. Authorized Agency. - The state agency designated by the WVBE to administer program approval standards and procedures approved by the WVBE. Currently, the WVDE serves as the WVBE's authorized agency.

5.5. Collaborative Program. - Approved educational personnel preparation program that is delivered as the result of a formal written agreement between two or more West Virginia institutions of higher education to enable prospective educators to receive licensure in a content specialization that is not available at the home institution and that is approved for the cooperating institution.

5.6. Endorsement. - The specialization(s) and grade levels appearing on any license, authorized by the WVBE which govern the legal assignment within the public schools of West Virginia (W.Va. Code §18A-3-1).

5.7. Educational Personnel Preparation Advisory Committee. (EPPAC). - This committee is comprised of public school and higher education teachers and administrators who advise the chief teacher education officer on personnel preparation matters. All institutions offering WVBE-approved programs are required to have an EPPAC.

5.8. Field-based Experiences. - Educational training activities organized by the college and university teacher preparation programs for the student teacher candidate which are structured to ensure significant exposure to diverse (multi-cultural), at-risk and special needs learners. Significant field experiences are those experiences completed under the direction of the institution and cooperating teacher. The experiences are arranged by the institution with the cooperating teachers such that the cooperating teachers have a thorough understanding of the

institution's expectations for the candidates during the experiences. During such experiences teacher candidates should work directly with students (i.e., plan and teach lessons).

5.9. License. - The term used for any or all of the documents issued by the State Superintendent of Schools under state law and regulations of the WVBE that empower the holder to perform designated services within the public schools.

5.10. National Council for the Accreditation of Teacher Education. (NCATE). - This organization reviews and accredits an institution's Professional Education Unit based on compliance with national standards related to the functioning of the unit. Insofar as this policy is concerned, NCATE accreditation of an institution's Professional Education Unit is optional.

5.11. Performance-Based Assessment. - The process whereby a cooperating public school professional(s) and a higher education faculty member(s) judge a prospective educator's ability to integrate content, basic professional knowledge and pedagogical skills in an appropriate educational setting in which the prospective educator anticipates licensure.

5.12. Professional Education Unit. - The administrative body within the institution that is primarily responsible for the initial and continuing preparation of teachers and other educational personnel. The Professional Education Unit is sometimes referred to as "the Unit."

5.13. Program Approval Status. - All professional preparation programs will be classified as follows: "Initial Approval Status," "Continuing Approval Status," or "Conditional Approval Status."

5.13.a. Initial Approval Status. - This term is used for new professional preparation programs. "Initial Approval Status" will be granted for a period of five years. During each of those five years, the institution will be required to document in its annual report the progress it is making to ensure the success of its graduates to promote student achievement in the public schools in the institution's service region. During the "Initial Approval Status" stage, the institution may recommend graduates for West Virginia certification. At the end of the five-year "Initial Approval Status" period, the institution will receive another visit from the WVDE at which time a final recommendation will be made to the WVBE to reclassify the status of the institution to "Continuing Approval Status."

5.13.b. Continuing Approval Status. - This term applies to all West Virginia higher education institutions that have a currently approved program with the WVBE. "Continuing Approval Status" is granted for a period of seven years. To maintain "Continuing Approval Status" programs with the WVBE, educator preparation programs must undergo the continuing program review and receive approval every seven years.

5.13.c. Conditional Approval Status. - This term applies to educator preparation programs that do not meet one or more of West Virginia Educator Preparation Program Standards (See Appendix A-5 of this policy) or has other capacity limiting problems. Programs with "Conditional Program Status" must undergo a Program Approval review process within 18

months. At that point, the educator preparation program will receive “Continuing Approval” or program approval will be withdrawn.

5.14. Program Review Board. - The WVBE has created the Educator Preparation Program Review Board to make recommendations to the WVBE regarding initial and continuing educator preparation program approval.

5.15. Regionally Accredited Institution of Education - A college or university accredited by: 1) the official accrediting agency of the state in which the institution is located, and 2) one of the six regional accrediting agencies recognized by the National Commission on Accrediting (Middle States, New England, Northwest, North Central, Southern and Western Associations) to award degrees at a stipulated level, i.e., bachelor’s degree, master’s degree and/or doctoral degree.

5.16. Specialization. - The specific teaching, administrative, or student support area listed on the educator’s license to which s/he may be legally assigned within the public schools.

5.17. Subject-Area Major. – A minimum of 30 semester hours in a specific content area.

5.18. Subject-Area Minor. – A minimum of 15 semester hours in a specific content area.

5.19. Teacher Education Accreditation Council (TEAC). - This organization reviews and accredits an institution’s Professional Education Unit based on compliance with national standards related to the functioning of the unit. Insofar as this policy is concerned, TEAC accreditation of an institution’s Professional Education Unit is optional.

#### **§126-114-6. Professional Educator Preparation Program Requirements: Teacher.**

6.1. Program Components. - All teacher preparation programs, at both undergraduate and graduate levels, shall consist of three (3) components: preprofessional skills, content specialization, and professional education. The three (3) components, including the associated educational technology knowledge and skills, are necessary to satisfy WVBE-approved program requirements.

6.2. Preprofessional Skills Component.

6.2.a. Component Description. - Preprofessional skills are those basic skills crucial to an educator’s performance and effectiveness. Competence in these skills underlies an educator’s ability to comprehend, utilize, analyze, synthesize, evaluate, and communicate information. Preprofessional skills common to educational personnel are reading, writing, mathematics, speaking, listening and educational technology. Component descriptions for reading, writing and mathematics are found in the study guide “Test at a Glance” for the Praxis I, Pre-Professional Skills Tests (PPST). Preprofessional skills for speaking and listening are found in Appendix B of this policy. Educational technology knowledge and skills related to this component are found in Appendix C of this policy.

6.2.b. Educator's Assessment and Proficiency Levels. - The educator's preprofessional skills in reading, writing and mathematics shall be assessed using the Educational Testing Service's PPST. The WVBE shall establish the acceptable levels of performance on the PPST in reading, writing, and mathematics. Individuals must meet the acceptable levels of performance on the PPST in reading, writing, and mathematics, or qualify for an exemption as identified in Section 6.2.c. of this policy, prior to formal admission to a WVBE-approved educator preparation program. The institutions shall establish the assessments and acceptable levels for the speaking, listening, and educational technology skills.

6.2.c. PPST Waivers. - In lieu of taking the WVBE-approved PPST, prospective educators completing WVBE-approved programs may provide evidence of:

6.2.c.1. A master's degree from an accredited institution of higher education; OR

6.2.c.2. Currently holding or having held a West Virginia professional teaching, administrative or student support service license; OR

6.2.c.3. Attainment of WVBE-approved composite scores from a single administration of the American College Testing (ACT) Program or the Scholastic Achievement Test (SAT). See Appendix E of this policy for currently approved ACT and SAT scores. Waivers 6.2.c.1, 6.2.c.2 and 6.2.c.3 do not apply to the institution's required assessments of speaking, listening and educational technology knowledge and skills. Individuals who currently hold or have held a West Virginia professional teaching, administrative or student support services license are not required to complete any of the preprofessional skills assessments.

### 6.3. Content Specialization Component.

6.3.a. Component Description. - Content specialization pertains to the specific teaching, administrative, or student support specialization(s) listed on a professional license in accordance with W.Va. Code §18A-3-1. See Appendix E of this policy for specific guidelines related to items 6.3.a.1 to 6.3.a.7 below for each specialization with the potential for approved program status. WVBE-approved specializations and grade level patterns are found in Appendix D of this policy. The content specialization program standards shall include:

6.3.a.1. WVBE recognized national Content Specialization Standards for the public school curriculum pertaining to the specialization.

6.3.a.2. WVBE policies or legislative initiatives that have implications for the teaching specialization.

6.3.a.3. WVBE adopted content standards for the public school curriculum pertaining to the specialization standards.

6.3.a.4. Content description(s) for the Praxis II tests identified for the specialization in West Virginia licensure requirements.

6.3.a.5. Institutionally identified content standards.

6.3.a.6. Preparation standards promulgated by national professional associations for specific specializations.

6.3.a.7. Educational technology skills and knowledge related to specializations offered by the institution. (See Appendix C of this policy)

6.3.b. Standards for Subject-Area Content in Teacher Preparation Programs.

6.3.b.1. Elementary Education (K-6) programs. – Elementary education (K-6) programs shall include a minimum of 30 semester hours of coursework in English/language arts, health, mathematics, physical education, science, social studies and the arts such that the coursework is relevant to the curriculum delivered in the elementary K-6 classroom.

6.3.b.2. Middle Level (5-9) Programs. – Individuals completing two middle level (5-9) programs shall complete the minimum of a subject-area minor, as defined in Section 5.18 of this policy, in each subject.

6.3.b.3. Secondary Level Programs.

6.3.b.3.A. Secondary-level teacher preparation programs shall provide that their secondary-level programs (those programs emphasizing the secondary-level grades and including licensure to teach grades 10-12) in core academic areas require at least the equivalency of corresponding content majors in terms of academic rigor and credit hours completed in content areas.

6.3.b.3.B. Secondary-level education certification areas for which equivalency in content majors are required biology, business education, chemistry, Chinese, English, French, German, Japanese, general science, mathematics, modern foreign languages, physics, Russian, Spanish, and social studies.

6.3.b.3.C. Each secondary-level certification area referenced in Section 6.3.b.3.B. of this policy must include an equivalent number of credit hours of subject area content course work to the institution's baccalaureate major in the corresponding content field, with the following exceptions:

6.3.b.3.C.1. For a baccalaureate major in a content field in which the credit hours for content course work exceed 48 hours, the number of content credit hours in the corresponding secondary-level teacher preparation program shall not be less than 48 credit hours.

6.3.b.3.C.2. For secondary-level teacher preparation programs in general science and social studies, areas in which there is typically no corresponding

baccalaureate degree, the minimum number of required credits hours in the content area shall not be less than 48. While the number of content hours in other secondary-level teacher preparation programs for certification areas listed in Section 6.3.b.3.B. of this policy is to be at least the equivalent of corresponding baccalaureate degrees, in no instance shall the number of credit hours in the content area of a secondary-level teacher preparation program be less than 36.

6.3.b.3.D. Each secondary-level certification area referenced in Section 6.3.b.3.B. of this policy must meet expectations of academic rigor similar to that of the corresponding baccalaureate degree programs. While the subject-area curriculum of the teacher preparation program may vary somewhat from the subject-area curriculum of the baccalaureate degree program, it must include some form of culminating educational experience in the content area, such as a capstone course. At the discretion of the institution, the curriculum may include applied courses in the content areas as deemed appropriate.

6.3.b.3.E. All secondary-level education certification areas not referenced in Section 6.3.b.3.B. of this policy must contain a subject-area major as defined in Section 5.17 of this policy.

6.3.b.3.F. All course work in a secondary-level teacher preparation program must be taught by faculty with appropriate in-field academic credentials. Typically, the faculty would serve in the academic department.

6.3.b.4. Within all WVBE-approved programs, institutions should seek to hire full-time faculty that have a minimum of one degree higher than the degree level at which they are teaching. Faculty shall have a degree(s) and/or professional licensure and/or expertise in the area(s) in which they are teaching.

#### 6.3.c. Mathematics Content in Teacher Preparation.

6.3.c.1. Each elementary (K-6) teacher preparation must contain:

6.3.c.1.A. three hours of college algebra or verification of college algebra equivalency and a minimum of six hours of college-level mathematics courses, AND

6.3.c.1.B. a three-hour course in mathematics methods.

6.3.c.2. Each middle childhood (5-9) mathematics program must contain:

6.3.c.2.A. a course in college algebra or verification of college algebra equivalency and a minimum of eighteen hours of college-level mathematics, AND

6.3.c.2.B. a three-hour course in mathematics methods.

#### 6.3.d. Reading Content in Teacher Preparation.

6.3.d.1. Each elementary education (K-6) teacher preparation program must contain a minimum of 9 hours of reading which include a focus on the five essential components of reading (i.e., phonemic awareness, phonics, fluency, vocabulary and comprehension) as well as how to assess students' reading ability and how to identify and correct reading difficulties.

6.3.d.2. Each middle (5-9) and secondary (PreK-Adult, 5-Adult, 9-Adult) preparation program must contain a minimum of three hours of reading in the content area which include a focus on vocabulary, comprehension and writing.

6.3.e. Special Education Content in Teacher Preparation.

6.3.e.1. All general education preparation programs must contain a minimum of six hours of preparation in special education, including a focus on the impact of each disability, the use of evaluation data generated from special education to assist with instruction, and the effective and efficient use of consultation.

6.3.e.2. All general education preparation programs must address the differentiation of instruction for diverse learners.

6.3.f. Instructional Technology Content in Teacher Preparation. All initial educator preparation programs must contain a minimum of three semester hours of preparation in instructional technology which incorporate the standards identified in Appendix C-1 of this policy.

6.3.g. Educator's Assessment and Proficiency Levels. - Candidates for completion of a WVBE-approved program shall be required to meet WVBE Praxis II specialty area test score(s), if adopted, indicated for the anticipated specialization(s). A listing of current WVBE-required tests and passing scores is found in Appendix E of this policy.

6.4. Professional Education Component.

6.4.a. Component Description. - Professional Education includes the studies and experiences that prepare the prospective educator to integrate professional pedagogy and content knowledge into successful learning experiences for students. Each institution is required to develop a conceptual framework rooted in the Conceptual Foundation for Teaching and Learning in West Virginia (See Appendix A-1 of this policy) that establishes the shared vision for the unit's endeavor in preparing educators to work effectively in PreK-Adult schools. The conceptual framework shall include a description of its prospective professional educator by identifying the knowledge, skills, and dispositions it expects to develop and assess. The description will serve as the foundation on which the institution will base its curriculum and implement the clinical experiences for professional educators, school administrators, and student support personnel. The description shall reflect the appropriate West Virginia Professional Educator Standards listed in Appendices A-2 through A-4 of this policy. The educational technology skills for this component are listed in Appendix C of this policy.

#### 6.4.b. Educator's Assessment and Proficiency Levels.

6.4.b.1. Professional Knowledge Assessment and Proficiency Levels. - Candidates completing a WVBE-approved teacher education program for any professional educator license shall pass a WVBE-adopted Principles of Learning and Teaching Praxis II test that includes at least a portion of the grade levels indicated on the anticipated license. (See Appendix E of this policy for a list of WVBE-required tests and passing scores.) The institution shall, with the cooperating public school(s), collaboratively establish the assessments and acceptable performance levels for the educational technology skills (See Appendix C of this policy) associated with the professional education component.

6.4.b.2. Performance Assessment Instruments. - Performance assessment instruments and procedures shall be collaboratively developed by public school administrators, classroom teachers, and teacher education faculty at the institutional level. The performance assessment instruments shall:

6.4.b.2.A. be consistent with relevant standards (i.e., West Virginia Professional Teaching Standards found in Appendix A-2 of this policy, appropriate Specialty Program Association Standards, institution teacher preparation standards, etc.);

6.4.b.2.B. include performance criteria and performance indicators rooted in the relevant Standards;

6.4.b.2.C. address the knowledge, skills, and dispositions to be acquired by professional candidates as set forth in program goals;

6.4.b.2.D. have multiple means of measuring candidate performance and impact;

6.4.b.2.E. specify candidate performance expectations, acceptable proficiency levels and designated benchmarks in the program; and

6.4.b.2.F. provide on-going, systematic information useful for decision-making.

6.4.b.3. Field-based Experiences. – All teacher candidates completing a WVBE-approved teacher preparation program for initial teacher licensure must complete a minimum of 125 clock hours of field experience under the direction of a teacher licensed to teach in the state, by the state's authorized agency, or their university supervisor in which the field experience is occurring, in each area in which they are seeking an endorsement. No less than 85 clock hours of the required 125 shall be completed in a public school.

6.4.b.4. Field-based Experiences for Special Education. – All teacher candidates completing a WVBE-approved teacher preparation program leading to an endorsement(s) in an area(s) of special education shall successfully complete the minimum of a significant field experience in the area(s) of special education in which they are seeking an

endorsement(s). Teacher candidates seeking an endorsement in multicategorical shall successfully complete significant field experiences that include instructional and behavioral support for students in each of the areas of emotional/behavioral disorders, mental impairments, and specific learning disabilities.

6.4.b.5. Clinical Experiences Completed in the Public Schools. - Each candidate completing an approved program shall spend a minimum of twelve weeks in the clinical portion of the program unless s/he is able to demonstrate to the satisfaction of the college supervisor and the cooperating public school supervisor that s/he has achieved the proficiency level in less than the specified time. The clinical experience must be completed under the direction of a teacher licensed to teach in the state, by the state's authorized agency, in which the clinical experience is occurring. A public school is defined as an agency licensed by the state. The candidate must be assessed during the clinical experience in a least one specialization for which s/he is requesting licensure. The institution is also required to document the candidates' field-based and/or clinical experiences with diverse (multi-cultural), at risk, and special needs learners at each programmatic level for which they anticipate licensure. Five exceptions to the programmatic level coverage for required field based experiences exist in the current system.

6.4.b.5.A. Any PreK-Adult program is required to contain clinical practice at both the elementary and middle or secondary levels. Field based experiences and/or clinical practice must be completed at a minimum of three different programmatic levels. The third programmatic level will be determined by the institution of higher education.

6.4.b.5.B. Any K-Adult program is required to contain clinical practice at both the elementary and middle or secondary levels. Field based experiences and/or clinical practice must be completed at a minimum of three different programmatic levels. The third programmatic level will be determined by the institution of higher education.

6.4.b.5.C. Any 5-Adult program is required to contain field based experiences and/or clinical practice at a minimum of two different programmatic levels.

6.4.b.5.D. Any 9-Adult program is required to contain field based experiences and/or clinical practice at a minimum of one programmatic level.

6.4.b.5.E. The elementary education specialization, K-6, is also exempt to the programmatic level coverage for required field based experiences at each programmatic level for which the candidate anticipates licensure. A placement in any grade including kindergarten and extending through grade six will satisfy the programmatic level requirement. This exception for elementary education cannot be used to satisfy the requirement for other specializations that require experiences in grades 5-9. If the candidate combines elementary education with another specialization, the required programmatic level placement for the other specialization must be satisfied. These required field based experiences must be of sufficient duration and quality to enable the candidate to practice and develop skills.

6.4.b.6. Clinical Experiences Completed in Non-Public Schools. - Each candidate completing an approved program shall spend a minimum of twelve weeks in the

clinical portion of the program unless s/he is able to demonstrate to the satisfaction of the college supervisor and the cooperating school supervisor that s/he has achieved the proficiency level in less than the specified time. The clinical experience must be completed under the direction of a teacher licensed to teach in the state in which the clinical experience is occurring. The candidate must be assessed during the clinical experience in a least one specialization for which s/he is requesting licensure. The institution is also required to document the candidates' field-based and/or clinical experiences with diverse (multi-cultural), at risk, and special needs learners at each programmatic level for which they anticipate licensure. Five exceptions to the programmatic level coverage for required field based experiences exist in the current system, as identified in Section 6.4.b.5.A-E of this policy.

6.4.b.6.A. Six Weeks of Clinical Experience Completed in a Public School and Six Weeks of Clinical Experience Completed in a Non-Public School. – Institutions of higher education that offer WVBE-approved educator preparation programs must place teacher candidates (student teachers) in a public school for the clinical experience for a minimum of six weeks or fulfill the requirements identified in Section 6.4.b.5.B. of this policy.

6.4.b.6.B. Twelve Weeks of Clinical Experience Completed in a Non-Public School. – Institutions of higher education that offer WVBE-approved educator preparation programs and place teacher candidates (student teachers) in a non-public school(s) such that the teacher candidates do not complete a minimum of six weeks of clinical experience in a public schools must complete the following requirements:

6.4.b.6.B.1. Two Hundred Clock Hours of Field-Based Experiences. - An institution whose teacher candidates do not complete a minimum of six weeks of clinical experience in a public school shall require teacher candidates to complete two hundred clock hours of field-based experiences in a public school, as defined in Section 6.4.b.5. of this policy, under the direction of a public school teacher licensed to teach in the state in which the field experiences are occurring.

6.4.b.6.B.2. Course for Teacher Candidates not Completing Six Weeks of Clinical Experience in the Public Schools. - Teacher candidates not completing a minimum of six weeks of clinical practice in a public school must complete a course which is a component of the institution's WVBE-approved educator preparation program that provides information sufficient to prepare the prospective teacher to demonstrate competence to teach in the public schools of West Virginia. The course shall include instruction in at least the following: State Board policy and provisions of W. Va. Code governing public education; requirements for federal and state accountability, including the mandatory reporting of child abuse; federal and state mandated curriculum and assessment requirements, including multicultural education, safe schools and the student code of conduct; federal and state regulations for the instruction of exceptional students, as defined by the Individuals with Disabilities Education Act; and varied approaches for effective instruction for students who are at-risk.

**§126-114-7. Alternative Preparation Program Requirements: General Education Teacher.**

7.1. General Requirements. - In accordance with W.Va. Code §18A-3-1a, an individual wishing to enroll in an alternative preparation program must meet the following criteria:

7.1.a. possess the minimum of a bachelor's degree, including bachelor's degrees based upon verification by a WVDE-approved foreign credential evaluating agency as specified in Policy 5202, in a field related to the area in which the individual seeks certification and from a regionally accredited institution of higher education, as defined in Section 5.15 of this policy; **AND**

7.1.b. meet the proficiency score(s) on the state competency exam(s) in preprofessional skills or qualify for an exemption as described in Section 6.2.c of this policy (Refer to Appendix E of this policy for a list of the required exams.); **AND**

7.1.c. meet the proficiency score(s) on the state competency exam(s) in content or qualify for an exemption as described in Policy 5202 in the area for which s/he is seeking certification or provide acceptable documentation of related life experiences to the entity providing the program for those content areas that do not have a required competency exam (Refer to Appendix E of this policy for a list of the required exams.); **AND**

7.1.d. be a citizen of the United States; be of good moral character and physically, mentally and emotionally qualified to perform the duties of a teacher, and have attained the age of eighteen years on or before the first day of October of the year in which the individual enrolls in the alternative preparation program; **AND**

7.1.e. is offered employment in a shortage area, as defined in Policy 5202, by a county school district; **AND**

7.1.f. complete a West Virginia State Police and Federal Bureau of Investigation background check.

7.2. Program Requirements. In accordance with W.Va. Code §18A-3-1a, a WVBE-approved alternative preparation program must contain the following phases and/or components and satisfy the WVBE-program approval requirements as specified in Section 12 of this policy:

7.2.a. Instruction. - The alternative preparation program must provide 18 semester hours of instruction in the areas of student assessment, development and learning, curriculum, classroom management, the use of educational computers and other technology, and special education and diversity. All programs must contain a minimum of three semester hours of instruction in special education and diversity out of the 18 required semester hours.

7.2.b. Phase I. - Phase I shall consist of a period of intensive on-the-job supervision by an assigned mentor and the school administrator for a period of not less than two weeks and no more than four weeks. The assigned mentor shall meet the requirements for mentor set forth in W.Va. Code §18A-3-2b and be paid the stipend pursuant to that section. During this time, the teacher shall be observed daily. This phase shall include an orientation to

the policies, organization and curriculum of the employing district. The alternative program teacher shall receive formal instruction in those areas listed in Section 7.2.a of this policy during Phase I.

7.2.c. Phase II. - Phase II shall consist of a period of intensive on-the-job supervision beginning the first day on which the alternative program teacher completes Phase I and continuing for a period of at least ten weeks. During Phase II, the alternative program teacher shall be visited and critiqued no less than one time per week by members of a professional support team, defined in Section 7.3 of this policy, and shall be observed and formally evaluated at the end of five weeks and at the end of ten weeks by the appropriately certified members of the team. At the end of the ten-week period, the alternative program teacher shall receive a formal written progress report from the chairperson of the support team. The alternative program teacher shall receive formal instruction in those areas listed in Section 7.2.a of this policy during Phase II.

7.2.d. Phase III. - Phase III shall consist of an additional period of continued supervision and evaluation of no less than 20 weeks duration. The professional support team will determine the requirements of this phase with at least one formal evaluation being conducted at the completion of the phase. The alternative program teacher shall receive formal instruction in those areas listed in Section 7.2 of this policy during Phase III and receive opportunities to observe the teaching of experienced colleagues.

### 7.3. Professional Support Team.

7.3.a. Composition of Professional Support Team. - The professional support team shall be comprised of a school principal, an experienced classroom teacher who satisfies the requirements for mentor for the Beginning Education Internship as specified in W.Va. Code §18A-3-2b, a college or university education faculty member and a curriculum supervisor. Districts or schools that do not employ curriculum supervisors or have been unable to establish a relationship with a college or university shall provide for comparable expertise on the team. The school principal shall serve as chairperson of the team.

7.3.b. Evaluation of Alternative Program Teacher. - The professional support team shall submit a written evaluation of the alternative program teacher to the county superintendent. The written evaluation shall be in a form specified by the county superintendent and submitted on a date specified by the county superintendent that is prior to the first Monday of May. The evaluation shall report the progress of the alternative program teacher toward meeting the academic and performance requirements of the program.

7.3.c. Training of Professional Support Team. - The training for professional support team members shall be coordinated and provided by the Center for Professional Development, hereinafter CPD, in coordination with the school district, consortium of schools, regional education service agency, and institution of higher education, or any combination of these agencies as set forth in the plan approved by the WVBE.

7.4. Alternative Preparation Program Providers. - A college or university, school, school district, consortium of schools, and/or regional education service agency seeking to employ an alternative program teacher must submit a plan to the WVBE and receive approval in accordance with W.Va. Code §18A-3-1a.

**§126-114-8. Alternative Preparation Program Requirements: Special Education Teacher.**

8.1. General Requirements. - In accordance with W.Va. Code §18A-3-1a for special education teachers, an individual wishing to enroll in an alternative preparation program must meet the following criteria:

8.1.a. possess the minimum of a bachelor's degree, including bachelor's degrees based upon verification by a WVDE-approved foreign credential evaluating agency as specified in Policy 5202, from a regionally accredited institution of higher education, as defined in Section 5 of this policy; AND

8.1.b. meet the proficiency score(s) on the state competency exam(s) in preprofessional skills or qualify for an exemption as described in Section 6.2.c. of this policy (Refer to Appendix E of this policy for a list of the required exams.); AND

8.1.c. be a citizen of the United States; be of good moral character and physically, mentally and emotionally qualified to perform the duties of a teacher, and have attained the age of eighteen years on or before the first day of October of the year in which the individual enrolls in an alternative preparation program; AND

8.1.d. complete a West Virginia State Police and Federal Bureau of Investigation background check pursuant to W.Va. Code §18A-3-10.

8.2. Program Requirements. - In accordance with W.Va. Code §18A-3-1a, alternative programs for the preparation of special education teachers may be developed to prepare such teachers for the special education teacher's role in providing and supporting the delivery of instructional services to students with disabilities. In order to assure learning at a high level for all students, the standards specified in Appendix A-2 of this policy shall be followed for the preparation of alternatively prepared special education teachers.

8.2.a. All alternative preparation programs leading to licensure in special education shall include a minimum of 21 semester hours of instruction in research-based reading strategies (minimum of six semester hours), research-based mathematics strategies (minimum of three semester hours), legal foundations and introduction to special education (minimum of three semester hours), diagnostic evaluation and early intervention strategies (minimum of three semester hours), and consultation (minimum of three semester hours). Programs shall also contain instruction focused on developing IEPs with WVBE content standards and objectives, differentiated instruction, and Positive Behavioral Interventions and Supports.

8.2.b. For currently certified special education teachers who lack content preparation in the area(s) in which they are currently teaching, alternative programs may be

developed to provide these teachers with instruction in the necessary content. These programs shall incorporate professional development to the maximum extent possible to provide the necessary content preparation.

8.2.c. For teachers not currently certified in special education, alternative programs may be developed in accordance with Section 8.2.a. of this policy to provide these teachers with instruction in the skills necessary to provide and support the delivery of instructional services to students with disabilities. At the conclusion of the alternative preparation program, teachers completing this program shall be required to meet the proficiency score(s) on the appropriate state competency exam(s) in special education as identified in Appendix E of this policy.

8.2.d. For individuals not currently licensed, alternative programs may be developed in accordance with Section 8.2.a. of this policy to provide these individuals with instruction in the skills necessary to provide and support the delivery of instructional services and content to students with disabilities. At the conclusion of the alternative preparation program, individuals shall be required to meet the proficiency score(s) on the appropriate state competency exam(s) in special education and professional education as identified in Appendix E of this policy.

8.3. Alternative Preparation Program Providers. - The WVDE, a college or university, school, school district, consortium of schools, and/or regional education service agency seeking to employ and/or prepare an alternative program teacher must submit a plan to the WVBE and receive approval in accordance with W.Va. Code §18A-3-1a.

#### **§126-114-9. Professional Educator Preparation Program Requirements: Student Support and Administration.**

9.1. Program Components. - All student support and administrative preparation programs shall consist of three (3) components: preprofessional skills, content specialization, and professional education. The three (3) components, including the associated educational technology and skills, are necessary to satisfy WVBE-approved program requirements.

9.2. Preprofessional Skills Component. - All provisions of this component described for teaching specializations (see Section 6.2 of this policy) apply for student support and administrative specializations.

9.3. Content Specialization Component. - All provisions of this component described for teaching specializations (see Section 6.3 of this policy) apply for student support and administrative specializations except in Section 6.3.a, item 3 of this policy, WVBE content standards and objectives for the public school curriculum pertaining to the specializations.

9.3.a. Instructional Technology Content in Administrator Preparation. All administrator preparation programs must contain a minimum of three semester hours of preparation in instructional technology which incorporate the standards identified in Appendix C-2 of this policy.

#### 9.4. Professional Education Component.

9.4.a. Component Description. - The professional education component for student support services and administrative programs prepares the candidate to integrate the professional pedagogy and the specialization knowledge and skills in an educational setting for the delivery of effective student support services programs or effective leadership roles in an educational setting. The professional education standards are listed in Appendices A-3 and A-4 of this policy.

9.4.b. Component Assessment. - The component shall be assessed as part of the program review process.

9.4.b.1. Performance assessment instruments and procedures shall be developed at the institutional level and procedures for their administration shall be based on the professional education standards in Appendix A of this policy and those performance indicators that are implied in the content specialization standards.

9.4.b.2. The acceptable proficiency level on the professional performance assessment shall be established collaboratively by public school administrators, student support personnel or administrators, and teacher education faculty.

#### 9.4.c. Educator's Assessment and Proficiency Levels.

9.4.c.2. Professional Knowledge Assessment and Proficiency Levels. - Each candidate completing a WVBE-approved program shall be assessed using the institution's performance instrument(s) and procedures developed collaboratively with cooperating public school personnel. A candidate for a student support services specialization is required to complete a performance assessment in each specialization for which licensure is requested. The specialization will be the PreK-Adult programmatic level, therefore, the performance assessment may be completed at any programmatic level.

9.4.c.3. The performance assessments for administrative endorsements shall be administered by a local team composed of the higher education supervisor and public school cooperating personnel or their specified designee. When a public school cooperating educator is not available to administer the performance assessment, higher education may designate an institution-based clinical supervisor in lieu of the public school supervisor. Verification that the candidate has attained the proficiency level shall be determined by both college supervisor and cooperating public school personnel, except where the institution-based clinical supervisor is used under the conditions noted.

### **§126-114-10. Additional Program Requirements.**

10.1. Program Admission, Retention and Exit criteria. - Admission, retention and exit criteria for educational personnel preparation programs shall be determined by the institutions' written policies.

10.2. EPPAC. - Each institution of higher education that offers a WVBE-approved educational personnel preparation program shall have an EPPAC which consists of representatives from college and university educators, teacher education students, public school administrators and classroom teachers, and community representatives. The WVDE shall appoint a liaison to serve as a member of each institution's EPPAC. The liaison to the institution from the WVDE shall serve in a nonvoting role. EPPAC serves as an advisory body to the institution's chief educational personnel preparation officer in developing and reviewing all programs and policies for the preparation of educational personnel with the institution. The EPPAC shall meet at least once a semester and shall review matters pertaining to the preparation and licensure of personnel including the following:

10.2.a. New and revised preparation programs.

10.2.b. Admission, retention and exit criteria.

10.2.c. Preprofessional skills, content specialization, and professional education assessments.

10.2.d. Educational technology activities and assessments.

10.2.e. Annual testing and supply/demand reports.

10.2.f. WVBE and national program reviews and findings.

10.2.g. WVBE educational preparation and licensure policies and statutes.

10.2.h. Recruitment of students.

10.2.i. Clinical and field experiences.

10.2.j. Development and preparation of policies and programs for inclusion in WVBE self-study materials.

10.2.k. Program Modifications. - Substantive program modification, (e.g., addition or deletion of courses, significant changes in course content or clinical experiences), must be submitted to the EPPAC for review. Following the EPPAC review, the institution's administrator for educational personnel preparation programs shall submit a letter summarizing the nature of changes and new curriculum summary sheet to the WVBE. Substantive program modifications that consist of the addition, deletion and/or modification of greater than six semester hours of course work must be submitted to and reviewed by the Educator Preparation Program Review Board. After its review of proposed program modifications, the Educator Preparation Program Review Board will submit its recommendation for acceptance or rejection of the proposed changes to the WVBE. The WVDE shall acknowledge by letter to the institution's administrator for education personnel preparation program the WVBE's acceptance or rejection of the modification. If accepted, the modification shall be incorporated into the

institution's approved program materials on file at the state. Any changes made to an existing WVBE-approved educational personnel preparation program shall be included in the institution's annual report submitted to the WVDE.

10.2.1. An executive summary, including supporting appendices of all EPPAC meetings, shall be included in the institution's annual report.

10.3. Second Field/Programmatic Level Requirements. - An institution may offer a specialization at a single or at multiple programmatic levels as indicated in Appendix D of this policy. However, the institution may establish an institutional policy related to the number of programmatic levels and specializations required for a candidate to satisfy an approved program and recommendation for licensure except for specializations identified in Section 10.4 of this policy.

10.4. Specialization Prerequisites, Restrictions and Timelines.

10.4.a. Gifted. - Gifted education must be taken in combination with a general education specialization leading to an endorsement on a Professional Teaching Certificate. The gifted education endorsement shall be issued for the 1-12 grade levels. Individuals admitted to teacher preparation programs in gifted must hold, qualify for or simultaneously complete a specialization in biology, chemistry, early childhood, elementary education, English, general science, mathematics, physics, reading education, reading specialist and/or social studies as recognized on a Professional Teaching Certificate.

10.4.b. Middle Childhood (5-9). - A middle childhood (5-9) program (i.e., English 5-9, general science 5-9, mathematics 5-9, social studies 5-9) must be taken in combination with another general education specialization leading to an endorsement on a Professional Teaching Certificate.

10.4.c. Reading Education - Reading education must be taken in combination with a general education specialization leading to an endorsement on a Professional Teaching Certificate. The reading education endorsement shall reflect those grade levels that appear on an individual's Professional Teaching Certificate as they relate to the general education endorsement(s).

10.4.d. Special Education. - Effective January 1, 2006, individuals admitted to teacher preparation programs in autism, emotional/behavior disorders (excluding autism), mental impairments (mild/moderate), multi-categorical and specific learning disabilities must hold, qualify for or simultaneously complete a specialization in biology, chemistry, early childhood, elementary education, English, general science, mathematics, physics, reading education, reading specialist and/or social studies as recognized on a Professional Teaching Certificate. Individuals completing an early childhood or elementary education specialization in conjunction with one or more of the special education specializations identified in this section will be granted their special education specialization(s) for the (K-6) programmatic level. Individuals completing one or more of the secondary specializations identified in this section with one or more of the special education specialization(s) identified in the section will be granted their special education

specialization(s) for the (5-Adult) programmatic level. If an individual does not hold any of the endorsements identified in this section, s/he must complete a restricted content endorsement offered through the WVDE in biology, English, general science, mathematics and/or social studies in conjunction with the special education 5-Adult program.

#### 10.5. Program Requirements, Assessments and Test Scores.

10.5.a. Validity Period. - The validity period for a test and a passing score is ten years from the date on which the candidate passed the assessment. In those circumstances where the WVBE has not altered either the required test or the passing score, the test and score shall remain valid beyond the ten-year period. A candidate whose test scores exceed the ten-year validity period at the time of application for licensure is required to satisfy current tests, passing scores and any changes in the program requirements.

10.5.b. Failure to Apply for Licensure. - A candidate who fails to apply for licensure within 12 months from the date of eligibility for licensure is required to satisfy any additional test and program components in effect at the time of application and to comply with conditions outlined for the validity periods.

10.5.c. New Specializations on a Professional Certificate. - A candidate who wishes to add a new specialization to his or her Professional Teaching Certificate is required to satisfy the approved program content requirements and the testing requirements for the new content specialization if a test is available. It is assumed that a candidate who holds a Professional Teaching Certificate has previously satisfied requirements in the Professional Education and Preprofessional Skills components and that a candidate who holds either the Professional Service or Professional Administrative Certificate has satisfied the Preprofessional Skills component. Institutions may modify this requirement for a candidate seeking an additional specialization based on the candidate's work or career experiences. In addition to satisfying the approved program content requirements and testing requirements for the new content specialization, if available, individuals wishing to add a new specialization to the Professional Teaching Certificate must also complete a supervised practicum which includes a performance assessment. Institutions of higher education will determine the method for and the amount of clinical and/or field-based experiences necessary to satisfy the requirements specified in Section 6.4.b.2.

10.5.d. Substitution of National Evaluation Systems (NES) Content Test in Special Education for Praxis II Education of Exceptional Students: Core Content Knowledge Test. – A candidate who successfully completed the NES test in emotional/behavior disorders, mentally impaired or specific learning disabilities is not required to satisfy the Praxis II Education of Exceptional Students: Core Content Knowledge Test since it is assumed this content was included in the NES special education content test.

10.5.e. Substitution of Praxis II Education of Exceptional Students: Core Content Knowledge Test (0351) for Praxis II Education of Exceptional Students: Core Content Knowledge (0353). – A candidate who successfully completed the Praxis II Education of Exceptional Students: Core Content Knowledge Test (0351) prior to September 2010 is not

required to satisfy the Praxis II Education of Exceptional Students: Core Content Knowledge Test (0353) since it is assumed this content was included in the Praxis II 0351 test.

**§126-114.11. Authorization and Accreditation Requirements.**

11.1. Institutional Authorization. - A publicly supported institution of higher education must be authorized by its governing board to offer a preparation program(s) leading to West Virginia licensure. In the case of private institutions, a letter from the chief executive officer of the institution authorizing the program offering must be provided.

11.2. Institutional Accreditation. - An institution offering WVBE-approved programs must hold regional accreditation as defined in Section 5.15 of this policy.

**§126-114-12. Educator Preparation Program Approval Process.**

12.1. Granting of Approved Program Status. - The WVBE is the statutory body with the authority to recognize educational personnel preparation programs leading to the licensure of educators to serve in the public schools of West Virginia. The Educator Preparation Program Review Board will recommend approval status to the WVBE consistent with the program classification and procedure contained in WVBE policies.

12.2. Initial Program Approval.

12.2.a. Request for Institutional Approval. - An institution that does not currently offer WVBE approved programs may notify the WVBE of its desire to offer such programs. This notification must be submitted in writing to the WVBE as least one year prior to the anticipated implementation date of the proposed program(s).

12.2.b. Prerequisite Requirements. - An institution seeking approval to offer WVBE-approved educational personnel preparation programs must meet authorization and accreditation requirements indicated in §126-114-11 prior to the review of the proposed program.

12.2.c. Self-Study. - Self-study and program approval procedures and requirements for a new institution are described in administrative guidelines available from the WVBE.

12.2.d. On-site Review. - New institutions are required to submit to an on-site review by a WVBE team, which cannot consist of an Educator Preparation Program Review Board member, in order to begin the implementation of an approved educational personnel preparation program and must be reviewed again at the end of the five-year period.

12.2.e. Program Status. - At the end of the five-year period, and based on the on-site review, the WVBE will reclassify the program as “continuing” or “conditional” status. If conditional approval is granted, the unit must schedule an on-site visit within two years of the semester in which the conditional approval decision was rendered. The unit, as a part of this

visit, must address all WVBE policies in effect at the time of the conditional approval review at the two-year point. This visit will result in a recommendation for either Continuing Approval or program termination.

### 12.3. Continuing Program Approval.

12.3.a. Program Review Agreements for Institutions Holding or Seeking NCATE Accreditation. - The WVBE is committed to working collaboratively with West Virginia institutions (public and private) that hold or are seeking NCATE accreditation for the purpose of minimizing duplication in the WVBE and NCATE review processes. Hence, the WVBE shall enter into agreements with the higher education governing boards and/or their institutions, separately or collectively, for the purpose of coordination of review procedures. Such agreements shall include, but are not limited to training a pool of qualified educator preparation program assessors/examiners drawn from higher education institutions and public schools, program review timetables, format and content of institutional reports, selection/appointment, number and role of joint (state and NCATE) review team members and the reporting of program review results.

12.3.b. Program Review Agreements for Institutions Holding or Seeking TEAC Accreditation. - The WVBE is committed to working collaboratively with West Virginia institutions (public and private) that hold or are seeking TEAC accreditation for the purpose of minimizing duplication in the WVBE and TEAC review processes. Hence, the WVBE shall enter into agreements with the higher education governing boards and/or their institutions, separately or collectively, for the purpose of coordination of review procedures. Such agreements shall include, but are not limited to training a pool of qualified educator preparation program assessors/examiners drawn from higher education institutions and public schools, program review timetables, format and content of institutional reports, selection/appointment, number and role of joint (state and TEAC) review team members and the reporting of program review results.

12.3.c. Program Review Agreements for non-NCATE and non-TEAC Institutions. The WVDE shall coordinate the review of educational personnel preparation programs offered by non-NCATE and non-TEAC institutions at least every seven years. The WVDE shall establish time lines related to the submission of data and other documentation of the institution's compliance with West Virginia Educator Preparation Program Standards, program approval criteria, the scheduling of program reviews, the role of state team review members, and procedures for the reporting of program review results. The state team members shall be selected and appointed from a pool of qualified educator preparation program assessors/examiners drawn from higher education institutions and public schools by the WVDE.

12.3.d. Review of WVBE-Approved Programs at the Discretion of the WVDE. – The WVDE may determine that a review of WVBE-approved programs is necessary at a time that does not coincide with the institution's seven-year review scheduled through the NCATE, TEAC or WVDE continuing program review process. At its discretion, the WVDE may assemble a team of representatives from the WVDE, higher education and the public schools to review any matters of concern identified by the WVDE.

**§126-114-13. Educator Preparation Program Review Board.**

13.1. Educator Preparation Program Review Board Purpose. - The WVBE has created the Educator Preparation Program Review Board to make recommendations to the WVBE regarding initial and continuing educator preparation program approval.

13.2. Educator Preparation Program Review Board Composition. - The Educator Preparation Program Review Board shall be comprised of seven members selected from a pool of trained educator preparation program assessors/examiners; three members shall represent higher education (two representatives appointed by the West Virginia Higher Education Policy Commission and one representative appointed by the West Virginia Independent Colleges and Universities) and three members shall represent public education, grades PreK-Adult, appointed by the WVBE. Each year the chairperson of the WVCPTS shall appoint a higher education representative of the WVCPTS to the Educator Preparation Program Review Board. The terms of the Educator Preparation Program Review Board members shall be for three years. An Educator Preparation Program Review Board member must exempt himself/herself from deliberations and actions related to an institution's status if s/he is an employee of that institution or served as a team member during the institution's program review. Educator Preparation Program Review Board members may not be appointed to serve more than two consecutive terms.

13.3. Educator Preparation Program Review Board Functions. - The primary functions of the Educator Preparation Program Review Board are to: 1) review the findings of the State Team Reports from the state on-site reviews or other documents deemed appropriate or relevant to the approval status of the educational personnel preparation program; 2) review proposed content specializations; 3) solicit from institutional staff and/or team members clarification on questions that might arise during the review of materials; and 4) recommend approval to the WVBE for only those educational personnel preparation programs and/or their components which satisfy the WVBE criteria.

13.4. Educator Preparation Program Review Board Procedures. - The Educator Preparation Program Review Board member must exempt himself/herself from deliberations and actions related to an institution's status if s/he is a current employee of that institution or served as a team member during the institution's initial program review. The Educator Preparation Program Review Board shall meet at least once each semester unless no materials have been submitted to it for review and recommendation. Any new content specialization recommended for implementation will be recommended for approval until the institution's next state on-site review. If the Educator Preparation Program Review Board determines and verifies in its written report that a proposed new content specialization has serious weaknesses or lacks verification that the standards have been met, the Educator Preparation Program Review Board may withhold its recommendation for program implementation. When the findings in the State Team Report verify that a content specialization and/or its components have serious weaknesses or the program lacks adequate documentation validating that the program is in compliance with the West Virginia Educator Preparation Program Standards, the Educator Preparation Program Review Board may withhold its recommendation to the WVBE to grant continuing program

approval. Procedures for the operation of the Educator Preparation Program Review Board are outlined in the Guidelines for the Submission of New Content Specialization and the Guidelines for On-site Review Procedures.

#### **§126-114-14. Annual Reports.**

14.1. Annual Reports. - Each institution with a WVBE-approved program shall report annually to the WVBE on its progress to: a) meet any program component standards that are not fully met as identified by the Educator Preparation Program Review Board for new content specializations and/or reports from the state on-site review team, b) implement new legislative or WVBE initiatives or policies that impact the qualifications and preparation programs for new educational personnel, c) address any new program criteria that require implementation by the institution prior to the comprehensive or continuing on-site reviews, and d) maintain current program descriptions by identifying the major changes and initiatives undertaken during the past academic year. In addition to progress indicators, each institution shall contribute annually to the database related to the licensure and preparation of educational personnel and to the follow-up of the institution's graduates to ensure an adequate assessment of West Virginia's supply and demand for educational personnel. Data collected from institutions shall include, but not be limited to, demographics of the teacher candidates; the average raw score of candidates admitted to the program on the preprofessional skills test (taken prior to program admission); the number of candidates entering and completing student teaching in a reporting year; the number of graduates who passed state licensing exams (subject matter and pedagogy); the satisfaction rating by cooperating teachers on student teachers from the institution; the average raw score of candidates on subject matter and pedagogy exams; evidence that the program informs candidates of certification areas that are identified as low-need areas; and evidence that the program encourages candidates to pursue certification in high-shortage areas. Additional data to be collected shall include initiatives underway in the unit and the unit's involvement with P-12 schools. The WVBE shall review the annual reports for compliance with the WVBE criteria specified for the annual report and for ongoing performance indicators. If the WVBE has concerns about the quality of the program based on these reports or other accepted performance indicators, these concerns shall be identified in a written notice to the institution. Any weakness and/or concerns identified through the program approval process shall be monitored annually by the WVBE.

14.2. Noncompliance. - An institution that fails to submit or to meet the criteria for any WVBE and/or national report or monitoring is subject to having the institution's program approval status withdrawn in addition to paying the required federal fines. When an institution fails to submit the required information, the WVBE may recommend an alteration in the program's approval status to the WVBE for review and action.

#### **§126-114-15. Procedures for Initiating a New Content Specialization.**

15.1. Authorization. - An institution currently delivering approved educational personnel preparation programs must obtain approval from its governing board for the implementation of any new program prior to seeking review by the authorized agency. All institutions participating

in the collaborative delivery of a program shall obtain the authorization of their respective boards.

15.2. Self-Study. - The institution must develop a self-study that addresses all criteria established in the self-study guidelines for new content specializations. EPPAC review of the new content specialization must be documented.

15.3. Educator Preparation Program Review Board. - The self-study shall be submitted to the Educator Preparation Program Review Board for review. Upon review of the self-study, the Educator Preparation Program Review Board may:

15.3.a. Recommend to the WVBE that the program be implemented, with or without conditions; **OR**

15.3.b. Require additional documentation (written and/or as a result of an on-site review) to further determine the program's readiness for implementation; **OR**

15.3.c. Require additional program development before the program is recommended for implementation. The institution may request technical assistance from the authorized agency as provided in Section 18 of this policy.

**§126-114-16. Procedures for Initiating an Experimental Program or for Conducting Research on Components on Implementation Procedures within Current Policy.**

16.1. Experimental Programs. - An institution currently operating approved educational personnel preparation programs may seek approval for an experimental personnel preparation program in a teaching, student support services or administrative area where there is no current WVBE approved specialization leading to West Virginia licensure provided the self-study contains sufficient justification to warrant the new specialization. The institution is encouraged to collaborate with the WVDE during the program's initial planning stage. The institution must identify the program objectives for the experimental program from which the curriculum shall be developed. All aspects for the review and approval of an experimental program, other than WVBE adopted program objectives, are the same as those outlined in Section 15 of this policy for a new content specialization. The experimental program's self-study must comply with the guidelines adopted by the WVDE.

16.2. Research Options. - An institution operating approved educational personnel preparation programs may seek approval for a waiver from component requirements and or procedures in current policy for research purposes to determine if the alternative described in the waiver prepares candidates who are equal to or better than candidates subject to policy guidelines. Such request must be in writing and submitted to the Educator Preparation Program Review Board.

16.3. Program Guidelines. - An institution that seeks approval to offer an experimental program or a waiver of current policy must submit the proposal in research format by clearly indicating the objective of the project, the persons and agencies involved, the duration of the

project, the assessment procedures and time lines, and the project coordinator. The institution must also agree to prepare and submit a summary of its findings to the Educator Preparation Program Review Board, the WVCPTS and the WVDE.

**§126-114-17. Educator Preparation Program Approval Waiver.**

17.1. Waivers for new programs may be granted based on critical teacher shortage areas.

**§126-114-18. Technical Assistance.**

18.1. Technical Assistance in Program Development. - At the request of a West Virginia educational personnel preparation institution, the WVDE shall provide technical assistance for purposes of program development.

**§126-114-19. Federal Monitoring.**

19.1. Recent federal legislation will require the WVDE to conduct institutional monitoring following federally established guidelines. Federal monitoring requirements will be implemented pursuant to the procedures set forth in this policy whenever possible.

**§126-114-20. Severability.**

20.1. If any provision of this rule or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of this rule.

**APPENDIX A-1****Conceptual Foundation  
For Teaching and Learning in West Virginia****Vision Statement**

All students will achieve their maximum potential in order to become life-long learners and productive, responsible citizens. Therefore, it is fundamental to the interests of West Virginia's children to collaboratively maintain a thorough, efficient and accountable comprehensive educational system that meets the needs of West Virginia's future.

**Core Beliefs**

The education system in West Virginia is founded in the following beliefs about children, teaching, and learning:

- Students master core subjects in a contemporary context.
- Instruction always includes content in a contemporary context through the incorporation of relevant examples, applications and settings.
- Extensive contemporary content is available and used by students, including global awareness, civic and business literacy.
- Where applicable, schools create 21<sup>st</sup> century content that is relevant to the economic needs of their region, such as biotechnology, manufacturing or agricultural technology.
- Educational objectives and teaching strategies emphasize the integration of learning skills and 21<sup>st</sup> century tools, which comprises information, technology and communication (ITC) literacy.
- Learning skills and 21<sup>st</sup> century tools are used together to enable students to effectively build content knowledge.
- Through integrating learning skills and 21<sup>st</sup> century tools, students are able to do such things as access and communicate information, manage complexity, solve problems and think critically and creatively.
- 100% of students have access to 21<sup>st</sup> century tools.
- All assessment is learner-centered, formative, context-specific, ongoing and rooted in teaching strategies.

- All teachers use classroom assessments that demonstrate evidence of student performance in core subjects and 21<sup>st</sup> century skills.
- All teachers share with parents and students the information needed to monitor student progress in achieving learning goals.
- Students, teachers and parents always collaborate to monitor student progress in achieving learning goals and use assessment to evaluate long-term student progress.
- Most assessments use technology and record student performance as a means of tracking information over time.
- Teachers act as facilitators, resources and partners for teaching and learning.
- All teachers use adaptable and flexible teaching and learning strategies that integrate 21<sup>st</sup> century skills.
- All teachers act as role models in the application and use of 21<sup>st</sup> century skills.

*Adopted from the Partnership for 21<sup>st</sup> Century Skills*

## APPENDIX A-2

### West Virginia Professional Teaching Standards

Teachers play a new professional role as facilitators of education to assure that every student has the opportunity for success in life and in work in this global society. These professional teaching standards are the basis for teacher preparation, assessment of teacher practice and professional development. Professional teaching standards provide a common language that describes what a teacher needs to know and be able to do. The curriculum for West Virginia higher education teacher preparation programs that lead to certification should reflect, and be aligned to, these teaching standards.

#### Professional Teaching Standards:

These professional teaching standards provide the expectation that every West Virginia teacher will demonstrate expertise in five broad areas that are the basis for what teachers must know and be able to do:

- **Curriculum and Planning**
- **The Learner and the Learning Environment**
- **Teaching**
- **Professional responsibilities for self-renewal**
- **Professional responsibilities for school and community**

#### Standard 1: Curriculum and Planning

The teacher displays deep knowledge of the core content skills and tools and designs instructional experiences that move beyond a focus on basic competency in the subject to include, as appropriate, the integration of 21<sup>st</sup> century interdisciplinary themes of global awareness, economic, business and entrepreneurial literacy, civic literacy and health literacy. Knowledge of content is absolutely necessary for good teaching, but it must be combined with an understanding of the complex and sophisticated relationships within the content, and must be made relevant to the learner. The teacher designs instruction that is aligned with the West Virginia Content Standards and Objectives and uses a standards-based approach to instruction supported by a variety of instructional resources that may include textbooks. Information media and technology tools are frequently incorporated into lesson design and teaching strategies are supported by a variety of technologies that promote self-directed learning, problem solving and collaboration. A balanced instructional assessment program is designed to assist students to achieve mastery of and depth of knowledge in the West Virginia Content Standards and Objectives. The teacher uses knowledge of content, process and 21<sup>st</sup> century learning skills to move beyond being a *provider* of knowledge to being a *facilitator* of learning. Experiences are created to advance student learning and systems thinking through processes such as critical thinking, collaboration and problem solving that encourage creativity, innovation and self-direction.

**Function 1A: Core Content** – *The teacher has a deep knowledge of the content and its inter-relatedness within and across the disciplines and can move beyond basic content competency to assure student mastery of skills necessary for success in life and work.*

**Function 1B: Pedagogy** – *The teacher has a deep knowledge of the art and science of teaching in his/her specific content and can facilitate experiences that advance creativity, innovation and problem-solving.*

**Function 1C: Setting Goals and Objectives for Learning** – *The teacher uses a standards-based approach to instruction aligned with the state and local curriculum and sets instructional goals and objectives that describe what students will learn.*

**Function 1D: Designing Instruction** – *The teacher designs instruction that engages student in meaningful instructional activities using the WV Content Standards and Objectives and resulting in intentional student learning.*

**Function 1E: Student Assessments** – *The teacher uses a balanced approach to assure both assessment of learning and assessment for learning to provide both teacher and students information to guide future learning.*

## **Standard 2: The Learner and the Learning Environment**

The teacher demonstrates knowledge of the underlying principles of how students develop and learn and creates an environment that supports the learning of all students. The teacher sets high expectations based on a conceptual understanding of what is developmentally appropriate for all students. The teacher establishes a learning culture that allows all students to be successful while respecting their differences in learning styles, socio-economic, cultural and developmental characteristics. That respect for diversity is apparent in the design of the learning environment – the activities and tasks, the materials and the student groupings—to assure student learning.. The learning environment is characterized by effective classroom procedures, the appropriate use of technology and efficient management of behaviors and physical space. Students’ misconceptions and misunderstanding of concepts are addressed in the lesson design to assure that the appropriate next steps in learning are taken. Students are encouraged to collaborate and to assume responsibility for their positive interaction in the learning environment.

**Function 2A: Understanding intellectual/cognitive, social, and emotional development** – *The teacher’s understanding of the unique characteristics of the learner is evidenced in the design of learning activities which are developmentally appropriate and differentiated to engage all students in the learning process.*

**Function 2B: Creating an environment of respect and rapport** – *The teacher shows respect for students by having high expectations, providing management frameworks that clearly define roles and procedures, using respectful language, communicating interest in students as individuals and encouraging student collaboration.*

**Function 2C: Establishing a culture for learning** – *The teacher establishes a culture in the learning environment that is focused on learning and that reflects the importance of the work undertaken by both students and the teacher.*

**Function 2D: Implementing classroom procedures** – *The teacher assures that rules and procedures are in place for a smoothly functioning learning environment evidenced by the efficient use of time and resources.*

**Function 2E: Managing student behaviors** – *The teacher collaborates with students to establish norms of behavior for the learning environment that assures a focus on learning.*

**Function 2F: Organizing the learning environment** – *The teacher assures that the physical or virtual learning environment is safe, and that there is maximum flexibility in the use of physical space in a physical learning environment.*

### **Standard 3: Teaching**

The teacher displays a deep knowledge of content that, when combined with the knowledge of teaching and knowledge of the learner and the learning environment, enables the development of instructional experiences that create and support the best possible opportunities for students to learn. The instructional delivery methods and tools are appropriate for the type of learning target and the teacher facilitates a challenging and active learning environment and encourages students to make decisions regarding their own learning. The teacher selects questioning, discussion, pacing, and grouping techniques that engage all students and elicit clear evidence of their learning.

The teacher engages in the instructional cycle of planning, instructing, assessing and adjusting based on data. The teacher extracts data from ongoing formative/classroom assessments to inform and adjust instruction for intervention, enrichment, or the next acquisition lesson. The teacher uses summative assessment data to measure student progress toward mastery of the West Virginia Content Standards and Objectives. The teacher provides timely, specific descriptive feedback through classroom assessment *for* learning practices, thus enabling students to self-assess and set their own goals. Excitement about learning is not only demonstrated in the instruction, but also by the engagement of the students in learning activities that are relevant and based on individual needs and learning characteristics.

**Function 3A: Importance of Content** – *The teacher utilizes content knowledge to focus learning targets that create meaningful learning experiences for students.*

**Function 3B: Communicating with Students** – *The teacher creates and maintains a positive, supportive classroom climate and communicates with students in a variety of ways.*

**Function 3C: Questioning and Discussion Techniques** – *The teacher practices quality questioning techniques and engages students in discussion.*

**Function 3D: Student Engagement** – *The teacher delivers instruction to motivate and engage students in a deep understanding of the content.*

**Function 3E: Use of Assessments in Instruction** – *The teacher uses both classroom summative and formative assessment as a balanced approach to instructional decision making.*

**Function 3F: Demonstrating Flexibility and Responsiveness** – *The teacher adjusts instruction based on the needs of the students and in response to “teachable moments.”*

#### **Standard 4: Professional Responsibilities for Self-Renewal**

The teacher persistently and critically examines their practice through a continuous cycle of self-improvement focused on how they learn, teach and work in a global and digital society. The teacher is responsible for engaging in professional, collaborative self-renewal in which colleagues, as critical friends, examine each other’s practice in order to adjust instruction and practice based on analysis of a variety of data. Participation in this form of professional dialog enables teachers to discover better practice, be supported by colleagues in engaging in that practice, and significantly contribute to the learning of others as members of a professional learning community. Teachers contribute to the teaching profession through the implementation of practices that improve teaching and learning.

**Function 4A: Professional Learning** – *The teacher engages in professional learning to critically examine his/her professional practice and to engage in a continuous cycle of self-improvements focused on how to learn, teach and work in a global and digital society.*

**Function 4B: Professional Collaborative Practice**– *The teacher is actively engaged in learning with colleagues in a way that models collaboration and collegiality to improve his/her practice for the purpose of addressing questions/issues related to the school and student achievement.*

**Function 4C: Reflection on Practice** – *The teacher engages in continuous critical examination of his/her teaching practice and makes adjustments based on data.*

**Function 4D: Professional Contribution** – *The teacher contributes to the effectiveness, vitality and self-renewal of the teaching profession through investigation of new ideas that improve teaching practice and learning for students.*

#### **Standard 5: Professional Responsibilities for School and Community**

The teacher’s primary responsibility is to create and support a learning environment that allows students to achieve at high levels; however, every teacher also has a primary responsibility for the improvement of the school in which they work. The teacher uses the strategic plan as a guide to help sustain the mission and continuous improvement of the school and thereby contributes to shaping a cohesive, learner-centered culture. Through a commitment to group accountability,

the teacher helps develop and maintain student support, management and assessment systems that enable learning to take place. A teacher's professional responsibilities also include working collaboratively with colleagues, parents, guardians and adults significant to students, on activities that connect school, families and the larger community. The teacher demonstrates leadership by contributing to positive changes in policy and practice that affect student learning and by modeling ethical behavior.

**Function 5A: School Mission** – *The teacher works collaboratively with the principal and colleagues to develop and support the school mission.*

**Function 5B: School-wide Activities** – *The teacher participates in the development and implementation of school-wide initiatives in curriculum, instruction and assessment.*

**Function 5C: Learner-Centered Culture** – *The teacher participates in activities and model behaviors that build and sustain a learner-centered culture.*

**Function 5D: Student Support Systems** – *The teacher works collaboratively with the principal and colleagues to develop and sustain student support systems that enable learning to occur.*

**Function 5E: Student Management Systems** – *The teacher works collaboratively with the school principal, colleagues and students to develop and sustain management systems that support and extend learning.*

**Function 5F: School, Family and Community Connections** – *The teacher works collaboratively with the principal, colleagues, parents, students and the community to develop and sustain school activities that make meaningful connections between the school and families and the community.*

**Function 5G: Strategic Planning/Continuous Improvement** – *The teacher participates in the development and implementation of the school's strategic planning and continuous improvement.*

**Function 5H: Teacher Leadership** – *The teacher demonstrates leadership by implementing classroom and school initiatives that improve education as well as by making positive changes in policy and practice that affect student learning.*

**Function 5I: Ethical Standards** – *The teacher models the ethical standards expected for the profession in the learning environment and in the community.*

*Created by the West Virginia Commission for Professional Teaching Standards and the West Virginia Task Force on Professional Teaching Standards.*

**APPENDIX A-3****West Virginia Professional Standards for  
Student Support Services**

The institution's program in professional studies shall promote the development and assessment of the following knowledge and skills for candidates completing a WVBE-approved student support services program. The candidate shall be able to demonstrate that s/he:

**1.0 Student Services/Programs**

1.1. Understands how students learn and develop and provides them with developmentally appropriate experiences or services that support their intellectual, social and personal development.

1.2. Understands the needs of special education and at-risk students and is knowledgeable of the educational programs and practices available to meet their needs.

1.3 Understands individual and group motivation and can develop strategies for organizing and supporting individual and group needs.

1.4. Has a well-grounded framework in understanding cultural and community diversity and can make accommodations for these differences.

**2.0 Professional Role**

2.1 Understands and practices effective communication strategies in working with students, faculty, parents and the community agencies.

2.2 Reflects on effectiveness of her/his contributions to students and the school community.

2.3. Seeks opportunities to foster positive relationships with school colleagues, parents and community agencies in endeavors that support students' learning and well-being.

2.4. Understands and utilizes ethical practices.

**3.0 Schools and the Education Community**

3.1. Understands the functions of schools, their purpose and administrative structure as well as the social, moral, governance and political dimensions of education.

**APPENDIX A-4****West Virginia Standards for School Leaders****Standard 1: Vision**

A school administrator is an educational leader who promotes the success of all students by facilitating the development, articulation, implementation and stewardship of a vision of learning that is shared and supported by the school community.

**Standard 2: School Culture/Instruction**

A school administrator is an educational leader who promotes the success of all students by advocating, nurturing and sustaining a school culture and instructional program conducive to student learning and staff professional growth.

**Standard 3: School Management/Environment**

A school administrator is an educational leader who promotes the success of all students by ensuring management of the organization and resources for a safe, efficient and effective learning environment.

**Standard 4: School Community**

A school administrator is an educational leader who promotes the success of all students by collaborating with families and community members, responding to diverse community interests and needs and mobilizing community resources.

**Standard 5: Personal/Professional Demeanor**

A school administrator is an educational leader who promotes the success of all students by acting with integrity, fairness and in an ethical manner.

**Standard 6: Systems**

A school administrator is an educational leader who promotes the success of all students by understanding, responding to and influencing the larger political, social, economic, legal and cultural context.

*Adopted from the Interstate Schools Leaders Licensure Consortium's Standards for School Leaders*

## **APPENDIX A-5**

### **West Virginia Educator Preparation Program Standards**

There is no one best format for teacher education programs. All teacher preparation programs, however, need to be based on the West Virginia Professional Teaching Standards. The conceptual framework and the structure of educator preparation programs may vary, but they should be rooted in the following program standards. The conceptual framework shall establish the shared vision for a unit's efforts in preparing educators to work effectively in PreK-12 schools. The programs, courses, teaching, candidate performance, scholarship, service and unit accountability should all be linked to the conceptual framework. The conceptual framework(s) shall be knowledge-based, articulated, shared, coherent and consistent with the unit and/or institutional mission.

#### **I. CANDIDATE PERFORMANCE**

##### **Standard 1. Candidate Knowledge, Skills and Dispositions**

Candidates<sup>1</sup> preparing to work in schools as teachers or other professional school personnel know and demonstrate the content, pedagogical and professional knowledge, skills and dispositions necessary to help all students<sup>2</sup> learn. Assessments indicate that candidates meet professional, state and institutional<sup>3</sup> standards.

- Element 1. Content Knowledge for Teacher Candidates
- Element 2. Content Knowledge for Other Professional School Personnel
- Element 3. Pedagogical Content Knowledge for Teacher Candidates
- Element 4. Professional and Pedagogical Knowledge and Skills for Teacher Candidates
- Element 5. Professional Knowledge and Skills for Other School Personnel
- Element 6. Dispositions for All Candidates
- Element 7. Student Learning for Teacher Candidates
- Element 8. Student Learning for Other Professional School Personnel

##### **Standard 2. Assessment System and Unit Evaluation**

The Unit has an assessment system that collects and analyzes data on the applicant qualifications, the candidate and graduate performance, and unit operations to evaluate and improve the unit and its programs.

- Element 1. Assessment System
- Element 2. Data Collection, Analysis, and Evaluation
- Element 3. Use of Data for Program

#### **II. UNIT CAPACITY**

##### **Standard 3. Field Experiences and Clinical Practice**

The unit and its school partners design, implement and evaluate field experiences and clinical practice so that teacher candidates and other school personnel develop and demonstrate the knowledge, skills and dispositions necessary to help all students learn.

- Element 1. Collaboration between Unit and School Partners
- Element 2. Design, Implementation, and Evaluation of Field Experiences and Clinical Practice
- Element 3. Candidates' Development and Demonstration of Knowledge, Skills, and Disposition To Help All Students Learn

#### **Standard 4. Diversity**

The unit designs, implements and evaluates curriculum and experiences for candidates to acquire and apply the knowledge, skills and dispositions necessary to help all students learn. These experiences include working with diverse higher education and school faculty, diverse candidates and diverse students in P-12 schools.

- Element 1. Design, Implementation, and Evaluation of Curriculum and Experiences
- Element 2. Experiences Working with Diverse Faculty
- Element 3. Experiences Working with Diverse Candidates
- Element 4. Experiences Working with Diverse Students in P-12 Schools

#### **Standard 5. Faculty Qualifications, Performance and Development**

Faculty are qualified and model best professional practices in scholarship, service and teaching, including the assessment of their own effectiveness as related to candidate performance; they also collaborate with colleagues in the disciplines and schools. The unit systematically evaluates faculty performance and facilitates professional development.

- Element 1. Qualified Faculty
- Element 2. Modeling Best Professional Practices in Teaching
- Element 3. Modeling Best Professional Practices in Scholarship
- Element 4. Modeling Best Professional Practice in Service
- Element 5. Collaboration
- Element 6. Unit Evaluation of Professional Education Faculty Performance
- Element 7. Unit Facilitation of Professional Development

#### **Standard 6. Unit Governance and Resources**

The unit has the leadership, authority, budget, personnel, facilities and resources, including information technology resources, for the preparation of candidates to meet professional, state and institutional standards.

- Element 1. Unit Leadership and Authority
- Element 2. Unit Budget
- Element 3. Personnel
- Element 4. Unit Facilities
- Element 5. Unit Resources Including Technology

<sup>1</sup>Candidates include persons preparing to teach, teachers who are continuing their professional development and persons preparing for other professional roles in schools such as principals, school psychologists and school library media specialists.

<sup>2</sup> “All students” include students with exceptionalities and the different ethnic, racial, gender, language, religious, socioeconomic and regional/geographic origins.

<sup>3</sup> Institutional standards are reflected in the unit’s conceptual framework and include candidate proficiencies.

*Modified from NCATE Standards 2000*

## APPENDIX A-6

### West Virginia Professional School Counselor Standards

School counselors play a vital role in supporting the success of all students by providing academic, career and personal/social development through a school counseling program that engages all stakeholders in providing a system of student supports within and across all programmatic levels. These Professional School Counselor Performance Standards provide a common language that describes what a counselor needs to know and be able to do, serve as a foundation for assessment of school counselor practice, and provide context for professional development. The curriculum for West Virginia higher education school counselor preparation programs should reflect and align to these school counselor performance standards.

#### Professional School Counselor Performance Standards:

These school counselor performance standards provide the expectation that every West Virginia school counselor will demonstrate expertise in five broad areas that are the basis for what counselors must know and be able to do:

- **Program Planning, Design and Management**
- **Program Delivery**
- **Data Driven Accountability and Program Evaluation**
- **Leadership and Advocacy**
- **Professional Growth and Responsibilities**

#### Standard 1: Program Planning, Design and Management

The school counselor plans, designs and manages a school counseling program that is ‘balanced’ between academic, career, personal/social domains, and delivery systems. The school counseling program is comprehensive and includes individual student planning and counseling, group counseling, classroom guidance, and responsive services. The counselor works collaboratively with school leadership, staff and community stakeholders to set goals and priorities for the school counseling program, intentionally aligning the program with other curricular areas, relevant school initiatives, and the school’s strategic plan. The school counselor assures that all program components and practices are aligned with established foundational components including the school counselor performance standards, the school counseling mission, beliefs and philosophy statements, and state student standards. The school counselor establishes a systemic process of involving stakeholders in program planning using diverse approaches consistent with best practices and assesses student needs and program effectiveness using a variety of tools to identify school needs and to plan specific activities designed to achieve optimal student results related to academic, career and personal/social development needs of ALL students.

**Function 1A: PROGRAM PLANNING** - *Plans a balanced comprehensive school counseling program.*

**Function 1B: PROGRAM DESIGN** - *Designs a balanced comprehensive school counseling program.*

**Function 1C: PROGRAM MANAGEMENT** - *Manages a comprehensive school counseling program.*

**Function 1D: STAKEHOLDER COLLABORATION** – *Collaborates with stakeholders to plan and manage the school counseling program.*

## **Standard 2: Program Delivery**

The professional school counselor delivers a balanced, comprehensive, developmental school counseling program that includes all delivery systems and equally addresses academic, career, and personal/social domains. In collaboration with school and community stakeholders, the school counselor delivers a standards and research-based guidance curriculum and school-wide prevention programs that contribute to a safe and positive school environment. The counselor engages staff and community agencies through a systemic approach to provide early identification and interventions for at risk students. The counselor facilitates the connections between students and families with opportunities that enhance academic, career, and personal/social development. The counselor assures implementation of effective transitioning practices that support all students during transitions within and between programmatic levels. The counselor involves school staff in a systemic approach to assessing, identifying, and implementing school-wide crisis prevention and intervention services. The counselor continually seeks to maintain a system of school-wide supports and to empower staff to provide personalized supports for all students.

**Function 2A: PROGRAM DELIVERY** - *Ensures the delivery of a comprehensive, developmental school counseling program aligned with West Virginia Board of Education policy.*

**Function 2B: RESEARCHED BEST PRACTICES** - *Utilizes research-based best practices to deliver individual and group counseling and classroom guidance curriculum.*

**Function 2C: GUIDANCE CURRICULUM** - *Facilitates delivery of a comprehensive guidance curriculum to meet the developmental needs of all students.*

**Function 2D: INDIVIDUAL STUDENT PLANNING** - *Coordinates an ongoing systemic approach to assist individual students in establishing personal goals and develop future plans.*

**Function 2E: RESPONSIVE SERVICES** - *Provides a continuum of interventions in response to student needs.*

**Function 2F: STUDENT SUPPORTS** - *Assists in developing comprehensive student supports within the school and community to support academic, career, and personal/social development of all students.*

**Function 2G: SUCCESSFUL TRANSITIONS** – *Acts as a team member to facilitate a school-wide system of student supports.*

## **Standard 3: Data Driven Accountability and Program Evaluation**

The professional school counselor systematically gathers, examines and analyzes individual student and school system data to evaluate the effectiveness of activities and interventions of the school counseling program. The counselor assures there are process protocols available and uses the protocols to inform, plan, manage, implement, and evaluate the effectiveness of the school counseling program. The counselor uses the results of program accountability measures to continually improve the school counseling program in meeting the developmental needs of all students.

**Function 3A: PROGRAM RESULTS** - *Uses data to measure the results and impact of the school counseling program.*

**Function 3B: PROGRAM COMPLETENESS** - *Evaluates the degree to which the school counseling program is implemented and aligned to West Virginia Board of Education policy.*

#### **Standard 4: Leadership and Advocacy**

The professional school counselor advocates for the success of all students by promoting equity and access to curriculum, programs, services and resources. The counselor facilitates professional development for school staff and provides training for stakeholders that advances and reinforces the school counseling program, its services and activities. The counselor promotes the achievements of students through the school counseling program. In order to foster success for all students, the counselor is actively engaged in establishing school practices and procedures that contribute to an effective school counseling program. The counselor assumes a school leadership role in ensuring the school counseling program is an integral part of the strategic plan of the school.

**Function 4A: STUDENT ADVOCACY** - *Advocates for success of ALL students.*

**Function 4B: STAKEHOLDER TRAINING** - *Facilitates appropriate training for stakeholders and staff related to school counseling program mission.*

**Function 4C: PROGRAM ADVOCACY** - *Advocates for and promotes the comprehensive school counseling program.*

#### **Standard 5: Professional Growth and Responsibilities**

The professional school counselor continually seeks contemporary knowledge and skills and integrates the most current research into his/her practice in order to advance the school counseling program and profession. The counselor sets professional development goals based on identified needs using recognized national and state standards, self-assessment, and other sources of information that inform professional practice. In order to optimize practice and discover new resources, the counselor routinely creates opportunities to engage, collaborate, and consult with other counselors. The counselor adheres to ethical standards and local, state and national policies that impact school counseling practice and sets high standards of professional performance. The counselor contributes to the growth of the school counseling profession by consistent demonstration of professional habits that advance the profession and that assure a

school counseling program that meets the academic, career, and personal/social development needs of all students.

**Function 5A: Knowledge and Skills** - *Enhances knowledge and skills to advance professional practice.*

**Function 5B: Legal and Ethical Practices** - *Adheres to professional ethical standards, policies, and laws in conduct and in practices.*

**Function 5C: Growth of Profession** - *Contributes to growth of the school counseling profession.*

*Created by the West Virginia School Counseling Model Task Force and Standards Sub-Committee.*

## **APPENDIX A-7**

### **West Virginia Elementary Mathematics Specialist (EMS) Standards (Endorsement and Masters Degree Programs)**

These standards lead to an elementary mathematics specialist add-on endorsement at the graduate or undergraduate level.

#### **Process Standards (Standards 1-7)**

The process standards recognize that mathematics is best approached as a unified whole. Mathematical concepts, procedures, and intellectual processes are interrelated such that, in a significant sense, the “whole is greater than the sum of the parts.” This approach is addressed by faculty involved in mathematics content, mathematics education, and education working together in developing candidates’ experiences.

#### **Standard 1: Knowledge of Mathematical Problem Solving**

Candidates know, understand, and apply the process of mathematical problem solving.

##### **Indicators**

- 1.1 Apply and adapt a variety of appropriate mathematical strategies to solve problems.
- 1.2 Solve problems that arise in mathematics and those involving mathematics in other contexts.
- 1.3 Build new mathematical knowledge through problem solving.
- 1.4 Monitor and reflect on the process of mathematical problem solving.

#### **Standard 2: Knowledge of Reasoning and Proof**

Candidates reason, construct, and evaluate mathematical arguments.

##### **Indicators**

- 2.1 Recognize reasoning and proof as fundamental aspects of mathematics.
- 2.2 Make and investigate mathematical conjectures.
- 2.3 Apply basic logic structures to develop and evaluate mathematical arguments and proofs.
- 2.4 Select and use various types of reasoning and methods of proof.

#### **Standard 3: Knowledge of Mathematical Communication**

Candidates communicate their mathematical thinking orally and in writing to peers, faculty, students, and others.

**Indicators**

- 3.1 Organize mathematical thinking through various effective communication modalities.
- 3.2 Analyze and evaluate the mathematical thinking and strategies of others.

**Standard 4: Knowledge of Mathematical Connections**

Candidates recognize, use, and make connections between and among mathematical ideas and in contexts outside mathematics to build mathematical understanding.

**Indicators**

- 4.1 Recognize and use connections among mathematical ideas.
- 4.2 Recognize and apply mathematics in contexts outside of mathematics.
- 4.3 Demonstrate how mathematical ideas interconnect and build on one another to produce a coherent whole.

**Standard 5: Knowledge of Mathematical Representation**

Candidates use varied representations of mathematical ideas to support and deepen students' mathematical understanding.

**Indicators**

- 5.1 Use representations to model and interpret physical, social, and mathematical phenomena.
- 5.2 Create and use representations to organize, record, and communicate mathematical ideas.
- 5.3 Select, apply, and translate among mathematical representations to solve problems.
- 5.4 Use multiple representations to model numbers, computations and algorithms, moving student understanding from concrete, to representational (symbolic), to abstract.

**Standard 6: Knowledge of Technology**

Candidates embrace technology as an essential tool for teaching and learning mathematics.

**Indicator**

- 6.1 Use knowledge of mathematics to select and use appropriate technological tools.

**Standard 7: Dispositions**

Candidates support a positive disposition toward mathematical processes and mathematical learning.

### Indicators

- 7.1 Demonstrate a commitment to mathematical equity.
- 7.2 Demonstrate a commitment to empowering students to use mathematics in creative ways.
- 7.3 Demonstrate a commitment to learning for conceptual understanding as well as procedural fluency in mathematics.

## Pedagogy Standard (Standard 8)

In addition to knowing students as learners, mathematics teacher candidates should develop knowledge of and ability to use and evaluate instructional strategies and classroom organizational models, ways to represent mathematical concepts and procedures, instructional materials and resources, ways to promote discourse, and means of assessing student understanding. This section on pedagogy is to address this knowledge and skill.

### Standard 8: Knowledge of Mathematics Pedagogy

Candidates possess a deep understanding of how students learn mathematics and of the pedagogical knowledge specific to mathematics teaching and learning.

### Indicators

- 8.1 Candidates must have specialized mathematical knowledge for teaching that enables them to:
  - Support the development of *mathematical proficiency* as characterized by conceptual understanding, procedural fluency, strategic competence, adaptive reasoning, and productive disposition (*National Research Council, 2001*).
  - Create opportunities for learners to develop mathematical practices and to critically evaluate their selection and use of these practices.
  - Diagnose mathematical misconceptions and errors and design appropriate interventions.
  - Decide whether, how, and how far to utilize specific oral or written responses from learners.
  - Recognize, evaluate, and respond to multiple, often non-standard solutions to problems.
  - Choose and/or design tasks to support the learning of new mathematical ideas or methods, or to test learners' understanding of them.
- 8.2 Understand learning trajectories related to particular topics in mathematics and use this knowledge to organize and deliver instruction that is developmentally appropriate and responsive to individual learners.
- 8.3 Construct and evaluate multiple representations of mathematical ideas or processes, establish correspondences between representations, and understand the purpose and value of doing so.

- 8.4 Use various instructional applications of technology in ways that are mathematically and pedagogically grounded.
- 8.5 Use multiple strategies, including listening to and understanding the ways students think about mathematics, to assess students' mathematical knowledge.
- 8.6 Reflect knowledge of research regarding the teaching and learning of mathematics in instructional practice.
- 8.7 Develop learners' abilities to make and investigate conjectures and provide justifications for their arguments.

### **Content (Standards 9-13)**

Candidates' comfort with, and confidence in, their knowledge of mathematics affects both what they teach and how they teach it. Knowing mathematics includes understanding specific concepts and procedures as well as the process of doing mathematics. That knowledge is the subject of the following standards.

#### **Standard 9: Knowledge of Number and Operations**

Candidates demonstrate computational proficiency, including a conceptual understanding of numbers, ways of representing number, relationships among number and number systems, and the meanings of operations.

#### **Indicators**

- 9.1 Demonstrate an understanding of non-quantified comparisons (less than, more than, the same), decomposition of numbers, 1-to-1 correspondence, conservation of quantity, cardinality and ordinality.
- 9.2 Develop a comprehensive repertoire of interpretations of the four operations of arithmetic and of the common ways they can be applied.
- 9.3 Demonstrate an understanding of the structure of place-value notation in general and base-10 notation in particular, i.e. how place-value notations efficiently represent even very large numbers, as well as decimals; use of these notations to order numbers, estimate, and represent order of magnitude (e.g., using scientific notation).
- 9.4 Develop an understanding of multi-digit calculations, including standard algorithms, mental math, and non-standard ways commonly created by students; informal reasoning used in calculations and reasonableness of solution.
- 9.5 Understand basic number systems: whole numbers (non-negative integers), integers, non-negative rational numbers, rational numbers, and real numbers; relationships among them, and locations of numbers in each system on the number line; and what is involved in extending operations from each system (e.g., whole numbers) to larger systems (e.g., rational numbers).

- 9.6 Demonstrate an understanding of multiplicative arithmetic: factors, multiples, primes, least common multiple, greatest common factor; proportional reasoning and rescaling.
- 9.7 Demonstrate a deep understanding of rational numbers, operations with rational numbers represented as fractions, decimals and percents.
- 9.8 Demonstrate knowledge of the historical development of number and number systems including contributions from diverse cultures.

### **Standard 10: Knowledge of Different Perspectives on Algebra**

Candidates emphasize relationships among quantities including functions, ways of representing mathematical relationships, and the analysis of change.

#### **Indicators**

- 10.1 Recognize commutativity, associativity, and distributivity, and 0 and 1 as identity elements in the basic number systems; understand how these may be used in computations and to deduce the correctness of algorithms. Use order-of-operations conventions.
- 10.2 Recognize literal symbols as names for mathematical objects; the process of *substitution* of particular numbers into variable expressions; the *solution set* of an algebraic equation or relation; transformations of equations (or relations) that do not change the solution set.
- 10.3 Model problems, both mathematical and “real world,” using algebraic equations and relations.
- 10.4 Explore and analyze patterns, relations, and functions.
- 10.5 Understand the concept of a function as defining one variable uniquely in terms of another. Familiarity with basic types of functions. Represent a function: formula, graph, table or situation.
- 10.6 Find functions to model various kinds of growth, both numerical and geometric.
- 10.7 Investigate equality and its relationship in equations.
- 10.8 Demonstrate knowledge of the historical development of algebra including contributions from diverse cultures.

### **Standard 11: Knowledge of Geometries**

Candidates use spatial visualization and geometric modeling to explore and analyze geometric shapes, structures, and their properties.

#### **Indicators**

- 11.1 Use visualization, the properties of two- and three-dimensional shapes, and geometric modeling.
- 11.2 Compose and decompose plane and solid figures.
- 11.3 Build and manipulate representations of two- and three-dimensional objects using concrete models, drawings, and dynamic geometry software.

- 11.4 Specify locations and describe spatial relationships using coordinate geometry. Draw and identify lines and their subsets and angles and classify shapes by properties of their lines and angles.
- 11.5 Apply transformations and use symmetry, congruence, and similarity.
- 11.6 Demonstrate knowledge of the historical development of Euclidean geometry including contributions from diverse cultures.

## **Standard 12: Knowledge of Data Analysis, Statistics, and Probability**

Candidates demonstrate an understanding of concepts and practices related to data analysis, statistics, and probability.

### **Indicators**

- 12.1 Address relevant investigations by creating data sets and collecting, organizing, and displaying relevant data.
- 12.2 Use statistical methods and technological tools to analyze data and determine measures that describe shape, spread, and center of the distribution of the set of data and when and why those measures are appropriate.
- 12.3 Apply the basic concepts of probability and ways to represent them; making judgments under conditions of uncertainty; measuring likelihood; becoming familiar with the concept of randomness.
- 12.4 Distinguish categorical (discrete) data (e.g., gender, favorite ice cream flavor) from measurement (continuous) data.
- 12.5 Demonstrate knowledge of the historical development of probability and statistics including contributions from diverse cultures.

## **Standard 13: Knowledge of Measurement**

Candidates apply and use measurement concepts and tools.

### **Indicators**

- 13.1 Demonstrate understanding of non-standard and standard units of measure.
- 13.2 Select and use appropriate measurement units, techniques, and tools.
- 13.3 Recognize and apply measurable attributes of objects and the units, systems and processes of measurement.
- 13.4 Employ estimation as a way of understanding measurement units and processes.
- 13.5 Understand and apply common units of geometric measures including: angles, perimeter, area and volume.
- 13.6 Demonstrate knowledge of the historical development of measurement and measurement systems including contributions from diverse cultures.

National Research Council. (2001). *Adding It Up: Helping Children Learn Mathematics*. J. Kilpatrick, J. Swafford, & B. Findell (eds.). Mathematics Learning Study Committee, Center for Education, Division of Behavioral and Social Sciences and Education. Washington, DC: National Academy Press.

## **APPENDIX A-8**

### **West Virginia Elementary Mathematics Specialist Standards (Masters Degree Programs)**

These standards lead to an elementary mathematics specialist component within a master's degree program.

The Elementary Mathematics Specialist Masters Level program will include all of the EMS Standards set out in Appendix A-7 for the Elementary Mathematics Specialist Endorsement program in addition to the Standards set forth in Appendix A-8.

#### **Curriculum and Assessment Standard (Standard 14)**

##### **Standard 14: Curriculum and Assessment**

Candidates demonstrate leadership in decisions regarding mathematics curriculum and assessment at the school and/or district level.

##### **Indicators**

- 14.1 Understand and lead others to understand the importance of careful sequencing and development of mathematical ideas, concepts, and skills in the pre-K–middle grades curriculum; be able to engage in discussions and decision-making to establish appropriate benchmarks for learning goals from pre-K to middle grades.
- 14.2 Select, use, adapt, and determine the suitability of mathematics curricula and teaching materials (e.g., textbooks, technology, manipulatives) for particular learning goals.
- 14.3 Evaluate the alignment of local and state curriculum standards, textbooks, and district and state assessments, and recommend appropriate adjustments to address gaps at the school and district level.
- 14.4 Know the different formats, purposes, uses, and limitations of various types of assessment of student learning; be able to choose, design, and/or adapt assessment tasks for monitoring student learning.
- 14.5 Analyze formative and summative assessment results, make appropriate interpretations and communicate results to appropriate and varied audiences.

#### **Leadership Knowledge and Skills Standard (Standard 15)**

##### **Standard 15: Leadership Knowledge and Skills**

Candidates are prepared to take on collegial non-evaluative leadership roles within their schools and districts. They must have a broad view of many aspects and resources needed to support and facilitate effective instruction and professional growth.

**Indicators:**

- 15.1 Use professional resources such as professional organization networks, journals, and discussion groups to be informed about critical issues related to mathematics teaching and learning, e.g., policy initiatives and curriculum trends.
- 15.2 Select from a repertoire of methods to communicate professionally about issues related to mathematics teaching and learning to educational stakeholders.
- 15.3 Plan, develop, implement, and evaluate mathematics professional development programs at the school and district level and support teachers in systematically reflecting and learning from practice.
- 15.4 Evaluate educational structures and policies that affect students' equitable access to high quality mathematics instruction, and act professionally to assure that all students have appropriate opportunities to learn important mathematics.
- 15.5 Use leadership skills to improve mathematics programs at the school and district levels, e.g., develop appropriate classroom- or school-level learning environments; build relationships with teachers, administrators and the community; develop evidence-based interventions for high and low-achieving students; collaborate to create a shared vision and develop an action plan for school improvement; partner with school-based professionals to improve each student's achievement in mathematics; mentor new and experienced teachers to better serve students.

**APPENDIX B****PREPROFESSIONAL SKILLS FOR SPEAKING AND LISTENING****PROFESSIONAL SPEAKING SKILLS****1.0. Psychomotor Skills**

Speak clearly and demonstrate effective use of the vocal mechanism in a public, group, or interpersonal communication interaction.

- 1.1. Articulation. Produce speech sounds intelligible to the listener(s).
- 1.2. Diction. Utilize diction that is not distracting to listener(s).
- 1.3. Vocal Flexibility. Utilize vocal inflection for emphasis and meaning.
- 1.4. Volume. Adapt to the communication situation with appropriate vocal energy.

**2.0. Message Construction Skills**

Construct a clear and effective message adapted to the perceptual framework of the listener(s), including nonverbal elements to reinforce and enhance the verbal component of the message.

- 2.1. Purpose. Identify the purpose (desired response) for the message.
- 2.2. Thesis. Frame the central idea of the message clearly and concisely.
- 2.3. Organization. Develop coherent main and subordinate ideas.
- 2.4. Support. Select clarifying or persuasive supporting materials appropriate to listener(s) and purpose.
- 2.5. Audience Analysis. Recognize the perceptual framework of the listener(s).
- 2.6. Style. Utilize language appropriate to listener(s), to employ acceptable grammar, and to foster supportive (avoid defensive) communication climate.
- 2.7. Vocal Flexibility. Modify pitch, rate, volume, and quality (paralanguage) consonant with intended meaning.
- 2.8. Appearance. Monitor and vary appearance consonant with communication situation and listener(s).
- 2.9. Kinesics. Utilize movement, gesture, and facial expression (“body language”) as part of intended message.

2.10. Proxemics. Understand and utilize spatial relationships as part of the intended message.

2.11. Oral Reading. Analyze and interpret the writer's message by use of paralanguage and kinesics.

### **3.0. Feedback Skills**

Analyze, evaluate, and respond to feedback as a means for improving the effectiveness of the communication interaction.

3.1. Active Listening. Perceive and evaluate accurately verbal and nonverbal feedback.

3.2. Paraphrasing. Check accuracy of feedback evaluation.

3.3. Adaptation. Modify the message appropriately in response to feedback.

3.4. Questioning. Elicit feedback productively in order to improve the effectiveness of communication.

## **PREPROFESSIONAL LISTENING SKILLS**

### **1.0. Literal Comprehension**

Listen actively to achieve understanding of the message in an interpersonal, group, or public communication interaction.

1.1. Thesis. Recognize and paraphrase accurately the central idea in an oral message.

1.2. Main Ideas. Identify accurately the main points that make up the thesis of the oral message.

1.3. Supporting Materials. Recognize accurately the details or evidence supporting the main points of an oral message.

1.4. Directions. Restate accurately directions and instructions.

1.5. Diction. Accommodate nonstandard articulation or dialectal patterns to achieve accuracy of intended meaning.

1.6. Suspending Judgment. Listen, without judging, in order to understand message accurately.

## **2.0. Interpretive Comprehension**

Demonstrate listening and responding skills that clarify and enhance human relations in a public, group, or interpersonal interaction.

2.1. Paraphrasing. Restate the speaker's viewpoint accurately when it differs from that of the listener.

2.2. Feedback. Ask questions effectively and in a nonthreatening manner for clarification of information.

2.3. Difference of Opinion. Identify and understand the reason for the perspective (perceptual framework) of the speaker.

2.4. Decoding Nonverbal Cues. Identify incongruities between verbal and nonverbal cues.

2.5. Empathic Listening. Identify the emotional content of the message from vocal and nonvocal cues.

## **3.0. Critical Comprehension**

3.1. Ideas. Evaluate the thesis, main points, and supporting material of the message.

3.2. Fact and Opinion. Distinguish between observation and inference.

3.3. Information and Persuasion. Distinguish between informative and persuasive message.

3.4. Persuasive Techniques. Identify a variety of reasoning techniques and motive appeals used in oral messages.

3.5. Drawing Conclusions. Analyze and synthesize multiple messages and draw defensible conclusions.

3.6. Assessing Credibility. Distinguish between the subjective attitude toward the speaker and the content of the message.

## APPENDIX C-1

### Educational Technology Standards and Performance Indicators for Teachers

All WVBE-approved programs must ensure that candidates have the requisite knowledge and skills to design, implement, and assess learning experiences that engage students and improve learning; enrich professional practice; and provide positive models for students, colleagues, and the community including the following:

**1. Facilitate and Inspire Student Learning and Creativity** – *Teachers use their knowledge of subject matter, teaching and learning, and technology to facilitate experiences that advance student learning, creativity, and innovation in both face-to-face and virtual environments.*

Teachers:

- a. promote, support, and model creative and innovative thinking and inventiveness
- b. engage students in exploring real-world issues and solving authentic problems using digital tools and resources
- c. promote student reflection using collaborative tools to reveal and clarify students' conceptual understanding and thinking, planning, and creative processes
- d. model collaborative knowledge construction by engaging in learning with students, colleagues, and others in face-to-face and virtual environments

**2. Design and Develop Digital-Age Learning Experiences and Assessments** – *Teachers design, develop, and evaluate authentic learning experiences and assessments incorporating contemporary tools and resources to maximize content learning in context and to develop the knowledge, skills, and attitudes identified in the West Virginia Content Standards and Objectives.*

Teachers:

- a. design or adapt relevant learning experiences that incorporate digital tools and resources to promote student learning and creativity
- b. develop technology-enriched learning environments that enable all students to pursue their individual curiosities and become active participants in setting their own educational goals, managing their own learning, and assessing their own progress
- c. customize and personalize learning activities to address students' diverse learning styles, working strategies, and abilities using digital tools and resources
- d. provide students with multiple and varied formative and summative assessments aligned with content and technology standards and use resulting data to inform learning and teaching

**3. Model Digital-Age Work and Learning** – *Teachers exhibit knowledge, skills, and work processes representative of an innovative professional in a global and digital society.*

Teachers:

- a. demonstrate fluency in technology systems and the transfer of current knowledge to new technologies and situations
- b. collaborate with students, peers, parents, and community members using digital tools and resources to support student success and innovation
- c. communicate relevant information and ideas effectively to students, parents, and peers using a variety of digital-age media and formats
- d. model and facilitate effective use of current and emerging digital tools to locate, analyze, evaluate, and use information resources to support research and learning

**4. Promote and Model Digital Citizenship and Responsibility** – *Teachers understand local and global societal issues and responsibilities in an evolving digital culture and exhibit legal and ethical behavior in their professional practices.*

Teachers:

- a. advocate, model, and teach safe, legal, and ethical use of digital information and technology, including respect for copyright, intellectual property, and the appropriate documentation of sources
- b. address the diverse needs of all learners by using learner-centered strategies and providing equitable access to appropriate digital tools and resources
- c. promote and model digital etiquette and responsible social interactions related to the use of technology and information
- d. develop and model cultural understanding and global awareness by engaging with colleagues and students of other cultures using digital-age communication and collaboration tools

**5. Engage in Professional Growth and Leadership** – *Teachers continuously improve their professional practice, model lifelong learning, and exhibit leadership in their school and professional community by promoting and demonstrating the effective use of digital tools and resources.*

Teachers:

- a. participate in local and global learning communities to explore creative applications of technology to improve student learning
- b. exhibit leadership by demonstrating a vision of technology infusion, participating in shared decision making and community building, and developing the leadership and technology skills of others
- c. evaluate and reflect on current research and professional practice on a regular basis to make effective use of existing and emerging digital tools and resources in support of student learning
- d. contribute to the effectiveness, vitality, and self-renewal of the teaching profession and of their school and community

*Adopted from the International Society for Technology in Education, National Education Technology Standards for Teachers*

**APPENDIX C-2****EDUCATIONAL TECHNOLOGY STANDARDS FOR ADMINISTRATORS**

All WVBE-approved programs must ensure that candidates have the requisite knowledge and skills for effective use of educational technology in instruction and leadership including the following:

**1. LEADERSHIP AND VISION**

Educational leaders inspire a shared vision for comprehensive integration of technology and foster an environment and culture conducive to the realization of that vision. Educational leaders:

- A. facilitate the shared development by all stakeholders of a vision for technology use and widely communicate that vision.
- B. maintain an inclusive and cohesive process to develop, implement, and monitor a dynamic, long-range, and systemic technology plan to achieve the vision.
- C. foster and nurture a culture of responsible risk-taking and advocate policies promoting continuous innovation with technology.
- D. use data in making leadership decisions.
- E. advocate for research-based effective practices in use of technology.
- F. advocate on the state and national levels for policies, programs, and funding opportunities that support implementation of the district technology plan.

**2. LEARNING AND TEACHING**

Educational leaders ensure that curricular design, instructional strategies, and learning environments integrate appropriate technologies to maximize learning and teaching. Educational leaders:

- A. identify, use, evaluate, and promote appropriate technologies to enhance and support instruction and standards-based curriculum leading to high levels of student achievement.
- B. facilitate and support collaborative technology-enriched learning environments conducive to innovation for improved learning.
- C. provide for learner-centered environments that use technology to meet the individual and diverse needs of learners.

D. facilitate the use of technologies to support and enhance instructional methods that develop higher-level thinking, decision-making, and problem-solving skills.

E. provide for and ensure that faculty and staff take advantage of quality professional learning opportunities for improved learning and teaching with technology.

### 3. PRODUCTIVITY AND PROFESSIONAL PRACTICE

Educational leaders apply technology to enhance their professional practice and to increase their own productivity and that of others. Educational leaders:

A. model the routine, intentional, and effective use of technology.

B. employ technology for communication and collaboration among colleagues, staff, parents, students, and the larger community.

C. create and participate in learning communities that stimulate, nurture, and support faculty and staff in using technology for improved productivity.

D. engage in sustained, job-related professional learning using technology resources.

E. maintain awareness of emerging technologies and their potential uses in education.

F. use technology to advance organizational improvement.

### 4. SUPPORT, MANAGEMENT, AND OPERATIONS

Educational leaders ensure the integration of technology to support productive systems for learning and administration. Educational leaders:

A. develop, implement, and monitor policies and guidelines to ensure compatibility of technologies.

B. implement and use integrated technology-based management and operations systems.

C. allocate financial and human resources to ensure complete and sustained implementation of the technology plan.

D. integrate strategic plans, technology plans, and other improvement plans and policies to align efforts and leverage resources.

E. implement procedures to drive continuous improvement of technology systems and to support technology replacement cycles.

### 5. ASSESSMENT AND EVALUATION

Educational leaders use technology to plan and implement comprehensive systems of effective assessment and evaluation. Educational leaders:

- A. use multiple methods to assess and evaluate appropriate uses of technology resources for learning, communication, and productivity.
- B. use technology to collect and analyze data, interpret results, and communicate findings to improve instructional practice and student learning.
- C. assess staff knowledge, skills, and performance in using technology and use results to facilitate quality professional development and to inform personnel decisions.
- D. use technology to assess, evaluate, and manage administrative and operational systems.

## 6. SOCIAL, LEGAL, AND ETHICAL ISSUES

Educational leaders understand the social, legal, and ethical issues related to technology and model responsible decision-making related to these issues. Educational leaders:

- A. ensure equity of access to technology resources that enable and empower all learners and educators.
- B. identify, communicate, model, and enforce social, legal, and ethical practices to promote responsible use of technology.
- C. promote and enforce privacy, security, and online safety related to the use of technology.
- D. promote and enforce environmentally safe and healthy practices in the use of technology.
- E. participate in the development of policies that clearly enforce copyright law and assign ownership of intellectual property developed with district resources.

*Adopted from the International Society for Technology in Education, National Education Technology Standards for Administrators*

**APPENDIX D****PROGRAMMATIC LEVELS AND SPECIALIZATIONS RECOGNIZED  
ON THE PROFESSIONAL LICENSE****Recognized Programmatic Levels**

• Preschool Education	PreK-PreK
• Preschool to Adult	PreK-Adult
• Kindergarten to Grade 12	Grades K-12
• Early Education	PreK-K
• Early Childhood	Grades K-4
• Elementary Education	Grades K-6
• Middle Childhood	Grades 5-9
• Adolescent	Grades 9-Adult
• Adult	Adult

**Grade Level Options for General Education Specializations**

Agriculture	5-Adult
American Sign Language	PreK-Adult
Any Modern Foreign Language	PreK-Adult, 5-Adult
Art	PreK-Adult, 5-Adult, 5-9
Biology	9-Adult
Business Education	5-Adult, 9-Adult
Business Education/Marketing	5-Adult, 9-Adult
Chemistry	9-Adult
Chemistry through Chemistry I	9-Adult
Chemistry/Physics	9-Adult
Chinese	PreK-Adult, 5-Adult
Computer Science Education	PreK-Adult
Dance	PreK-Adult, 5-Adult
Driver Education	9-Adult
Early Childhood Education	K-4
Early Education	PreK-K
Elementary Education	K-6
Elementary Mathematics Education	K-6
Elementary Mathematics Specialist <sup>2</sup>	K-6
English	5-Adult, 5-9
English as a Second Language	PreK-Adult
Family & Consumer Science	5-Adult
French	PreK-Adult, 5-Adult
General Math through Algebra I	5-Adult, 5-9
General Science	5-Adult, 5-9
German	PreK-Adult, 5-Adult
Health	PreK-Adult, 5-Adult

Instructional Technology	PreK-Adult
Japanese	PreK-Adult, 5 Adult
Journalism	5-Adult, 9-Adult
Latin	5-Adult, PreK-Adult
Marketing	9-Adult
Mathematics	5-9, 5-Adult
Middle Childhood	5-9
Music	PreK-Adult
Oral Communications	5-Adult, 9-Adult
Physical Education	PreK-Adult, 5-Adult, 5-9
Physics	9-Adult
Preschool Education	PreK-PreK
Reading Education	PreK-K, K-6, 5-Adult
Reading Specialist <sup>1,2</sup>	PreK-Adult
Russian	PreK-Adult, 5-Adult
School-Library Media	PreK-Adult
Social Studies	5-Adult, 5-9
Spanish	PreK-Adult, 5-Adult
Technology Education	5-Adult
Theatre	PreK-Adult, 5-Adult
Wellness (Health-Physical Education Combined Major)	PreK-Adult

### **Grade Level Options for Special Education Specializations**

Autism	PreK-PreK, K-6, 5-Adult
Emotional/Behavior Disorders	K-6, 5-Adult
Gifted	1-12
Deaf and Hard of Hearing	PreK-Adult
Mentally Impaired (Mild/Moderate)	K-6, 5-Adult
Multi-Categorical (E/BD excluding Autism, MI, SLD)	K-6, 5-Adult
Preschool Special Needs	PreK-K
Severe Disabilities	K-Adult
Specific Learning Disabilities	K-6, 5-Adult
Visually Impaired	PreK-Adult

### **Grade Level Options for Student Support Specializations**

Counselor <sup>2</sup>	PreK-Adult
School Nurse	PreK-Adult
School Psychologist <sup>2</sup>	PreK-Adult
Social Services and Attendance	PreK-Adult
Speech Language Pathologist <sup>2</sup>	PreK-Adult
Speech Assistant	PreK-Adult

### **Grade Level Options for Administrative Specializations**

General Supervisor<sup>2</sup>

Principal<sup>2</sup>

Superintendent<sup>2</sup>

PreK-Adult

PreK-Adult

PreK-Adult

<sup>1</sup>Graduate Level Certification Program Required

<sup>2</sup>Master's Degree Required

The WVDE shall issue certificates for discontinued specializations only to those students enrolled in an approved program at the time the program was discontinued.

### **Grade Level Options for Paraprofessionals**

Paraprofessionals<sup>3</sup>

PreK-Adult

<sup>3</sup>Associate Degree required for proposed new programs.

## APPENDIX E

### APPROVED STANDARDS FOR PROGRAM DEVELOPMENT AND REQUIRED TESTS FOR COMPLETION OF WEST VIRGINIA APPROVED PROGRAMS LEADING TO WEST VIRGINIA LICENSURE

### DOCUMENTATION OF FOOTNOTES ON THE FOLLOWING TABLES

- \*Indicates that the **National Standards** are used in the NCATE folio process.
- <sup>1</sup>The **test validity period** is ten years from the date on which the candidate passed the examination. In those circumstances where the WVBE has not altered either the required test or the passing score, the test and score shall remain valid beyond the ten-year period. See Section 10.5 of this policy for a more detailed explanation of testing requirements, particularly as they apply to experienced educators.
- <sup>2</sup>The **Pre-Professional Skills Test (PPST)** [called Praxis I] may be waived provided the candidate: a) holds a master's degree from an accredited institution of higher education; or b) currently holds, or has held, a West Virginia Professional Teaching, Student Support Services or Administrative Certificate; or c) has attained a score of 25 on the American College Testing (ACT) program prior to November 1989 or an enhanced ACT score of 26 beginning November 1989; or d) has attained a score of 1035 on the Scholastic Achievement Test (SAT) prior to April 1995, or a re-centered SAT score of 1125 beginning April 1995, or an SAT combined Critical Reading and Math score of 1170 beginning March 2005.
- <sup>3</sup>A candidate completing a WVBE-approved program for the initial teaching license is required to pass a WVBE-adopted Principles of Learning and Teaching Praxis II Test that includes at least a portion of the grade levels indicated on the anticipated license.
- <sup>4</sup>A candidate who has successfully completed the National Evaluation Systems (NES) test in emotional/behavior disorders, mentally impaired, or specific learning disabilities is not required to satisfy the Praxis II Education of Exceptional Students: Core Content Knowledge Test since it is assumed this content was included in the NES special education content test.
- <sup>5</sup>For general science in grades 5-Adult, a candidate may substitute 1) Test No. 0235 (Biology: Content Knowledge) taken for biology certification for Test No. 0231 and/or 2) Test No. 0245 (Chemistry: Content Knowledge) or Test No. 0265 (Physics: Content Knowledge) for Test No. 0481.
- <sup>6</sup>Candidates completing multi-categorical programs must take Test No. 0542 (Education of Exceptional Students: Mild to Moderate).
- <sup>7</sup>A candidate who has successfully completed the Praxis II Education of Exceptional Students: Core Content Knowledge Test (0351) prior to September 2010 is not required to satisfy

the Praxis II Education of Exceptional Students: Core Content Knowledge Test (0353) since it is assumed this content was included in the 0351 test.

- <sup>8</sup>Due to test regeneration a candidate may substitute 1) Test No. 0100 (Business Education) taken for business certification for regenerated Test No. 0100; 2) Test No. 0542 (Education of Exceptional Students: Mild to Moderate Disabilities) taken for multi-categorical special education certification for regenerated Test No. 0543; 3) Test No. 0544 (Education of Exceptional Students: Severe to Profound Disabilities) taken for severe disabilities certification for regenerated Test No. 0545; 4) Test No. 0173 (French Content Knowledge) taken for French certification for regenerated Test No. 0174; 5) Test No. 0181 (German: Content Knowledge) taken for German certification for regenerated Test No. 0183; 6) Test No. 0120 (Home Economics Education) taken for family and consumer science certification for regenerated Test No. 0121; 7) Test No. 0560 (Marketing Education) taken for marketing certification for regenerated Test No. 0561; 8) Test No. 0310 (School Library Media Specialist) taken for school library/media certification for regenerated Test No. 0311; 9) Test No. 0400 (School Psychologist) taken for school psychologist certification for regenerated Test No. 0401; 10) Test No. 0220 (Speech Communication) taken for oral communication certification for regenerated Test No. 0221; 11) Test No. 0191 (Spanish: Content Knowledge) taken for Spanish certification for regenerated Test No. 0195; 12) Test No. 0353 (Special Education: Education of Exceptional Students: Core Content Knowledge) taken for autism, emotional/behavior disorders, Mentally Impaired (mild/moderate), multi-categorical, severe disabilities, and specific learning disabilities certification for regenerated Test No. 0354.

### 3.2 – Rubrics for Professional Teaching Standards

<b>STANDARD 1: CURRICULUM AND PLANNING</b>			
<b>Element 1.1: The teacher demonstrates a deep and extensive knowledge of the subject matter.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• demonstrates expert, specialized content knowledge</li> <li>• collaborates with teachers from other grades and subjects to extend and connect student learning to other content areas</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• demonstrates extensive content knowledge</li> <li>• connects student learning to other content areas</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• demonstrates content knowledge</li> <li>• attempts to connect student learning to other content areas</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not demonstrate sufficient content knowledge</li> <li>• does not attempt to connect student learning to other content areas</li> </ul>
<b>Element 1.2: The teacher designs standards-driven instruction using state-approved curricula.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• collaborates with others, including students, to design instruction and assessment aligned to the state-approved curricula</li> <li>• collaborates with students to design sequential learning activities that provide for varied student abilities and interests</li> <li>• collaborates with others, including students, to design learning activities that promote student collaboration, critical thinking and problem solving</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• designs written instructional plans that align instruction and assessment to the state-approved curricula</li> <li>• designs sequential learning activities that provide for varied student abilities and interests</li> <li>• designs activities that promote student collaboration, critical thinking, and problem solving</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• designs written instructional plans aligned to the state-approved curricula</li> <li>• designs sequential learning activities at appropriate developmental levels</li> <li>• designs activities that promote student collaboration</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not design written instructional plans</li> <li>• does not design instructional plans and/or units that are driven by state-approved curricula</li> <li>• does not design sequential learning activities at appropriate developmental levels</li> <li>• does not design activities that promote student collaboration</li> </ul>
<b>Element 1.3: The teacher uses a balanced assessment approach to guide student learning.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• collaborates with students to design and use a variety of assessments, including peer and student self-assessments, to monitor student progress and set learning goals</li> <li>• collaborates with students and others to clearly define and communicate assessment criteria</li> <li>• shares assessment data and provides timely feedback to students and other stakeholders</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• designs and uses formative and summative assessments to monitor student progress and set learning goals</li> <li>• clearly defines and communicates assessment criteria</li> <li>• shares assessment data and provides timely feedback to students</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• designs and uses formative and summative assessments</li> <li>• communicates assessment criteria</li> <li>• shares assessment data with students</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not use formative and summative assessments</li> <li>• does not communicate assessment criteria</li> <li>• does not share assessment data or provide feedback to students</li> </ul>

<b>STANDARD 2: THE LEARNER AND THE LEARNING ENVIRONMENT</b>			
<b>Element 2.1: The teacher understands and responds to the unique characteristics of learners.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>demonstrates extensive knowledge of students' social, emotional and academic needs, interests, learning styles, cultural heritage, and gender</li> <li>plans and implements differentiated learning activities with students</li> <li>helps colleagues understand the unique characteristics of all learners</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>demonstrates thorough knowledge of students' social, emotional and academic needs, interests, learning styles, cultural heritage, and gender</li> <li>plans and implements differentiated learning activities for students</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>demonstrates adequate knowledge of students' social, emotional and academic needs, interests, learning styles, cultural heritage, and gender</li> <li>plans and implements differentiated learning activities for some students</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>does not demonstrate knowledge of students' social, emotional and academic needs, interests, learning styles, cultural heritage, and gender</li> <li>does not plan and implement appropriate learning activities</li> </ul>
<b>Element 2.2: The teacher establishes and maintains a safe and appropriate learning environment.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>collaborates with students to establish an effective classroom management system</li> <li>collaborates with students to ensure appropriate behavior as defined by the code of conduct</li> <li>organizes space and materials in a safe, highly efficient and well-designed learning environment</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>establishes an effective classroom management system</li> <li>responds appropriately and respectfully to student behavior as defined by the code of conduct</li> <li>organizes space and materials to ensure safety and efficiency</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>establishes a classroom management system</li> <li>inadequately responds to student behavior as defined by the code of conduct</li> <li>organizes space and materials to ensure safety</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>does not implement an effective classroom management system</li> <li>does not respond to student behavior as defined by the code of conduct</li> <li>does not organize space and materials to ensure safety</li> </ul>
<b>Element 2.3: The teacher establishes and maintains a learner-centered culture.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>establishes with students clear criteria for high-quality work</li> <li>collaborates with students to maximize instructional time</li> <li>engages students in active, self-directed learning as part of a community of learners</li> <li>provides extensive opportunities for students to collaborate in learning</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>sets and communicates clear criteria for high-quality work</li> <li>uses instructional time efficiently</li> <li>engages students in active learning</li> <li>provides adequate opportunities for students to collaborate in learning</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>sets criteria for high-quality work</li> <li>uses instructional time with limited efficiency</li> <li>engages students in learning</li> <li>provides limited opportunities for students to collaborate in learning</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>does not establish criteria for quality work</li> <li>does not use instructional time efficiently</li> <li>does not engage students in learning</li> <li>does not provide opportunities for students to collaborate in learning</li> </ul>

<b>STANDARD 3: TEACHING</b>			
<b>Element 3.1: The teacher utilizes a variety of research-based instructional strategies.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• collaborates with students to use an extensive variety of effective instructional strategies to deliver content</li> <li>• collaborates with students to provide scaffolding and differentiated instruction</li> <li>• extensively uses appropriate technology to deliver content</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• uses a variety of effective instructional strategies to deliver content</li> <li>• demonstrates adequate use of scaffolding and differentiated instruction</li> <li>• adequately uses technology to deliver content</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• uses a limited variety of effective instructional strategies to deliver content</li> <li>• demonstrates limited use of scaffolding or differentiated instruction</li> <li>• demonstrates limited use of appropriate technology to deliver content</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not use effective instructional strategies to deliver content</li> <li>• does not scaffold or differentiate instruction</li> <li>• does not use appropriate technology to deliver content</li> </ul>
<b>Element 3.2: The teacher motivates and engages students in learning, problem solving and collaboration.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• facilitates student-led learning activities leading to deep understanding of the content</li> <li>• encourages students to initiate or adapt learning activities to deepen understanding</li> <li>• provides students with extensive opportunities to collaborate and peer assess using appropriate technologies to gather information, problem solve and share learning</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• provides learning activities relevant to the content that involve meaningful real-world experiences leading to deep understanding</li> <li>• explains directions and procedures clearly and models them when necessary</li> <li>• provides students with adequate opportunities to collaborate and peer assess using appropriate technologies to gather information, problem solve and share learning</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• provides learning activities relevant to the content</li> <li>• explains directions and procedures</li> <li>• provides students with limited opportunities to collaborate using appropriate technologies</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not provide learning activities that are relevant to the content</li> <li>• does not provide meaningful activities</li> <li>• does not explain directions and procedures</li> <li>• does not provide students opportunities to collaborate</li> </ul>

<b>STANDARD 3: TEACHING</b>			
<b>Element 3.3: The teacher adjusts instruction based on a variety of assessments and student responses.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>effectively modifies instruction to meet the needs of all students</li> <li>extensively monitors student progress using a variety of assessments</li> <li>collaborates with students and others to make instructional decisions</li> <li>extensively analyzes and uses student data to make instructional decisions</li> <li>uses a variety of formative assessments to differentiate instruction and provide effective interventions</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>modifies instruction when need is apparent</li> <li>consistently monitors student progress using a variety of assessments</li> <li>uses student feedback to make instructional decisions</li> <li>analyzes student data to make instructional decisions</li> <li>uses a variety of formative assessments to differentiate instruction and provide appropriate interventions</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>recognizes missed opportunities to modify instruction</li> <li>inconsistently monitors student progress using a variety of assessments</li> <li>examines student data</li> <li>uses formative assessments to provide whole-group interventions</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>does not modify instruction</li> <li>does not monitor student progress</li> <li>does not base instruction on a variety of assessments</li> <li>does not provide interventions based on student data</li> </ul>

<b>STANDARD 4: PROFESSIONAL RESPONSIBILITIES FOR SELF-RENEWAL</b>			
<b>Element 4.1: The teacher engages in professional development for self-renewal that guides continuous examination and improvement of professional practice.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>initiates the investigation that leads to the development of best practices</li> <li>extensively implements best practices</li> <li>mentors others in implementation of best practices</li> <li>shares results of investigation at the local, state, or national level</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>engages in professional learning to investigate best practices</li> <li>consistently implements best practices</li> <li>shares best practices within the school community</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>participates in opportunities to investigate best practices when invited to do so</li> <li>inconsistently implements best practices</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>does not participate in professional development of best practices as required for self-renewal</li> <li>does not implement best practices</li> <li>does not implement best practices acquired through professional development to improve unsatisfactory performance rating</li> </ul>
<b>Element 4.2: The teacher actively engages in collaborative learning opportunities for self-renewal with colleagues.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>initiates or advances the development of a collaborative team</li> <li>contributes consistently to group learning</li> <li>mentors others in utilizing the knowledge and skills gained</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>participates actively in and/or facilitates a collaborative team</li> <li>contributes to group learning</li> <li>utilizes the knowledge and skills gained</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>participates in a collaborative team when invited to do so</li> <li>attempts to utilize the knowledge and skills gained</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>works in isolation</li> <li>does not contribute productively to work of collaborative teams as required for self-renewal</li> <li>does not utilize knowledge and skills gained</li> <li>does not utilize knowledge and skills gained to improve unsatisfactory performance rating</li> </ul>

<b>STANDARD 5: PROFESSIONAL RESPONSIBILITIES FOR SCHOOL AND COMMUNITY</b>			
<b>Element 5.1: The teacher participates in school-wide collaborative efforts to support the success of all students.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• leads the ongoing development of school-wide initiatives based on school and student data</li> <li>• participates in the design and delivery of professional development for the implementation of school-wide initiatives</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• collaborates in the development of school-wide initiatives based on school and student data</li> <li>• participates in the implementation of school-wide initiatives</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• participates in school-wide initiatives</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not participate in school-wide initiatives</li> </ul>
<b>Element 5.2: The teacher works with parents, guardians, families and community entities to support student learning and well-being.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• develops ongoing opportunities for families to participate in classroom activities based on needs assessment</li> <li>• interacts appropriately with families within the school and community</li> <li>• utilizes theory and current research to facilitate meaningful connections between the school and family</li> <li>• develops and promotes meaningful school activities by utilizing community expertise and resources</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• offers ongoing opportunities for families to participate in classroom activities</li> <li>• interacts appropriately with families within the school setting</li> <li>• seeks relevant knowledge of the family in order to provide meaningful connections between the school and family</li> <li>• creates positive connections between the school and the community</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• participates in school-wide family activities</li> <li>• has minimal interaction with families</li> <li>• responds appropriately to contact from families</li> <li>• occasionally connects school activities with community resources</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not attend school-wide family activities</li> <li>• does not respond or inappropriately responds to contact from families</li> <li>• does not positively contribute to the relationship between school and community</li> </ul>
<b>Element 5.3: The teacher promotes practices and policies that improve school environment and student learning.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
<p>The teacher</p> <ul style="list-style-type: none"> <li>• involves and coaches others to implement and sustain teacher-identified change</li> <li>• takes a leadership role in growth initiatives that affect practice and policy throughout the school community</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• identifies possible areas of growth within the classroom and school</li> <li>• recommends and facilitates opportunities for change and growth in the classroom and school</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• participates in required initiatives leading to change in practice and policy in the classroom and school</li> </ul>	<p>The teacher</p> <ul style="list-style-type: none"> <li>• does not participate in available opportunities for change and growth that affect practice and policy</li> </ul>

<b>STANDARD 6: STUDENT LEARNING</b>			
<b>The work of the teacher results in measurable progress of student learning of state-approved curricula.</b>			
<b>Distinguished</b>	<b>Accomplished</b>	<b>Emerging</b>	<b>Unsatisfactory</b>
Evidence from multiple measures consistently validates progress of student learning of appropriate state-approved curricula. The teacher accomplishes a student learning goal that involves collaborative efforts across classrooms.	Evidence from multiple measures consistently validates progress of student learning of the appropriate state-approved curricula.	Evidence from multiple measures does not consistently validate progress of student learning of the appropriate state-approved curricula.	Evidence from multiple measures does not validate progress of student learning of appropriate state-approved curricula.

<b>STANDARD 7: PROFESSIONAL CONDUCT</b>			
<b>The teacher demonstrates professional conduct as defined in law, policy and procedure at the state, district, and school level.</b>			
	<b>Meets Standard</b>	<b>Below Standard</b>	<b>Unsatisfactory</b>
<b>Policy and Procedure</b>	Adheres to state, district and school policy and procedure	Adheres to state, district and school policy and procedure with few exceptions	Demonstrates a pattern of violating state, district or school policy and procedure
<b>Attendance</b>	Adheres to state, district and school attendance policy and procedure	Adheres to state, district and school attendance policy and procedure with few exceptions	Demonstrates a pattern of absences that violate state, district or school attendance policy and procedure
<b>Schedule</b>	Adheres to state, district and school work schedule policy and procedure	Adheres to state, district and school work schedule policy and procedure with few exceptions	Demonstrates a pattern of failure to adhere to the work schedule defined by state, district, or school policy and procedure
<b>Respect</b>	Interacts professionally with students, parents/guardians, colleagues and community	Interacts professionally with students, parents/guardians, colleagues and community with few exceptions	Demonstrates a pattern of behavior with students, parents/guardians, colleagues and/or community which is unprofessional

### 3.3 – WVBE Policy 5310

**TITLE 126  
LEGISLATIVE RULE  
BOARD OF EDUCATION**

**SERIES 142  
PERFORMANCE EVALUATION OF SCHOOL PERSONNEL (5310)**

**§126-142-1. General.**

1.1. Scope. -- These legislative rules establish the process for evaluation of the employment performance of professional personnel that shall be applied uniformly statewide.

1.2. Authority. -- W. Va. Constitution, Article XII, §2 and W. Va. Code §18-2-5 and §18A-2-12.

1.3. Filing Date. -- August 11, 2006

1.4. Effective Date. -- September 11, 2006

1.5. Repeal of Former Rule. -- This legislative rule revises W. Va 126CSR142 "Performance Evaluation of School Personnel" filed August 12, 2002 and effective September 11, 2002.

**§126-142-2. Purpose.**

2.1. This evaluation policy has two (2) major purposes:

2.1.1. To promote professional growth and development and assure quality performance in West Virginia schools, and

2.1.2. To provide evaluation data as one basis for sound personnel decisions.

**§126-142-3. Authorities.**

3.1. State Board of Education -- The State Board of Education shall: a) develop standardized evaluation components to be used by each county board of education in implementing its evaluation policy and related administrative procedures, and b) approve county board's of education employee evaluation administrative procedures.

3.2. County Board of Education -- Each county board of education shall implement written administrative procedures related to the requirements of this policy subject to the approval of the State Board of Education.

**§126-142-4. Definitions.**

4.1. Conference: a meeting between the supervisor and employee or among the improvement

teams and the employee focusing on the employee's performance, the employee's performance during an observation, an evaluation, or an improvement plan.

4.2. Evaluation Instruments: the approved evaluation form(s) containing the performance criteria.

4.3. Performance Criteria: indicators of stated job responsibilities used to evaluate the performance of an employee.

4.4. Observation: the process of collecting data on the employee's job performance.

4.5. Rating: an exemplary, exceeds standards, meets standards, or unsatisfactory value assigned to the performance of an employee.

4.6. Portfolio for Teachers: a collection of materials assembled and selected by the teacher to document commendable job performance. The compilation of this documentation is optional. The portfolio may be used by the teacher during the observation or the evaluation conference.

4.7. Portfolio for Administrators/Professional Support Personnel: a collection of materials assembled and selected by the administrator or professional support personnel to document goal attainment. The compilation of this documentation is required. The portfolio may be used by the administrator or professional support personnel during the observation or the evaluation conference.

4.8. Professional Growth and Development Plan: a plan designed and developed by teacher and his/her supervisor for continued professional growth.

4.9. Classroom Teacher: For the purposes of this policy, classroom teacher is defined as the professional educator who has a direct instructional relationship with pupils.

4.10. Professional Support Personnel: For the purposes of this policy, professional\_support person is defined as the professional educator whose title includes but is not limited to the following: athletic trainer, counselor, education audiologist, school nurse, school psychologist, social service and attendance, and speech language pathologist.

4.11. Administrator: For the purposes of this policy, administrator is defined as the professional educator whose title includes but is not limited to the following: central office administrator, supervisor, director, coordinator, program specialist, principal, and/or vice principal.

4.12. Coach: For the purposes of this policy, coach is defined as a member of a school faculty, substitute teacher or student teacher within a public school or an authorized certified individual under contract with a county board of education who provides instruction, direction, or supervision to athletic teams for the purpose of developing ability or skill to perform in athletic contests.

4.13. Immediate Supervisor: For the purposes of this policy, immediate supervisor is defined

as a professional educator/administrator identified by the county superintendent to conduct observations, complete evaluations, and write and monitor improvement plans.

4.14. Orientation: a meeting to assure that all employees have a full understanding of the purposes, instruments and procedures used in evaluating the performance of employees.

4.15. High Objective Uniform State Standard of Evaluation (HOUSSE): HOUSSE is an optional method of documenting subject matter competency in a core academic subject(s) for a teacher in order to meet the definition of highly qualified teacher. Section I of the Teacher Evaluation Form identified in W.Va. 126CSR13, West Virginia Board of Education Policy 2320, A Process for Improving Education: Performance Based Accreditation System and W. Va. §126-142-14.2 that addresses a teacher's knowledge of the subject has been designated as West Virginia's HOUSSE. A general education teacher not new to the profession and a special education teacher eligible to use HOUSSE as defined in W. Va. 126CSR136 West Virginia Board of Education Policy 5202, Minimum Requirements for the Licensure of Professional/Paraprofessional Personnel and Advanced Salary Classification (hereinafter Policy 5202), Section 8.2.2.c may use a rating of "meets standards" or higher on Section I of the Teacher Evaluation Form §126-142-8.1.3 to document his/her subject matter competency in order to meet the definition of highly qualified teacher in that content are being evaluated that year. Special education teachers who must rely on HOUSSE to demonstrate subject matter competency may use WV Board of Education approved professional development for the purpose of demonstrating subject matter competence.

#### **§126-142-5. Training.**

5.1. All supervisors shall receive training in a) conducting observations and conferences, b) completing evaluations, and c) writing and monitoring improvement plans.

5.2. Each evaluator shall be trained in management and evaluation skills.

5.3. The Center for Professional Development and the State Board of Education shall provide education and training in evaluation skills to administrative personnel who will conduct evaluations.

#### **§126-142-6. State Board of Education Approval.**

6.1. County school district administrative procedures approved by the State Board of Education shall be in effect no later than September 1, 2002.

#### **§126-142-7. Principles of Operation.**

7.1. County administrative procedures for conducting employee evaluations shall include a) the identity of the immediate supervisor who conducts the observations and evaluations, b) the time frame for conducting and completing the evaluation process, c) the procedures for sharing the results with the employee, and d) the process to be used in improving an employee's performance based on the evaluation results.

7.2. All monitoring and/or observations of the employee shall be conducted openly.

7.3. An employee whose performance evaluation is rated unsatisfactory shall be given an opportunity to correct the deficiencies.

7.4. Each county school district's administrative procedures shall be implemented in conformity with current grievance and other due process requirements.

7.5. To assure that all employees have a full understanding of the evaluation policy and procedures an orientation shall be convened for all employees at the beginning of the employment period. Employees shall be provided a copy of the instruments and procedures.

#### **§126-142-8. Rating Structure.**

8.1. The four (4) performance rating categories on the personnel evaluation form for employees are a) exemplary, b) exceeds standards, c) meets standards, and d) unsatisfactory. The scale for assessing the performance criteria is as follows:

8.1.1. Exemplary - Performance is consistently exceptional in meeting performance criteria demonstrated by providing extraordinary opportunities for student success through instructional strategies that confirm the teacher's expertise and the ability to reach all students.

8.1.2. Exceeds Standards - Performance is consistently above average in meeting performance criteria demonstrated by going beyond the established standards and instructional practices in reaching all students.

8.1.3. Meets Standards - Performance is consistently adequate in meeting performance criteria.

8.1.4. Unsatisfactory - Performance is not consistently acceptable in meeting performance criteria.

#### **§126-142-9. Evaluation Criteria for Classroom Teachers.**

9.1. Classroom teachers who are in their first, second, or third year of teaching shall be evaluated a minimum of two (2) times per year using performance criteria as set forth in this policy. Classroom teachers in their fourth or fifth year of teaching shall be evaluated a minimum of one (1) time per year using performance criteria. For classroom teachers with five (5) or more years of experience, who have not received an unsatisfactory rating, an evaluation shall be conducted or professional growth and development plan required only when the immediate supervisor determines it to be necessary for a particular classroom teacher, or when a classroom teacher exercises the option of being evaluated at more frequent intervals.

9.2. Observation of classroom teachers -- Teachers who are in their first, second, or third year of teaching will be observed a minimum of three (3) times for each written performance evaluation. Two (2) observations shall cover a minimum of thirty (30) minutes each and shall be conducted during an instructional activity. One (1) of the two (2) instructional observations shall

be scheduled with the teacher. Other observations shall be conducted at the discretion of the supervisor and may include non-instructional activities. The first observation shall occur on or before November 1.

9.3. Teachers in their fourth or fifth year of teaching will be observed a minimum of two (2) times for each written performance evaluation. One (1) of the two (2) observations shall cover a minimum of thirty (30) minutes and shall be conducted during an instructional activity. The supervisor shall schedule one (1) of the two (2) observations with the teacher. Other observations may be conducted at the discretion of the supervisor and may include non-instructional activities. The first observation shall occur on or before November 1.

9.4. HOUSSE. – Educators, regardless of the number of years teaching experience, wanting to use the HOUSSE option to demonstrate subject matter competence, must:

9.4.1. Meets Requirements. – Educators must first be eligible to use the HOUSSE option to demonstrate subject matter competence as specified in Policy 5202, Section 8.2.a-C-c. AND

9.4.2. Evaluation Request. – Educators must request in writing that the administrator conduct an observation and evaluation in each content area for which subject matter competence must be demonstrated.

a. Elementary. – Educators assigned to teach at the elementary level must have one observation and one evaluation for one content area.

b. Secondary. – Educators assigned to teach at the middle or high school level must have one observation in each content area assigned but only one evaluation.

c. Previous Evaluations. – Educators may use previous evaluations (not to exceed three years prior to current school year) to demonstrate subject matter competence.

9.4.3. Section of form to be used. – Only section I of the Performance Evaluation “Programs of Study” as referenced in §126-142-14.2 shall be used in evaluating the educator using the HOUSSE option.

9.5. Post observation conference -- After each thirty (30) minute observation of the teacher the supervisor shall conduct a post observation conference with the teacher within five (5) working days. At that time a signed copy of the observation form shall be given to the teacher. Additional conferences may be held on an as-needed basis as determined by the supervisor.

9.6. Supervisors may observe teachers at any time.

9.7. Lesson plans may not be used as a substitute for observations.

#### **§126-142-10. Evaluation Process for Classroom Teachers.**

10.1. Evaluation -- Evaluations shall address all levels of teacher responsibilities as outlined in §126-142-13. Commendations may be included and may be based upon data obtained from

the portfolio or other sources. Evaluations shall identify deficiencies, and shall provide written recommendations for meeting performance criteria and characteristics. Evaluations may be completed at any time during the school year before June 1.

10.2. For the purpose of evaluation, classroom teachers may not be required to include in lesson plans any of the following: teach/re-teach strategies; write to learn activities; cultural diversity; color coding; or any other similar items which are not required to serve as a guide to the teacher or substitute for daily instruction.

10.3. For teachers with five (5) or more years of experience who have not received an unsatisfactory rating, an evaluation shall be conducted or professional growth and development plan required only when the supervisor determines it to be necessary for a particular classroom teacher, or when a classroom teacher exercises the option of being evaluated at more frequent intervals.

10.4. To determine if an evaluation is needed more frequently for a particular teacher with five (5) or more years of experience and no unsatisfactory ratings, supervisors shall complete at least two (2) written observations using state performance criteria forms with deficiencies specified. Observations may be conducted during instructional or non-instructional activities at any time during the school year. The supervisor shall conduct a post observation conference with the teacher within five (5) working days of each observation informing the teacher during any observation conference after the first observation conference that an evaluation using state performance criteria forms will be conducted with reasons specified. After each conference, a signed copy of the observation form shall be given to the teacher.

10.5. Teachers with five (5) or more years of experience who have not received an unsatisfactory rating may request a professional growth and development plan or performance evaluation with a written request to the school principal by October 1 in the year an evaluation is requested. If a performance evaluation is requested, it shall be evaluated pursuant to §126-142-9.3. If a professional growth and development plan is requested, it will be mutually agreed upon by the teacher and supervisor and contain the following elements: goal(s), objectives and activities, and criteria to measure achievement of goal(s). On or before November 1 the professional growth and development plan will be developed and agreed upon by the teacher and supervisor. By June 1 progress toward achievement of the goal(s) will be discussed in the evaluation conference and included in the written evaluation narrative. The professional growth and development plan will be implemented for a one (1) year period and may be revised on an annual basis by mutual agreement by the teacher and supervisor.

10.6. Teachers requesting a HOUSSE with a written request to the school principal shall be evaluated pursuant to §126-142-9.4.

10.7. A teacher who has received an unsatisfactory rating shall be evaluated every year using state performance criteria forms until five (5) consecutive years of satisfactory ratings have been achieved. Thereafter, the teacher shall be evaluated pursuant to §126-142-9.1.

10.8. The immediate supervisor is responsible for the teacher's evaluation.

10.9. The supervisor shall share the evaluation with the teacher during a scheduled conference.

10.10. The teacher has the right to include a written statement as an addendum to the evaluation.

10.11. The teacher shall sign the evaluation form denoting that the supervisor has reviewed the evaluation with the teacher and the teacher has received a copy, but the signature shall not imply concurrence with the findings.

#### **§126-142-11. Improvement Plan for Classroom Teachers.**

11.1. An improvement plan shall be developed by the supervisor and teacher when a teacher's performance is unsatisfactory in any area of teacher responsibility as contained in §126-142-13.

11.2. The improvement plan shall designate how the teacher shall meet the criteria. The improvement plan shall:

11.2.1. identify the deficiency(ies),

11.2.2. specify the corrective action to remediate the deficiencies,

11.2.3. contain the time frame for monitoring and deadlines for meeting criteria, but in no case shall an improvement plan be for more than one (1) semester in length, and

11.2.4. describe the resources and assistance available to assist in correcting the deficiency(ies).

11.3. After a teacher has successfully corrected deficiency(ies) the teacher must continue to meet standards.

11.4. If a teacher transfers within the county or to any other county within the state during the implementation of an improvement plan, the plan is transferred to the new supervisor for continuation.

11.5. Nothing in this section shall supersede the provisions of W. Va. Code §§18-2E-6, 18-3-4, or 18A-2-8.

#### **§126-142-12. Improvement Team for Classroom Teachers.**

12.1. A referral to an improvement team for a teacher whose evaluation is unsatisfactory may occur when the supervisor determines he/she needs such assistance. The teacher may request the assistance of an improvement team.

12.2. The improvement team shall be comprised of the teacher's immediate supervisor, one additional administrator preferably in the content area, and one professional educator in the same

or related specialization. The professional educator shall be selected by the teacher and approved by the county superintendent. The selection of the other members of the improvement team shall be based upon county administrative procedures adopted pursuant to §126-142-3.2.

12.3. The improvement team shall serve only as a resource to the immediate supervisor who shall retain authority for the evaluation.

12.4. The improvement team shall monitor the improvement plan and may: a) conduct observations and conferences, b) provide training to assist the teacher in meeting the performance criteria outlined in the plan, and c) identify additional resources.

12.5 Release time may be provided for teachers who serve on the improvement team.

### **§126-142-13. Classroom Teachers' Responsibilities.**

13.1. Job descriptions for teachers shall include the following responsibilities:

13.1.1. implements programs of study,

13.1.2. fosters a classroom climate conducive to learning,

13.1.3. utilizes instructional management systems models that increase student learning,

13.1.4. monitors student progress towards mastery of instructional goals and objectives,

13.1.5. communicates effectively within the educational community, and with parents on a regular basis,

13.1.6. meets professional responsibilities, and

13.1.7. effective July 1, 2003, demonstrates competency in the knowledge and implementation of technology standards.

### **§126-142-14. Classroom Teachers' Performance Criteria.**

14.1. Performance criteria in this section are the state adopted responsibilities for classroom teachers. The purpose is to clarify teacher responsibilities and help provide guidance to the teacher in understanding job expectations.

14.2. Programs of Study:

14.2.1. Definition: Provides curricula required by the State of West Virginia.

a. Bases instruction on adopted curricula for the school.

b. Demonstrates accurate and current knowledge in subject field.

- c. Develops appropriate lessons to teach instructional objectives.
- d. Employs a variety of instructional strategies to augment achievement.
- e. Uses content scope and sequence in planning.

#### 14.3. Classroom Climate:

14.3.1. Definition: Provides an atmosphere conducive to learning consistent with school/county mission.

- a. Follows established school discipline procedures that include W. Va. 126CSR99, West Virginia Board of Education Policy 4373, Student Code of Conduct.
- b. Establishes procedures and rules that enhance learning.
- c. Encourages students' attendance.
- d. Sets high positive expectations for student performance.
- e. Encourages and acknowledges individual student accomplishments and appropriate behavior.
- f. Treats students in a fair and equitable manner.
- g. Accommodates individual learning differences.
- h. Creates and maintains an environment that supports learning.
- i. Communicates with parents.

#### 14.4. Instructional Management Systems:

14.4.1. Definition: Organizes teaching strategies to maximize allocated instructional time to increase student learning.

- a. Prepares and implements lesson plans.
- b. Begins lesson or instructional activity with a review of previous material as appropriate.
- c. Has materials, supplies and equipment ready at the start of the lesson or instructional activity.
- d. Introduces the instructional activity and specifies instructional objectives.
- e. Directs and adequately supervises students to be on task quickly at the beginning

of each instructional activity.

f. Presents reading, writing, speaking, and listening strategies using concepts and language that students understand.

g. Provides relevant examples and demonstrations to illustrate concepts and skills.

h. Assigns developmentally appropriate tasks.

i. Provides instructional pacing that ensures student understanding.

j. Maximizes student time-on-task.

k. Makes effective transitions between instructional activities.

l. Summarizes the main point(s) of the instructional activity.

m. Encourages students to express ideas clearly and accurately.

n. Incorporates higher level thinking skills.

o. Assists students to develop productive work habits and study skills, enabling communication with parents as needed.

p. Provides remediation activities for students.

q. Designs, delivers, and assesses student learning activities addressing the state adopted instructional goals and objectives.

r. Integrates a variety of technology applications and learning tools to augment student achievement.

#### 14.5. Student Progress:

14.5.1. Definition: Gathers, stores, and monitors data related to student learning for use in assessing progress toward achieving the instructional objectives.

a. Follows grading policies and regulations.

b. Maintains accurate and complete student records.

c. Monitors and evaluates student progress.

d. Provides feedback on student work.

e. Monitors student attendance.

#### 14.6. Communication:

14.6.1. Definition: Communicates with students, parents, educational personnel, and others, utilizes standard grammar, listening skills, and clarity in the presentation of ideas.

- a. Communicates student progress according to established procedures and policies.
- b. Communicates regularly and effectively with students, co-workers, parents/guardians, and the community, and exhibits appropriate interactive skills.
- c. Follows confidentiality procedures regarding students, parents/guardians, and fellow staff members.
- d. Speaks and writes standard English clearly, correctly, and distinctly.
- e. Determines and utilizes appropriate community resources.

#### 14.7. Professional Work Habits:

14.7.1. Definition: Demonstrates behavior that reflects established professional responsibilities (i.e. attendance, punctuality and verbal/nonverbal communication).

- a. Adheres to established laws, policies, rules, and regulations.
- b. Interacts appropriately with students, other educational personnel, and parents.
- c. Participates in activities that foster professional growth.
- d. Is punctual with reports, grades, records, and in reporting to work.
- e. Performs assigned duties.
- f. Strives to meet county/school goals.
- g. Commands respect by example in appearance, manners, behavior and language.

#### 14.8. Technology Standards, effective July 1, 2003.

14.8.1. Definition: demonstrates competency and knowledge in the implementation of technology standards identified by the West Virginia Board of Education policies which are based on the International Society for Technology in Education (ISTE) Standards.

- a. Demonstrates a sound understanding of technology operations and concepts.
- b. Plans and designs effective learning environments and experiences supported by technology.

- c. Implements curriculum plans that include methods and strategies for applying technology to maximize student learning.
- d. Applies technology to facilitate a variety of effective assessment and evaluation strategies.
- e. Uses technology to enhance productivity and professional practice.
- f. Understands the social, ethical, legal and human issues surrounding the use of technology in PreK-12 schools and applies that understanding in practice.

**§126-142-15. Evaluation Process for Administrators.**

15.1. Administrators who are in their first, second, or third year of administration, a minimum of two (2) written evaluations per year is required.

15.2. Administrators with three (3) or more years of administration, a minimum of one (1) written evaluation per year is required.

15.3. The administrator's immediate supervisor is responsible for monitoring performance and for preparing the written evaluation.

15.4. The purpose of the evaluation is to improve the administrator's performance and professional growth. The administrator and the immediate supervisor will mutually establish annual written goals for the administrator's performance evaluation on or before October 1. The goals shall be related to the administrator's job responsibilities. In addition to the goal setting conference the administrator and the supervisor will meet at least once annually to review progress toward meeting the established goals. The supervisor will schedule an evaluation conference with the administrator to share findings and prepare the written evaluation. The administrator shall receive a copy of the evaluation within five (5) working days.

15.5. The primary data source for the performance evaluation will be information and documentation related to the mutually established goals. The administrator shall maintain a portfolio of materials that validate progress or completion of the mutually establish goals. The administrator's supervisor may also collect documentation relating to these goals. The supervisor will evaluate the administrator's performance using a narrative description to document the progress made toward goal attainment or to document unsatisfactory performance. Because the mutually established goals will be unique to each administrator, it follows that the evaluation narrative will focus on the administrator's demonstration of those skills identified in the performance characteristics. Therefore, the evaluation will be goal directed and may incorporate the performance characteristics in the narrative description. The supervisor may include those performance characteristics appropriate to the mutually established goals. The performance characteristics should be identified during the goal setting conference. The portfolios maintained by the administrator and the supervisor shall be included as part of the evaluation documentation.

15.6. The administrator's signature on the evaluation form denotes that the supervisor has reviewed the evaluation with the administrator. The administrator's signature does not imply

concurrence with the evaluation and/or its rating. The administrator shall receive a copy of the evaluation. The administrator has the right to include a written statement as an addendum to the evaluation. An addendum and the signature of the administrator must be affixed to the evaluation not later than five (5) working days following receipt of the written evaluation.

**§126-142-16. Improvement Plan for Administrators.**

16.1. An improvement plan shall be developed by the supervisor and administrator when an administrator's performance is unsatisfactory in any area of responsibility as contained in §126-142-18.

16.2. The improvement plan shall designate how the administrator shall meet the performance characteristics. The improvement plan shall:

16.2.1. identify the deficiency(ies),

16.2.2. specify the corrective action to remediate the deficiency(ies),

16.2.3. contain the time frame for monitoring and deadlines for meeting the performance characteristics, and in no case shall an improvement plan be for more than one (1) semester in length, and

16.2.4. describe the resources and assistance available to assist in correcting the deficiency(ies).

16.3. After an administrator has successfully corrected deficiency(ies), the administrator must continue to meet standards.

16.4. Nothing in this section shall supersede the provisions of W. Va. Code §§18-2E-6, 18-3-4, or 18A-2-8.

**§126-142-17. Improvement Team for Administrators.**

17.1. A referral to an improvement team for an administrator whose evaluation is unsatisfactory may occur when the supervisor determines he/she needs such assistance. The administrator may request the assistance of an improvement team.

17.2. The improvement team shall be comprised of the administrator's immediate supervisor and two administrators, one at the same school level. One of the administrators shall be selected by the administrator completing the improvement plan and approved by the county superintendent. The selection of the other members of the improvement team shall be based upon county administrative procedures adopted pursuant to §126-142-3.2.

17.3. The improvement team shall serve only as a resource to the immediate supervisor who shall retain authority for the evaluation.

17.4. The improvement team shall monitor the improvement plan and may: a) conduct

observations and conferences, b) provide training to assist the administrator in meeting the performance criteria outlined in the plan, and c) identify additional resources.

17.5. Release time may be provided for administrators who serve on the improvement team.

#### **§126-142-18. Administrators' Responsibilities.**

18.1. In addition to established laws, policies, rules and regulations, job descriptions for administrators shall include the following responsibilities:

18.1.1. demonstrates instructional leadership to enhance school effectiveness by improving instruction and augmenting student performance,

18.1.2. provides purpose and direction for schools/county,

18.1.3. demonstrates cognitive skills to gather, analyze and synthesize information to reach goals,

18.1.4. manages group behaviors to achieve consensus,

18.1.5. enhances quality of total school/county organization,

18.1.6. organizes and delegates to accomplish goals,

18.1.7. communicates effectively, and

18.1.8. effective July 1, 2003, provides leadership in the implementation of technology standards.

#### **§126-142-19. Administrators' Performance Characteristics.**

19.1. Performance characteristics in this section are the state adopted responsibilities for administrators. The purpose is to clarify responsibilities of the administrator and to provide guidance to the administrator in understanding job expectations.

##### **19.2. Instructional Leadership**

19.2.1. Demonstrates instructional leadership to enhance school effectiveness by improving instruction and augmenting student achievement. Items that may be used to reflect instructional leadership competencies:

a. demonstrates a knowledge of supervision to improve instruction,

b. uses the evaluation process to improve instruction effectively,

c. analyzes a variety of educational data to focus on student achievement,

- d. guides teachers in their professional growth, and
- e. facilitates a climate that is conducive to student learning and development.

### 19.3. Purpose and Direction.

19.3.1. Proactive Orientation. -- Views self as the school's/county's leader, initiates action, takes responsibility and motivates others to assist in setting and achieving the goals. Items that may be used to reflect instructional leadership competencies:

- a. accepts authority and assumes responsibility,
- b. analyzes negative and positive forces affecting the school/county,
- c. takes immediate steps when problems arise,
- d. focuses resources on strategic goals,
- e. uses problem solving strategies,
- f. exhibits a positive attitude,
- g. encourages and facilitates meaningful and effective parent-teacher communication, and
- h. commands respect by example in appearance, manners, behavior and language.

### 19.4. Educational Values

19.4.1. Educational Values. -- Manifests values about the school/county including students' welfare, fairness to staff, effective communication with parents, and demonstrates behavior consistent with the values. Items that may be used to reflect instructional leadership competencies:

- a. promotes the welfare of students, faculty and staff, and
- b. sets high expectations and articulates them to community, parents, staff and students

### 19.5. Cognitive Skills.

19.5.1. Interpersonal Skills. -- Listens, understands and verbalizes the concepts, thoughts and ideas held by others to ensure an understanding of their feelings and position. Items that may be used to reflect interpersonal skills:

- a. encourages others to describe their perspectives,

- b. respects others' perspectives, and
- c. listens to others.

19.5.2 Problem Analysis. -- Searches for relevant data and analyzes complex information before arriving at an understanding of an event or a problem using formal and informal observations, research and interaction in gathering information. Items that may be used to reflect problem analysis:

- a. gathers information about the school, county, students, parents, and community as appropriate,
- b. attends professional development sessions that are relevant to goals, and
- c. accesses computer and management information systems.

19.5.3. Judgment. -- Generates, evaluates, and selects effective solutions in making decisions and solving problems. Items that may be used to reflect judgment:

- a. values divergent thinking,
- b. compares consequences of options, and
- c. makes decisions after data are analyzed.

#### 19.6. Leadership.

19.6.1. Managing Interaction. -- Demonstrates effective use of group processes and facilitator skills. Items that may be used to reflect managing interaction:

- a. identifies self as a team leader,
- b. intervenes, negotiates, resolves conflict as needed,
- c. facilitates communication, and
- d. creates cooperative atmosphere.

19.6.2. Persuasiveness. -- Gains and sustains the attention and interest of others. Items that may be used to reflect persuasiveness:

- a. ties needs to established goals,
- b. articulates expected outcomes, and
- c. develops trust by modeling desired behavior.

19.6.3. Sensitivity. -- Understands the diversity among different groups and modifies interaction style to fit the situation. Items that may be used to reflect sensitivity:

- a. understands how own behavior may affect others,
- b. adjusts strategies when ineffective,
- c. exhibits appropriate interaction skills, and
- d. deals effectively with emotional issues.

#### 19.7. Quality Enhancement.

19.7.1. Personal Motivation. -- Establishes high work standards for self and others. Items that may be used to reflect personal motivation:

- a. promotes excellence by evaluating goals,
- b. sets standards for goal accomplishment,
- c. considers feedback, and
- d. assesses own strengths and limitations.

19.7.2. Management. -- Devises opportunities to receive adequate information on the progress of work accomplishments, delegates activities and offers timely feedback relating to quality and productivity. Items that may be used to reflect management:

- a. supervises and monitors performance of staff,
- b. collects and records performance data,
- c. judges performance using criteria,
- d. reinforces desirable behavior,
- e. accesses computer and management information systems, and
- f. demonstrates effective school financial management.

19.7.3. Coaching. - Creates opportunities for development of human resources through effective use of coaching, and the use of staff development to foster individual growth. Items that may be used to reflect coaching:

- a. builds a supportive environment for learning,
- b. provides timely and specific feedback,

- c. reinforces growth and development, and
- d. exhibits effective conferencing skills.

#### 19.8. Organization.

19.8.1. Organizational Ability. -- Develops a plan to meet goals by focusing on time lines and flow of activities, and identifies resources needed to accomplish the job. Items that may be used to reflect organizational ability:

- a. plans for goal accomplishment,
- b. establishes priorities,
- c. budgets and allocates resources,
- d. assigns tasks and activities, and
- e. plans for contingencies.

19.8.2. Delegation. -- Delegates authority and responsibility clearly and appropriately. Items that may be used to reflect delegation:

- a. assesses expertise of self and others,
- b. determines tasks to be assigned,
- c. determines tasks needing outside assistance,
- d. establishes performance standards, and
- e. provides guidance.

#### 19.9. Communications.

19.9.1. Oral Communications. -- Uses verbal skills to communicate appropriately. Items that may be used to reflect oral communications:

- a. pronounces words and articulates clearly,
- b. speaks confidently, and
- c. uses correct grammar.

19.9.2. Written Communications. -- Demonstrates skill in writing appropriately to the intended audience. Items that may be used to reflect written communications:

- a. writes with clarity and conciseness, and
- b. uses correct grammar, spelling and appropriate language.

19.10. Technology Leadership, effective July 1, 2003.

19.10.1. Definition -- Demonstrates and creates opportunities for personnel to become competent and knowledgeable in the implementation of technology standards identified in §126-142-14.8.1. Items that may be used to reflect technology leadership competencies:

- a. inspires a shared vision for comprehensive integration of technology and fosters an environment and culture conducive to the realization of that vision,
- b. ensures that curricular design instructional strategies and learning environments integrate appropriate technologies to maximize learning and teaching,
- c. applies technology to enhance professional practice and to increase his/her own productivity and that of other personnel,
- d. ensures the integration of technology to support productive systems for learning and administration,
- e. uses technology to plan and implement comprehensive systems of effective assessment and evaluation, and
- f. understands the social, legal, and ethical issues related to technology and models responsible decision-making related to these issues.

**§126-142-20. Evaluation Process for Professional Support Personnel.**

20.1. Professional support personnel who are in their first, second, or third year of professional service, a minimum of two (2) written evaluations per year is required.

20.2. Professional support personnel in their fourth or fifth year of professional service, a minimum of one (1) written evaluation per year is required.

20.3. For professional support personnel with five (5) or more years of experience who have not received an unsatisfactory rating, a minimum of one (1) evaluation every three (3) years is required unless the supervisor determines that an evaluation is needed more frequently. Supervisors may determine that professional support personnel whose written evaluations include identified deficiencies related to specific professional support personnel performance characteristics may be evaluated more frequently than once every three years.

20.4. The professional support person's immediate supervisor, as defined by the county superintendent, is responsible for monitoring performance and for preparing the written evaluation.

20.5. The purpose of the evaluation is to improve the professional support person's performance and professional growth. The professional support person and the immediate supervisor will mutually establish annual written goals for the professional support person's performance evaluation on or before November 1. The goals shall be related to the professional support person's job responsibilities. In addition to the goal setting conference, the professional support person and the supervisor will meet at least once annually to review progress toward meeting the established goals. The supervisor will schedule an evaluation conference with the professional support person to share findings and prepare the written evaluation. The professional support person shall receive a copy of the evaluation within five (5) working days.

20.6. The primary data source for the performance evaluation will be information and documentation related to the mutually established goals. The professional support person shall maintain a portfolio of materials that validate progress or completion of the mutually established goals. The professional support person's supervisor may also collect documentation relating to these goals. The supervisor will evaluate the professional support person's performance using a narrative description to document the progress made toward goal attainment or to document unsatisfactory performance. Because the mutually established goals will be unique to each professional support person, it follows that the evaluation narrative will focus on the professional support person's demonstration of those skills identified in the performance characteristics. Therefore, the evaluation will be goal directed and may incorporate the performance characteristics in the narrative description. The supervisor may include those performance characteristics appropriate to the mutually established goals. The performance characteristics should be identified during the goal setting conference. The portfolios maintained by the professional support person and the supervisor shall be included as part of the evaluation documentation.

20.7. The professional support person's signature on the evaluation form denotes that the supervisor has reviewed the evaluation with the professional support person. The professional support person's signature does not imply concurrence with the evaluation and/or its rating. The professional support person shall receive a copy of the evaluation. The professional support person has the right to include a written statement as an addendum to the evaluation. An addendum and the signature of the professional support person must be affixed to the evaluation not later than five (5) working days following receipt of the written evaluation.

#### **§126-142-21. Improvement Plan for Professional Support Personnel.**

21.1. An improvement plan shall be developed by the supervisor and the professional support person when the professional support person's performance is unsatisfactory in any area of responsibility as contained in §126-142-23 of this policy.

21.2. The improvement plan shall designate how the professional support person shall meet standards. The improvement plan shall:

21.2.1. identify the deficiency(ies),

21.2.2. specify the corrective action to remediate the deficiency(ies),

21.2.3. contain the time frame for monitoring and deadlines for meeting performance characteristics, and in no case shall the improvement plan be for more than one semester in length, and

21.2.4. describe the resources and assistance available to assist in correcting the deficiency(ies).

21.3. After a professional support person has successfully corrected deficiencies the professional support person must continue to meet standards.

21.4. Nothing in this section shall supersede the provisions of W. Va. Code §§18-2E-6, 18-3-4, or 18A-2-8.

#### **§126-142-22. Improvement Team for Professional Support Personnel.**

22.1. A referral to an improvement team for the professional support person whose evaluation is unsatisfactory may occur when the supervisor determines he/she needs such assistance. The professional support person may request the assistance of an improvement team.

22.2. The improvement team shall be comprised of the professional support person's immediate supervisor, one additional administrator preferably at the same school level, and one professional educator in the same or related specialization. The professional educator shall be selected by the professional support person and approved by the county superintendent. The selection of the other members of the improvement team shall be based upon county administrative procedures adopted pursuant to §126-142-3.2.

22.3. The improvement team shall serve only as a resource to the immediate supervisor who shall retain authority for the evaluation.

22.4. The improvement team shall monitor the improvement plan and may: a) conduct observations and conferences, b) provide training to assist the professional support person in meeting the responsibilities outlined in the plan, and c) identify additional resources. Release time may be provided for professional educators who serve on the improvement team.

#### **§126-142-23. Professional Support Personnel Responsibilities.**

23.1. In addition to established laws, policies, rules and regulations, job descriptions for professional support personnel may include the following responsibilities when appropriate:

23.1.1. plans, prepares and implements new programs or facilitates change in the existing program,

23.1.2. organizes, directs, and coordinates programs,

23.1.3. gathers and interprets data for individuals, groups or programs,

23.1.4. delivers services to students or others,

23.1.5. collaborates with school personnel and/or parents to coordinate the delivery of services to students or others,

23.1.6. facilitates professional development activities to achieve goals,

23.1.7. develops and improves individual competencies and skills to deliver services, and

23.1.8. effective July 1, 2003, demonstrates competency in the knowledge and implementation of technology standards.

#### **§126-142-24. Professional Support Personnel Performance Characteristics.**

24.1. Performance characteristics in this section are the state-adopted responsibilities for professional support personnel. The purpose is to clarify responsibilities of the professional support person and to provide guidance to the professional support person in understanding job expectations.

##### **24.2. Planning, Preparation and Implementation.**

24.2.1. Engages in activities that prepare for implementation of new programs or facilitates change in existing programs and their implementation. Items that may be used to reflect planning and preparation:

- a. identifies needs of students and others,
- b. develops action plans based on identified needs,
- c. evaluates ongoing programs/plans,
- d. revises programs based on assessment ,
- e. implements ongoing program activities and revises activities as needed, and
- f. advises school personnel regarding available resources.

##### **24.3. Administration/Management.**

24.3.1. Organizes, directs, or coordinates programs that include responsibility for budgeting, staffing, reporting and other similar activities. Items that may be used to reflect administration/management:

- a. aids school administration in developing and providing policies and/or programs,
- b. establishes and communicates practices and procedures to students, parents,

community and staff,

- c. works to integrate program into total school curriculum,
- d. prepares thorough and accurate reports in a timely manner, and
- e. makes recommendations to modify the school program to meet individual students' needs.

#### 24.4. Assessment/Evaluation.

24.4.1. Gathers and interprets data from individual, groups, or programs to evaluate needs and programs. Items that may be used to reflect assessment/evaluation:

- a. explains nature and purpose of assessment in an understandable manner,
- b. demonstrates knowledge of theories, techniques and instruments used for assessment,
- c. follows confidentiality procedures,
- d. makes provisions for the attainment and evaluation of program goals, and
- e. communicates effectively with school personnel, students, parents, and the community.

#### 24.5. Intervention.

24.5.1. Delivers services to students and others to improve skills/functional abilities or inform recipients of services. Items that may be used to reflect intervention:

- a. provides activities to foster the development of the whole child/student,
- b. demonstrates positive interpersonal relationships with students, educational staff, parents, and the community,
- c. assists teachers and students in implementing plans/strategies,
- d. involves students in setting objectives, and
- e. uses systematic processes to assess needs, plan interventions, and evaluate outcomes.

#### 24.6. Collaboration.

24.6.1. Collaborates with school personnel, parents and the community to assist with and coordinate the delivery of services to students. Items that may be used to reflect collaboration:

- a. presents information about services offered to students, school personnel, parents, and the community,
- b. assists parents and students with individual needs to secure available services,
- c. creates a positive climate during consultation,
- d. serves on or leads multidisciplinary teams, and
- e. respects values different from her/his own.

#### 24.7. Professional Development.

24.7.1. Facilitates professional development activities to achieve goals. Items that may be used to reflect professional development:

- a. seeks input from staff,
- b. plans, implements, and evaluates professional development programs,
- c. disseminates information at meetings, and
- d. develops procedures and provides training for school personnel, students, and parents.

#### 24.8. Professional Responsibilities.

24.8.1. Develops and improves individual competence and skill in delivering services consistent with professional standards. Items that may be used to reflect professional responsibilities:

- a. behaves in an ethical manner,
- b. demonstrates understanding of own professional limitations,
- c. continues professional development by keeping abreast of current trends,
- d. keeps appointments and follows up with commitments,
- e. adheres to established regulations, policies, rules and laws, and
- f. commands respect by example in appearance, manners, behavior and language.

#### 24.9. Technology Standards, effective July 1, 2003.

24.9.1. Definition: demonstrates competency and knowledge in the implementation of

technology standards identified by the West Virginia Board of Education policies which are based on the ISTE Standards. Items that may be used to reflect instructional leadership competencies:

- a. demonstrates a sound understanding of technology operations and concepts,
- b. applies technology to facilitate a variety of effective assessment and evaluation strategies,
- c. uses technology to enhance productivity and professional practice, and
- d. understands the social, ethical, legal and human issues surrounding the use of technology in PreK-12 schools and applies that understanding in practice.

#### **§126-142-25. Evaluation Process for Coaches.**

25.1. The primary purpose of the evaluation is to provide information necessary to make an objective assessment of the performance of coaches and assistant coaches and to assure that quality coaching is provided to the student athlete.

25.2. A minimum of one (1) written evaluation per coach's and assistant coach's contract period is required each year.

25.3. Principals, assistant principals, or athletic directors who hold an administrative certificate according to W. Va. Code §18A-2-12 shall evaluate coaches and assistant coaches.

25.4. The principal, assistant principal or athletic director shall conduct observations and evaluations of head coaches. A minimum of two (2) observations is required for each evaluation.

25.5. The principal, assistant principal or athletic director with input from the head coach, shall conduct observations and evaluations of assistant coaches. A minimum of two (2) observations is required for each evaluation.

25.6. The principal, assistant principal or athletic director shall share the evaluation with the coach/assistant coach during a scheduled conference and within a four (4) week period at the conclusion of each sport's season as defined by West Virginia Secondary School Activities Commission (WVSSAC).

25.7. The coaches and assistant coaches have the right to include a written statement as an addendum to the evaluation.

25.8. The coach and or assistant coach shall sign the evaluation form denoting that the supervisor has reviewed the evaluation with the coach and the coach has received a copy. The signature shall not imply concurrence with the findings.

#### **§126-142-26. Improvement Plan for Coaches.**

26.1. An improvement plan shall be developed by the principal, assistant principal or athletic director who holds an administrative certificate, when a coach's performance is unsatisfactory in an area of coaching responsibility as contained in §126-142-28.

26.2. The improvement plan shall designate how the coach shall meet performance criteria. The improvement plan shall:

26.2.1. identify the deficiency(ies),

26.2.2. specify the corrective action to remediate the deficiencies,

26.2.3. contain the time frame for monitoring and deadlines for meeting the criteria, and in no case shall an improvement plan be for more than one semester in length, and

26.2.4. describe the resources and assistance available to assist in correcting the deficiency(ies).

26.3. After a coach has successfully corrected deficiencies the coach must continue to meet standards.

26.4. Nothing in this Section shall supersede the provisions of W. Va. Code §§18-2E-6, 18-3-4, or 18A-2-8.

#### **§126-142-27. Improvement Team for Coaches.**

27.1. A referral to an improvement team for a coach whose evaluation is unsatisfactory may occur when the supervisor determines he/she needs such assistance. The coach may request the assistance of an improvement team.

27.2. The improvement team shall be comprised of the coach's immediate supervisor, one additional administrator and one coach in the same or related sport. The coach who will serve as a member of the improvement team shall be selected by the coach and approved by the county superintendent. The selection of the other members of the improvement team shall be based upon county administrative procedures adopted pursuant to §126-142-3.2.

27.3. The improvement team shall serve only as a resource to the immediate supervisor who shall retain authority for the evaluation.

27.4. The improvement team shall monitor the improvement plan and may: a) conduct observations and conferences, b) provide training to assist the coach in meeting the performance criteria outlined in the plan, and c) identify additional resources.

27.5 Release time may be provided for employees who serve on the improvement team.

#### **§126-142-28. Coaches' Responsibilities.**

28.1. In addition to established laws, rules, policies and regulations, job descriptions for coaching shall include the following responsibilities:

28.1.1. communicating with parents and the educational community (Professional and Interpersonal Relations), and

28.1.2. implementing fundamental sports skills and sports management systems. (Coaching and Related Areas).

**§126-142-29. Coaches' Performance Criteria.**

29.1. Performance criteria in this section are the state adopted responsibilities for coaches. The purpose is to clarify coaching responsibilities and help provide guidance to the coach in understanding job expectations.

29.2. Professional and Interpersonal Relations.

29.2.1. Definition: Communicates with educational personnel, parents, students, and others. Items that may be used to reflect professional and interpersonal relations:

- a. cooperates with building principal,
- b. cooperates with athletic director,
- c. develops rapport with coaching staff within the school,
- d. organizes coaching staff,
- e. develops positive relationship with participants,
- f. develops positive relationship with student body,
- g. develops positive relationship with faculty,
- h. develops positive relationship with parents and community,
- i. develops positive relationship with game officials,
- j. develops positive relationship with news media,
- k. develops positive relationship with opponents,
- l. employs appropriate conduct during games,
- m. employs appropriate conduct during practices,
- n. attends league, conference and WVSSAC meetings,

- o. participate in activities that foster professional growth and development,
- p. motivates staff and players toward desired goals, and
- q. commands respect by example in appearance, manners, behavior and language.

### 29.3. Coaching and Related Areas.

29.3.1. Definition: Organizes strategies for teaching sports skills and sports management systems. Items that may be used to reflect coaching and related areas:

- a. develops high caliber and quality instruction,
- b. teaches fundamental skills,
- c. handles athletic injuries,
- d. cares for equipment,
- e. supervises participants and disciplines team appropriately,
- f. designs quality organization of practice sessions,
- g. designs pre-season planning,
- h. supervises managers and other support personnel,
- i. manages budget,
- j. follows purchasing procedures,
- k. initiates game organization skills,
- l. follows league, conference, and WVSSAC policies,
- m. devotes time and energy to coaching duties, and
- n. follows end of season procedures.

**3.4 – Minutes from the July 13, 2011 Meeting of the WVBE Approving a Waiver of Policy 5310 Allowing 25 Schools to Pilot the Revised Educator Evaluation System.**

**MINUTES  
WEST VIRGINIA BOARD OF EDUCATION  
Board Conference Room  
Capitol Building 6, Room 353  
1900 Kanawha Boulevard, East  
Charleston, West Virginia  
July 13, 2011**

**I. Call to Order**

President Priscilla M. Haden called the meeting of the West Virginia Board of Education (WVBE) to order at 12:30 p.m. on July 13, 2011, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Michael I. Green, Lowell E. Johnson, L. Wade Linger Jr., Gayle C. Manchin, and William M. White (via telephone). Members absent were Burma Hatfield and ex officios Jorea M. Marple, State Superintendent of Schools, Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education. Mr. Charles K. Heinlein, Deputy Superintendent of Schools, represented Superintendent Marple during the proceedings.

**II. Recognitions**

The Board: 1) recognized Dr. Kenna R. Seal, former Director of the Office of the Education Performance Audits, for his many years of exemplary service to education (Dr. Seal was the first Director of OEPA and served for 13 years); 2) heard from three students (██████████, Shady Springs High School/Raleigh County, ██████████, Hurricane High School/Putnam County, and ██████████, Huntington High School/Cabell County) attending the first West Virginia Youth Science Camp addressed the Board regarding their camp experience; 3) recognized Ms. ██████████, a first grader at Barboursville Elementary (Cabell County); Ms. ██████████, an eighth grader at Beverly Hills Middle School (Cabell County); and Ms. ██████████, a sophomore at Greenbrier East High School (Greenbrier County), who submitted the winning videos in the West Virginia Department of Education's "What are you reading, West Virginia?" video contest; 4) recognized Ms. Betty Stepp, a kindergarten aide in McDowell County, recipient of the 2011 West Virginia Board of Education School Service Personnel Employee of the Year. Ms. Stepp is the first recipient of the new award. Mr. William Douglas Cooper, an electronic technician for Greenbrier County Schools, was recognized as runner-up for the award, and 5) Ms. Liza Cordeiro, Executive Director, WVDE Office of Communications, State Superintendent's Office, presented *Global21 Moments*, spotlighting Tyler, Hardy, Pocahontas, and Wyoming County Schools for the Board's information.

### **III. Approval of Agenda**

President Haden called for a motion to approve the agenda. Upon motion by Ms. Phillips, seconded by Mr. Dunlevy, the Board unanimously approved the agenda.

### **IV. Personnel Progress Audit for Lincoln County School District**

Dr. Gus Penix, Director of the Office of Education Performance Audits, reported that the Lincoln County School District was returned to full local control at the December 2010 WVBE meeting with the condition that the OEPA review the personnel areas to assure that the Lincoln County School District and the Lincoln County Board of Education adhere to personnel requirements of W. Va. Code and WVBE policies. A Team reviewed personnel areas at the Lincoln County Board of Education office on March 30 and April 1, 2011. The Team returned May 10, 2011, to check additional personnel issues.

Upon the recommendation of Dr. Penix and a motion by Mrs. Manchin, seconded by Ms. Phillips, the Board unanimously continued the Conditional Approval status of Lincoln County Schools, continued its provisional oversight of Lincoln County Schools and required that the county submit to the State Superintendent of Schools, through the Office of Legal Services, 1) monthly agendas of meetings and all official meeting minutes, and 2) a separate schedule listing all county personnel actions until such time as it is determined by another OEPA audit and upon action by the WVBE that the submission of the aforesaid information is no longer needed. (Copy appended to Official Minutes, Attachment A.)

Following the motion, Ms. Phillips requested that the West Virginia School Boards Association (WVSBA) contact the Lincoln County Board of Education and advise of the WVBE's concerns and offer WVSBA trainings to members of the Lincoln County Board of Education. Dr. Johnson requested that the WVBE President and State Superintendent of Schools send formal correspondence to the Lincoln County Board of Education regarding the WVBE's response to the OEPA audit findings. Dr. White suggested that a future meeting of the WVBE take place in Lincoln County.

### **V. Education Performance Audit Report of the Jefferson County School District and North Jefferson Elementary School, Page Jackson Elementary School, South Jefferson Elementary School, Charles Town Middle School, Harpers Ferry Middle School, and Wildwood Middle School, Jefferson County**

Dr. Penix reported that an announced on-site review (five days in advance) was conducted of the Jefferson County School District on April 5-7, 2011. Individual school audits were also conducted at the following schools: North Jefferson Elementary School, Page Jackson Elementary School, South Jefferson Elementary School, Charles Town Middle School, Harpers Ferry Middle School, and Wildwood Middle School. Ms. Susan K. Wall, Superintendent of Jefferson County Schools, addressed the Board regarding the audit findings.

### **VI. Break**

President Haden called for a break at 2:58 p.m.

**VII. Call to Order**

President Haden called the meeting back to order at 3:12 p.m.

**VIII. Education Performance Audit Report of the Jefferson County School District and North Jefferson Elementary School, Page Jackson Elementary School, South Jefferson Elementary School, Charles Town Middle School, Harpers Ferry Middle School, and Wildwood Middle School, Jefferson County (Continued)**

Upon the recommendation of Dr. Penix and a motion by Dr. Johnson, seconded Mrs. Manchin, the Board unanimously: 1) continued the Full Approval status of the Jefferson County School District and directed the WVDE System of School Support, to assist Jefferson County in developing a system of school support specifically directed to the personnel issues of hiring practices and licensure; 2) issued Exemplary Accreditation status to Page Jackson Elementary for school year 2011-2012; 3) approved South Jefferson Elementary School's Education Performance Audit report; and, 4) directed that North Jefferson Elementary School, Charles Town Middle School, Harpers Ferry Middle School, Wildwood Middle School, and Jefferson County revise the schools' Five-Year Strategic Plans within 30 days and correct the findings noted in the reports by the next accreditation cycle. (Copy appended to Official Minutes, Attachment B.)

**IX. Final Individual School Education Performance Audit Report for Philip Barbour High School, Barbour County**

Dr. Penix reported that an announced on-site review was conducted at Philip Barbour High School, Barbour County, on May 5, 2010. A Team returned to the above school April 19, 2011. The purpose of the return visit was to verify correction of the findings identified during the original Individual School Education Performance Audit and to recommend a final school accreditation status. The school had corrected two noncompliances and had not corrected four noncompliances. Dr. F. Joseph Super, Superintendent of Barbour County Schools, addressed the Board regarding the audit findings. Dr. Johnson requested clarification from the WVDE Office of Legal Services regarding the number of times an OEPA review is required before a school is identified as low performing.

Upon the recommendation of Dr. Penix and a motion by Mrs. Manchin, seconded by Mr. Dunlevy, the Board unanimously issued Philip Barbour High School Temporary Accreditation status with an April 30, 2012 Date Certain to correct the remaining findings listed in the report. (Copy appended to Official Minutes, Attachment C.)

**X. Capacity Building for Low Performing Schools and Intervention Counties**

Mr. Ted Mattern (distributed information), System Support, Office of the State Superintendent, provided a brief summary of services provided to Gilmer, Marion, Preston, McDowell, and West Virginia Schools for the Deaf and the Blind. Ms. Michele Blatt, Executive Director, WVDE Office of School Improvement provided information regarding services

provided to Jefferson County Schools and Philip Barbour High School. (Copy appended to Official Minutes, Attachment EE.)

## **XI.**

### **Consent Agenda**

Upon motion by Mr. Green, seconded by Ms. Phillips, the Board unanimously approved the Consent Agenda. (Copies appended to Official Minutes, Attachments D through S.)

- Continued the Full Accreditation status of Mount Vernon Elementary School, Barbour County (Attachment D)
- Continued the Full Accreditation status Sutton Elementary School, Braxton County (Attachment E)
- Continued the Distinction Accreditation status of Brooke High School, Brooke County (Attachment F)
- Continued the Full Accreditation status of Oak Glen Middle School, Hancock County (Attachment G)
- Continued the Full Accreditation status of Wilsonburg Elementary School, Harrison County (Attachment H)
- Issued Cedar Grove Elementary School Full Accreditation status and continued the Full Accreditation status of Hayes Middle School, Kanawha County (Attachment I)
- Continued the Full Accreditation status of the Nicholas County Career/Technical Center (Attachment J)
- Meeting minutes of June 8 and 23, 2011 (Attachment K)
- Closure of J. E. Robins Elementary and Watts Elementary Schools upon the completion of the new West Side II Elementary School (Attachment L)
- West Virginia Schools for the Deaf and the Blind Comprehensive Educational Facilities Plan (CEFP) - The West Virginia Schools for the Deaf and the Blind (WVSD/B) CEFP evaluation team has interviewed three professional architectural firms to assist in the development of a CEFP for the WVSD/B. Based on the required interview scoring system, the CEFP evaluation committee has ranked ordered the three firms interviewed. State Purchasing will negotiate a price for services with the top ranked firm with the understanding that mutual agreement must be reached between the WVSD/B and the top ranked firm on cost. The name of the successful architectural firm will be brought before the WVBE for approval once the firm is determined.

- West Virginia Board of Education's Response to the 2011 Annual Report of the West Virginia Advisory Council for the Education of Exceptional Children (WVACEEC) (Attachment M)
- Four county applications representing summer school at an additional eight county locations (Attachment Mc)
- Fifty-five County Step 7 Plans for Improvement of Instruction (Attachments N-1 and N-2)
- Office of Institutional Education Programs (OIEP) School Calendars for 2011-2012 and granted the Superintendent of the OIEP the authority to approve minor amendments to the school calendars, as needed, for good cause (Attachment O)
- Policy 2322, Standards for High Quality Schools (Attachment P-1 and P-2)
- Policy 2520.1, 21st Century Reading and English Language Arts Content Standards and Objectives for West Virginia Schools and Policy 2520.1A, Next Generation Content Standards and Objectives for English Language Arts in West Virginia Schools (Attachments Q-1 and Q-2)
- Policy 2520.2, 21st Century Mathematics Content Standards and Objectives for West Virginia Schools and Policy 2520.2B, Next Generation Content Standards and Objectives for Mathematics in West Virginia Schools (Attachments R-1, R-2a and R-2b)
- West Virginia Secondary School Activities Commission (WVSSAC) - *Series 2*, Athletics, Provisions Governing Eligibility, *Series 3*, Provisions Governing Contests, and *Series 4*, Provisions Governing Conduct (Attachments S-1, S-2 and S-3).

**XII. Amicus Brief in the matter of *Boards of Education of the Counties of Barbour, et al. v. Public Employees Insurance Agency, et al.*, No. 11-0243 (Kanawha 10-C-327)**

Ms. Heather L. Deskins, General Counsel to the WVBE and WVDE, presented an Amicus Brief in the matter of *Boards of Education of the Counties of Barbour, et al. v. Public Employees Insurance Agency, et al.*, No. 11-0243 (Kanawha 10-C-327) for the Board's consideration. Fifty of West Virginia's county boards of education (the Petitioners) filed a lawsuit in the Circuit Court of Kanawha County alleging that the following actions interfere with and frustrate Petitioners' ability to provide a thorough and efficient system of free schools in accordance with Article XII, Section 1 of the West Virginia Constitution: 1) the application of West Virginia Code §5-16D-6(e) to county boards of education by the Public Employees Insurance Agency (PEIA) and the PEIA Finance Board; 2) the assessment and billing of the total Other Post Employment Benefits (OPEB) liability to county boards of education by the PEIA

and the PEIA Finance Board; and 3) the requirement by the West Virginia State Auditor that Petitioners record the total OPEB liability as a current liability on their annual financial statements. Respondents (PEIA, the PEIA Finance Board, and the West Virginia State Auditor) moved to dismiss the complaint on the basis that Petitioners raised a nonjusticiable political question and on the basis that the complaint did not satisfy the standard applicable to determining whether a court should entertain a declaratory judgment action. The Circuit Court agreed with Respondents and dismissed the complaint without entertaining the merits of the case. The Petitioners filed an appeal of the dismissal to the West Virginia Supreme Court of Appeals. The Court has subsequently agreed to hear the appeal.

Upon motion by Mr. Dunlevy, seconded by Ms. Phillips, the Board unanimously approved the filing of an amicus brief in support of *Boards of Education of the Counties of Barbour, et al. v. Public Employees Insurance Agency, et al.*, No. 11-0243 (Kanawha 10-C-327).

### **XIII. Board Reports**

**Professional Development Committee.** Dr. Johnson, assisted by Mr. Nathaniel Hixson (distributed information), Assistant Director, WVDE Office of Research, provided information regarding the committee meeting that took place on June 22. Agenda items included: discussion of online registration system for professional development, review of professional development survey (draft report), update on statewide professional development plan, discussion of memorandum on state professional development policies, Advanced Placement and Policy 2510 update and discussion of Policy 2515 and weighted grades for AP courses/exams. (Copy appended to Official Minutes, Attachment FF.)

**Board Member Reports.** Dr. White indicated that he wished to provide a report (with video) regarding his June visit to the WVSDB at the August meeting and provided information regarding his attendance at a meeting with the intervention counties sponsored by the WVSBA. Mrs. Manchin provided information regarding the NASBE Southern Regional meeting regarding the common core standards that took place at The Greenbrier in Lewisburg. Mr. Dunlevy provided information regarding a recent meeting of the School Building Authority of West Virginia and attended the annual superintendent's meeting at Oglebay. Ms. Phillips and Ms. Haden provided information regarding graduation activities at the WVSDB and parental concerns regarding the lack of opportunities to interact with stimuli outside the school/campus atmosphere.

### **XIV. Recess**

President Haden recessed the meeting at 4:45 p.m. and announced that the meeting would reconvene on July 14, 2011, at 9:00 a.m., in the same location.

### **XV. Reconvene**

President Haden reconvened the meeting of July 13, 2011, at 9:00 a.m. on July 14, 2011, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Haden, Vice President Jenny N. Phillips, Secretary Robert W. Dunlevy, Michael I. Green, Lowell E. Johnson, L. Wade Linger Jr., Gayle C. Manchin, and William M. White (via telephone). Members absent were Burma Hatfield and ex officios Jorea M. Marple, State Superintendent of Schools, Brian E. Noland, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education. Mr. Charles K. Heinlein, Deputy Superintendent of Schools, represented Superintendent Marple during the proceedings.

#### **XVI. Board Reports (Continued)**

President Haden provided information regarding the signing of the Memorandum of Understanding as a part of the Common Ground: Education and Military Partnership, Civic Literacy meeting, RESA 8 meeting, legislative agenda building, judicial conference, and visit to RESA 5 to recognize Mr. Ronald K. Nichols for his many years of service (Mr. Nichols retired as Executive Director of RESA 5 on June 30, 2011) and Education Commission of the States/National Civic Literacy Council meetings.

#### **XVII. Waivers of State Board of Education Policies and Regulations, Superintendent's Interpretations and State Statutes and Legislative Rules**

Ms. Betty Jo Jordan, Executive Assistant to the State Superintendent presented waivers of State Board of Education policies and regulations, Superintendent's Interpretations and state statutes and legislative rules for the Board's consideration. In March 2011, the WVBE revised its procedures for first time and continuation of waiver requests for instructional materials or high school courses to be used as substitutes for graduation requirements. The revision established a uniform, annual timeline for these requests, approval and evaluation. All requests for waivers of instructional materials or for courses used as a substitute for graduation requirements must now be submitted on or before May 1 of each year. The WVBE will then consider those requests at its annual July meeting. Approved waivers of instructional materials will be effective for two school years; each county or school is required to submit annual evaluation results which will be reviewed by appropriate WVDE staff. Should any continuation for waiver be denied, the school/county will be expected to immediately implement their alternative plan for instructional materials. Approved waivers for courses used as a substitute for graduation requirements will be effective upon approval until June 30 of the next calendar year. All schools or counties who receive such waivers for courses as substitute for graduation requirements will be required to annually submit evaluation results to WVDE/WVBE. In the event such waiver is not approved, the school or county will be notified to modify course/student schedules so that students are enrolled in the appropriate high school course for graduation credit. All other requests for waivers or WVBE policies will be reviewed as received and placed on WVBE agenda accordingly. Any school or county that receives a waiver of WVBE policy must provide evaluation of impact of waiver to WVDE/WVBE on an annual basis. The approved waiver will be in effect for one year from approval date or for the period of time requested and approved. WVDE staff reviewed each request and prepared recommendations for WVBE action.

Upon motion by Ms. Phillips, seconded by Mrs. Manchin and unanimously carried, the Board approved two first time requests for waivers of WVBE policy, three continuation requests

for waivers of WVBE policy and 20 requests for continuation waiver of instructional materials. (Copy appended to Official Minutes, Attachment T.)

### **XVIII. Appointments to the Educator Preparation Program Review Board**

Dr. Amelia Courts, Assistant State Superintendent, Division of Educator Quality and System Support, presented appointments to the Educator Preparation Program Review Board (EPPRB) for the Board's consideration. The Educator Preparation Program Review Board (EPPRB) makes recommendations to the WVBE regarding initial and continuing educator preparation program approval. According to Policy 5100, the EPPRB is comprised of seven members; three members representing higher education, three members representing public education, and one member representing the West Virginia Commission for Professional Teaching Standards. Members representing the public schools are nominated and approved by the WVBE. Rachel Cunningham, a teacher from Upshur County; Delores Cook, former WVBE Member; Isaac Lewis, a teacher from Hampshire, have been nominated by members of the WVBE.

Upon motion by Dr. Johnson, seconded by Ms. Phillips and unanimously carried, the Board appointed Rachel Cunningham, Delores Cook, and Isaac Lewis to the EPPRB. (Copy appended to Official Minutes, Attachment U.)

### **XIX. WVBE Policy 2525, West Virginia's Universal Access to Early Education System, Section §126-28-6, Collaboration and the County Plan**

Mr. Clayton Burch (distributed information), Assistant Director, WVDE Office of Instruction, presented the county plans required by Policy 2525 for the Board's consideration. W. Va. Code §18-5-44 requires county boards of education to submit a plan at least every two years for implementation of their pre-kindergarten system. The WVBE and West Virginia Department of Health and Human Resources (WVDHHR) have the responsibility for convening a committee, known as the WV Pre-K Steering Team, to review the quality and content of the county plans. Pursuant to WVBE Policy 2525 the WV Pre-K Steering Team has reviewed the county plans and submitted its recommendation for approved county plans to the WVDHHR. The WVDHHR has informed the WVDE and the WVBE of all West Virginia Pre-K County Plans approved for FY2011-2012.

Upon motion by Mrs. Manchin, seconded by Ms. Phillips and unanimously carried, the Board accepted the county plans in order that funding for programs be authorized. (Copy appended to Official Minutes, Attachment V and addenda.)

### **XX. Policy 2340, West Virginia Measures of Academic Progress Revision**

Mr. Robert E. Hull, Associate Superintendent, presented Policy 2340 for the Board's consideration. Amendment of Policy 2340 is required due to the recent revision of Policy 2510, Assuring Quality of Education: Regulations for Education Programs.

Upon motion by Mr. Dunlevy, seconded by Ms. Phillips and unanimously carried, the Board placed the affected portions of Policy 2340 on public comment for 30 days. (Copy appended to Official Minutes, Attachment W.)

**XXI. Policy 3236, Education Innovation Zones**

Dr. Courts presented Policy 3236 for the Board's consideration. Policy 3236 is being revised to incorporate Senate Bill 228, Local Solution Dropout Prevention and Recovery Innovation Zone Act provisions. The intent of the bill is to add a separate category of innovation zones focusing on dropout prevention. The original category of innovation zones contained in Policy 3236 will be maintained.

Upon motion by Dr. Johnson, seconded by Ms. Phillips and unanimously carried, the Board placed Policy 3236 on public comment for 30 days. (Copy appended to Official Minutes, Attachment X.)

**XXII. Policy 5100, Approval of Educational Personnel Preparation Programs**

Ms. Lori Wiggins, Executive Director, WVDE Office of Professional Preparation, presented Policy 5100 for the Board's consideration. WVBE Policy 5100 has been revised to reflect the new Praxis test numbers and scores for the tests that have been regenerated; to adjust the definition of accredited institution of higher education to mirror definition in WVBE 5202; clarify programmatic levels previously omitted; to modify the programmatic level for the PreSchool endorsement from Birth - PreK to PreK-PreK; to modify the Severe Disabilities endorsement from PreK-Adult to K-Adult; to update the scores for the SAT and ACT exemption to the PPST; to clarify the three (3) semester hours of instructional technology for renewal purposes applies to individuals who are not enrolled in a program that leads to a masters degree or an additional endorsement; to allow candidates that have satisfied the college algebra requirement to take an additional college level math course; to update language regarding the Annual Report requirements for institutions of higher education; and to make other edits to clarify the intent of the policy.

Upon motion by Dr. Johnson, seconded by Mrs. Manchin and unanimously carried, the Board placed Policy 5100, specifically the Table of Contents and sections 1, 5.1, 6.3.3, 10.5.5, 14.1, Appendix D, and Appendix E, on public comment for 30 days. (Copy appended to Official Minutes, Attachment Y.)

**XXIII. Policy 5202, Minimum Requirements for the  
Licensure of Professional/Paraprofessional Personnel and  
Advanced Salary Classifications**

Ms. Wiggins presented Policy 5202 for the Board's consideration. Policy 5202 has been revised to reflect the new Praxis test numbers and scores for the tests that have been regenerated; clarify programmatic levels previously omitted; modify the programmatic level for the PreSchool endorsement from Birth-PreK to PreK-PreK; modify the Severe Disabilities endorsement from PreK-Adult to K-Adult; require that the Chief Business Official Initial Authorization include a minimum 2.5 GPA for the required 24 semester hours of coursework;

insert previously omitted renewal requirements for JROTC; sunset the Student Support Certificate for Athletic Training per new W. Va. Code; add two Advanced Credentials for Business and for Marketing; to update the scores for the SAT and ACT exemption to the PPST; provide a renewal option for technology integration specialist authorization; clarify language related to salary classifications; and make other edits to clarify the intent of the policy.

Upon motion by Dr. White, seconded by Ms. Phillips and unanimously carried, the Board placed Policy 5202, specifically the Table of Contents and sections 1, 4, 10,1.2.F.a, 10.4.1, 10.3.6, 11.7.3a, 11.7.3a.BB and CC, 11.7.3a.G.a., 19.3.3, 20, 22, 24, and Appendix A, on public comment for 30 days. (Copy appended to Official Minutes, Attachment Z.)

#### **XXIV. Waiver for the Revised Educator Evaluation System**

Dr. Courts (distributed information) presented a request to waive the requirements of Policy 5310 on behalf of the schools that will be utilizing the revised educator evaluation system and instruments in a pilot program.

Upon motion by Dr. Johnson, seconded by Ms. Phillips and unanimously carried, the Board approved the waiver request the schools participating in the pilot program. (Copy appended to Official Minutes, Attachment AA and addenda.)

#### **XXV. Break**

President Haden called for a break at 10:20 a.m.

#### **XXVI. Call to Order**

President Haden called the meeting back to order at 10:30 a.m.

#### **XXVII. WVBE Personnel Matters including Termination of Employment of Employee at RESA 1, Termination of Employment of Employee at Vicki V. Douglas Juvenile Center and RESA 4 Executive Director Search Executive Session**

President Haden distributed a proposed process for the hiring of an Executive Director of RESA 4. It was the consensus of the Board that the process be approved. Thereupon, as provided in W. Va. Code §6-9A-4(b)(2)(A) (personnel exception) and, President Haden called for a motion to move into executive session to take up the termination of employment of the employees at RESA 1 and the Vicki V. Douglas Juvenile Center.

Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously entered into executive session at 10:37 a.m.

**XXVIII.****Return from Executive Session**

The Board returned from executive session at 11:37 a.m. at which time President Haden announced that no decisions were made or action taken. Thereupon, President Haden called for a motion to approve the Board's personnel attachment inclusive of the termination of employment of employee at RESA 1, termination of employment of employee at the Vicki V. Douglas Juvenile Center, and signatory authority to Pam Butcher, RESA 4, until such time as the Executive Director assumes responsibility. Upon motion by Dr. Johnson, seconded by Ms. Phillips, the Board unanimously approved the motion as stated by President Haden. (Copy appended to Official Minutes, Attachment BB and addendum.)

**XXIX.****State Superintendent's Report**

Mr. Heinlein presented Department personnel items for the Board's information. (Copy appended to Official Minutes, Attachment CC.)

**XXX.****Board Items for Future Consideration**

President Haden asked that items, inclusive of any requested during the meeting, that members wish considered for placement on a future agenda are to be provided to the President as soon as possible. (Copy appended to Official Minutes, Attachment DD.)

**XXXI.****Election of Officers 2011-2012**

President Haden extended her appreciation to the Board for their support over the past two years and called for nominations from the floor.

**President**

Dr. Johnson nominated Mrs. Manchin to the office of President. Ms. Phillips seconded the motion. Mrs. Manchin declined the nomination.

Mr. Green nominated Mr. Linger to the office of President. Ms. Phillips seconded the motion.

No additional nominations were offered and upon the call for the question the motion was carried. Mr. Linger was elected President.

**Vice President**

Ms. Haden nominated Dr. White to the office of Vice President. Ms. Phillips seconded the motion. Upon the call for the question the motion failed.

Mr. Green nominated Mrs. Manchin to the office of Vice President. Ms. Phillips seconded the motion. No additional nominations were offered and upon the call for the question the motion was unanimously carried. Mrs. Manchin was elected Vice President.

### **Secretary**

Mr. Green nominated Mr. Dunlevy to the office of Secretary. Ms. Phillips seconded the motion. No additional nominations were offered and upon the call for the question the motion was unanimously carried. Mr. Dunlevy was elected Secretary.

Dr. Johnson conveyed his appreciation to President Haden for her service as President over the past two years (Dr. Johnson's sentiments were echoed by all members of the Board).

### **XXXII. Future Meetings**

The next meeting of the Board will be held August 10, 2011, in Charleston, West Virginia. The meeting will continue on August 11, 2011, if the agenda is not completed on August 10, 2011.

### **XXXIII. Point of Personal Privilege – President L. Wade Linger Jr. Governor's Education Efficiency Audit**

President Linger stated that he wished an update to be provided at each Board meeting regarding the Governor's Education Efficiency Audit and indicated that Mr. Green, Mrs. Manchin and Ms. Phillips have agreed to assist him in keeping abreast of audit proceedings.

### **XXXIV. Adjournment**

President Haden declared the meeting adjourned at 11:55 a.m.

**Minutes approved by the Board on August 10, 2011.**

---

**L. Wade Linger Jr., President**

---

**Robert W. Dunlevy, Secretary**

**3.5 – Minutes from the July 21, 2012 Meeting of the WVBE Approving a Waiver of Policy 5310 Allowing 111 Additional Schools to Join the Pilot of the Revised Educator Evaluation System.**

**MINUTES  
WEST VIRGINIA BOARD OF EDUCATION  
Board Conference Room  
Capitol Building 6, Room 353  
1900 Kanawha Boulevard, East  
Charleston, West Virginia  
July 11, 2012**

**I. Call to Order**

Following the welcome, introductions and Pledge of Allegiance, President L. Wade Linger Jr. called the meeting of the West Virginia Board of Education (WVBE) to order at 12:33 p.m. on July 11, 2012, in the Board Conference Room, Capitol Building 6, Room 353, 1900 Kanawha Boulevard, East, Charleston, West Virginia.

The following members were present: President Linger, Vice President Gayle C. Manchin, Secretary Robert W. Dunlevy, Michael I. Green, Priscilla M. Haden, Lloyd G. Jackson II, Lowell E. Johnson, Jenny N. Phillips and William M. White (via telephone) and ex officio Jorea M. Marple, State Superintendent of Schools. Student representative in attendance was Jared Peterson of Morgantown, West Virginia, a 2012 graduate of Morgantown High School (Monongalia County). Members absent were ex officios Paul L. Hill, Chancellor, West Virginia Higher Education Policy Commission, and James L. Skidmore, Chancellor, West Virginia Council for Community and Technical College Education.

**II. Delegations**

Mr. Michael Kelley, Principal, Herbert Hoover High School (Kanawha County), representing the West Virginia Association of Secondary School Principals and Kanawha County Schoolmasters, addressed the Board regarding the Teacher Evaluation Pilot. Ms. Carolyn Arritt, citizen of Fayette County, addressed the Board regarding Fayette County.

**III. Approval of Agenda**

President Linger requested a motion to approve the agenda. Mr. Dunlevy moved that the agenda be approved. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously.

**IV. Broadband Technology and Opportunities Program (BTOP) Update**

Mr. Mark McKenzie (distributed information), Manager - Engineering, Frontier Communications, provided an update regarding BTOP. Ms. Brenda Williams, Division Leader, Superintendent's Division, WVDE Office of Instructional Technology, and Mr. John Miller (distributed information), Assistant Director, WVDE Office of Instructional Technology, provided an update regarding WVDE BTOP issues. (Copy appended to Official Minutes, Attachment V.)

**V. Wheeling Academy of Law and Science Foundation's Mock Trial Project**

Ms. Barbara Knutsen (distributed information), Executive Director, Wheeling Academy of Law and Science, provided information regarding the Wheeling Academy of Law and Science Foundation's Mock Trial Project. The mock trial project brings the system of American justice to life by allowing students to act out the roles of lawyers, witnesses, and jurors based upon factual case scenarios prepared by the foundation. Over 9,500 students have participated during the project in two-day age appropriate scripted mock trials in 4<sup>th</sup> or 5<sup>th</sup> and 8<sup>th</sup> grade public school classrooms in the northern panhandle and Kanawha County. (Copy appended to Official Minutes, Attachment W.)

**VI. Transition to Teaching Project (TtT)**

Dr. Amelia Courts, Assistant State Superintendent, Division of Educator Quality and System Support, introduced Ms. Lisa D. Hedrick, Executive Director, and Mr. Doug Cipoletti, Coordinator, WVDE Office of Professional Preparation, who provided information regarding the Transition to Teaching Project (TtT). TtT is an alternative certification program that targets high-need fields in schools across West Virginia. The program is in its fourth year and has had tremendous success. To date, TtT has certified 103 teachers in the content areas of mathematics, English, science, foreign language and multi-categorical special education. Mr. Scott Adkins, science teacher, Man Middle School (Logan County), Mr. Thomas Bane, mathematics teacher, Mingo Central Comprehensive High School (Mingo County), and Ms. Heidi Johnston, mathematics teacher, River View High School (McDowell County), recent TtT graduates, also addressed the Board regarding TtT.

**VII. 2012 West Virginia Board of Education  
School Service Personnel Employee of the Year**

Mr. Keith Burdette, Executive Director, WVDE Office of Human Resources, introduced Mr. Richard Bussard, Jr., bus mechanic, Jefferson County Schools, first runner-up and Ms. Debra Martin, secretary, Putnam County Schools, recipient of the 2012 WVBE School Service Personnel Employee of the Year award.

**VIII. Break**

President Linger called for a break at 1:43 p.m.

**IX. Call to Order**

President Linger called the meeting back to order at 1:52 p.m.

**X. Director's Information**

Dr. Gus Penix, Director of the Office of Education Performance Audits, provided an update of OEPA activities including the revision of Policy 2320.

**XI. Release of Lincoln County from July 2011 Requirements regarding  
Submittal of Personnel, Agenda, and Meeting Minutes**

Dr. Penix reported that in July 2011 the Lincoln County Board of Education, while under conditional approval status, was determined to not be in compliance with personnel laws. As a result, the OEPA recommended that the conditional approval status of Lincoln County Schools be continued and that the county be required to submit the following to the State Superintendent of Schools, through the Office of Legal Services, until such time as it is determined by another OEPA audit and upon action by the WVBE that the submission of the listed information is no longer needed: 1) monthly agendas of meetings and all official meeting minutes, and 2) a separate schedule listing all county personnel actions. The WVBE accepted the OEPA's recommendations in order to assure proper adherence to personnel laws and the appropriate application of personnel laws by the Lincoln County Board of Education. During the past year, the Lincoln County Board of Education has displayed due diligence in the exercise of its responsibility for personnel; the OEPA returned to Lincoln County June 28, 2012, to assess progress relative to personnel issues identified in the July 2011 report to the WVBE. In order to return full control to the Lincoln County Board of Education, the OEPA must revisit Lincoln County to ascertain the degree of compliance with the standards set forth in Policy 2320 and make a recommendation to the WVBE regarding the status of the Lincoln County school system.

Upon the recommendation of Dr. Penix, Mrs. Manchin moved, pursuant to W. Va. Code §18-2E-5, that Lincoln County Schools be issued Full Approval status, and that the review of monthly agendas of meetings, official meeting minutes, and county personnel actions be discontinued effective immediately and that the OEPA conduct a review audit of the Lincoln County school system in the fall of 2012. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment A.)

**XII. Follow-Up Individual School Education Performance Audit Reports  
and Revised Strategic Plans for Fort Gay Elementary School,  
East Lynn Elementary School and Wayne Middle School, Wayne County**

Dr. Penix reported that announced on-site reviews (five days in advance) were conducted at Fort Gay Elementary School, East Lynn Elementary School and Wayne Middle School January 27, 2011. The Team returned to Fort Gay Elementary School and East Lynn Elementary School March 28, 2012 and Wayne Middle School March 29, 2012. The purpose of the follow-up reviews was to verify correction of the findings identified during the original Education Performance Audits. Ms. Lynn Hertz, Assistant Superintendent, and Ms. Debbie Russell, Elementary Director, Wayne County Schools, addressed the Board regarding the East Lynn Elementary audit report.

Upon the recommendation of Dr. Penix, Ms. Haden moved that Fort Gay Elementary School, East Lynn Elementary School and Wayne Middle School be issued the accreditation status listed in the Follow-up Individual School Reports and that a monthly progress report be provided to the WVBE and WVDE by the Superintendent of Wayne County Schools regarding Fort Gay Elementary School, East Lynn Elementary School and Wayne Middle School. Ms.

Phillips seconded the motion and upon the call for the question the motion was carried unanimously. In light of the audit report findings, it was the consensus of the Board that the WVDE provide technical assistance to Wayne County Schools. (Copy appended to Official Minutes, Attachment B.)

President Linger moved New Business item *B. West Virginia Secondary School Activities Commission (WVSSAC), Series 2, Athletics, Provisions Governing Eligibility, and Series 4, Provisions Governing Conduct* be taken up immediately.

**XIII. West Virginia Secondary School Activities Commission (WVSSAC)  
Series 2, Athletics, Provisions Governing Eligibility, and  
Series 4, Provisions Governing Conduct**

Mr. Charles K. Heinlein, Deputy State Superintendent of Schools, and Ms. Heather Deskins, General Counsel to the WVBE and WVDE, presented WVSSAC Series 2 and Series 4 for the Board's consideration. WVSSAC Series 2 and 4 were placed on comment at the WVBE's May 2012 meeting. No changes were made to Series 2 as a result of the comments received; no comments were received during the comment period for Series 4. Mr. Bernie Dolin (Ohio County), and Mr. Mike Arbogast (Kanawha County), representing the WVSSAC Board of Directors, addressed questions regarding WVSSAC Series 2.

Mr. Dunlevy moved that WVSSAC Series 2 and Series 4 be approved. Ms. Haden seconded the motion and upon the call for the question the motion was carried unanimously. (Copies appended to Official Minutes, Attachment M-1 and M-2.)

**XIV. Capacity Building for Low Performing Schools, Intervention Counties  
and the West Virginia Schools for the Deaf and the Blind**

Ms. Michele Blatt, Executive Director, WVDE Office of School Improvement and System Support, Mr. Ted Mattern, and Dr. Jack McClanahan, System Support Liaisons, Office of the State Superintendent, provided information regarding capacity building for a number of low performing schools and the intervention counties. Dr. Lynn Boyer, Superintendent, West Virginia Schools for the Deaf and the Blind (WVSDB), provided an update regarding the WVSDB's Comprehensive Educational Facilities Plan as well as other campus activities. (Copies appended to Official Minutes, Attachments C-1 through C-6.)

**XV. Break**

President Linger called for a break at 3:22 p.m.

**XVI. Call to Order**

President Linger called the meeting back to order at 3:38 p.m.

**XVII.****Consent Agenda**

Ms. Haden requested Consent Agenda item *C. 1. Waivers of State Board of Education Policies and Regulations, Superintendent's Interpretation and State Statutes and Legislative Rules*, be removed from the Consent agenda and taken up immediately following the approval of the Consent Agenda. Dr. Johnson moved that the Consent Agenda be approved as amended. Mr. Dunlevy seconded the motion and upon the call for the question the motion was carried unanimously. (Copies appended to Official Minutes, Attachments D, E, and G through J.)

- Issued Keyser High School the accreditation status listed in the Final Individual School Report (Attachment D)
- Meeting minutes of June 13 and 15, 2012 (Attachment E)
- Approved summer school programs found in Attachment G
- Received ten additional applications during fiscal year 2011-2012 for a total of 1,480 applications for Operation Recognition in connection with Policy 4355, High School Diplomas for Veterans (Attachment H)
- Approved the WVBE's response to recommendations found in the 2012 Annual Report of the West Virginia Advisory Council for the Education of Exceptional Children (Attachment I)
- Approved scheduling the primary statewide assessment program prior to May 15 for the 2012-2013 school year
- Approved the realigned initial teacher preparation programs of Bluefield State College, Marshall University, and Ohio Valley University (Attachment J).

**XVIII.****Waivers of State Board of Education Policies and Regulations, Superintendent's Interpretation and State Statutes and Legislative Rules**

Following the discussion of several requested waivers, Ms. Haden moved that two first time waivers of WVBE policy and 34 requests for continuation waivers be approved. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment F.)

**XIX.****State Superintendent's Report**

Superintendent Marple (distributed addendum) presented WVDE personnel matters for the Board's information. **Community Eligibility Option.** Ms. Mollie Wood, Assistant Director, and Ms. Keri Kennedy (distributed information), Coordinator, WVDE Office of Child Nutrition, provided information regarding the Community Eligibility Option (provision of school meals). **P-20 Data System.** Mr. Juan D'Brot, Executive Director, WVDE Office of Assessment and Accountability, provided an update regarding the P-20 Data System. President Linger

template, development of a plan action, and the WVBE's response to the Governor's Education Efficiency Audit. It was the consensus of the Board that an individual be hired to finalize the WVBE's response to the audit and that members be provided the credentials of such consultant prior to the hiring of said consultant at a specially called or future meeting of the WVBE. Mr. Jackson requested that an item be placed on future agendas for discussion of the Governor's Education Efficiency Audit. (Copy appended to Official Minutes, Attachment X.)

**XXIV. Break**

President Linger called for a break at 10:49 a.m.

**XXV. Call to Order**

President Linger called the meeting back to order at 11:12 a.m.

**XXVI. Policy 5310 Waiver Request**

Dr. Courts presented, for the Board's consideration, a waiver of certain sections of Policy 5310 for educators in schools selected as demonstration sites in the Educator Evaluation system referenced in House Bill 4236. The waiver includes a total of 136 schools which includes the 25 pilot schools from the 2011-2012 school year. Schools from each county were selected by the superintendent along with an institutional education program and career and technical center.

Dr. Johnson moved that the wavier of certain sections of Policy 5310 to implement the new Educator Evaluator system be approved. Mr. Jackson seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment Mc.)

**XXVII. Policy 1224.1, Accounting Procedures Manual for the Public Schools in the State of West Virginia**

Mr. Joe Panetta, Assistant State Superintendent, Division of Student Support Services, presented Policy 1224.1 for the Board's consideration. This policy repeals and replaces the current "Accounting Procedures Manual for the Public Schools in the State of West Virginia" (Policy 1224.1) filed July 15, 1996. The intent of this policy is to prescribe the basic accounting requirements that have been established by the State Board of Education for the public schools in West Virginia. On May 11, 2012, the suggested revisions were placed on public comment for 30 days. There were two comments received during this period from Multi-County Vocational Center (MCVC) Directors. No changes to the policy are recommended as a result of the comments that were received.

Dr. Johnson moved that Policy 1224.1 be approved. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment N.)

**XXVIII. Policy 8200, Purchasing Procedures for Local Educational Agencies**

Mr. Panetta presented Policy 8200 for the Board's consideration. Policy 8200 is being updated to clarify the use of cooperative and pooled purchasing arrangements. Other changes include: updated the section on exemptions from competitive bidding requirements to align with the State Purchasing Policy; updated the agreement addendum to include provisions for the purchase of computer software and to incorporate other changes made by the Attorney General's Office in the equivalent state-level document; and added the statutory requirement for governmental agencies to obtain releases from the West Virginia Insurance Commission and Workforce West Virginia regarding workers' compensation and unemployment compensation premiums before making final payments to vendors on contracts. On May 11, 2012, the suggested revisions were placed on public comment for 30 days. There were no comments received during the comment period on this policy. Ms. Williams addressed questions pertaining to purchasing.

Dr. Johnson moved that Policy 8200 be approved. Mrs. Manchin seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment O.)

**XXIX. Policy 2510, Assuring the Quality of Education:  
Regulations for Educational Programs**

Mr. Robert E. Hull, Associate State Superintendent, Division of Teaching and Learning, presented Policy 2510 for the Board's consideration. At the May 2012 WVBE meeting, a request was submitted to place Policy 2510 on comment for 30 days. Minor changes were made to reflect the adoption of the Common Core State Standards with the subsequent implementation of the Next Generation CSOs in English Language Arts, Literacy and Mathematics, as well as the adoption of the Next Generation CSOs for Social Studies. Also English 12 College and Career Readiness Course has been added and language clarifying AP requirements was added to this policy.

Mrs. Manchin moved that Policy 2510 be approved. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment P.)

**XXX. Policy 2525, West Virginia's Universal Access to a  
Quality Early Education System**

Mr. Clayton Burch, Executive Director, WVDE Office of Early Learning, presented Policy 2525 for the Board's consideration. Policy 2525 was approved to be placed on a 30-day comment period after revisions for continuous quality improvement of West Virginia's Universal Pre-K system were made and presented to the WVBE at the May 2012 meeting. The reduction of class size has been removed from the proposed revisions.

Dr. Johnson moved that Policy 2525 be approved. Mrs. Manchin seconded the motion and upon the call for the question the motion was carried unanimously. (Copies appended to Official Minutes, Attachment Q.)

**XXXI. Policy 1471, Education in West Virginia's Correctional Institutions:  
Mission and Goals and  
Policy 2800, Regulations for the Education of Juveniles  
Placed in Secure Predispositional Juvenile Centers**

Dr. Fran Warsing, Superintendent, WVDE Office of Adult Institutional Education Programs, presented Policy 1471 and Policy 2800 for the Board's consideration. At the February 2012 meeting of the WVBE Policy 1471 and Policy 2800 were placed on comment for 30 days. Since placing the policies on comment, a number of additional revisions have been made to assure individualized programming for all students and to provide guidelines for schools to follow when receiving a student returning to a public school from an institutional facility.

Ms. Phillips moved that Policy 1471 and Policy 2800, as placed on comment in February 2012, be withdrawn and that the revisions found in Attachment R and Attachment S be placed on public comment for 30 days. Mrs. Manchin seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment R and S.) President Linger moved the WVBE's personnel matters to be taken up prior to adjournment.

**XXXII. Board Reports**

**Board Member Reports.** Dr. Johnson (distributed information) attended a teacher evaluation meeting and, assisted by Superintendent Marple and Mr. D'Brot, discussed strategic planning concerns. Members were requested to provide feedback to Dr. Johnson regarding the documents distributed during the meeting and members are to be notified of date of the next meeting of the WVBE's Strategic Planning Committee. Ms. Haden attended a State Superintendent's meeting and provided information regarding the School Building Authority. Mr. Petersen addressed the Board regarding the importance of arts education. Mrs. Manchin will participate in NASBE's new member institute next week. Mr. Green attended the most recent meeting of the Wellness Committee and a meeting sponsored by Vision Shared regarding the Governor's education efficiency audit. Ms. Phillips attended a State Superintendent's meeting. Mr. Jackson attended a WVDE assessment and accountability meeting as well as a number of meetings sponsored by Vision Shared regarding the Governor's education efficiency audit. (Copy appended to Official Minutes, Attachment Y.)

**WVBE Wellness Committee.** Mrs. Manchin (distributed information) provided information regarding the July 10 committee meeting. It was the consensus of the Board that a news release be issued promoting and encouraging parents and students to be proactive in preparing to meet the adolescent immunization requirements as they prepare for the new school year. (Copy appended to Official Minutes, Attachment Z.)

**ReConnecting McDowell.** Mrs. Manchin provided an update regarding the ReConnecting McDowell initiative.

**XXXIII. Board Items for Future Consideration**

President Linger requested that items requested during the meeting, if any, be placed on the appropriate agenda and asked that other items be provided to the newly elected President as soon as possible. (Copy appended to Official Minutes, Attachment U.)

**XXXIV. Election of Officers 2012-2013**

President Linger extended his appreciation to the Board for their support over the past year and called for nominations from the floor.

**President**

Mr. Green nominated Mr. Linger to the office of President. Mr. Jackson seconded the nomination.

Ms. Haden moved that nominations for the office of President be closed. Dr. Johnson seconded the motion and upon the call for the question the motion was carried unanimously.

Dr. Johnson moved that Mr. Linger be declared President by acclamation. Ms. Haden seconded the motion and it was carried unanimously.

**Vice President**

Mr. Green nominated Mrs. Manchin to the office of Vice President. Mr. Jackson seconded the nomination.

Dr. Johnson moved that nominations for the office of President be closed. Ms. Haden seconded the motion and upon the call for the question the motion was carried unanimously.

Dr. Johnson moved that Mrs. Manchin be declared Vice President by acclamation. Ms. Haden seconded the motion and it was carried unanimously.

**Secretary**

Mr. Green nominated Mr. Dunlevy to the office of Secretary. Dr. Johnson seconded the nomination.

Dr. Johnson moved that nominations for the office of Secretary be closed. Ms. Haden seconded the motion and upon the call for the question the motion was carried unanimously.

Dr. Johnson moved that Mr. Dunlevy be declared Secretary by acclamation. Ms. Haden seconded the motion and it was carried unanimously.

**XXXV. WVBE Personnel including Salary of State Superintendent of Schools and Search Process for Executive Director of RESA 1**

President Linger, in accordance with W. Va. Code §6-9A-4(b)(2)(A) (personnel exception), called for a motion to enter into executive session to discuss personnel matters.

Ms. Haden moved that the Board enter into executive session. Dr. Johnson seconded the motion and upon the call for the question the motion was carried unanimously. The Board entered into executive session at 1:05 p.m. The Board returned from executive session at 2:34 p.m. at which time President Linger announced that no decisions were made or action taken.

Ms. Haden moved that the Board list the salary of the State Superintendent as \$167,000.00. Dr. Johnson seconded the motion upon the call for the question the motion was carried unanimously. President Linger announced that Ms. Haden will chair the RESA 1 Executive Director Search Committee.

President Linger called for a motion to approve the Board's personnel matters found in the attachment. Dr. Johnson moved that the WVBE's personnel matters found in the attachment be approved. Ms. Phillips seconded the motion and upon the call for the question the motion was carried unanimously. (Copy appended to Official Minutes, Attachment T.)

**XXXVI. Future Meetings**

The next regular meeting of the WVBE will be held August 8, 2012, in Charleston West Virginia. The meeting will continue on August 9, 2012, if the agenda is not completed on August 8, 2012.

**XXXVII. Adjournment**

President Linger declared the meeting adjourned at 2:37 p.m.

**Minutes approved by the Board on August 9, 2012.**

### **Request for a Waiver of Policy 5310 for Educators in Schools Selected as Demonstration Sites in the Educator Evaluation Pilot**

A waiver of Policy 5310 is requested during the 2012-2013 school year for educators serving the 136 schools selected as demonstration sites for the revised educator evaluation system referenced in House Bill (HB) 4236, introduced at the request of Governor Earl Ray Tomblin and enacted by the West Virginia Legislature at the close of the 2012 legislative session. The 136 schools for which the waiver is requested include the 25 schools that participated in the educator evaluation pilot during the 2011-2012 school year in addition to the demonstration schools selected by superintendents representing each of the 55 counties as well as one school representing institutional education programs and one school representing career and technical education.

These selected demonstration schools are:

Belington Elementary, Barbour County  
 Philippi Middle, Barbour County  
 Bunker Hill Elementary, Berkeley County  
 Martinsburg North Middle, Berkeley County  
 Mountain Ridge Intermediate, Berkeley County  
 Sherman High, Boone County  
 Whitesville Elementary, Boone County  
 Braxton County Middle, Braxton County  
 Little Birch Elementary, Braxton County  
 Brooke High, Brooke County  
 Hooverson Heights Primary, Brooke County  
 Barboursville Middle, Cabell County  
 Martha Elementary, Cabell County  
 Arnoldsburg Elementary, Calhoun County  
 Calhoun Middle/High, Calhoun County  
 Big Otter Elementary, Clay County  
 Clay Middle, Clay County  
 Doddridge Elementary, Doddridge County  
 Doddridge County Middle, Doddridge County  
 Doddridge County High, Doddridge County  
 Fayetteville High, Fayette County  
 New River Elementary, Fayette County  
 Gilmer County High, Gilmer County  
 Glenville Elementary, Gilmer County  
 Petersburg Elementary, Grant County  
 Union Educational Complex, Grant County  
 Eastern Greenbrier Middle, Greenbrier County  
 Rupert Elementary, Greenbrier County  
 Augusta Elementary, Hampshire County  
 Hampshire Senior High, Hampshire County  
 Romney Elementary, Hampshire County

Broadview Elementary, Hancock County  
 Oak Glen Middle, Hancock County  
 East Hardy High, Hardy County  
 Moorefield Intermediate, Hardy County  
 Moorefield Middle, Hardy County  
 Bridgeport Middle, Harrison County  
 Nutter Fort Intermediate, Harrison County  
 Fairplain Elementary, Jackson County  
 Ripley High, Jackson County  
 Blue Ridge Elementary, Jefferson County  
 Charles Town Middle, Jefferson County  
 Cedar Grove Middle, Kanawha County  
 East Bank Middle, Kanawha County  
 George C. Weimer Elementary, Kanawha County  
 Herbert Hoover High, Kanawha County  
 Malden Elementary, Kanawha County  
 Riverside High I, Kanawha County  
 Stonewall Jackson Middle, Kanawha County  
 Watts Elementary, Kanawha County  
 Roanoke Elementary, Lewis County  
 Robert L. Bland Middle, Lewis County  
 Guyan Valley Middle, Lincoln County  
 Hamlin Pre-K-8, Lincoln County  
 Harts Pre-K-8, Lincoln County  
 Ranger Elementary, Lincoln County  
 West Hamlin Elementary, Lincoln County  
 Chapmanville East Elementary, Logan County  
 Chapmanville Middle, Logan County  
 East Fairmont Junior High, Marion County  
 East Fairmont High, Marion County  
 East Park Elementary, Marion County

Cameron High School, Marshall County	Fellowsville Elementary, Preston County
Center McMechen Elementary, Marshall County	George Washington Middle, Putnam County
Point Pleasant Junior/Senior High, Mason County	Mountain View Elementary, Putnam County
Roosevelt Elementary, Mason County	Bradley Elementary, Raleigh County
Kimball Elementary, McDowell County	Trap Hill Middle, Raleigh County
Mount View High, McDowell County	Homestead Elementary, Randolph County
River View High, McDowell County	Tygarts Valley Middle/High, Randolph County
Sandy River Middle, McDowell County	Harrisville Elementary, Ritchie County
Southside K-8, McDowell County	Ritchie County High, Ritchie County
Welch Elementary, McDowell County	Geary K-8, Roane County
Montcalm Elementary, Mercer County	Reedy Elementary, Roane County
Princeton Senior High, Mercer County	Spencer Elementary, Roane County
Frankfort Middle, Mineral County	Walton Elementary/Middle, Roane County
New Creek Primary, Mineral County	Hinton Area Elementary, Summers County
Gilbert Elementary, Mingo County	Summers County High, Summers County
Mingo Central Comprehensive High, Mingo County	Taylor County Middle, Taylor County
North Elementary, Monongalia County	West Taylor Elementary, Taylor County
Suncrest Middle, Monongalia County	Tucker County High, Tucker County
James Monroe High, Monroe County	Tucker Valley Elementary Middle, Tucker County
Mountain View Elementary & Middle, Monroe County	Arthur I Boreman Elementary, Tyler County
Pleasant View Elementary, Morgan County	Tyler Consolidated High, Tyler County
Warm Springs Middle, Morgan County	Buckhannon-Upshur Middle, Upshur County
Birch River Elementary, Nicholas County	Rock Cave Elementary, Upshur County
Richwood High, Nicholas County	Kenova Elementary, Wayne County
Summersville Middle, Nicholas County	Vinson Middle, Wayne County
Bridge Street Middle, Ohio County	Glade Middle, Webster County
Elm Grove Elementary, Ohio County	Hacker Valley Elementary, Webster County
Steenrod Elementary, Ohio County	New Martinsville, Wetzel County
Wheeling Middle, Ohio County	Paden City High, Wetzel County
North Fork Elementary, Pendleton County	Wirt County High, Wirt County
Pendleton County Middle/High, Pendleton County	Wirt County Primary Center, Wirt County
St. Marys Elementary, Pleasants County	Franklin Elementary, Wood County
St. Marys High, Pleasants County	Hamilton Middle, Wood County
Mid Ohio Valley Tech. Institute, Pleasants County	Pressley Ridge at White Oak, Wood County
Hillsboro Elementary, Pocahontas County	Worthington Elementary School, Wood County
Marlinton Middle, Pocahontas County	Glen Fork Elementary & Middle, Wyoming County
Bruceton School, Preston County	Westside High, Wyoming County

The West Virginia Department of Education (WVDE), in consultation with the combined Educator Evaluation Task Force, is instituting a second year of the educator evaluation pilot in 2012-2013. The 136 schools will demonstrate the efficacy of the revised educator evaluation system referenced in House Bill 4236 prior to full statewide implementation in 2013-2014. This demonstration cycle of the

educator evaluation pilot will continue exploration and evaluation of this significant revision of the state's current educator evaluation system. The WVDE will explore outcomes of the pilot that are both formative (i.e., measure the processes required by the evaluation system) and summative (i.e., measure the outcomes of the evaluation system). Data will be used to make adjustments to the evaluation system during the demonstration cycle of the pilot if necessary, make adjustments prior to statewide implementation, and make judgments about the quality of the overall evaluation system. All professional educators in the demonstration schools will be expected to embrace the opportunities provided through the pilot including: be "early adopters" of the proposed system, engage in professional development that supports the implementation of the revised system, engage in the work of a collaborative team to define appropriate student learning goals, and provide feedback to researchers on revised educator evaluation processes and effectiveness.

The proposed educator evaluation system differs from the current system in the following ways:

- Is based on the revised WV Professional Teacher, Leader, Counselor Standards;
- Professionalizes the process of evaluation by requiring the educator to take an active role in the evaluation process;
- Provides specific feedback to professional educators about performance through the use of performance level rubrics;
- Encourages and acknowledges continuous professional growth across the professional continuum through annual evaluation;
- Includes multiple measures of student learning across all learning contexts.

The goals of the educator evaluation pilot are to ensure:

- The proposed educator evaluation system aligns with the professional educator standards adopted by the West Virginia Board of Education;
- Educators in the pilot schools have a thorough understanding of the evaluation system and the application to their professional practice;
- The proposed evaluation system enhances educator efficacy and leads to improved student learning outcomes;
- Recommendations, substantiated by data, to further guide policymakers' decisions to revise and improve the educator evaluation system in West Virginia schools.

### **Waiver of Policy 5310 Performance Evaluation of School Personnel**

The Waiver Request is for all sections of Policy 5310. Improvement plans to be developed in the aforementioned demonstration schools for the revised educator evaluation system during the 2012-2013 school year are outlined in the following framework.

## **Plans to Support Continuous Improvement**

### **Rationale**

The educator evaluation system offers educators plans to address areas of concern as part of a comprehensive system of support. A school culture based on trust, support and professional growth is foundational for successful implementation. The plans invite educators to participate actively in improving professional practice while acknowledging that significant support is necessary for optimal results. Both the focused support plan and the corrective action plan recognize that time, resources and collaboration with other educators are essential to success. The work of educators is complex and necessitates differentiated support that is appropriate to the areas of concern and the unique contexts of educators.

### **Focused Support Plan**

The focused support plan is a proactive, preventative measure that supports individual improvement and professional growth. The focused support plan may commence only after a purposeful conversation and when there is documented evidence indicating an area of concern based on one or more of the five performance standards. The following supports may be considered to meet individual needs:

- Professional development
- Coaching/Instructional support
- Mentoring
- Peer observation
- Programs of study
- Other supports and resources

The focused support plan must include the following essential components:

- Identified area of concern with reference to the standard(s) to be addressed
- Expectations for change
- 9 week timeline for implementation
- Resources for support, including referral to other educators

The focused support plan may address an area of concern involving student learning goals when in conjunction with one or more of the five performance standards. School-wide student growth performance levels cannot be considered in a focused support plan.

At the conclusion of the nine-week focused support plan, if evidence demonstrates that the standard has been met, then the plan is successfully completed. If evidence demonstrates that adequate progress has been made, the focused support plan will continue for a second nine-week period. In the event of inadequate progress on the standard related to the area of concern, an evaluation will be completed and a corrective action plan will be initiated. In the event of inadequate progress at the conclusion of a second nine-week focused support plan an evaluation will be completed and a corrective action plan will be initiated. Evidence may include a formal observation if appropriate to the area of concern.

Educators remain on their current progression while implementing a focused support plan.

### **Corrective Action Plan**

The corrective action plan is typically initiated when a focused support plan results in inadequate progress and when an evaluation is completed that shows unsatisfactory performance based on one or more of the five performance standards. However, certain instances of misconduct as specified in W.Va. Code §18A-2-8 may require immediate action and/or a corrective action plan. The corrective action plan may address unsatisfactory performance involving student learning goals when in conjunction with one or more of the five performance standards. School-wide student growth performance levels cannot be considered in a corrective action plan. The corrective action plan spans 18 weeks and may commence at any time during the school year.

The corrective action plan is determinative and may not be repeated. Evidence of adequate progress must be demonstrated by the conclusion of the 18-week corrective action plan. If evidence does not demonstrate that adequate progress has been made at the conclusion of the 18-week period, termination for unsatisfactory performance shall ensue. The area of unsatisfactory performance guides the choice of evidence within a corrective action plan that may include observation if appropriate.

Educators remain on their current progression while implementing a corrective action plan.

Evaluators must identify other educators, either within the school or county, to be used as resources during a corrective action plan.

The corrective action plan must include the following essential components:

- Identified area of unsatisfactory performance with reference to the standard(s) to be addressed
- Expectations for change
- Timeline for implementation
- Resources for support, including referral to other educators

### **Performance in a Single Element**

Unsatisfactory performance related to a single element is addressed through quality, sustained, job-embedded professional development and support. Two consecutive unsatisfactory performance-level summative ratings related to the same element are addressed through evaluation based on the rubrics associated with Standard 4 - Professional Responsibilities for Self-Renewal that stipulate professional self-renewal as a requirement. Unsatisfactory performance related to a single element cannot initiate a corrective action plan.
